This is a small reproduction of full page coloured ad to appear in the best Canadian magazines December 1st. It will create demand for Time-Saver Electric Washers as Christmas gifts.

# Beatty Bros. Limited Bulletin

**Window Cards Furnished Free For Washer Window Displays**

We are advertising the Time Saver widely as a Christmas gift. The ads refer the people to the hardware dealer. Get ready for their business.

Put a Time Saver Display in your window first week of December. We furnish the cards free.

**This is one of the special Christmas ads for your local paper.**

In addition to window display you should put a Washer ad in your local paper. We will furnish two ads free. One is 1 column wide and 9 inches deep. The other is 2 columns wide and 7 inches deep. The people will want to know where to get the Time Saver Washer advertised in the magazines. It is up to you to tell them.

Use our special Time Saver Christmas slide in your local movie, if you have one. A small cut of it is shown below. The slide, of course, is free and movie rates are very low.

**Christmas Movie Slide for Time Saver Electric Washer.**

You can make your Christmas Season a bigger season than you have ever had if you will push Washers as Christmas gifts. And your customers will thank you for selling them practical, useful gifts.

Time Saver agents should write at once for the advertising material and begin work at once. We want agents in a number of towns.

# Economy Is a Great Sales Force

## SILKSTONE

(REGISTERED TRADE MARK)

**FLAT WALL COLOURS**

**The Economic Appeal** is a powerful force in business to-day. Economy for your customer can also mean good profits for you—no salesman needs argument on that. It may mean larger profits on each sale, or more turnovers per year; what you as a business man want is a constant flow of money with a profit in it to your cash register. Silkstone Flat Wall Colours fill this want exactly. Cheaper than wall paper, more sanitary and longer lasting, it can be washed often and never rubs off.

Silkstone gives a beautiful, soft, silky finish. The economy of Silkstone appeals forcibly to all.

**There is something ahead for you; write for our agency proposition.**

# Clothes Washing

Practically every woman in every home, once a week, has to face the wash-day problem. And if you have something to offer her that will really free her from the dreariest and weariest of household tasks, it is bound to appeal.

**The Eden**

fills every requirement of wash-day labor-saving. It saves work, clothes and money and is the one machine that once sold, stays sold.

Simplicity of operation is an Eden characteristic. It has been designed from the woman's point of view and with this in mind it has been so constructed that all moving parts are enclosed and nothing to confuse or annoy the woman in her work.

**The Eden IS THE MACHINE FOR THE LIVE DEALER**

***Distributors of LACO TUNGSTEN and NITRO LAMPS***

# THE NEW
# EXTENDED "LIVINGSTON" SERVICE

To extend the "Livingston" service we have opened a mill at St. Boniface, Manitoba. This facilitates prompt delivery to all points West. This will give real service to Western Canada merchants, wholesalers and manufacturers.

Arrangements have been made for representation in British Columbia with Messrs. R. C. Jamieson & Co., Vancouver, who carry at all times stocks of both raw and boiled linseed oil.

The above "Livingston" service is new, but the "Livingston Brand" is older than Confederation.

# THE OLD RELIABLE "LIVINGSTON" SERVICE

The foundation of the "Livingston" business has been service. Our organization, with its increased facilities, will even better than ever maintain the "Livingston" service and merit your continued patronage.

Messrs. Shatfords Limited, Halifax, N.S., have been appointed special representatives for Nova Scotia and arrangements have been completed with them to carry full stocks from now on.

For some years now Mr. B. Rogers, Charlottetown, P.E.I., has been acting as special agent for Prince Edward Island.

We solicit your patronage to the new and old connections.

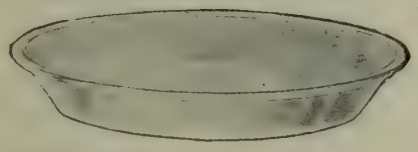
## PYREX saves Fuel, Food and Labor

PYREX saves about one-half the fuel usually required, because it absorbs nearly all the oven heat and bakes food quickly.

PYREX saves food in many ways. Meats, vegetables, etc., when cooked in PYREX, retain their natural color and flavor to such a degree that economy may be practiced in buying the less expensive kinds and yet have delicious food. Most foods usually cooked on top of the stove can be better prepared in the oven.

PYREX saves labor—it is always free from grease and odors, for nothing can penetrate the hard, smooth surface. You can wash it as easily as your china and silver.



Every practical shape and size for baking is made in PYREX. It is ready for immediate use and never discolors, rusts, crazes, dents or chips.

# Canada Paint

## *"The Paint of Merit"*

The paint that assures you a satisfied customer, a good profit and the increased sales that a prestige for quality merchandising will inevitably bring you.

Write now for particulars of our attractive agency proposition. Learn of the growing demand for "C.P." paint products among the paint consumers of Canada—a demand that's fostered and developed by strong and well-placed consumer advertising. Let us show you how it pays to be a "C.P." agent.

***Postcard will do.***

"Save the surface and you save all" *Paint & Varnish*

***Makers of the famous "Elephant Brand" White Lead***

**LIMITED**

PAINT-VARNISH & DRY COLOR MAKERS-LINSEED OIL CRUSHERS

MONTREAL-TORONTO-WINNIPEG-CALGARY-HALIFAX

OXIDE MINES-RED MILL-QUEBEC

*"In towns that have no Agent Don't wait," says Winthrop Wise, "If you're a hustling dealer, Take hold of Kyanize."*

# 6 big helps

## TO BOOST ONE DEALER'S TRADE

*Quality Goods Guaranteed*

*Strong National Advertising*

*Trade Building Displays*

*Exclusive Agents Protected*

*Dealers Mail Advertising*

*Effective Newspaper Electros*

Our idea is to select only ONE progressive, up-to-the-minute dealer in each locality — give him the full benefit of our big advertising campaign and work with him and for him to obtain the cream of the varnish and enamel business in his locality.

Kyanize Quality itself is the kind that brings repeat business. Once you sell a can of Kyanize you may count on seeing that customer again and again for more.

**Kyanize**

KY-AN-IZE

### The Business-Building Varnishes and Enamels

These high grade products offer up-to-the-minute dealers a better avenue of profit than ever.

Our advertising plans for this season are more powerful and of wider scope than ever before. The leading magazines will carry stronger advertisements than ever.

New window and store display material is ready that will positively tie-up your store to the big magazine campaign.

Winthrop Wise is back. Old Kyanize Agents will rejoice at the news of his return—new dealers will welcome the jingle he brings to their cash registers.

### LIVE DEALERS, COME — GRASP THIS OPPORTUNITY

No town will long be without a Kyanize Exclusive Agent. If there is no Kyanize store in your locality, write for particulars to-day. Our proposition will interest you if you are a hustling, wide-awake merchant. Take a minute NOW to ask us for particulars. A postal will do—but send it NOW.

# Capitalize on this Popularity for Your Store!

FOR thirty years "61" Floor Varnish has been a *popular* varnish. And for eighteen of these thirty years "61" Floor Varnish made thousands of friends *without* advertising! With the added advantage of twelve years of publicity, dealers everywhere find "61" an exceptionally live, steady-selling, business-building line.

This fall a big, hard-hitting series of full-page advertisements in the magazines will impress millions of householders with the marproof, heelproof and waterproof qualities of "61" Floor Varnish and "61" in Colors.

Some of these readers are in *your* community. Be ready to sell them "61" when they come in your store. You will then understand how this popularity and quick turn-overs have won thousands of dealers who appreciate the possibilities of this line backed up by seventy years of quality varnish making.

Capitalize on this popularity — NOW! Just a postal brings the details.

# Sell roofings that have proved themselves

No dealer can afford to recommend or push "bargain" roofings if he expects to be in business five years from now. It is safest to tie up to a well-known line that has *made good.*

Barrett Everlastic Roofings have *proved* themselves. They sell for a fair and honest price, and when you sell them you can have the comfortable knowledge that your customers will find them wonderfully satisfactory and that they will continue to be good customers, year in and year out.

## Everlastic "Rubber" Roofing

Thousands upon thousands of buildings are protected from wind and weather by Everlastic "Rubber" Roofing. It is made of high-grade waterproofing materials and is tough, pliable, elastic and very durable. It can be sold with perfect confidence that it will give satisfaction.

Made in 1, 2, and 3-ply weights, each roll containing enough to cover 100 square feet of roofing surface. Complete with nails and cement for laps will weigh about as follows: Light (1-ply) 35 lbs.; Medium (2-ply) 45 lbs.; Heavy (3-ply) 55 lbs. per roll.

## Everlastic Slate-Surfaced Roofing

The most beautiful and durable roll roofing made. Surfaced with real crushed slate in soft shades of red or green. The slate not only makes a very handsome roof, but one that is fire-resisting.

Remind your customers that this roofing requires no painting. The colors are fast. Comes in rolls weighing about 80 lbs. Nails and cement included in each roll.

Steel Stationery or Material Cabinet

Steel House or Office Safe

## Every Shop, Office and Home is a prospect for some item of

## DENNISTEEL

*Made in Canada*

The all-steel Stationery Cabinet illustrated is one of our fastest sellers. Provides a place for all the stationery, records, material, etc., so often allowed to lie around shop or office and give the place an untidy appearance. Takes best care of material and stock and saves time formerly wasted in hunting for paper or material desired. Many styles and sizes.

This Steel House or Office Safe is built in double-wall construction, with asbestos between. Yale locks on door and drawer. Sells to homes and offices where a large, cumbersome safe is undesirable.

**Write for folders on our complete line, addressing our head office at London, Ont.**

# Quick Results

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word for first insertion, and one cent per word for subsequent insertions, with 5c additional for Box Number or Address.

## SALE OF MILITARY STORES, ETC.

### DRY GOODS, HOSPITAL FURNITURE, BEDDING, HARDWARE, LEATHER GOODS, JUNK, ETC.

**SALES WILL BE MADE BY SEALED TENDER**

Persons desiring to tender are requested to register their names and addresses with the

**SECRETARY OF THE WAR PURCHASING COMMISSION, BOOTH BUILDING, OTTAWA**

stating the class of goods in which they are interested, whether new or second-hand or both.

Tender forms with full details of the goods and places at which samples may be seen, will be mailed when ready to those who have registered as requested above.

**Special Terms to Hospitals, Etc.**

Dominion, Provincial, and Municipal departments, hospitals, charitable, philanthropic, and similar institutions which are conducted for the benefit of the public and not for profit may purchase goods without tender at prices established by the War Purchasing Commission.

**Returned Soldiers and Sailors and Widows and Dependents** of Soldiers and Sailors killed in the War may obtain supplies for their own personal use and not for re-sale, through the nearest branch of the Great War Veterans' Association, who will combine individual orders and forward to the War Purchasing Commission through the Dominion Command of the Great War Veterans' Association. These services are rendered by the Great War Veterans' Association to all parties in the classes named, whether members of the Great War Veterans' Association or not.

All communications should be addressed to the Secretary, War Purchasing Commission, Booth Building, Ottawa, who will be glad to supply lists and further details to those interested.

Practically all good buyers of hardware in Canada are readers of Hardware and Metal

# Which Separator Did John Johnson Buy?

Suppose you were Farmer John Johnson and you wanted to buy a separator. You asked several separator manufacturers to send you a ten-word telegram stating in the most convincing way, why their separator was the one you should buy. Sharples would only need **five** words: "Skims clean at any speed," and you would not have to ask for anything further.

No other separator manufacturer could put into five words or **fifty** words, as convincing an argument as "Skims clean at any speed." They would tell you about the durability of their separator, that it was well known, that it cost less and everything else **but** the **one** big reason why you need a separator—to get **all** the butterfat out of your milk. Sharples also has the exclusive advantage of no discs in the bowl; knee-low tank; once a month oiling system; durable construction and besides, it is the pioneer North American Separator.

## AND FOR THE SAME REASONS DEALERS SHOULD

look closely into the matter of their Separator Contract. Will the separator you are now handling stand the telegram tests? If you are fortunate enough to be a Sharples Dealer, you have the answer. If not, you are going against the tide. Hundreds of thousands of times each month the words "Sharples Skims Clean at Any Speed" are being put into the minds of American dairymen through Sharples National Advertising. Why not put this **positive** selling force at work in your territory for you? Write nearest branch.

***"THERE ARE NO SUBSTITUTES FOR DAIRY FOODS"***

## UNITED STATES SAND PAPER CO. WILLIAMSPORT, PENN

## "Business Follows Facilities"

The "W & W" Winch

### *Convenient in Size—Two Cranks*

Contractors will buy a winch that will give them real service. Just show him how a "W & W" winch will do the work of two men, and he is sold.

With one of these winches, one man with a single line can handle 500 pounds with safety, and the load cannot drop until he turns the crank.

Put a couple on the floor of your store; they will sell themselves.

Special discounts to dealers. Write for price list to-day.

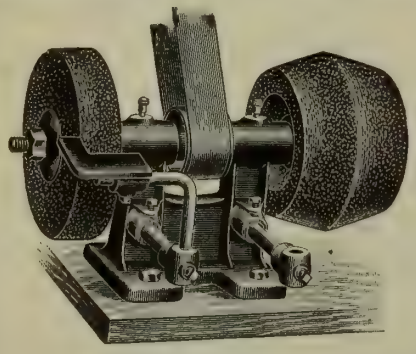
# GILSON GARDEN TOOLS

The gardener can do better work by using Gilson Garden Tools and you can increase your sales and profits by selling them. The Gilson Weeder here illustrated does four times the work of an ordinary hoe with half the effort. Made also for attaching to a wheel outfit. A very powerful tool for the destruction of weeds.



'Progressive Hardware Dealers are handling Gilson Garden Tools. How about you? It will pay you to investigate. Write us to-day.

# BULL DOG

## *Power Tool Grinders*

designed to meet the demand for a small power head grinder. Two vitrified corundum wheels for general use, and tool rests. The ideal wheel for steel grinding.

Bull Dog Grinders cost less and give satisfaction. Get catalogue No. 1. Write your jobber.

## WESTERN HARDWARE MFG., COMPANY, LIMITED

**MILWAUKEE, WISCONSIN**

# A Few Suggestions for Christmas Stock

EVERYTHING at present points to a "bumper" Christmas trade in high class goods; the greatest difficulty will be for the jobber and the dealer to keep their stocks sorted to meet the demand.

We are fortunate in having a nice assortment in almost every line of Christmas goods, and additional orders placed with the factories on which we will receive deliveries in time to fill orders from our customers. We strongly advise you to check up now and place orders, either for immediate delivery, or for shipment a little later to assure yourself of stock when it is needed.

## USE THIS LIST AS A GUIDE

### SAFETY RAZORS

GILLETTE, AUTO-STROP and EVER READY Safety Razors are all nationally advertised and are big sellers at the Christmas season. We have a nice assortment of the most popular sellers.

### FLASHLIGHTS

The demand for this line seems to grow almost daily, and they have become very popular for gifts. "EVEREADY DAYLOS" are the best, and we have them.

### SILVERWARE

"COMMUNITY PLATE" in "Adam," "Sheraton" and "Patrician" designs are ready sellers; stocks are hard to get as the factory is far behind in deliveries. Our present stock, and deliveries we will receive, will enable us to take care of a nice volume of trade in this line. We can, of course, make prompt shipment from stock of "1847 ROGERS" round-handled knives and forks.

### SKATES AND HOCKEY STICKS

"STARR" Skates are popular and will bring you big business and satisfied customers. The line is profitable and easy to sell. A hockey stick or a pair of ankle supports can usually be sold with a pair of skates. We carry a popular assortment of hockey sticks, and the best in ankle supports—"THE PERFECTION."

### ELECTRICAL GOODS

There are few lines which offer such sales possibilities for gifts as household electrical appliances. We carry in stock a few of the best selling items in "HOTPOINT" and "CANADIAN BEAUTY" appliances. We, of course, always have a good supply of electric irons.

### UNIVERSAL HOME NEEDS

Coffee Percolators, Tea Pots, Breadmakers, Vacuum Bottles, Lunch Kits and Food Choppers with the "UNIVERSAL" trade mark represent the highest quality obtainable at reasonable prices. They are all excellent gifts.

### POCKET KNIVES

There has been a good deal of difficulty during the last few years in getting any stock of pocket knives. We have specified freely and offer a complete range of "UNIVERSAL" pocket cutlery.

*SERVICE*

**Our staff is organized to give prompt and efficient service at all times, but particular attention will be paid to small orders for express or mail shipment during the Christmas season.**

**"Once Upon a Time"**

TRADE B&C MARK

An automobile broke down in front of a Hardware Store. While the lightning flashed and the water gurgled along the curb, the owner slogged around in his wet boots and found he had no tools with him. The Hardware Man sold him a wrench, in a few minutes a screw driver and another style of wrench. And then, gently and tactfully for the car-owner was miserable—he pointed a moral about preparedness; and he sold that auto driver about fifty dollars' worth of tools. HE HAD THE RIGHT TOOLS.
Are you prepared? Have you got a line, like Bemis & Call, that you could stand and watch him use with confidence that he would buy more?

# HACK SAWS AND TOOTH SHAPES

## Right down at the bottom of cheaper

cutting costs is the shape of the tooth. Years of experiment and actual working tests have given us the "Standard" shape tooth. It "cuts quicker and lasts longer."

And here's the reason. As a saw is used the points are worn off and the "contact area" of the teeth on the work becomes so great that enough weight to make the teeth "bite" crushes or breaks the blade. In other words, "the saw is dull."

Another thing: In the acute or "positive" angle tooth the leading edge points in the direction of the cut, it's always "digging in" under the surface and most likely to strip. The negative angle tooth simply scrapes off the metal and does not actually cut at all. The hook tooth is under the same handicap as the acute angled tooth. In all unusual teeth the "contact area," the friction producing surface, is greater than with the "Standard" tooth.

The easiest, surest way to get economy in Hack Saws is to use Starrett Blades with the Starrett Chart. Send for Catalog No. 21 "MA"

# The Little Things---That Make the Car Complete

# *Stanwood Products*

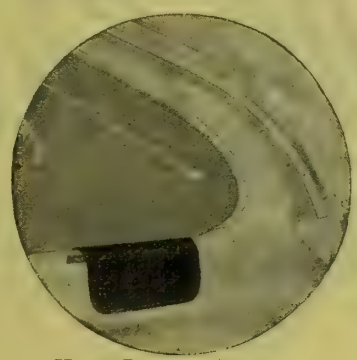
## Stanwood Safety Step Plates

Stanwood Safety Step Plate

For automobile running boards assure safety. They add to car refinement and keep the car clean. This device will not mat down or discolor and is very quickly applied. Pat. May 30, 1916, Feb. 19, 1918.

**Type B, $3.75 List  Type C, $2.25 List  Special Ford, $2.25 List**

## Stanwood Conformable Hand Pad for Automobile Doors



An exceedingly ductile metallic sheet is enclosed between the front and back leather sections of the pad, insuring through pressure of the hand, perfect comformity of the pad to the contour of the door.

*Positively will not curl by usage, or strong air pressure. Prevents finger marking of the door, especially after car has been polished.*

Made up of leather in various grains, such as long, seal, pebbled, smooth, pigskin and patent. Priced from $1.35 to $2.70 List. Size 4¼ x7 ¼ in.

Accelerator Foot Rest

Hand Pad for Doors
Patented 3-19-18

## Stanwood Adjustable Accelerator Foot Rest

Patents Pending

A reliable safety device to prevent *unintentional* rapid acceleration when driving over uneven crossings or rough roads. Relieves the foot from constant tension. Permits delicate advancement or retarding of accelerator.

Made with an indented rubber roller vulcanized to a steel tube, revolving on a steel spindle riveted to the uprights. The pressed steel uprights and base sections are engaged by graduated indentations, insuring stability. These parts are sherardized and polished to prevent rusting.

Important Note—The graduated indentations make our Foot Rest easily adjustable to various heights and positions. This feature makes it fit your usual driving position.

**Price $2.25 List**

## Stanwood Accelerator Heel Plate

A perforated metal plate entirely covered with rubber and provided with a series of longitudinal ribs firmly moulded to the metal plate. Size of plate 4 in. wide, 11½ in. long.

The accelerator Plate furnishes a stable position for the heel when operating the pedal. Prevents wearing a hole in the floor covering of the car and is also used as a toe and heel guard on the running board shield as shown.

**$1.20 List**

Accelerator Heel Plate
Patented May 30, 1916 and Feb. 19, 1918

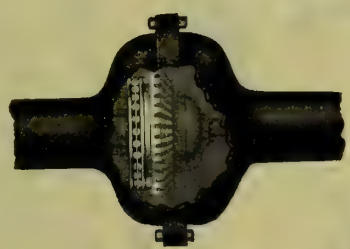
# Chapman Bearings

## Every Ford and Chevrolet A Prospect



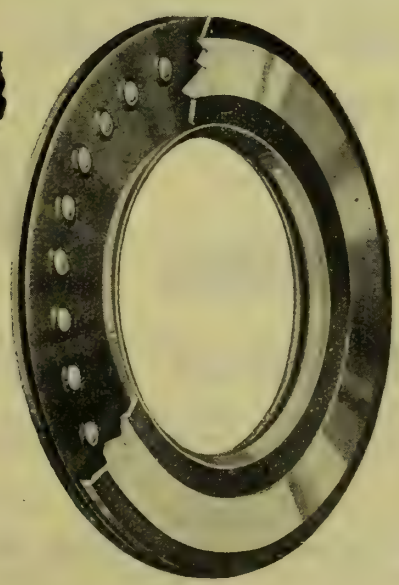
### Chapman Roller Bearings

A Ford or Chevrolet car is subject to rapid wear in the cup and cone bearings of the front wheel, because the hub is too small to take a cone bearing with a sufficient factor of safety.

Chapman Roller Bearings overcome this difficulty and are easily installed.

Every Ford and Chevrolet is a prospect.

### Chapman Differential Thrust Bearing



Readily substituted for the plain, flat washer in the differential of Ford or Chevrolet. The flat washer wears out due to heavy end thrust.

When worn there is lost motion in the gears and incorrect contact of teeth, causing extreme wear, and noise.

The Chapman Differential Thrust Bearing exactly replaces the washer with no other changes required.

It takes the pressure on steel balls, reducing friction to a minimum and holds the gears in perfect mesh.

Get our dealer proposition by a post card to-day.

### Chapman Advertising and Increasing Sales

are daily making this a better opportunity for you. We want dealers in every locality. Chapman advertising is reaching every car-owner and garage man.

Advertising, and Chapman co-operation with dealers, has greatly increased sales until it offers you a very profitable opportunity.

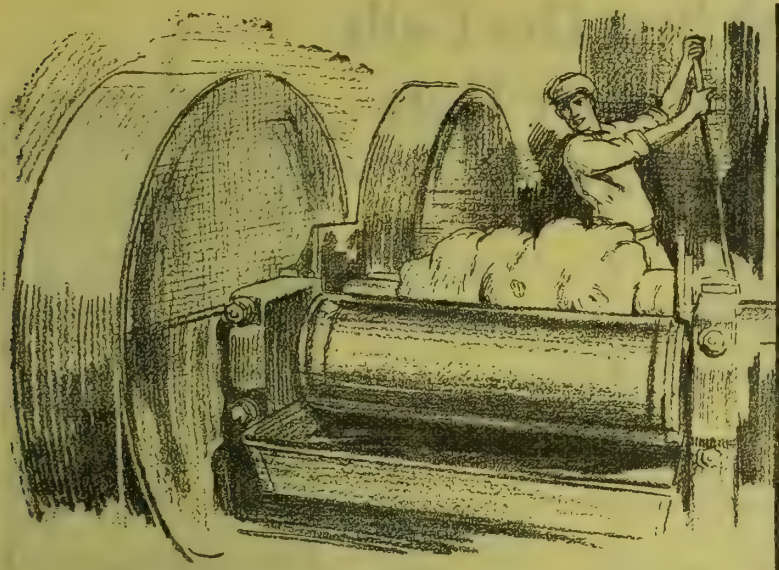
## The Real Ankle Support That Makes Others Look Like Imitations



Sell Perfection Ankle Supports—the only sure and comfortable ankle support on the market.

Made from the best quality of steel, and is so devised that by means of a hinge and sliding attachment the ankles may bend forward or backward, but simply can not bend sideways.

You'll sell more skates this winter as well as supports if you handle this line.

**Write us for prices.**

**Owen Sound Steel Press Works, - Owen Sound, Ont.**

MIXING GRAPNAL

**Ordinary Woven Lining**

*Notice the loosely woven texture.*

*Wears down quickly and unevenly.*

*Loses its gripping power as it wears.*

**Thermoid Hydraulic Compressed Brake Lining**

*Notice the compact texture.*

*Wears down slowly.*

*Gives uniform gripping surface until worn wafer thin.*

# The only brake lining that is "Grapnalized"

## *An exclusive process*

ONE of the most dangerous defects which a brake lining can possess is its inability to resist moisture.

Moisture from any source—rain or water as well as oil and gasoline, causes cheap linings to become swollen and "mushy," which makes them slip and grab. Automobile accidents due to failure of the brakes can in almost every case be traced directly to this cause. Woven linings absorb a large quantity of moisture.

Every foot of Thermoid Brake Lining is subjected to the special process of *grapnalizing* which makes it impervious to water, oil, gasoline, dust, etc. Thermoid is absolutely moisture proof.

## *What Grapnal Is*

*Grapnal* is a special compound, discovered and used exclusively by the makers of Thermoid Brake Lining. The special formula by which *Grapnal* is made contains ingredients which have great moisture resisting properties.

The asbestos fabric is thoroughly impregnated with *Grapnal*. Under hydraulic pressure and terrific heat, *Grapnal* becomes an integral part of the brake lining.

## *Satisfaction and future patronage for Thermoid dealers*

Thermoid is the 100% lining by virtue of the exclusive processes under which it is made.

It has proved best by test in the scientific laboratory as well as by use over thousands of miles of road. Many of the motor transports in Pershing's army were equipped with Thermoid which proved "responsible" in every critical emergency and which stood unlimited wear and tear.

You owe to your trade to sell Thermoid—it insures satisfied customers and means a permanent, increasing business.

Every foot of Thermoid is backed by the famous guarantee: *Thermoid will make good—or WE WILL.*

The Signal of Distinction

An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

## WARNS

### BUT DOES NOT OFFEND

This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

# "LIBERTY BELL"

## DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

**GETS THE RIGHT OF WAY**

This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.

**A POLITE SIGNAL**

# Display Sells Razors

The cutlery counter in most hardware stores stands near the door, where the customer lingers, looks around, and wonders what he forgot to buy.

Men are always on the lookout for good razors. The GENCO Display Case, sent you with your first order of GENCO Razors, gets their attention.

The handsome case will make them look more closely. Your salesman then simply reaches under its glass top and says: "Just examine the edge on this razor."

In a few minutes your cash register will ring. And your customer will be a satisfied customer. For the GENCO Razor has an edge that we guarantee: "GENCO Razors must make good or we will."

*Write us today for terms and details*

Genco
RAZORS

Reg. U. S. Pat. Off.

# *Oatmeal In The Radiator*

is an old-fashioned method of trying to stop leaks. It only works once in a long while, and then by mere chance.

What your customers really want is a radiator that DOES NOT leak at the slightest opportunity. Or, if it does, through some unforeseen circumstances, can be repaired at very short notice.

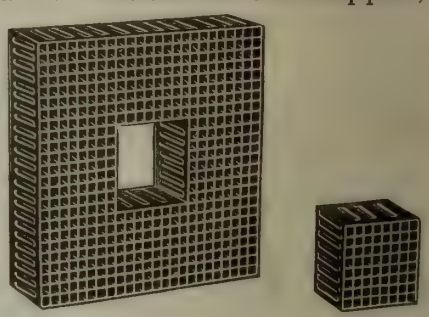
Engineers have decreed that Cellular Radiators are the best because they do not leak easily. But there is a difference between cellular radiators (some are, and some are not) but,

# McKINNON RADIATORS

**Are**

## *"Really Cellular"*

They are simply a combination of individual cells. Each rectangular section is made by wrapping the metal around the forming mandrels, not stretching or drawing it around the core, the very method that hardens the metal and makes it crack so easily.



Corrosion is also one of the evil influences of water on the radiator. Overcome this by carefully tinning the inside and outside of McKinnon Radiators. The sides are straight downward and corrugated so that the water is constantly in agitated action, carrying sediment away from the sides, so that the heat can be transferred to the sides and carried away by the cool air passing through the air cells, keeping the engine cool.

The water tubes are also constructed to permit of an outward strain many times before a burst will take place.

McKinnon Radiators do not leak unless they are forced to. But should this happen, the motorist would just plug up the leaking section with tire dough, or wood plugs, refill the radiator and drive on. Later, the repair man would simply replace the broken section with the new cells.

Vibration has no terrors for the McKinnon Radiator —because it is a solid unit, not an aggregation of tubes, fins and separate pieces.

This is one line every garage man and dealer should carry. We invite correspondence.

USTUS Limousette FOR FORDS

# For Big and Profitable Business

At last—an honest-to-goodness all-season attachment for Ford Cars. The "Ustus Limousette" gives every Ford Touring Car or Roadster a closed car appearance and protection when needed. It is invaluable in Winter, Spring, and late Fall, but it is not necessary to remove any part to enjoy open car freedom during the warm weather.

After the initial attachment the Ustus Limousette becomes a permanent part of a Ford Car. Adjustments to suit weather conditions, for ventilation, entrance or exit, are accomplished by the raising or lowering of the side piece on special spring rollers. These rolling side members can be operated conveniently and easily from outside or inside the car. The action of these rollers is identically the same as the way in which the window shades in your own home are raised. When in the raised position they are entirely concealed from view by the overhanging position of the Ford Top. But they are at all times ready for instant use.

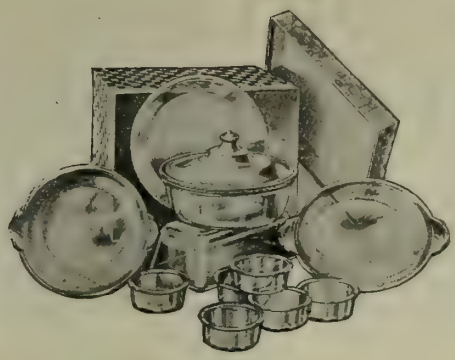
Not only does the Limousette give open car freedom when weather conditions are suitable, but it gives practically the identical appearance of an open car. Even the parts that are necessarily in full view when open car freedom is desired, add to the appearance of any Ford.

If for any reason it is desired to detach the Limousette it can be readily removed, folded, and placed under the seat. It folds into a bundle only 31½ inches overall. It weighs but 40 lbs.

Here are ten of the most interesting and important features of the Ustus Limousette:

1. It improves the looks of the car.
2. It is light in weight.
3. Gives clear vision front and sides.
4. Permits easy and quick entrance and exit.
5. Gives closed car comfort in bad weather.
6. Instantly convertible into an open car.
7. Eliminates inconveniences of awkward side curtains in summer.
8. It wears well.
9. No rattling or vibration.
10. No alteration of standard Ford equipment required.

Every Ford Touring and Roadster in Canada is a live prospect for an Ustus Limousette.



The practicability and convenience of the Limousette, plus our advertising efforts, practically assures an immediate wide-spread demand for this new addition on Ford Cars. We have a real, live selling proposition to offer you. Write or wire for our proposition.

Every dealer with half an eye can see the selling possibilities in this line.

# Models Help Your Sales

***Put C. S. G. Co. Models Where Your Customers Can Try Them Out---They Sell for You***

C. S. G. Co. Models give your customers a chance to see all the good points of the hangers. It demonstrates very simply how easy and free the action is with the anti-friction steel roller bearings. It makes the impossibility of jumping the track self-evident.

The parts are regular stock parts and the model is handsomely finished and labeled.

Let the models sell for you.

## The Famous NATIONAL Flexible Door Hanger

A reliable standby for sales records and quick turnover. The "National" cannot jump the track; it is impossible.

The flexible feature is important and builds customer-satisfaction and future business for you. When hanging straight down the door moves in a direct line, but on being shoved inward or outward it is free to give.

Packed one pair in a box with all bolts. Weighs 88 lbs. per dozen pairs.

# Big "4" Door Hanger

Front view of "Big 4" Hanger

## Thousands of Dozens Have Been Sold

A flexible hanger pre-eminent among all the sliding, barn door hangers on the market. Its superiority is self-evident from the long, satisfactory service.

A sale of Big "4" to a customer is your best assurance to yourself of his future business!

Simple construction, great strength and a free motion to the door.

**"Mail Orders Sent the National Way Are Shipped Direct the Very Same Day."**

**National Manufacturing Company**
**STERLING, ILLINOIS**

Weight, pressure on the blade, is one of the biggest factors in getting everything out of a Hack Saw that the manufacturer put into it.

Too little weight is just as uneconomical as too much—and it doesn't have even the advantage of cutting quickly while the blade lasts.

Where too light pressure is used the teeth of the saw slip and slide over the work without cutting. If too much weight is put on, the saw may strip and, in any case, the teeth are worn off in a short space of time, out of all proportion to the work accomplished.

The surest, safest way to get Hack Saw economy is to use Starrett Blades according to the Starrett Hack Saw Chart. Both the blade and the method are sure to be correct if you follow the chart.

# What Every Housewife Needs--- A Souvenir Combination Range

ONE of the chief reasons why a Souvenir Combination Range is such a valuable acquisition to any household is the fact that it eliminates the worry and inconvenience of uncertain, promiscuous fuel supplies. The Souvenir Combination bakes and cooks with coal, coke, wood or gas. It can be changed from coal to gas without the aid of tools in one minute. Coal or gas may be used separately or at the same time.
The range is exceptionally well made, of cast iron, with removable nickel edges, glass oven door with thermometer, white porcelain enamel closet back, nickel-plated plain base and legs, six holes for coal, three burners for gas.
Every Souvenir Combination Range is fully guaranteed, and you as a dealer should make it your business to see that all your customers are supplied with this exceptionally economical and trouble-saving range.

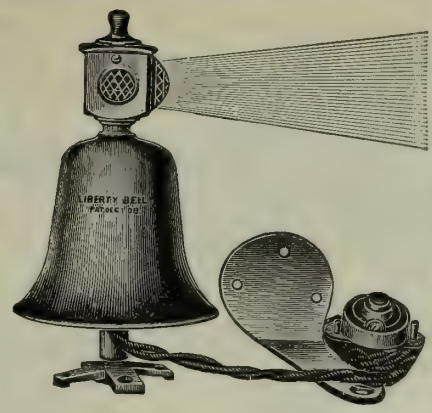
TRADE **YALE** MARK



**The trade-mark that means "All's Well"—**

WHEN your customers see "Yale" on the Night Latches, Padlocks, Door Closers and Builders' Hardware you carry—they ***know*** "all's well."

Handling a line of established reputation, extensively advertised, brings prestige and profit to the dealer stocking Yale products. The trade-mark "Yale" helps make the sale.

*Yale products are made at St. Catharines, Ontario*

**Canadian Yale & Towne Limited**

**The Signal of Distinction**
An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

# WARNS

## BUT DOES NOT OFFEND

This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

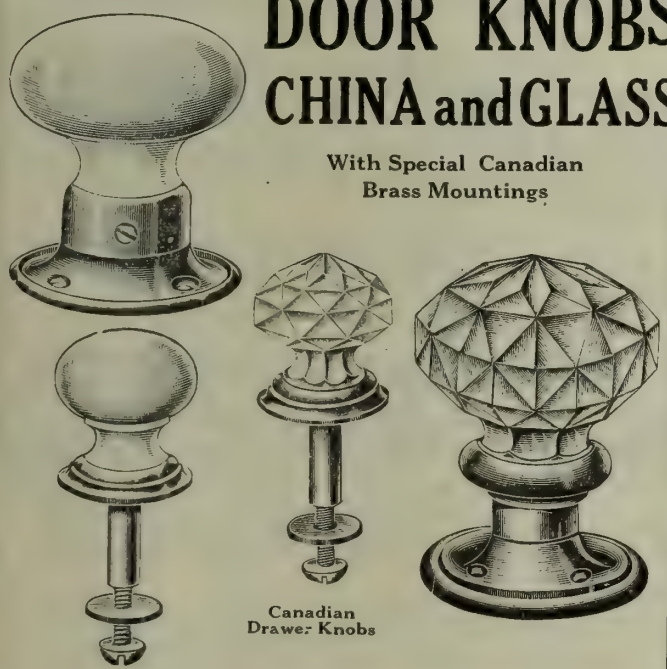
# "LIBERTY BELL"

## DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

### GETS THE RIGHT OF WAY

This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.



### A POLITE SIGNAL

# Profitable Field in Electrical Goods

## Carrying the Stock to Take Care of All Customers' Requirements is a Big Help, Says Sales Manager—Few Displays Can be Made More Attractive in the Store —Steadily Growing Market

THERE is a better and more profitable field for the trade in the sale of electric fixtures and appliances if the individual merchant will be more energetic in making this one of the most attractive departments in his store. This was the opinion expressed to HARDWARE AND METAL by the sales manager of one of the leading manufacturing firms in Toronto. The development of electricity, he pointed out, is increasingly important to the home as well as the industrial life of every community; and the wise merchant has his ear to the ground, so far as the growing requirements of his particular community are concerned.

### Varying Opinions

Not a few merchants with whom HARDWARE AND METAL has talked have built up a splendid trade in fixtures and appliances. Opinions seem to vary somewhat as to the procedure to be followed in going after trade. This is to be expected, however, as the needs of various localities are widely different. One man went so far as to say that the hardware merchant should not go in for the sale of fixtures at all unless he created a department entirely separate from all other departments in his store and put an expert electrician in charge of it. He pointed out the difficulties in connection with assembling the several parts of the completed fixture after it has been shipped by him to the wholesale house; the inability of the average merchant either to wire for the fixture or hang the fixture after he had sold it; and the premium upon his chances of sale because he could not assist the customer to install the fixtures after he had sold them.

### Takes Opposite View

This view was not shared, however, by the sales manager of a leading manufacturing firm in Toronto. Experience had taught him, he said, that the hardware merchant or his assistants were quick to gather and to perfect the details in connection with assembling of parts. His view, in this respect, is borne out by many merchants throughout the province who are carrying on a most successful trade in electrical fixtures. He emphasized the desirability of the purchase by the hardware merchant of the fixtures, sockets and the glassware,

*Electrical fixtures displayed right up at the front of the store have produced splendid business for Kent-Garvin & Co., Ltd., of Hamilton. They make a fine showing at all times, but when turned on at night, the effect is particularly appealing to prospective buyers.*

leaving to the expert electrician the whole matter of wiring. It might be impossible for the merchant to carry as complete a stock of glassware as would satisfy the customer; but, by means of catalogues, the most fastidious taste could be satisfied.

**Carry the Stock**

"Our trouble is to get merchants to carry the stock in electrical goods," said this manager to HARDWARE AND METAL. "They should, I believe, stock more. There is good profit in the sale of all electrical goods. They should sell more than they are selling, and we want them to buy more than they are buying."

He strongly advised the display of all electrical goods, both fixtures and appliances, in a separate department; they should not be mixed up with the other departments of the hardware trade. Few displays can be made more attractive than a display of electrical goods, he said, and frequent use should be made of the windows for such displays. He stated that some merchants were timid about putting in a stock of fixtures and appliances that would let their customers know they were in the electrical business to meet every want of every customer who came into the store.

**Business is There**

"The business is to be had," said the manager, "it remains with the merchant to interpret the needs of his community and then, with his courage in both hands, open a department, which, with the steady growth of electricity, will soon develop into one of the most profitable departments of his store."

# Stove and Range Prices Are Higher

## Five to Ten Per Cent. Increase—Labor and Material Are the Factors and Changes Have Been Forecast for Some Time—May Go Higher

AN advance in the price of stoves and ranges has been made effective. The increase will be ten per cent. on stoves and ranges, and on heating stoves five per cent. The new prices are now operative.

HARDWARE AND METAL has consistently pointed to the factors surrounding the stove manufacturer, and it has been most clearly indicated that price advances were inevitable. It is only last week that a manufacturer made the statement that price increases have been deferred from week to week, and from month to month. Now the change has come, and the market conditions, even at these advances, are very firm. In fact, owing to the outside conditions that have developed of late, the manufacturer does not know just where he is at, particularly with regard to raw materials and their future price. Already increases of price have been made effective on the part of the mills, in those materials used by the stove maker. Added to this, wages have been advancing from time to time.

**What Will Future Prices Be?**

The trade, while buying more regularly than earlier in the season, have not, it is stated, been purchasing more stoves or ranges than they were able to absorb for immediate and near future requirements. This means that none, apparently, have excess stocks—not large ones, in any case.

"What will be the position if the dealer continues to order freely; will there be enough raw material in hand to meet the trade needs?" asked HARDWARE AND METAL of a manufacturer.

In reply, it was pointed out that the stove manufacturer is entirely dependent upon what transpires in the United States from now on. In the first place, the raw material cannot be provided without coal, and if the miners decline to work the whole situation is at once changed. With rather limited supplies in hand, there is likely to be no surplus material in the makers' hands for a long period.

And, referring to prices, there is strong probability of these again advancing. The outlook is not promising, and it will be quite out of the question to bank on the future of prices at all. They are likely to be higher before they are lower.

### DEMURRAGE AND EXPRESS CHARGES DEBATED BY WESTERN BRANCH C.M.A.

Western branches of the Canadian Manufacturers' Association have joined with the Winnipeg Board of Trade in application for the removal of demurrage charges which accrued during the strike last summer. The C.M.A. committee contends that such charges should be dealt with as ordered by the railway commissioners with respect to demurrage charges during the influenza epidemic of 1918.

A more equitable assessment of cartage charges by the express companies is to be considered at a forthcoming meeting of the C.M.A. Meanwhile shippers are furnishing the committee with information relative to cartage charges made where they have been unable to secure cartage service owing to these being included in the carrying rate.

# Credit Men Asking for More Stringent Laws to Hold Bankrupts

## Claim That Merchants Are Losing $25,000,000 a Year, and That They Are Put to Endless Trouble and Annoyance

THE National Association of Credit Men has launched a campaign for the repeal of exemptions allowed to debtor merchants in the bankruptcy statutes of various sections of the country.

These exemptions are allowed by law to safeguard citizens with family obligations against the perils of poverty in event of insolvency.

The National Association, however, through its secretary, J. H. Tregoe, announced its belief that the commercial interests of the country, including the interests of the majority of retail merchants themselves, would be much better served if there were no such exemptions for the minority of merchants who, honorably in some cases and dishonorably in others, go through the bankruptcy courts taking advantage of such legal provisions.

**Costs $25,000,000**

The association also announces its intention to fight the evil of returning goods, which, it asserts, imposes an additional cost on business of approximately $25,000,000 every year—a cost which must ultimately be paid by the consumer.

Other points affect the retail merchant as seen through the eyes of his creditors are set forth as follows:

**Causes of Failure**

"Unadaptability and lack of training are the chief contributing causes for failure and though independence of action has been the controlling spirit of our nation, yet we are commencing to understand that economic wastes where avoidable should be prevented by reasonable means, and that no greater economic waste can happen than a human failure.

"The officers and directors firmly believe that a merchant who does not keep some kind of books should not be allowed his discharge if bankruptcy happens, and should he be overtly neglectful in this matter and cause a loss to his creditors by his neglect, to suffer in a much keener way than we have ever considered or attempted to accomplish in the commercial and credit affairs of our nation."

# A Fruitful Business Proposition

WINDOW dressing at Christmas is a fruitful business proposition. The tasty window is a constant salesman. No merchant has a greater variety of useful Christmas gifts to display than the hardware merchant. Not only is there variety but there is usefulness in his goods; and it is possible to display them in such a way that people will stop to examine them and receive suggestions for Christmas presents that will bring rapid business to the merchant. You have the goods; display them.

If you display them attractively, you gain two objects: You sell goods and stand a chance of winning a cash prize from HARDWARE AND METAL. Send a photo of your window to us not later than January 1, 1920, and you will be a competitor for the cash prizes.

## Potent Suggestions

Men who make a study of the human mind, in other words psychologists, tell us that there is no power so potent as the power of suggestion. Momentum can be added to the power of suggestion by visualizing it; suggestion by sight is even more potent than suggestion by word. The window-dresser, therefore, who makes a careful study of the community in which he lives and knows something of the class of goods that will appeal to his customers can wield this power with double force. He can talk to the general public through the display of goods he makes in his windows; by visualizing his entire stock in the samples shown in the window in an attractive manner, he becomes a powerful salesman, throwing out a hundred suggestions to the bewildered Christmas-present seeker who knows not what to buy.

## Cash Prize Can Be Won

The primary object to be served in window dressing is to sell goods. The window display that is not the forerunner of sales is wasted time and energy. But in addition to the profits from window dressing at this particular time of the year, there is a cash prize to be won in the Christmas Window Display Competition of HARDWARE AND METAL. The only stipulation of the competition is that the goods shown in your window must be for the Christmas trade. It will be your own talent for selecting goods and displaying them that will count in the competition.

## Now is the Time

Time rushes on, but there are still five weeks before Christmas. Now is the time to make your plans for the Christmas display. Try a few windows before you dress the one which shall be a competitor for the cash prize. Practice makes perfect. The competition is wide open; every hardware man from coast to coast is permitted to participate in it.

# Hardwareman Favors Standardization

## James Aikenhead, of the Aikenhead Hardware, Tells Why He Believes Cutting Out a Number of Unnecessary Sizes and Styles Makes for Better Business All Round

VARIETY may be the spice of life but it does not always result in the greatest number of sales. At least that is the opinion of Mr. James Aikenhead, of the Aikenhead Hardware Company, Toronto, and he backs up his statement by demonstrations. In his view, variety more often confuses the purchaser than helps him. Of course, the policy is not carried to that point where a selection that would suit the most fastidious taste is not to be had. Such a policy would be suicidal from the standpoint of the progressive retailer, no matter what his line might be. But Mr. Aikenhead thoroughly believes that variety, carried to extreme, is neither beneficial to the retailer, the purchaser, or the manufacturer; and he says he knows of a large departmental store in this province into which thousands of people go, but only 5 per cent. of them—one out of very twenty—come out, having bought anything.

### Other Considerations

But there are other considerations which are of value to the retailer—and to the purchaser—in this matter. In these days of the high cost of living, the best brains of the country are being devoted to a solution of that vexing problem. The keynote of the whole problem, they say, is production, production, production. And production is not aided by the necessity for creating a variety of lines which satisfy only the passing whims, rather than the exact requirements of the customer. The cost of production is made higher by variety lines which which there is only a limited demand. Staple goods are the best; regular lines can be sold with good salesmanship as well as the special or variety lines. If the cost of production can be reduced by manufacturing only staple lines, the cost to the jobber and the retailer and the customer can be reduced proportionately.

### Gives Illustration

Mr. Aikenhead gave HARDWARE AND METAL one particular illustration and he said that it served as a criterion for many lines throughout the store.

"We used," he said, "to carry 11 designs of lock sets. 9 in three finishes and 2 in four finishes. We now carry 4 designs, 3 in one finish and 1 in two finishes. This makes a variety of 5 as against what it used to be, namely, 35. And we are selling more for the simple reason that we can now give the factory an order for 250 or 300 dozen of one kind and they can give them to us quicker and cheaper than they used to. The manufacturers are glad to do it; it is easier for them and it increases their production."

### A Lesson in Itself

The manner in which these lock sets are now shown as compared with the way they used to be displayed is a lesson in itself. Formerly, they were displayed in show cases and drawers, taking up a whole room. Some 500 sets could be seen by the prospective purchaser. It so happened many times, that the purchaser would be in this room looking around when the salesman arrived. The vast variety semed only to confuse rather than to help; salesmanship was harder and there was not always complete satisfaction.

The system was changed. Many of the show cases have curtains over them so that, upon entrance into this room, they may not be seen. The drawers are kept shut. The salesman finds out from the prospective purchaser what kind of a house he wants his lock for, or what kind of a door. And after finding this out, the salesman has a pretty good idea what the buyer wants. Then he shows him the different styles that would be suitable for his purpose and he makes his selection without being confused by a hundred other styles that would be of no possible use or assistance to him.

### Always a Come Back

Then, too, there is always a come back. If the buyer is not satisfied with the selection, he is told that a special lock can be secured for him. It will take some time to get it or to have it made, possibly some weeks, but it can be had for the waiting. Usually, the customer does not want to wait; and there are very few of them that cannot be satisfied with what they see.

### Space is Saved

By not stocking near the variety they used to, space is saved in the showroom, the stockroom and the over-stockroom. On the whole, Mr. Aikenhead expressed himself as strongly favoring the standardization of most hardware lines. It benefited all concerned, he said, not the least of whom was the customer, who paid less for his article.

### C. L. SHAINWALD KILLED

Charles L. Shainwald, manager for the Standard Paint Company of Canada, Ltd., Montreal, met with a tragic death on Tuesday of this week when he fell from a window on the eighth floor of the Ritz-Carlton hotel, fracturing his skull, and meeting instant death.

The late Mr. Shainwald came to Montreal from New York, having charge here of the Canadian branch of the Standard Paint Company's business. He had been suffering of late from severe attacks of asthma, and had been under the care of Dr. Lauterman. At the time of the accident, Mr. and Mrs. Shainwald were preparing to go to lunch. Leaning out of the window to get fresh air, he lost his balance and fell to a projecting point at the second floor.

Mr. Shainwald was associated with the Federation of Jewish Philanthropies, and was associated prominently with Jewish communal activities here.

## Up To Business Men To Ban Bolshevism

Speaking before 1,500 diners at the fall meeting of the Credit Men's Association in New York Tuesday night, Curtis P. Burnett, president of the National Credit Men's Association declared that it was up to the business men of the country to show Europe that Bolshevism cannot flourish on this side of the water.

"Business men must put their shoulders to the wheel," he said, "and show Europe what they can do. Our workers must prove their ability and dependability. Then Bolshevism will find America a poor place in which to grow."

Mr. Burnett declared that the time had come for business and industry to rise up and tell the Government to keep its hands off. He said that the theorists and idealists in the Government must keep their hands off, otherwise prosperity will be threatened.

"Riders on bills to which the riders do not really apply must be stopped," declared the speaker.

He added that the doctrine that the American worker should not speed up because the less work he does, the more employment is given to labor is pernicious and bound to work the greatest harm to the country if persisted in. He said that he was not opposed to trade unions, but that union leaders must realize that others must live besides themselves.

Referring to the general business situation, Mr. Burnett declared that everything indicated the country was very prosperous. He said that reports of banks and other institutions showed that the country was doing a tremendous business and that this good business would continue.

---

R. C. Pinchin, vice-president and director of the Ontario Oil and Turpentine Co., has been appointed director of the Basque Chemicla and Production Co. of British Columbia, which represents Toronto and Walkerville capital. It is stated that this company controlls one of the largest deposits of magnesium sulphate known to chemical science, and deposits are estimated at twenty-one million tons. The Ontario Oil and Turpentine Co. are distributors for Canada.

# Don't be Afraid to Take on New Lines

## Walter Brittain, of Bloom & Brittain, Hamilton, Ont., Tells How the Firm Has Multiplied Its Business Many Times—Finds Sales of Electrical Goods Steadily Increasing—Discusses Trade Problems

Based on an interview by C. E. PARSONS, of Hardware and Metal, with Walter Brittain, of Bloom & Brittain, Hamilton, Ont.

TEN years ago Walter Brittain and Harry Bloom started in the plumbing business in Hamilton in a modest way. To-day they have two places of business and their turnover each year runs into really large figures which are still growing.

"I guess we grew because we were not afraid to take a chance and go into new lines," said Mr. Britain, in talking with HARDWARE AND METAL. "We are still following in the same line. There is only one stipulation. We must see that there is a demand for whatever line of goods it is, and they must be goods that we can stand behind. We do not want to handle anything that is not going to give good service and good satisfaction to the party who buys it. If we did we would quickly get the wrong kind of advertising, because nobody talks louder or more persistently than the man or woman who pays good money for something that turns out unsatisfactorily. On the other hand, we have no better advertisement than customers who are satisfied.

### The Firm's Motto

Long ago we adopted as our motto or our business policy the slogan: "The customer is always right." If at any time there is even the slightest question about anything we take the stand that the customer decides the matter. If he thinks he has an article that is in any way unsatisfactory all he has to do is to bring it back and we will make it right and give him another. The same policy applies in regard to our plumbing and heating work. It has got to satisfy the customer. His word is final. The people all over the city and district know that we stand behind this policy and it has helped us to build up the trade we now enjoy."

### Got Good Results

Mr. Brittain stated further in reference to the firm not being afraid to take on new lines that one of their first departures from the plumbing and heating business was to stock stoves. From that they have gone into electric stoves, aluminum ware, electric utilities, toasters, heaters, vacuum cleaners and washing machines. In addition to electric washers they carry a complete stock of washers operated by hand, water and gasoline power.

"No matter what line you are in," said Mr. Brittain, "it pays to carry the stock. People like to deal at a place where they can get a good selection. They like to see a lot of goods out about the store and they like to see it kept in good condition. Women particularly are apt to keep away from shops where they have to step around piles of merchandise and they will not handle goods that are not kept clean. It doesn't matter whether it is a display of bath tubs, bath-room fixtures, electric washers, stoves or anything else, it is good business to keep it out where people can see and inspect it and keep it clean and nice."

### Cuts Down Overhead

"We soon found that handling other lines than plumbing goods not only brought a lot of people to our shop for both the other lines and plumbing goods, but the steadily increasing turnover made for more profits and at the same time cut down our overhead. We could do many times the business we had been doing when we only sold plumbing goods, and with litle increase in expense. We have been adding one line after another and at the present time would go into the handling of electrical fixtures if we could find a man to take charge of the work upon whom we could thoroughly depend."

### Take All Discounts

Mr. Brittain pointed out that the

*This model laundry, located at the rear of the store is proving a big business getter for Bloom and Brittain and is a centre of real interest for housewives who are interested in getting away from the drudgery of washing. The equipment is all connected up and can be demonstrated instantly.*

*Bloom and Brittain are not afraid to use newspaper space. The original of this illustration was 15 inches wide and twelve deep. The firm state that they get excellent results from their ads. and frequently use full pages. Note the attractive arrangement, the use of cuts and the punchy sales talk.*

firm's stove business has grown so big that they now buy by the carload. They buy for cash and they sell as nearly as possible on a cash basis. By doing business in this way they effect a material saving in the way of discounts and minimize all losses due to collection of credit accounts.

In connection with the selling of stoves, Bloom and Brittain keep half a dozen stoves for demonstration purposes only right up at the front of the store. These are combination stoves that will burn either coal, wood or gas. They are kept in perfect condition, the nickel shining brightly and all parts clean, so that any woman who comes in may, if she wishes, handle the stoves and see for herself just how they work.

### Keep Them Separate

"The reason we keep several stoves for demonstration purposes," said Mr. Brittain, "is that we have found that it is bad business to interrupt a salesman who is trying to sell a stove. If we have half a dozen customers in at the same time and only had one stove to show, the customers would start talking to one another and the salesmen would get mixed up. In short, when selling stoves you must concentrate on the customer. Any interruption from outside sources disturbs both the salesman and the customer and may result in the loss of a sale."

### Take Old Ones in Exchange

Mr. Brittain stated that if a party comes into the store and wants to buy a new stove and wants something allowed on an old one, that the firm always takes the old one.

"We handle from 450 to 500 stoves every year," said Mr. Brittain, "and in the course of our business we get a number of old ones. We fix them up and make a good profit out of them, in fact we frequently make as much out of an old stove as we do on a new one. We put them in good shape and have no trouble whatever in turning them over."

In connection with the trade in used stoves, Bloom and Brittain have fitted up a special section in the basement, where they are kept on display. All are neatly arranged and are kept in good condition.

### Are Easily Handled

The department where the used stoves are rebuilt and fixed up generally is located on the third floor, up out of the way of everybody. In order to facilitate the handling of stoves and heating equipment generally, the firm has a freight elevator which will take them to the basement or to any floor desired. Most of the stoves are mounted on wheels and are quickly and easily moved to the place desired.

Just how big a business Bloom and Brittain do in stoves may be gauged from the fact that they have sent out as many as 33 combination ranges in one day.

### Bring Good Results

Mr. Brittain says that demonstrations are put on frequently and always bring good results. These are well advertised and very often the firm co-operates in its efforts with some leading woman's organization, which puts on a sale of cooking in connection with the stove sale. Some of the demonstrations last as long as two weeks. Others are shorter.

"Results vary," said Mr. Brittain, "but they are always satisfactory. The whole thing seems to depend on the weather. If the weather is such that people will naturally think about stoves or whatever we are demonstrating, we will probably sell twice as much goods as if the days are of the variety that people are outside and not thinking about heating equipment."

### Helps Sales Also

Another thing that helps stove sales in Hamilton, Mr. Brittain says, is the gas situation. Sometimes there will be trouble with the natural gas supply, especially in zero weather, and there will be a rush for heating stoves.

"We thoroughly believe in advertising," said Mr. Brittain. "We get excellent results always. By arranging our demonstrations so that we are working with some local women's organization we also get a lot of business. Recently we put on a two weeks' demonstration, and during that time co-operated with the Women's Exchange, an organization through which Hamilton women sell anything they wish to sell. Naturally this brought a great number of women into the store, and they were easy to interest in stoves, washers and other lines."

In connection with the sale of stoves the firm makes a charge for setting up all stoves, unless they are purchased during the special demonstrations.

An auto delivery is a feature of the store service, and Mr. Brittain says it has proven most satisfactory in every way, not only to the firm, but to customers.

"We simply would not be without it," he said.

### Other Demonstrations

Occasionally the firm puts on a demonstration of aluminumware and inserts a coupon in its ads. to be returned to the store with the name and address of the party.

"This gives us a new mailing list every couple of months containing perhaps 500 names," said Mr. Brittain. "We follow these up and many of them are prospects for other goods."

During the year four demonstrations of washing machines are put on with excellent results.

As stated above, the model laundry is a feature that is a real talking point when it comes to closing business.

### Steadily Growing

The firm is doing a steadily increasing business in electric stoves and washers.

"We find the demand for electrical goods increasing all the time," said Mr. Brittain. "The goods sell themselves. Take washers for instance: We have no hesitation in allowing people whom we know to be reliable, to take home an electric washer. In practically every case the machine sells itself and they

*At the right of the picture is shown part of a battery of electric stoves, all ready for demonstration purposes. Note the battery of washers, the display stands of electric utilities and aluminum ware and the many attractive show cards on the walls.*

never come back. People like electrically-operated equipment, because it more than does the work claimed for it. The equipment works quickly and efficiently and economically. These are three big points that the buyer gives important consideration to. In addition he or she likes to have a nice-looking utility, and few lines are better or more attractively finished than the electric devices. On all the lines that we sell we give a guarantee that as far as I know is the broadest of its kind in Canada. It is simply following out our general policy that holds good in all departments that the customer has to be thoroughly satisfied."

### Aggressive Policy

"We believe in an aggressive policy," said Mr. Brittain. "The business man who sits still and waits for trade to come to him, may get by, but if he hustles he will get many times the turnover. In our electric vacuum cleaner business we keep four men going about the city all the time demonstrating and selling. We get excellent results, and very often obtain prospects for other goods."

The firm not only sells stoves and ranges from now on, but during the summer months does a big trade in summer stoves and in coal oil heaters and gas plates. During the proper seasons these lines are kept prominently displayed.

"We sell about 400 plates every season," said Mr. Brittain. "We get the business by advertising and by store and window displays. The merchant who sticks his goods back in a corner and waits for the public to come in and ask for it is working on the wrong plan. To sell stuff you have to let the people see it and let them know you have got it to sell."

### Business Is Good

Mr. Brittain says business in the plumbing and heating lines has been excellent. The firm makes a specialty of looking after factory work, and as Hamilton is a big factory city, they have had any number of excellent contracts. The city has, in common with many other Canadian cities, an acute scarcity of dwellings. This has resulted in a great many people with large homes converting them into duplexes, apartments or family flats. Bloom and Brittain have undertaken a great many of the plumbing and heating contracts for these.

"One thing we have kept away from," said Mr. Brittain, "is the speculative builders. They are, as a rule, out to get something cheap. We will not cut prices for anybody, and we do not want any cheap jobs. As a rule, work of this kind would reflect back on our standing, because when the installation commenced to give trouble as it surely will sooner or later, the buyer would say we did the work and would never, if he lived to be a thousand years old, give us another contract. We do not want that kind of advertising. It is bad for business."

### Range Boiler Troubles

Mr. Brittain discussed the trouble that is frequently with range boilers, and pointed out that this is a serious matter for the master plumber and runs into quite a loss. It frequently happens, he states, that after a range boiler is installed that it is defective. This means that the firm has to lose all the time its workmen have put on the job and also the time it takes to put in a new one.

"It is not a fair deal on the part of the manufacturers," said Mr. Brittain, "to send out goods which are guaranteed and turn out to be defective. I think the trouble is caused by the kind of material they are using now. We seldom had these troubles with the old boilers.

### Suggest New Ones

Bloom and Brittain have a staff of eighteen workmen. They do a great deal of repair work all over the city and district.

"When we are called to a repair job," said Mr. Brittain, "our men are instructed to make an investigation, and if the part that is to be repaired is past repairing, to point out the weakness to the owner and suggest that a new part be installed. If we are satisfied that the repair will not, owing to conditions, give every satisfaction, and the owner refuses to put in a new part, we will make the repair he wants, but on the distinct understanding that we do not guarantee the work. We generally find, however, that once a party understands that a new piece means permanency, and that fixing up the old one simply means more trouble later, that he is only too glad to accept our recommendation."

### Apprentice Problem

Mr. Brittain regards the apprentice problem as one of the most acute things with which the trade in general has to deal. As far as his firm is concerned it has for the present, at least, given up any idea of training apprentices.

"If the unions would let us alone," said Mr. Brittain, "we would be in a better position. I think that as far as the trade as a whole is concerned, the policy

*The illustration shows an interior view of one of Bloom and Brittain's show windows and also the very front of the shop. Note the display of bathroom fixtures in the window, the neat arrangement of stock and the attractiveness of the show room.*

of the unions at the present time is a short-sighted one. If we could retain control of the apprentice until he was out of his time, as used to be possible under the old indenture system, it would help solve the problem. But as things are now, if a boy comes to us he is of little use for the first year or so. Then he begins to get the hang of things and we send him out. The union takes control of him and demands more money than he is worth. The result is that we are not training any apprentices, and if this is carried on generally, where are the plumbers of the future coming from? The men who are doing the work now are not going to live forever, and someone should be ready to take their place."

**Co-operation Essential**

Mr. Brittain spoke of the good work that is being accomplished as a result of the men in the trade in Hamilton co-operating. They are, he says, making steady progress. They are not only working to solve their own local problems, but with the Ontario organization and the Dominion organization to solve provincial and national problems.

"The only way to get anywhere is to work together," said Mr. Brittain. "As long as men who are engaged in the same business and who have the same interests pull away from one another, instead of together, they are not going to get results. The master plumbers in this city are finding that out. They are realizing as never before just what it means to them to get together and work out our common problems. We hold regular meetings and at them we have practical talks on trade matters and on business matters. Such things as overhead and business management are taken up and some of the boys are seeing things in connection with running their business that they never knew anything about before."

**Eliminating Troubles**

There have been local problems to settle in Hamilton just as there are in most cities or districts. Mr. Brittain states that the master plumbers and the local plumbing inspector are working together well and getting things in good shape. The city by-laws, in regard to plumbing, are being improved. At the present time the Board of Health has no jurisdiction over the inspector, who works under the direction of the Building Inspector. The master plumbers are working to have the Plumbing Inspector's Department work with the Board of Health, believing that this is directly in the interests of the citizens as a body.

## DEMURRAGE RATES WILL BE LOWERED

A copy of an agreement signed by the steamship lines operating out of Canadian Atlantic ports in regard to demurrage on export traffic, which is of interest to many manufacturers, has been received. The agreement, which is between the Canadian Railway War Board and the steamship lines, states in part:

"That cars containing freight for British countries (other than Canada, and foreign countries other than the United States), including that for Newfoundland via Halifax, Montreal or North Sydney only, and for islands of St. Pierre and Miquelon, via Halifax or North Sydney, for transhipment to ocean vessels, whether moving on through bills of lading, or otherwise, which are held on railway tracks at Atlantic ports awaiting vessels, or for other reasons beyond the control of the railways, shall be allowed 20 days free time from 7 a.m. following the date of advice of arrival at such port, exclusive of Sundays and legal holidays, after which a toll of $2 per car per day or fraction therof, shall be charged for all time in excess of the free time, exclusive of Sundays and legal holidays.

"It is further agreed that should at any time the present scale of demurrage rates on domestic freight be restored to the one dollar per day basis, a similar reduction will be made in the demurrage rate on export freight, provided for in this agreement."

The steamship lines concerned are: Canadian Pacific Ocean Service, Limited; White Star Dominion Line; the Robert Reford Company, Limited; Canadian Government Merchant Marine; McLean, Kennedy, Limited; Furness, Withy & Company, Limited; Canada Steamship Line; Campagnie Canadienne Transatlantique; New Zealand Shipping Company; Elder Dempster Company.

# Will Continue to Search for Oil

## Director of Imperial Oil Company Tells of Next Year's Program in the North-West—Big Increase in Use of Oil for Fuel

THOUGH the extensive operations carried on by the Imperial Oil Company throughout the Western portions of Canada during the past five years have yet brought no tangible results of any considerable proportion, there is no discouragement on the part of the officers of the Canadian branch of the Company who have just returned from an inspection tour of all Canadian refineries.

The party consisted of C. O. Stillman, president; Victor Ross, one of the directors; W. B. Ellsworth, general superintendent; A. M. MacQueen, one of the vice-presidents; Thomas Montgomery, chief engineer; Leo McCloskey, statistician; and A. Fleming, secretary to Mr. Stillman. With the exception of the small field south-west of Calgary, no fields of any considerable commercial value have been discovered; but the program which was outlined for the past year and provides for bigger operations next year will be carried on during 1920 just the same.

### Will Continue Work

While the field south-west of Calgary produces about 100 barrels of oil and gasoline a day, the other drillings have not produced results sufficient to make any appreciable difference in the situation, so far as Canada is concerned. All the way from the international boundary to beyond Fort Norman on the Mackenzie River, seven crews have been operating and will continue in the work next year. The past season has been a short one, because the winter in the West has set in early and cut off operations.

Following the survey of the geologists, six or seven wells have been drilled at Peace River, all of which have a production of oil, but not sufficient to warrant the installation of pipe lines or other transportation to handle the production. With more development work and better transportation facilities, these wells may prove exceedingly valuable. Two holes were drilled on the Great Waterways Railway but without appreciable results.

### Geologists Busy

During the past season, geologists have been at work in the country south of Cardston, south and west of Calgary, between the Athabasca River and the Big and Little Smoky Rivers, in the Peace River block and north of this region, on the plains in the eastern part of Alberta and the western part of Saskatchewan. Work has proceeded at the Great Slave Lake and on the Mackenzie River, 45 miles below Fort Norman.

Speaking to a representative of HARDWARE AND METAL, Mr. Victor Ross referred to the work for the coming year and the necessity, both from the standpoint of the Company and the country, of continuing that work.

### Next Year's Program

"We will continue next year on the same program which we commenced this year," said Mr. Ross, "believing that we will be successful. We believe that the natural resources of the country should be developed. We have enormous investments in Canadian refineries and transportation equipment, and to keep the Canadian markets supplied with all the oil required, we must search the world for it.

### Crude Petroleum

"Crude petroleum is being brought into Canada from three or four foreign countries. For the Western country, it is brought from Peru, refined at Ioco, and distributed for bunking vessels, naval supplies and the internal trade of British Columbia. For the prairie provinces, the oil is refined at Regina, and comes from Wyoming, where it is largely bought from individual producers. We also draw on those States for the oil refined at Sarnia, and also for the Montreal refinery; another part of the oil for Montreal we get from Mexico. For Dartmouth, the oil comes from Mexico, and that refinery was really built to supply the navy during the war."

### $125,000 Per Day

What this means to the development of the natural resources of Canada, and what it means in loss to Canada, can be estimated from the fact that about $125,000 per day goes to foreign countries for the oil that is used here. Added to this, at the present time, is the unfavorable rate of exchange, which means about $5.00 on every $100.

With regard to the use of oil in Canada for fuel purposes, Mr. Ross said that it was on a considerable increase, particularly for bunkering purposes. This was due to the scarcity of labor. On the farms, too, with the increased use of the farm tractor, the combustible engines for grinding and chopping, and because of the scarcity of labor, there was an increased demand for oil as a fuel.

## POWDER COMPANY SUSTAINS HEAVY DAMAGES

A case of considerable importance was decided this week in the Superior Court at Montreal. This affected the powder manufacturing firm of Curtis & Harvey (Canada) Ltd., and was in connection with the severe explosion which destroyed their plant at Dragon, on Aug. 18, 1917.

The plaintiff in this action was Geo. Boyce, who owned a house at Dragon, near Rigaud, Que. containing four apartments. One of these he occupied and the others were leased, and at the time of the explosion, in addition to the damage to the company's property, the house of the plaintiff was completely destroyed, having taken fire after it had been severely shaken with the force of the explosion.

The company defending this action contended that the accident was something over which they had no control, and that it was a case of force majeure, there being no neglect on their part, as everything had been conducted with caution and care. It was furthermore contended that they had a license to manufacture explosives. They also claimed that the damage, namely, $7,695.00, was excessive.

In rendering judgment, Mr. Justice Panneton said the plaintiff had proven the essential allegations of his declaration, and the defendant had not proven the action was due to force majeure, something which could not be foreseen, such as to free the company of liabilities for damages caused. And in consequence, the court condemned the company to pay $7,655.00, holding that damages to this extent had been suffered by the plaintiff.

## HAD CARTRIDGES IN BARREL

A decision of interest to hardware merchants was rendered at Darlington, England, recently, when J. F. Smythe (Ltd.,) gunsmiths, were summoned for having unlawfully deposited a quantity of cartridges in a receptacle appropriated for refuse in an open shed.

R. Cape, Inspector under the Explosives Act, said that he went to the defendants' premises, and, in a place to which anyone had access, about forty-eight yards from the street, he found a number of cartridges amongst a lot of rubbish in a barrel.

The defence was that the cartridges had been put in barrels with a view to their being sorted, the shot and powder taken out, and the cases saved for use in testing guns after they had been repaired. Four barrels were placed in the shed and one outside, there being no room for it in the shed.

The defendants were fined £5, with 33s. 6d. costs.

Ransome Canada Products, Limited, capital $10,000, head office Toronto, plans to manufacture and deal in fertilizers, and chemicals.

Curran Motor Radiators, Limited, capital $250,000, head office Toronto, plans to manufacture and deal in radiators.

Canadian Linoleums and Oilcloths, Limited, capital $1,000,000, head office Montreal, plans to manufacture and deal in these lines.

* * *

WHEN you lose a sale don't think what was wrong with the prospect. Try to figure out what was wrong with you.

* * *

THE man who waits for something to turn up very often finds that his competitor has turned up something while he waits.

* * *

PUBLIC opinion undermined the miners and things may not turn out so badly after all.

* * *

MOST folks used to shine their own shoes, whereas recent figures show that $1,359,576 is paid out each year now to Greeks and others.

## *THIS HARD-TIMES TALK*

A YEAR ago, after the signing of the Armistice, there was a feeling in Canadian business circles that something in the nature of an industrial crash was impending. The only way to evade idle plants that could be seen was by getting export orders to replace munitions output. What few or none foresaw was the fact that with short working days declining production, and a prosperous people willing to spend from their war-time savings there would be a home market for practically everything which the majority of our plants could supply. To-day Canadian manufacturers are developing a market in Britain and Europe for those products which are largely made from our raw materials, but in many other lines there is, at present, a market at home for everything that can be turned out from the available raw materials, and at prices providing a good margin of profit.

That present conditions will continue is not to be expected. Public men like Premier Drury have, with commendable frankness, sounded a warning as to the necessity for production and thrift, and the U.F.O. leader has been candid and emphatic in referring to lower prices. The Toronto *Globe* goes so far as to talk of a "hard times" serum to "bring the world's pulse back to normal."

That there must be a process of deflation before Canada and other countries which have been engaged in the great war can reach a solid foundation upon which to build permanently for the future is something which HARDWARE AND METAL has long regarded as inevitable, although from time to time it has been postponed. This readjustment will, no doubt, be accompanied by a strain upon the economic and social fabric of those countries which are suffering from a serious shortage of commodities as well as depleted financial resources and the domination of radical leaders. But at the same time we believe that if there are hard times in Canada it will be largely the fault of Canadians. The world is short of foods and commodities. Canada has the raw materials and available agricultural areas. If we can produce efficiently there is a market waiting. And if we are thrifty we can afford to extend credits to those countries worthy of our confidence. The Bolshevik element must be held in control.

The success of the Victory Loan established the solidity of Canada's financial resources. The people have done their part. It will now be for the Government to do its part. The money has been provided to clean up the situation and to get the national machinery back to a normal basis. It is for the Government to do just that. At present the national expenditures are far above income. If they continue on this basis there is nothing in sight but another Government loan a year or so hence despite rather indefinite assurances to the contrary.

It is to be hoped that Ottawa will not take advantage of the loyalty and generosity of the Canadian people to continue extravagances which must sooner or later be curtailed—and the sooner the better. If the people are to successfully readjust their personal affairs an example must be given by the Government.

## *THE CHRISTMAS TRADE*

THERE is every indication that this season's Christmas trade will break all records if merchants can get enough goods to supply the demands. It has already begun and thousands of citizens realizing that the early shopper is the one who will get the things he is likely to want are making their purchases. Many hardware merchants are finding that their stocks are moving out at a rate that looks ominous when it is considered that there are five more weeks until Christmas. Rush orders for more goods are proving unavailing in many cases as the manufacturers cannot handle what they already have on their books. The only answer to this situation is that many people, a great many people in fact, are

going to have to buy something different from what they planned, simply because they will not be able to get what they had in mind. Here is where display and salesmanship will play a great part and also the large stock of really practical and serviceable articles which comprise a hardware stock. If people cannot get cutlery suggest silverware or cut glass or electrical goods or some other line. Keeping your stock out on display all the time will be a big help in offsetting any shortage you may have in some lines.

## *SPENDING FOR COMFORT*

THE man who is making money—and the working man who is not making good money is the rare exception to-day—is spending a larger share of it than ever before on things that will make life easier for him and his home more comfortable. He has seen electric lights in the home of a friend and he knows that the friend would not be without them, so he plans to get them too. His wife probably has an electric iron and has seen an electric sweeper in action while out somewhere and she will never be satisfied until she gets away from the sweat and dust of old-time methods of sweeping. Or perhaps it is a hand power washing machine she wants, or a water power, or an electric machine. At any rate, it is something that is going to make life easier and pleasanter for her. Very often they are both agreed on some such improvement as modern plumbing or new bathroom fixtures. It is just such cases as these that account for the enormous demand for merchandise at the present time, a demand which is taxing the capacity of manufacturers to keep up with. Instead of growing less this demand is going to be greater, because just as soon as men and women learn about the things they have been going without there is going to be no stopping until they get everything that is within their reach. Once they get electric lights and an electric iron in their home they are going to want other electrical goods. Once they get water installed in the house, it is only a question of time before they will have other conveniences. Once they see how well a nicely painted room shows up, it is only going to be a short time before the whole house is gone over. And so it goes. No merchants in the country are in a position to supply so many of these needs as the hardware merchant and the prospects for business were never brighter. This is just as true of the merchant in the small country village as in the large city. The people are finding out that they have the money to buy the things they would like to have and they are going to have them.

## *SOLVING THE HEATING PROBLEM*

NECESSITY is the mother of invention and it is interesting to note what is happening by those who faced by a great and growing shortage of coal, are trying to work out some plan for heating. The town of Renfrew has carried a by-law to expend $25,000 on a central heating plant for the business section. The town of Owen Sound, it is stated, has under contemplation something along the same line. New York is undergoing a remarkable transition in regard to heating and from a huge coal burning centre is being turned into an oil burning city. Many of the huge sky scrapers will be kept warm this winter by heat obtained by burning oil. Not a few power companies have started installation of equipment which will enable them to burn oil instead of coal. The whole problem of heating has, owing to coal shortage and strikes, assumed an acute stage which has resulted in efforts being made to try new plans. One of these days we may wake up to find that coal is really not the best or most economical fuel for heating. Predictions are being freely made that this will be the case.

## *BOOSTING HOME TRADE*

FORTUNATE indeed is a community whose business men advertise wisely and liberally, says a bulletin from the Associated Advertising Clubs of the World, for that community will grow and prosper.

Good advertising, which means steady advertising in space big enough to tell the story that the advertiser wants to present, brings new dollars to town, and keeps home dollars at home, the bulletin continues.

And what becomes of the dollar that goes into the cash drawer of a local merchant? Three-fourths of it or thereabouts (depending somewhat on the line of business and the nature of the goods sold) goes to the wholesale dealer or manufacturer for the goods the store sells.

The rest stays in the home town. Most of the other twenty-five cents out of each dollar goes for rent, salaries of employees, and to the local coal dealer, the light company and others whose goods or services are needed in keeping the store going.

Each time the advertising of local merchants brings $10,000 of new business to a town, at least $2,500 of it remains in the town, and is passed around from person to person, and all the people share in the resulting prosperity.

Though some people who are not themselves in business fail to appreciate it, everyone in a community has an interest in every new dollar that is brought to town, and that is just as true in the large city, where business is a great net-work of mutual interest, as in the smaller place, where it is easier to trace the benefits which every person receives.

Advertising has come to be a great power in business because advertising creates markets. Markets are in the minds of people, and can be made through honest advertising. Merchants and manufacturers have found that out, and that is why they advertise.

# EVENTS IN THE TRADE

## Business Changes

Charlton, Ont.—The Legault Hardware Co. has purchased the general store of Dominique Legault.

Hamilton, Ont.—Frank Elms has purchased the hardware and grocery business of W. H. Davidson.

Kerrobert, Sask.—The Herity Hardware Co. has purchased the business of the Nicholson-Herity Hardware Co., Ltd.

Limerick, Sask.—W. Thatcher, until recently of the firm of Thatcher & Prowse, Neville, Sask., has purchased the hardware business of G. W. McLeod.

Neville, Sask.—The partnership in the hardware firm of Thatcher and Prowse has been dissolved and the business is being continued by Percy Prowse.

## Obituary

The death occurred in Toronto of Wm. P. Ryrie, president of Hyslop Bros., dealers in autos and bicycles.

Arthur E. Lamalice, for the past twenty-five years an employee of Sheet Metal Products Company of Canada, Limited, Montreal branch, passed away on Sunday night at his home in Montreal.

Mr. Lamalice's death came as a great surprise to his immediate relatives and friends, as he had been at work on Saturday. He had made many friends in the City of Montreal, and at the time of his death was connected with the sales staff at the Montreal office.

Wareham S. Wisner, of Brantford, Ont., formerly head of the Wisner Seed Drill Company of that city, was fatally injured in Toronto on Monday by being struck by a street car. Charles S. Wisner, director and second vice-president of the Massey Harris Co., is a son.

James F. Munro, who was killed at Eganville, Ont., when an aeroplane in which he was riding, fell, was president of the Pembroke Woollen Mills Co.; a director of the Thomas Pink Co., Ltd., manufacturers of lumbering tools; of the Steel Equipment Co., Ltd., Pembroke; the Pembroke Iron Co., and president of the Superior Electrics.

Stricken with heart failure as he was rising at his home in Penetang, Ont., George H. Wright, hardware merchant, died a few minutes later. He was 70 years old and had been a resident of Penetang for forty-three years, being in the hardware business all that time. For more than twenty years he was a member of the council and occupied the mayor's chair for one year. He was also a member of the Board of Education and was prominent in Masonic circles. R. Alan Wright with the Pedlar People, Toronto, is a son, and another son, Heber, was killed in action at Zillebeke, in June, 1916.

J. T. Connor, of A. W. Faber, Incorporation and was prominent in Masonic circles. R. Alan Wright, with the Pedlar People, Toronto, is a son, and another son, Heber, was killed in action at Zillebeke in June, 1916.

## Fire Losses

Fire at Blyth, Ont., caused a loss of $17,000 in the hardware store of Wm. Moore & Son and the tinshop of G. H. Leith.

## Personals

Charles Craig, of D. H. Howden & Co., Ltd., London, Ont., who has been ill at his home for a week, is back at his work again.

The many friends of Adam Taylor, of the Taylor, Forbes Co., Guelph, Ont., will be glad to know that "Adam," as he is familiarly known to hundreds of friends in the trade, has baffled the doctors and is now on the road to recovery. Only a remarkable constitution could have withstood the severe injuries received by Mr. Taylor.

### *Comrades in Trenches Join Hands in Business*

*Paul Regan and James Dunbar, both veterans of the great war, who became acquainted while serving overseas, have started in the hardware business at Stettler, Alberta. Mr. Regan is an old-timer in the district, having settled there in 1907. Mr. Dunbar is a Scotchman who, before going overseas, resided in Detroit. He gained his first knowledge of metals in the big shipbuilding yards at Glasgow. The partners have engaged as salesman Mr. Harry Cullis, formerly with the Holton-Bradley Hardware Co., of Stettler.*

## Trade Notes

The Prest-O-Lite Company has purchased ten acres in Toronto and contemplates erecting a new $150,000 plant.

The Republic Motor Truck Co. plans to commence work at London, Ont., shortly on a Canadian branch plant to cost $500,000.

The Hanover Cement Co., Hanover, Ont., contemplates the construction of a large rock cement plant near Walkerton, Ont.

W. H. Davidson, hardware and groceries, Hamilton, Ont., has disposed of his business.

Waites' hardware, Orillia, Ont., is now occupying new and larger quarters in the Mulcahy block.

The Earl Grey Hardware and Furniture store, at Earl Grey, Sask., is now under the management of Messrs. Warren and Warren.

Work is to commence at once on an addition, to cost $100,000, to the plant of the Imperial Plow Works at Hamilton, Ont.

The Dominion Glass Company is expending $100,000 on an extension to its plant at Redcliffe, Alberta, and plans to manufacture lamp chimneys, lantern globes, and other lines.

Smith & Sons, of Buffalo, according to press reports, contemplate erecting a plant for the manufacture of wire specialties at either Niagara Falls or Welland.

The Satinette Products Manufacturing Co., Ltd., of Toronto, has secured a site on Pacific Avenue, and plans the erection of a new factory.

James A. Coles, implement dealer at Charlton, Ont., is putting in a stock of hardware and plans to handle both lines of merchandise.

A change has taken place in connection with the hardware firm of James Cowan & Co., London, Ont., and R. G. Edgecombe is retiring.

## Western News

W. "Pink" Watt has presented a very handsome silver loving cup to the Curling Club organized by the office and warehouse staff of Wood, Vallance Ltd., for annual competition.

Lyon Paint & Glass Co., of Winnipeg, have moved into larger quarters adjoining their former location.

"Don" Ferguson, manager of Wood, Vallance Ltd., auto accessory department, has returned from the Chicago Motor Show, which he reports was bigger and better than ever.

Marshall Wells Company, Winnipeg have opened a cafeteria for the convenience of employees.

Wood, Vallance Ltd. sales convention will commence this year on December 8.

## Montreal News

George A. Paine, representing A. J. Reach Company, Philadelphia, was in Montreal this week.

James Kinsman, of North Bros., Philadelphia, was in Montreal this week.

A. E. Warren, buyer for Frothingham and Workman, Ltd., has been confined to his home through illness.

H. G. Macpherson, Taylor Instrument Companies, Rochester, N.Y., was in Montreal this week.

Albert Taylor, of the George Taylor Hardware Co., Ltd., Cochrane, paid Montreal a visit this week.

W. Adler, of the American Thermo Ware Co., Ltd., was in Montreal during the week.

Ernest Bureau, of Richardson & Bureau, manufacturers' representatives, is spending several weeks in the Maritimes.

T. Mortimer, of Toronto, was in Montreal during the week.

John B. Paxton, of Drummond, McCall, Ltd., returned from a trip to the United States.

## Incorporations

Rex Oil Burner, Limited, capital $750,000, head office Montreal, plans to manufacture and deal in oil burners of all kinds.

McKinnon Industries, Limited, St. Catharines, Ont., has been granted permission to increase its capital stock from $1,000,000 to $2,000,000.

The Robert Simpson Eastern, Limited, capital $2,500,000, head office Halifax, plan to carry on a general merchandising business.

The Robbins & Myers Company of Canada, Limited, capital $2,000,000, head office Brantford, Ont., plans to manufacture and deal in electrical equipment.

Canada Coal Briquette and Liquid Fuel Company, Limited, capital $70,000, head office Montreal, plans to manufacture and deal in coal and liquid fuels.

Brunswick Shops, Limited, capital $50,000, head office Toronto, plans to carry on a general business in gramophones and supplies.

Reliance Fuse Company of Canada, Limited, head office Bridgeburg, Ont., capital $500,000, plans to manufacture and deal in electrical goods.

Electric Machinery Co., Limited, capital $100,000, head office Montreal, plans to manufacture and deal in fixtures and electrical equipment.

Premier Oil and Gas Producing Company, Limited, head office Toronto, capital $250.000, plans to develop oil and gas properties.

Sigmore Limited, head office Windsor, Ont., capital $50.000, plans to carry on the business of wire drawers, tube makers, japanners and enamellers.

The Satinette Products Manufacturing Company, Limited, head office, Toronto, capital $50,000. plans to manufacture and deal in polishes, creams, oils, stains, etc.

Hatzel and Buehler, Inc., head offices Windsor, capital $50,000, plans to manufacture and deal in electrical equipment of all kinds.

## Charles H. Gratton Appointed Manager

The T. S. Simms Co., Ltd., of Moncton, N.B., has just appointed Charles H. Gratton as manager of the Montreal branch. Mr. Gratton has had a wide experience with both the wholesale and retail hardware trade in Montreal. For ten years he was connected with I. L. Lafleur, Ltd., and here received instruction in both retail and wholesale branches of the business. Following this he was in business on his own account under the name of the Union Hardware Company, which enterprise was operated on St. Catherine Street for a period of five years. Subsequent to this he joined the sales staff of Lewis Bros., Ltd., and covered Northern Quebec for that firm. Two years ago he joined the sales staff of Brandram-Henderson, Ltd., with which firm he has been connected since. An interesting part of his experience was that of a special commission for this firm to the big trade fair held at Lyons, France, last spring. Mr. Gratton's familiarity with the French tongue stood him in excellent stead for this particular work.

It might be said that Mr. Gratton was one of the earliest Canadian trade representatives to cross the ocean after the war had ceased.

*CHARLES H. GRATTON*
*Who has been appointed Montreal Manager of T. S. Simms & Co., Limited.*

## Douglass Carter Goes With Lewis Bros., Ltd.

John A. Frazer, sales manager of Lewis Bros., Ltd., announces the appointment of Douglas G. Carter as assistant sales manager in succession to Tom Houghton.

"Douglas," as he is known to his friends, learned the hardware business at Picton, Ont., where he was associated with Carter Bros., the senior member, of which firm is W. J. Carter, Douglas' father.

He spent some two years with Lewis Bros., Ltd., joining the travelling staff in 1915, and remaining with the firm for about two and a half years, when he returned to assist his father in the retail store at Picton. In all, his connection with the retail trade at Picton covered a period of ten years. The many friends of Mr. Carter will extend to him the best of good wishes in his new responsibilities.

## W. J. Carter Honored By Picton Fair Board

At the annual banquet of the Prince Edward Agricultural Society, W. J. Carter, hardware merchant, at Picton, Ont., was presented with an address and a handsome gold watch in appreciation of the work he has done for the organization. It was felt by all that Mr. Carter's services, always so cheerfully given and so effectively rendered, deserved recognition, and his fellow-directors surprised him at the annual banquet. The address was read by B. R. Leavens, the first vice-president of the society, and Grant Thompson, second vice-president, made the presentation. The address was signed by the officers and directors. Mr. Carter expressed his thanks suitably.

### A. W. POOLE HONORED

A. W. Poole, who has purchased control of Stewart & Wood, Ltd., Toronto, was pleasantly surprised by the salesmen of McArthur, Irwin, Ltd., when they presented him with a beautiful Old English oak humidor, filled with his favored indoor brand of cigars. The presentation was made by William Reynolds, who referred to the pleasant relations which had existed between Mr. Poole and the sales staff.

In replying, Mr. Poole, who had been completely taken by surprise, stated in his usual happy manner that the splendid and rapid growth of the McArthur, Irwin Company was due in no small measure to the efforts of the salesmen.

### NEW WICKER-WEAVING INDUSTRY MAY BE ESTABLISHED IN WESTERN CANADA

Winnipeg may shortly have a new industry in the machine manufacture of baskets and all articles of wicker, according to recent reports from Minneapolis. The industry is the outcome of an invention of Marshall Burns Lloyd, of Menominee, Mich., the Canadian rights of which were sold to a group of U. S. capitalists, including J. W. Wells and F. A. Spies, millionaire lumbermen of Menominee.

For many years inventors have tried unsuccessfully to invent a machine to weave wicker, but the new discovery is successful to the point where it will do in twenty minutes more wicker weaving than can be done by a hand weaver in ten hours.

Lloyd, the inventor, was born in Meaford, Ont. A previous successful invention was that of a machine to weave steel wire for bed springs. He is also responsible for the invention of the machine which welds thin-gauge seamless steel tubing.

# Interesting Evidence at Investigation Into Alleged Combine

A GOOD deal of interesting evidence and comment was given at the resumed hearing of the application of the Canadian Laco-Phillips Company to have the Canadian General Electric Company declared a combine. An account of the preliminary hearing appeared in last week's issue of HARDWARE AND METAL. An entire day was spent at the resumption of the hearing in getting information from both sides. A decision in the matter is expected very shortly.

The Canadian Laco-Phillips Company sought to prove that the Canadian General Electric was a combine and, as such, inimical to the public interests. Counsel for the Canadian General, on the other hand, maintained that that company merely sought to protect the patent rights acquired by it at considerable expense and that instead of being injurious to the interests of the public, the lamps were being provided to Canadians at prices cheaper than in the United States and England.

### Complete Board

The complete board was present for the hearing, including Judge H. A. Robson, chairman; W. F. O'Connor, K.C., vice-chairman, and James Murdock, commissioner.

Senator Nicholls told of the various stages in the formation of the Canadian General Electric. When he was asked by Mr. Anglin what arrangement or agreement existed between the Canadian Company and the General Electric Company of the United States, Mr. Hellmuth objected. Mr. Anglin maintained that what he wanted to show was that there was an agreement between these companies and others that there should be no infringements of territory in which each was located. However, Judge Robson ruled that the case in hand did not cover this and to go into it would be setting up an entirely new case.

### General Increase

When Mr. Anglin turned his enquiries to the question of lamp prices, Senator Nicholls stated that the tendency of the material parts had been "towards an increase in every direction." In reply to questions the witness said that up to 1917 prices of tungsten lamps advanced, but from that time up to last Fall there had been reductions totalling 30 per cent. This, he explained, was with the object of making the tungsten lamp the cheapest in the world to the Canadian consumer. When asked he denied that there had been a specific object of putting the Canadian Laco-Phillips out of business, but, he admitted, this had been partially the object. Prices were higher in the United States and much more so in England than here, he said.

### About 10,000,000

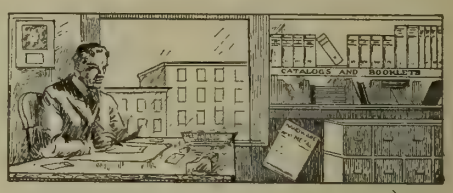
The witness, under examination, estimated the total lamp consumption in Canada to be about eight or ten millions. He said his company sold about five millions, and that the number imported was less than five per cent. The Canadian Tungsten Lamp Company, he stated, were licensees of the C.G.E. and paid them royalties.

### To Increase Output

Senator Nicholls readily admitted recently refusing to consider the question of licensing the Canadian Laco-Phillips Company and that at one time, under some pressure of the War Trade Board, this firm had been granted a limited type of license. Continuing his evidence, the witness declared that with the increasing volume of business, they expected to continue to decrease prices to the consumer and that they expected to have an equipment to turn out fifty per cent. more than their entire output in Canada.

L. A. Johnston, manager of the Northern Electric, Montreal, and John Burns, of the Mundelsloh Company, both testified that there was a shortage of lamps in Canada, while the latter said that if the small lamp sold by the Laco-Phillips Company was off the market the shortage would be greater.

### Question of Patents



The argument of counsel on both sides centred largely around the question of patents. Mr. Anglin argued that an attempt was being made to drive his company out of the lamp field by refusing to sell to them supplies of the drawn tungsten wire used for lamp filaments. He maintained that the Canadian General Electric was making use of their patent rights to unduly limit the manufacturing of an article subject to trade and commerce and to unduly prevent competition in the production of such article. He urged that the board recommend action to revoke these patents.

### Right to Protect

Mr. Hellmuth, on behalf of the C.G.E. asserted that the public had suffered no injury, and that therefore the matter was not one for the Board of Commerce but for the ordinary courts of law to decide. He maintained that the patent rights held by his company covered the making of the lamps, that the Canadian Laco-Phillips Company would be infringing on these rights in using the tungsten wire in manufacturing incandescent lamps, and that therefore the General Electric was justified in refusing to supply a business rival.

He claimed that the matter was purely the question of a company's legitimate right to protect its patents from infringement and that it would be unjust if these patents, acquired by his company at considerable expense, should be nullified by the Board of Commerce. He held that the question was one to be settled in the courts of law, where an opportunity for appeal was provided.

Replying to Mr. Hellmuth's claim that the public had not been injured and that it would be time for the Board of Commerce to act when such was found, Mr. Anglin alleged that prices were being kept down now for the purpose of driving out competition.

### Birmingham Small Arms Co., Ltd.

A catalogue issued by the Birmingham Small Arms Co., Ltd., Birmingham, England, lists the lines of guns and rifles manufactured by the firm, giving complete details regarding sizes, interchangeability of parts, care and cleaning. B.S.A. air rifles are also listed and there is a section devoted to sights and registers. The catalogue contains twenty pages, each 8½ x 11 inches, and is attractively illustrated throughout. The firm has also issued a booklet dealing with the design and manufacture of the B.S.A. .22 super-accurate match rifle. Copies of both the catalogue and booklet may be obtained by readers of HARDWARE AND METAL upon request.

### PENBERTHY INJECTOR CO., LIMITED

Catalogue No. 25 V, issued by the Penberthy Injector Co., Limited, of Windsor, Ont., lists the lines of steam radiator and hot water radiator valves manufactured by the firm, as well as brass gate valves, brass valves, hydraulic vacuum pump, automatic cellar drainer and brass check valves. The catalogue is very attractively printed and illustrated. Readers of HARDWARE AND METAL, who desire copies, may obtain them upon request.

### Glidden Co., Ltd.

The Glidden Co., Ltd., Toronto, is sending out a booklet entitled: "When is a White House, White?" The booklet tells about the line of white paint the firm manufactures. Readers of HARDWARE AND METAL may obtain a copy on request.

### The Stanley Works

The Stanley Works, New Britain, Connecticut, has issued a catalogue listing the lines of garage hardware for rolling doors manufactured by the firm. The catalogue contains twenty-one pages and is profusely and very attractively illustrated. The company has also issued a booklet, "Buildings You Have Seen." Copies of both the catalogue and the booklet will be sent to readers of HARDWARE AND METAL upon request.

# Enthusiastic Over Canada's Future

## Managing Director of Baldwin's, Limited, Big Welsh Tin Plate Firm, is Looking for Splendid Trade Developments

ACCORDING to information given HARDWARE AND METAL this week by J. C. Davies, managing director of the company, the big new plant being erected in Toronto by Baldwin's Limited, will be producing by July, 1920. Work is being rushed and splendid progress is being made.

The report has been published in some papers that Baldwin's, Limited, intend to work from the ore, which means the installation of blast furnaces and perhaps a coking plant.

### Large Tonnages

When asked regarding this, Mr. Davies said, "For the present we intend to operate the furnaces, depending largely on scrap metal, for the turning of which into steel ingots the works are admirably fitted. We will be purchasers of very large tonnages of scrap material, much of which I am given to understand goes out of the country at present. Our decision regarding the installation of furnaces later on to produce our own iron from the ore will depend on the development of the business and the conditions of the market.

### Will Help Others

We believe that the operation of our plant here will be a good thing for numerous other industries, for there are many lines affected by the operation of a plant that is turning out tin plate, and our other lines. Above all else for the present, though, we want to secure the co-operation and good-will of the Canadian people. We want that more than anything. We are taking a big step in coming to Canada, for many of our friends urged us to keep on supplying the trade here from our Swansea plant in Wales. We have taken the big step and we certainly are not going to turn back now."

### Sees Good Market

"We expect to put the finishing mill in operation, and then all lines can be turned out. Of course, there is a great forging capacity at the works, as you know, that was utilized to such good advantage in war work. We shall likely use that to turn out some of the heavy castings for our rolling mill. Some of the rest of it we shall secure in United States and some will come from the Old Country. As far as we can see there should be easily a market now for 200,000 tons annually of tin plate, black sheets and black plate (black plate for enamel work), galvanized sheets, etc. We also intend to develop the forging plant."

### Future of Canada

Mr. Davies is returning to the Old

(Continued on page 61)

# Best Attended Convention in 65 Years

## Executive and Sales Staff of the James Smart Plant of the Canada Foundries & Forgings, Ltd., Meet at Brockville

THE annual conference of the service and sales staff of the James Smart plant of the Canada Foundries and Forgings Ltd., held at Brockville, was the largest meeting of the executive and salesmen since the founding of the business in 1854. Among those present were several who have seen more than thirty years of continuous service in direction and selling.

Two days were occupied in business meetings, at which pertinent topics of interest were discussed. These meetings were interspersed by trips by road and river through Brockville's beautiful environments.

The annual dinner was held the first evening with the general sales manager, Mr. B. J. McCormick, as host. Addresses were given by J. H. A. Briggs, secretary-treasurer of the Canada Foundries & Forgings Ltd.; James Arnold, assistant-general manager of the Canada Foundries & Forgings Ltd.; D. R. Fowler, head of the sales, and John R. Bell, head of the service staffs of the James Smart plant, spoke of the 1920 programme. Others who spoke were W. J. Irving, Montreal; J. P. Weir, Montreal; T. H. Webster, Elora; T. Wright, Toronto; N. S. Vanzant, Winnipeg; W. T. R. Irving, of the Maritime Provinces; W. F. Reynolds, Brockville; J. A. Turnbull, London; James Boaz, Toronto, and L. S. Eiler, of Montreal. Also in attendance were: J. C. Thomson, H. E. VanDuzen, T. Guest, W. Birdsall, T. M. Strain, L. Phillips, and W. E. Cowan, Charles F. Swaze, W. Deveau, L. Smith, and G. H. Hutcheson.

*Members of the Service and Sales Staff of the James Smart plant of the Canada Foundries and Forgings, Ltd., who attended the annual conference which was held at Brockville, Ont.*

# THE CLERKS DEPARTMENT

## How He Chooses His Men For Promotion

### Those Who Reach Out and Profit by the Experiences of Others Get Along Fastest, Says F. H. Goff, President of Big Trust Company. Willingness to Take Responsibility Also a Big Factor

TAKE any employee in a store, office, shop, factory, no matter where, and let him work out this formula—strict sobriety, honesty, frankness, punctuality, courtesy, a discreet tongue, a passion for thoroughness, coupled with ambition and willingness to work—and you cannot keep him down. And the best of it is, the qualities I have named are within the reach of all. Any man who will practise these rules for six months will find himself developing a new kind of self-confidence, and things will come his way as never before."

This is the basis of success in business, says Frederick H. Goff, President of the Cleveland Trust Company, one of the largest institutions of its kind in the United States. In the "American Magazine" A. S. Gregg tells the story of Mr. Goff's rules for selecting men for promotion as follows:

#### The Two Viewpoints

No matter what you may be doing—driving a truck, selling goods, keeping books, or working in a factory—there are two ways of looking at your job. One is to feel that you are in a treadmill, with the door locked. The other is to feel that you are part of the concern, that you can grow with it, that your work is not a dull grind, but a path alive with opportunity.

Whatever way you look at it, you may be pretty sure that the boss is going to find it out. When he does he will put a tag on you, and it is mighty important to you that he should use the right kind of a tag.

When I asked Frederick H. Goff to tell me just how he determined what tag to tie on an employee he gave me quite an illuminating answer. Goff, by the way, is president of the Cleveland Trust Company, at Cleveland, Ohio, a great institution, with many departments and fifteen branch banks.

Hundreds of bright young men and young women make up the working force of this concern. Goff has a way of knowing an astonishing amount about each of them, and it is quite likely that your own employer is equally well informed about your work and how you feel about it.

#### Grasp of Business

"One of the things that causes me to 'tag' a man for promotion," said Goff, "is his grasp of the business as a whole. Of course he must be a success at his immediate task; but that is not quite enough. To grow he must gradually learn how his particular job is related to other jobs, and how each one is related to the general purpose of the institution.

"A young man may do good work as a receiving teller. But if he stops there, that does not satisfy me. I want him to grow, so that he can be moved along to the paying teller's cage, and then, perhaps, be made manager of a department. Men who grow by experience alone do not go ahead very rapidly; but those who reach out and profit by the experiences of others are the ones who make the most rapid advancement.

#### Acts on Own Initiative

"The next point I note in a man is his ability to see what should be done without being told. That quality naturally links up with the first. One who has the larger view will see all questions in the light of his larger knowledge.

"A man who waits for somebody to tell him what should be done at every turn does not make much of an impression upon me. I do not mean that he should rush off and act on impulse without authority. What I mean is that he should be ready with suggestions; should be able to see with his eyes and hear with his ears It makes me happy when I find a young fellow who can out-think me or his department head on some matter.

"All who work for a salary should realize as early as possible that an employee has two kinds of value in the estimation of his employer: One is expressed by the question, What can he do? And the other is, What does he know? The big pay goes to the one who knows the most and can direct others.

"Another quality that impresses me is willingness to take responsibility. This quality involves self-confidence and good judgment. The essence of it is courage to take the risk of doing something without waiting to be told just how to do it. There are all kinds of opportunities in every business for employees to reveal the qualities that I have indicated.

"I place a high value on dependableness. If a man tells me he will do a certain piece of work, I want to feel that it is as good as done. Slackness in getting to work on time, staying overtime for lunch, or leaving before one's work is finished, may hinder the advancement of a man otherwise deserving. Men of ordinary ability sometimes go over the heads of really smarter men in business, simply because the employer knows they can be trusted to the limit The value of this quality is quite clear when you remember that the modern business executive must delegate much of his responsibility to associates.

"Be willing to relieve your department head or the next man above you. Your immediate boss wants to get certain things done. They have an important bearing on the business. Make a study of his problems; and as opportunity offers give him a lift. Stay overtime, if needed, in order to do it. Of course there is no immediate money in such work; but you gain something that will soon grow into money. You show willingness to do a little more than you are paid for doing, and that opens the way for a better job and larger pay.

#### Higher Positions

"When I became president of this company, I determined to 'grow' men for the higher positions. A very important factor in accomplishing this has been the holding of staff meetings at which questions from various departments are threshed out and predigested for the directors. The advantage of the staff conference is that the heads of departments obtain a comprehensive view of all the activities of the bank. It keeps the executive officers from getting into a rut, which is fatal to progress. All promotions right up the line are made from within the organization. A young man who starts as messenger or receiving teller knows that the road is open for him, and that his progress depends entirely upon himself.

"We give careful attention to the quality of the young people taken into the organization. After a young man has been employed, he is given an individual rate card on which is entered credits for certain personal qualities. These qualities are: Character, Efficiency, Courtesy, Judgment, Ambition, and Punctuality. They are marked on the scale of 100, and for convenience the different grades are indicated by the letters A, B, C, D. A stands for excellent, indicating a percentage ranging from 90 to 100 per cent.; B, for good, 80 to 90; C, fair, 70 to 80; D, poor, below 70. Only the average is taken.

"The head of each department gives the rating for those under him. When his card shows that a man is frequently tardy, is wanting in ambition, or is falling off at any other point, the matter is called to his attention, and oftentimes a frank talk will start him the other way.

#### Locating Misfits

"This rate card also enables us to locate misfits. When it develops that a man is manifestly in the wrong job, we begin shifting him about, trying to find where he does fit. We have been quite successful in fitting such men in where they could be happy and do good work. We have gone so far as to find places for misfits in other lines of work; one case in particular comes to mind:

"A capable young fellow of good qualities who had been with us for a year or two began to slip at several points. When he was asked about it, he stated candidly that he was more interested in machinery than he was in banking. He was too good to be merely let out, so we decided to get him a job in a machine shop. Through one of our clients we located just the place he wanted, and when I last heard from him he was doing well.

#### Found Places for Them

"We have gone further in one or two cases, and found places for men who have actually wronged us. This is done through bank patrons who are in sympathy with our views. A young man who has not been able to withstand temptation is quietly shifted to another company, with a full understanding all around, where he is given an opportunity to make a new start.

"Special instruction in classes is provided for those who may need it; and when an employee fully realizes that his progress depends on what he knows, he is quick to take advantage of the opportunity to study.

"I am a great believer in having an understudy for every executive position in the bank. For that matter, there should be an

understudy for every position of responsibility in every business organization. With a man ready to step into a vacancy the concern is made independent of any one man. A business that promotes from within and 'grows' its own men need never have any trouble about understudies. It should be the ambition of every employee to get quietly into line for the next job, for the inevitable change which is sure to come sooner or later.

### Should Have Opinion

"I also appreciate independence of opinion. In our staff meetings each man is encouraged to speak his own mind without fear or favor. I may not agree with him at all, but I want the organization to have the benefit of his way of looking at things. In important matters I go so far as to accord him the right to appear before the directors, and to state his views. In that way, he feels that he has had fair treatment and that, even if his views are not accepted, it is not because he did not have a hearing."

Goff's way of dealing with the employees of the bank brought a singular reaction, which attests the value of his methods. A year or two after the directors had adopted a pension system, and taken out group insurance for all employees, they established a bonus or profit-sharing plan. Soon afterward Goff was approached by one of the junior officers, who said the employees wanted to inaugurate a "booster campaign" for bringing in new accounts. Goff did not fall in with the plan readily, for he is not much in favor of "drives" or "spurts" for getting business. Then he was informed that "the boys" out in the bank wanted to show their appreciation of what had been done for them, by organizing the entire force into "teams" for the purpose of increasing the number of depositors.

### Did Work Well

When it was put in that way, Goff yielded and authorized "the boys" to go ahead with their idea. The directors did not have anything to do with the booster campaign, either in starting it or in seeing it through. But they "took notice" before it was over.

The undertaking was managed entirely by the junior officers and heads of departments. It should be added that the instigator and leader was a product of Goff's policy of "growing" men for the higher positions. He had started as a messenger, and had worked his way up the line by developing the qualities described in the first part of this article. He is now a vice-president.

When the results of the booster campaign were counted, it was found that "the boys" had gained 3,877 new accounts and $649,021.89 in initial deposits. The campaign lasted thirty days, and was such a great success that, when it was over, the directors gave a banquet to the entire force.

### Booster Campaign

Last December another booster campaign was put on, similar to the first one, the results being 8,033 new accounts, and $825,441.32 in initial deposits—a very substantial gain. This time the directors again "took notice" with another banquet.

The general plan was to divide the employees of the bank into about forty teams, with captains. Each person was then given a card ruled off in squares; and as fast as a new account was landed, a gold star was pasted in one of the squares. Tellers and others who came in close contact with the public proudly displayed their honor cards, and others kept them among their valuables.

### Original Plans

Some of the boys evolved original plans for obtaining customers. They first went after all their friends and relatives; then they gave little talks on thrift at store and factory meetings, and clinched the matter by getting signers on the spot. Schools, shops, stores, the Y.M.C.A. and the churches were invaded by the enthusiastic boosters.

Frederick H. Goff is himself a striking example of his own ideas on achievement. As a schoolboy in Cleveland he carried a newspaper route which obliged him to hustle out at five in the morning—and he says with commendable pride that he did it without an alarm clock. Later he was sent to the University of Michigan, at Ann Arbor, to complete his education. While at college he borrowed eight hundred dollars from a room-mate on a plain unsecured note, which carried him through.

### Was $800 in Debt

Thus, when he graduated at twenty-two, with the degree of Ph.B., he was eight hundred dollars in debt. He decided to become a lawyer; but he made up his mind that before he did anything else, he was going to pay that debt. On his return to Cleveland he got a job as librarian of the Cleveland Law Library at five hundred dollars a year. In taking books to some of the courtrooms he had to carry them down four flights of stairs, and bring them back again. He walked to and from his work four miles morning and evening, and read law at home after juggling with law books all day.

In order to keep down expenses he carried a sandwich in his hip pocket for his lunch. He saved his money, made a little extra by writing briefs, and at the end of two years had paid back every cent of the eight-hundred-dollar loan. The privations he endured cannot be set down in this article. The big thing about the entire affair is that he took it as a matter of course that he should return the last cent of the money he had borrowed before he did anything else.

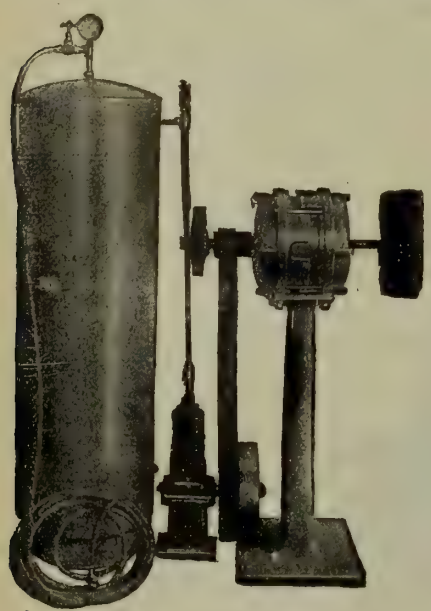
### Went Into Business

When it was done and he took stock of his affairs, he found that he had just $15 in his pocket. He was twenty-five, a member of the bar, and ready to make his bow as a lawyer. So he decided to hang out his shingle and go into business for himself. He rented desk-room in another lawyer's office for $7.50 a month. During the first thirty days of his legal career he took in $2.40; the second month his income increased to $3.50, and the third month he made $12. But before the year was out he had earned $1,200.

Speaking of his early struggles, Goff said: "The first years of my experience as a lawyer was a time of testing. I attended to every piece of business, no matter how small, as carefully as if the fate of a kingdom depended upon my faithfulness. I did a great deal of work for which I did not receive any pay; but I was determined, regardless of what the compensation might be, to be thorough in everything. Perhaps my fidelity in little things aided in building up a reserve of confidence among my friends and associates. I did my utmost to persuade them that I could be depended upon to serve their interests.

"I have always had a desire to know the exact facts about any situation, and have spent hours my clients knew nothing about in the endeavor to obtain every scrap of information bearing on a case or a problem that I had in mind."

*Uncle Sam:—I don't know where we are going, but we are surely on the way.*
—From the Pittsburgh *Leader*.



# NEW HARDWARE GOODS

## OFFERED TO CANADIAN HARDWAREMEN

### BUFFER AND GRINDER

The Lebron Buffing and Grinding Outfit is a machine which, it is claimed, will do the work of three individual machines, viz., buffing, grinding and operating an air compressor. The motor, it is stated, is of high-grade manufacture, and will stand up under hard usage. The motors are ball-bearing type, dust and grit-proof, and oil is filtered through felt washers.

The outfit is sold complete with compressor, tank, grinding wheel, buffer and

*Buffing and Grinding Stand*

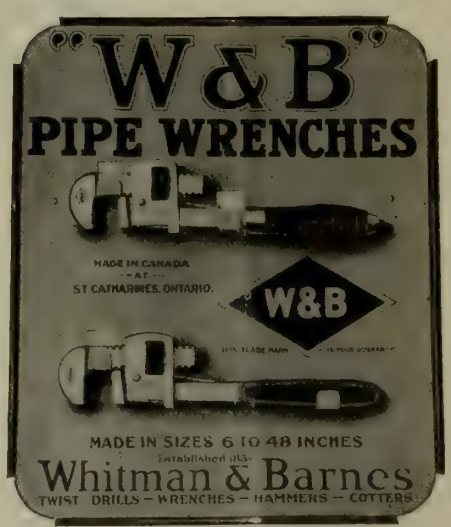
all tank and line fittings, if desired; or, motor and stand, including wheels and pulley for compressor-drive can be supplied: 110-220-440 volts, single or three-phase, 60 cycle.

This device is sold exclusively in Canada by the Northern Electric Company, Limited, Montreal, and branches.

---

### SWITCH

The C H Seventy Fifty Switch, manufactured by the Benjamin Electric Manufacturing Co. of Canada, Limited, Toronto, prevents all danger of fire due to leaving current "on" accidentally, it is claimed. The manufacturers state that the buttons tell clearly whether the current is "on" or "off." Pressure on the light button allows the current to flow, but the instant the black button is depressed the current is "off." With electric irons, it is stated, the switch is not only a convenience, but relieves the



*Switch*

socket from the wear of making and breaking the current, and thus saves it from burning out. Used with many appliances, the switch saves reaching up to an overhead fixture or going to a wall switch, as it may be placed close at hand.

---

### PIPE WRENCH DISPLAY EASEL

The Whitman & Barnes Manufacturing Company, St. Catharines, Ont., is sending out a handsome new display easel to assist dealers in selling pipe wrenches. The easel is made of sheet steel, attractively lithographed in colors. It carries one each steel and wood handle pipe wrench, and is of such a size that it may be conveniently used either on the counter or in trimming the window. The manufacturers claim for their

*W. & B. Display Easel*

wrenches that bar and jaw are high carbon drop forgings, heat treated and tempered to insure maximum strength. In addition, both bar and jaw are reinforced at points of extreme pressure or strain. The teeth are milled, insuring a slipless grip. Adjusting nuts are cut from solid steel and case-hardened, and wrenches are so designed that the frame is rigidly supported by the drop-forged bar, relieving the frame pin from any strain.

The jaws and bars are highly polished, and the ebonized wood handles are reinforced with steel ferrules.

#### Plaster Board

**Canada Hardware Co., Toronto.**—Will you advise us regarding the manufacturers of plaster board?

This may be obtained from the Canada Plaster Board Co., Ltd., of Brantford, Ont.

#### Aluminum Polish

R. T. Holman, Limited, Summerside, Prince Edward Island. Kindly give us names of manufacturers of aluminum polish.

Northern Aluminum, 138 Sterling Road, Toronto, Ont.; Orona Manufacturing Co., 29 India St., Boston, Mass.; Brillo Manufacturing Co., New York, N.Y.—Editor.

#### Large Hotel Range

Frank Koehler, Watrous, Sask. Please inform me who makes a large hotel range with one fire box at the end.

The Gurney Foundry Co., Ltd., and McClary Manufacturing Co., both of Toronto, Ont.; also the Prowse Range Co., Montreal, Que.

#### Wants Lime Substitutes

M. E. Thomas, Foster, Quebec. Am unable to note any advertisers of substitutes of lime in your publication. Please advise who to communicate with.

The Ontario Lime Co., Crown Office Building, Toronto, are agents for limes, etc.—Editor.

#### Repairs For Range

W. C. Hoskins, Champion, Alberta. Kindly advise where we can get repairs for Home Comfort Range.

The Wrought Iron Range Mfrs., 149 King St. W., Toronto, make this stove. —Editor.

D. K. Clarke, Hamilton, Ont. Will you supply us with the names of manufacturers of hardware store fixtures?

Cameron and Campbell, Toronto, are Canadian manufacturers, and the War-

(Continued on page 61)

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

THE general tendency throughout the entire hardware line seems to be a strong one, and many important changes are noted this week. The sheet situation continues to be a serious one and is causing great inconvenience both to the jobber and the consumer. The situation is now at such a point that it is often necessary for jobbers to buy back some of the sheets previously sold, and the rehandling costs something, naturally the price is stiffening continually. There is no immediate relief expected, it is stated, and the situation will have to automatically relieve itself. The present increase was 25 cents per cwt. over base prices.

Other changes noted were: Wire nails, showing an advance of 25 cents, making the new base price $4.95 per keg. Cut nails are now quoting at $5.00 per keg, fence staples and annealed wire show an advance of 25c over base prices, while bale ties are selling at 40 cents higher than previously. Roofing nails are raised to $10.75 per hundred pounds, while $1.00 extra is charged for quantities less than hundred-pound lots.

Ingot metals show a weaker tendency, tin being the only one to show a change in price and is selling at from 59 to 60 cents per pound. Iron bars are very firm and an advance would not be unexpected as the American mills have already advanced their price $3.00 per ton. Plate glass is quoting 10 per cent. higher.

Soldering coppers are now quoting at a base price of 59 cents per pound. Savage rifles show a sharp advance, 1899 model, solid frame, round barrel, is quoting at $56.00; Take-down at $61,75; Take-down Featherweight at $63.45; the 250-3,000 calibre is now $67.65. Gilmour auger bits show new and higher prices and are quoting at 17½ per cent. Eye and nut augers are quoting at net list and 2nd grade Beaver at 35 per cent. off the list, sets No. A 20½ quarters at $4.80 net, D 30½ quarters $7.40 net. Glass lamps advance 10 per cent.

Russwin food choppers show new prices as follows: No. 0 $27.00, No. 1 $32.40, No. 2 $38.90, No. 3 $51.85. Perfect handle screwdrivers and wrenches, cow bells, coppered wire and barrel bolts are also higher.

# MONTREAL MARKETS

MONTREAL, Nov. 20—There are many advances for the week and the big features are increases made effective for wire and cut nails and all wire products. These increases follow the definite forecasts made in HARDWARE AND METAL. The caption in the Montreal market last week stated that "Nails are firming." The whole list of wire products, including barbed, plain twist, coiled springs, staples, baling wire and bale ties are marked higher. It is to be expected that other wire manufactured products will immediately move to higher levels.

Another feature of the week that is of far-reaching consequence is that of a five per cent. increase in the price of heating stoves and of ten per cent. for ranges and cook stoves.

Increased prices will soon be effective for compression work and locks are to be advanced at once by the padlock makers. Iron and steel are very firm and there may be advances on these products. The trade in these lines is not excessive. Cotton wick has advanced about ten per cent. Leather halters are marked up in one quarter 25 per cent. Brass hinges are revised upward, the list being subject to an advance now of 30 per cent. Lead products are very firm. The buying prices are better this week for old scrap iron, particularly for cast iron.

Among the declines are those for ingot copper and spelter, while copper sheets and rods are also down one cent. There is an excellent tone to business and all lines are moving well, particularly Christmas goods. The greatest difficulty is that of procuring adequate stocks.

## *Barb Wire and Staples Are Revised Upward*

**Montreal.**

BARB WIRE, STAPLES, ETC.—New revised prices are effective for barb wire, in accordance with the advance of $5 per ton made last week for various wire products.

Plain, bright fence staples are now quoted at $5.35 per cwt., and galvanized at $6.10.

Barb wire—catch weights (when available, as these are being gradually eliminated), $5.65 per cwt.; galv. barb wire, 80-rd. spools, 2 pt. x 75 lbs., $4.35 per spool; 4 x 6, 85 lbs., $4.90; 4 x 4, No. 93, $5.30; galv. plain twist, per cwt., $6.15; galv. coiled spring, No. 9, $5.30; No. 12, $5.45; No. 13, $5.55; galv. plain, gauges 3 to 8, $5.90; 9, $5.25; 10, $5.95; 11, $6; 12, $5.40; 13, $5.50; 14, $6.35; 15, $6.80, and 16, $6.95.

## *Baling Wire and Ties Take on New High Prices*

**Montreal.**

BALING WIRE, TIES, ETC — Advanced prices are effective for baling wire, baling ties, etc.

The new prices on cut hay wire, annealed, are: No. 9, $5.80; 10, $5.90; 11,

$5.95; 12, $6.05; 13, $6.15; 13½, $6.20; 14, $6.35; 15, $6.50, and 16, $6.65.

Single loop bale ties are priced as follows: No. 12, $5.90; 13, $6; 13½, $6.10; 14, $6.15; 15, $6.30, and 16, $6.50.

## *All Lock Prices Due For An Advance*

**Montreal.**

LOCKS.—The various manufacturers of padlocks have withdrawn prices or have issued new revised prices. This means that advances of approximately ten per cent. will be at once effective.

## *Bibbs To Go Higher; Lamp Wick; Halters*

**Montreal.**

COMPRESSION WORK, HALTERS, WICK.—Prices on compression bibbs are being revised and an increase of considerable amount will be effective. The discount is expected to be somewhat below 30 per cent.

Leather halters are marked up about 25 per cent., while lamp wick is quoted 10 per cent. higher.

## *Copper Sheets and Rods Are Lower*

**Montreal.**

COPPER SHEETS AND RODS.—One cent per pound is the reduction made effective for copper sheets and rods. One-half to 2 inch rods are now quoted at 40c; soft sheets at 41c, and tubing at 45c.

## *Wrought Goods Firming; Brass Hinges Are Up*

**Montreal.**

WROUGHT HINGES, ETC. — Advances are effective for wrought brass hinges, the present basis being list plus 30 per cent. It is also stated that a further advance is to be effective in the near future for general wrought hardware.

## *Gasoline and Oil Hold; Are in Good Demand*

**Montreal.**

OIL AND GASOLINE.—The markets have ruled without quotable change during the past week, and the base prices for coal oil are still held at 22c to 25c per gallon. The price for motor grade gasoline is held unchanged at 33c per Imperial gallon.

## *Stoves and Ranges; Heaters Are Higher*

**Montreal.**

STOVES AND RANGES.—The market has been constantly advancing on raw materials, and only last week HARDWARE AND METAL stated: "Tendencies are still of an advancing nature." An advance of five per cent. on heating stoves and of ten per cent. on ranges and stoves has since been made effective, and this bears out what has been repeatedly forecast in these columns. It may be, even, that higher prices still will prevail.

The market on various wares is firm at the recent advances. Business has been seasonably active.

## *Hemp Material Firm; No Cordage Changes*

**Montreal.**

ROPE AND CORDAGE.—The market is unchanged, and while the amount of business coming to hand is not heavy, the tone of trading is a little better. Hemp is very firm and the tendencies are upward. In the United States the rope manufacturers advanced their prices a week or ten days ago 1c per lb. on pure manila, and then reduced it to the old price. The base prices for pure manila are now 31c; British and Beaver manila, 27c, and sisal, 23½c.

## *Wire Nails and Wire Up 25 Cents*

**Montreal.**

NAILS AND WIRE. — "Nails are firming, some say may advance." Such was the forecast made last week in HARDWARE AND METAL. Since that time an advance of 25c per keg has been made effective for both wire and cut nails, and the market is firm. This makes the base quotation $5 per keg.

Smooth steel wire is advanced in like proportion, the present basis being $5.25 for 0-9 gauges.

## *Iron and Steel Are Firm But No Advance*

**Montreal.**

IRON AND STEEL.—The market is a decidedly firm one, but no advances have been recorded. Some anticipate that, as in the case of wire products, an increase may be made effective at any time. One jobber reports that the movement has not been large of late, and assigns this as a reason for withholding any increase at the present time.

IRON AND STEEL

| | |
|---|---|
| Star finish machinery steel | 3 80 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 50 |

| Common bar iron, per 100 lbs. | 3 75 |
| Refined iron, per 100 lbs. | 4 75 |
| Mild steel | 3 75 |

## *Sheets Command a Variety of Prices*

**Montreal.**

SHEETS AND PLATES.—There is no promise of low prices on sheets. Everywhere jobbers are picking up supplies where they can get them and at prices which are decidedly a matter between the holder and the buyer. In other words, a decidedly nominal condition prevails, and there is no promise of relief at an early date. Jobbers and manufacturers, alike, are confronted with the same conditions.

| | | |
|---|---|---|
| **BLACK—** | | |
| 10 gauge | 5 90 | 6 65 |
| 12 gauge | 5 95 | 6 60 |

| 18 and 20 gauge | .... | 8 10 |

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

## *Lead Products Firm; Tendency Upward*

**Montreal.**

LEAD PRODUCTS.—The market is a very firm one and the tendencies are strong, advances being suggested in some quarters. It is felt, again, that the pig lead basis is likely to rule more or less as it now is. This being the case, it may be that the manufactured products will not advance materially, but some increase may come on sheets and also, probably, on solder.

| | | |
|---|---|---|
| Lead pipe | .... | 0 12½ |

| Do., broken lots | .... | 0 16½ |

## *Slight Improvement Noted in Old Metals*

**Montreal.**

OLD MATERIALS.—The market conditions are inclined to be quiet, but the prices are improved for old iron scrap, cast iron, etc. Wrought iron is quoted at $18 per ton, pipe scrap at $11, and machinery cast at $25-$26. The manufacturers are buying some supplies, and iron products should be maintained on a fairly high basis in view of deliveries and strike conditions which have obtained.

| | | |

| No. 2 busheling | 7 00 | 8 00 |
| Machinery, cast (ton) | 25 00 | 26 00 |

## *Copper is Lower; Spelter Easier*

**Montreal.**

INGOT METALS.—Prices have declined on ingot copper. The market is extremely dull, little demand existing in this market. Spelter is also somewhat shaded in price, while lead is steadier.

COPPER.—There is little new feature, in fact the market is even duller than it was last week, and the price is down 1 cent to 24c per lb.

TIN.—The market is still held at 58c per lb., but there may be an advance of price ere long.

LEAD.—At 8¼c per lb., some think that this metal has reached a high point, for the present at least.

SPELTER—A decline of one-eighth of a cent is reported for this and the price ruling here is now 10⅛c per lb.

ANTIMONY.—No change, and without feature to mark this metal the price holds at 10½c.

ALUMINUM—Decidedly little business and the basis is held at 34c.

PIG IRON.—The price of $50 per ton is unchanged.

# TORONTO MARKETS

TORONTO, November 20—The upward tendency of hardware still continues, and some important changes are again noted this week. The sheet market, both black and galvanized, is causing dealers and consumers no end of inconvenience. The situation has arrived at such a point now, that jobbers are often glad to buy sheets back that they previously had sold some smaller man and likewise the smaller man has to buy back from a still smaller man, the result being various prices, with some premiums being charged. There is no immediate relief looked for and the situation will have to automatically adjust itself.

Amongst the changes noted are, wire nails showing an advance of 25 cents, making the new base $4.95 per keg. Cut nails are now quoting $5.00 per keg, fence staples and annealed wire show an advance of 25 cents over base, while bale ties are quoting 40 cents higher. Roofing nails are raised to $10.75 per cwt., while $1.00 extra is charged for less than cwt. quantities.

Soldering coppers are now quoting at a new base price of 59 cents per pound. A sharp advance has taken place in Savage rifles, 1899 model, solid frame, round barrel, is quoting at $56.00; Take-down at $61.75, and Take-down Featherweight at $63.45; the 250-3,000 calibre is now $67.65. Gilmour auger bits show an advance of 17½ per cent. Eye and nut augers are quoting at net list, 2nd grade Beaver at 35 per cent. off the list. Sets A 20½ quarters at $4.80 net, D 30½ quarters at $7.40 net.

Ingot metals show a weaker tendency, tin being the only one to show a change though, and is selling at from 59 to 60 cents per pound. Iron bars are very firm with an expected advance in accordance with American mills, who advanced their prices $3.00 per ton. Plate glass prices continue to advance and are 10 per cent. higher.

Russwin food choppers are also higher and are as follows: No. 0 $27.00, No. 1 at $32.40, No. 2 at $38.90, No. 3 at $51.85. Glass lamps are up 10 per cent., and American padlocks have advanced 10 per cent., and Canadian makes are liable to follow.

## *Gilmour Auger Bits Advance 17½ Per Cent.*

**Toronto.**

AUGER BITS.—A sharp advance has been made in Gilmour auger bits, and will approximate 17½ per cent.. Eye and nut augers are net list, while the second grade Beaver brand are quoting at 35 per cent. discount off the list.

## *Lead and Zinc Products Prices Remain Firm*

**Toronto.**

LEAD AND ZINC PRODUCTS.—While the ingot market shows a weaker tendency, lead and zinc products show a firm price. The demand continues excellent and a fair amount of business is offering. The general effect of the labor unrest is still being felt to some extent, although advanced prices are not immediately expected. Quotations are as follows:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | .... | $0 12½ |
| Lead waste pipe, list, per lb. | .... | 0 13½ |
| Do., over 8 inches, list, per lb. | .... | 0 14½ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | .... | 15% |
| Lead wool, lb. | 0 11 | 0 12½ |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 12 | 0 13 |
| Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra. | | |
| Solder, guaranteed, lb. | 0 35½ | 0 38 |
| Solder, strictly, lb. | 0 34½ | 0 37 |
| Solder, commercial, lb. | 0 32½ | 0 35 |
| Solder, wiping, lb. | 0 31½ | 0 34 |
| Solder, wire, lb. | 0 35½ | 0 41 |
| Zinc sheets, per lb. | .... | 0 17 |

## *Soldering Coppers Up to 59c Base*

**Toronto**

SOLDERING COPPERS.—A higher price is noted on soldering coppers and the new base is quoting at 59 cents per pound.

## *Corrugated Sheets Remain Firm, No Change*

**Toronto.**

CORRUGATED SHEETS show no change. The demand continues to be a good one, and although related to flat sheets, do not show the same scarcity. In fact, jobbers state they are not losing any business and are well satisfied with the trade offering. The following quotations are current:

| Corrugated Sheets— | Per 100 square Feet Gal'zed | Painted |
|---|---|---|
| No. 28 gauge | $8 25 | $7 00 |
| No. 26 gauge | 9 00 | 8 00 |
| No. 24 gauge | 13 50 | 10 00 |
| No. 22 gauge | 16 00 | 12 50 |
| No. 20 gauge | 19 00 | 16 00 |
| No. 18 gauge | 24 00 | 19 50 |

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

## *Boiler Tubes Remain Unchanged*

**Toronto.**

BOILER TUBES.—While the boiler tube situation is not so serious as the wrought pipe, there is a noticeable scarcity. Jobbers, however, state that tubes are coming in from the States in normal quantities and no business is being turned down. The prices still continue firm and are quoting as follows:

| BOILER TUBES— | Per 100 feet Seamless | Lapweld |
|---|---|---|
| 1 inch | $27 00 | ..... |

### A CORRECTION

In the issue of November 8 of HARDWARE AND METAL, on page 72, in speaking of the brush market, an error was inadvertently made concerning the price of badger. In the fourth paragraph it was stated: "As an instance of the price of one raw material, badger, the product which formerly cost $16 per ton is now quoted at $57."

As will be obvious to anyone familiar with the price of this material, the mistake is that of the word "ton." the word which should have been used being "pound."

| | | |
|---|---|---|
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## *Iron and Steel Bars Scarce, May Advance*

**Toronto.**

IRON BARS AND STEEL.—The majority of business in iron and steel bars continues to be mostly warehouse, and mill shipments continue very hard to procure. The stocks of small shapes, angles, channels, tees, etc., is said to be practically exhausted. A new and higher price seems inevitable and would be rather surprising if it did not materialize, as it is a natural sequence that market prices follow mill quotations, which showed an advance of $3 per ton last week. The reason given for not taking the benefit of the raise here so far has been given, that jobbers have an idea that the present market is not settled, and wish to see if things are righted before changing, as they do not want any premiums, but rather a steady business with a standard market. It is stated, though, that if the increase at the mills is permanent there will undoubtedly be new and higher prices declared. The present prices are as follows:

| | | |
|---|---|---|
| Common bar steel | .... | 4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 50 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 70 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | 4 25 | 4 50 |
| Band steel | 4 25 | 4 50 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## *Sheets and Plates Advance 25 Cents*

**Toronto.**

SHEETS AND PLATES.—Galvanized and black sheets show an advance of 25 cents over base prices this week. This was not unexpected as owing to industrial disturbances sheets, and in fact nearly all iron and steel products, have been curtailed in production. A very strong feature also noted in connection with this last advance is the increased high rate of exchange as the difference of our money on the New York exchange is said to be almost 4½ per cent., so it may be readily seen how this affects the cost of bringing sheets into Canada.

The stock on hand has not seemed to increase, and many are unable to procure sheets in sufficient quantities to satisfy their demands. Some firms are sending notice that they have advanced their price and that they will not supply more than one ton to a customer, in order to serve as many customers as possible and ward off an impending famine. The situation is not expected to be relieved for some time to come, and even if sheets were coming it is doubtful if stocking would be heavy as many are doubtful as to whether the present market is a healthy one or not. The following are the quotations that are going at present:

**BLACK SHEETS—**

| | | |
|---|---|---|
| 14 gauge | 5 45 | 6 50 |
| 16 gauge | 5 60 | 6 65 |
| 18-20 gauge | 5 15 | 6 55 |
| 22-24 gauge | 6 20 | 6 60 |
| 26 gauge | 6 30 | 6 65 |
| 28 gauge | 6 45 | 6 75 |
| 3-16 inch plate | 4 90 | 5 25 |
| ¼-inch boiler plate | 4 50 | 5 80 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

**GALVANIZED SHEETS.**

| | Premier | | Apollo | |
|---|---|---|---|---|
| 10¾ oz. | 8 90 | 9 50 | 8 25 | 9 25 |
| U.S. 28 | 8 30 | 9 90 | 7 85 | 8 55 |
| U.S. 26 | 7 90 | 8 50 | 7 55 | 8 20 |
| 22 and 24 | 7 70 | 7 90 | 7 40 | 8 00 |
| 18 and 20 | 7 50 | 7 70 | 7 25 | 7 80 |
| 16 | 7 25 | 7 50 | 7 10 | 7 60 |
| 12 and 14 | 7 05 | 7 25 | 6 95 | 7 35 |

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Some Scrap Materials Up, Others Weaker*

**Toronto.**

SCRAP MATERIALS.—Stove scrap and cast machinery show a slightly higher figure than we quoted last week but the rest of the metals show no change with a weaker tendency. A lower price is noted on old rubbers, boots and shoes, overseas, and lumbermen's rubber boots. As industrial disturbances gradually settle it would not be surprising to note numerous changes although there is a very quiet market at present with the general tendency showing weakness. The prevailing quotations are as follows:

DEALERS' BUYING PRICES

| | | |
|---|---|---|
| Tea lead | .... | 0 03½ |
| Heavy lead pipe | .... | 0 05¾ |
| Pipe scrap | .... | 8 00 |
| Stove plate, per ton | .... | 17 50 |
| No. 2 busheling | .... | 11 00 |
| Yellow brass | .... | 0 10 |
| Red brass | .... | 0 16¾ |
| Light brass | .... | 0 07 |
| Scrap zinc | .... | 0 06 |
| Heavy copper | .... | 0 18½ |
| Wrought iron, No. 1, per gr. ton | .... | 14 00 |
| No. 1 machinery cast | .... | 22 00 |
| Heavy melting steel | .... | 14 00 |
| Old rubbers, boots and shoes | .... | 0 06 |
| Overseas, lumbermen's rubber boots | .... | 0 04 |
| Bicycle tires | .... | 0 01½ |
| Automobile tires | .... | 0 03 |
| Tea lead | .... | 0 03½ |
| Heavy lead pipe | .... | 0 05¼ |

## *Stove Prices Firm; May Advance*

**Toronto.**

STOVES AND RANGES continue to be in big demand and show greater scarcity, which instead of being immediately relieved is becoming more serious. Jobbers state they are not able to keep up with the demand, and one manufacturer claimed they would employ at least fifty moulders "and the complement of laborers and assistants that would be required to assist them," if it were possible to do so, but men are at a premium and are as hard to get as the raw material. One of the great drawbacks also is the comparative production hours, of former years. Men are getting often double the wages, yet production has not increased in proportion. This may be one reason to exact an early advance, as when the supply is limited raw material hardly procurable, labor demanding higher pay, strikes and disturbances prevalent, there is only one alternative, it is said, and that is higher prices to meet these demands.

## *Canadian-Made Padlocks May Advance Soon*

**Toronto.**

AMERICAN PADLOCKS.—American made padlocks have advanced 10 per cent. and it would not be surprising for Canadian manufactured padlocks to follow suit, although no new prices are mentioned at present.

## *An Advance of 10% on Russwin Food Choppers*

**Toronto.**

RUSSWIN FOOD CHOPPERS show an advance of 10 per cent. and the new prices are as follows: No. 0 at $27.00 per dozen; No. 1 at $32.40; No. 2 at $38.90; No. 3 at $51.85.

## *Glass Lamps Jump 10 Per Cent. Higher*

**Toronto.**

GLASS LAMPS show an advance this week and are quoted at a new price of 10 per cent. higher. Glass of all kinds seems to be in large demand, and stocks, it is stated, were hardly ever lower.

## *Roofing Nails and Staples Move Higher*

**Toronto.**

ROOFING NAILS AND STAPLES show higher prices. The present conditions of labor unrest, strikes, lockouts and other disturbances, all are having serious effects on the markets generally. The increasing difference in our relative money values also is a factor. The new price quoting on staples is 25 cents over former base prices. Roofing nails are quoting at $10.75 per 100 pounds with $1.00 extra per 100-weight for lesser quantities than 100 pounds.

## *Bale Ties Advance 40c and Wire 25c Base*

**Toronto.**

BALE TIES AND WIRE.—An advance in annealed wire and bale ties has taken effect. Wire is now quoting at $5.25 base, while bale ties are 40 cents higher than former base. This advance is no doubt due to the disturbing conditions of strikes, lockouts, etc., which are greatly disturbing production.

## *Wire and Cut Nails Advance 25c Base*

**Toronto.**

WIRE AND CUT NAILS advance 25 cents over base prices. This is not unexpected as nails have been firming for some time. Although the coal strike had no direct bearing on the situation, there is no doubt that it was to a cer-

tain extent a factor. Cut nails are now quoting at $5.00 per keg, and wire nails at $4.95 base.

## *New Prices Shown On Savage Rifles*

**Toronto.**

SAVAGE RIFLES follow ammunition, Stevens rifles, etc., in an upward movement, and new higher prices have been made, which are as follows: 1899 model, solid frame, round barrel, $56.00; take down, $6.17; take down featherweight, $63.45 and 250-3,000 calibre, $67.65.

## *Ingots Weaker; Due to Conditions*

**Toronto.**

INGOT METALS.—All ingots show a weaker tendency, due to conditions generally. The recent strikes and disruptions have curtailed the production of nearly every commodity where ingots are part of the manufacture. This holds especially to copper, which is very extensively used. The fact also that the money markets have not been adjusted as yet may also have a tendency, as it was expected that the Europeans would be in the market as heavy buyers. The money exchange, instead of becoming settled, is showing wider differences than ever, and it would be impossible to say just what the future will bring.

COPPER.—The present quotation of 25 cents cents per pound still holds, although copper is showing a weaker tendency. The business offering is not so brisk. It is not expected that Europe will be able to come into the market for some time to come as the difference in exchange is continuing so great, also other conditions.

SPELTER.—The demand for spelter is not great and prices show a weakness, although no change is noted at present. The supply is not heavy, it is stated, but enough is on hand to take care of present orders. The present price is 10½ cents per pound.

TIN shows a lower figure this week. The demand for tin is not brisk, although some report a fair business offering. The prices that are now being quoted are 59 to 60 cents per pound.

LEAD.—The stocks of lead continue to be small. The market shows a weaker tendency, although no immediate change is noted, a fair demand has been reported. The price quoting at present is 8½ cents per pound.

ANTIMONY shows little movement, the demand having temporarily stopped. The price shows a weaker tendency if anything. The price now being quoted is 11½ cents per pound.

ALUMINUM continues to be dull, the demand having slackened off. A weaker tendency is noted, although there has been no report as yet of a lower price. The present quotation is 34 cents per pound.

# LONDON MARKETS

LONDON, Ont., Nov. 20—Price changes are again numerous this week and the whole tendency is to higher levels. Advances are recorded in coil leather buggy washers, electric cleaners, carpet beaters, tire and repair tape, saw wedges, Chicago common floor hinges, Sargent steel carpenter squares, pointed belt hooks and wire nails.

Business has been very brisk and slow deliveries continue to annoy hardware merchants all through the district.

Indications continue to point to a big demand in the spring for builders' hardware. From all over the district come reports of building that is planned.

## *Advance is Made in Carpenters' Squares*

**London, Ont.**

STEEL CARPENTER SQUARES.—New and higher prices are in effect on Sargent steel carpenter squares, the quotations being as follows: No. 14, $28 per doz.; No. 3, $31.25; No. 3B, $33.80; No. 100, $34.60.

## *Electric Cleaners And Carpet Beaters Higher*

**London, Ont.**

ELECTRIC CLEANERS, CARPET BEATERS. — Higher quotations have been named on Cadillac electric cleaners, the figures being: Cadillac Model D, $32 each; in lots of five, $31 each. Carpet beaters have also moved up, the new quotations being: No. 143, $1.75 per doz.; No. 141, $1.50 per dozen.

## *Higher Quotations On Pointed Belt Hooks*

**London, Ont.**

POINTED BELT HOOKS.—Pointed belt hooks show an advance, the new figures being: No. 10, 25 cents per 100; No. 9, 35c; No. 8, 40c; No. 7, 45c; No. 6, 65c; No. 5, 70c.

## *Common Floor Hinges, Saw Wedges Advance*

**London, Ont.**

FLOOR HINGES, SAW WEDGES.—New and higher quotations have been named on Chicago common floor hinges as follows: No. 3171 AC, $1.60 pair; No. 3281 D Bro, $1.60 pair. Saw wedges are also higher, the quotations being: 1 pound and larger, 28c per pound; ¾ lb. 34c per pound.

## *Wire Nails Are Up 25 Cents Per 100 Lbs.*

**London, Ont.**

NAILS.—Wire nail prices have been revised upwards, the new quotations showing an advance of 25 cents per 100 pounds. Quotations are as follows: Wire, $4.95 base, f.o.b. London. Cut nails are unchanged, the quotation being $4.75 base.

## *Wire Nails Advance 25 Cents Base*

**London, Ont.**

WIRE NAILS show a new and higher price of $4.95, the advance approximating 25 cents per 100 pounds; no change has yet been mentioned on cut nails and they are still selling at $4.75 base.

## *Coil Leather Buggy Washers 28 Cents Pound*

**London, Ont.**

COIL LEATHER BUGGY WASHERS are reported at a higher figure, and the quotation now going is 28 cents per pound for 1 inch.

## *Tire and Repair Tape Advances*

**London, Ont.**

TIRE OR REPAIR TAPE is quoting at higher figures, and are as follows: 1 ounce and 2 ounce size, 68 cents per pound; ¼, ½, and 1 pounds are now selling at 65 cents per pound.

## *20 Per Cent. Advance on Dominion Ammunition*

**London, Ont.**

DOMINION AMMUNITION. — The advance in ammunition will approximate 20 per cent. Prices now prevailing are shown in our current market quotations.

## *Linseed Oil Advances 7 Cents Per Gallon*

**London, Ont.**

LINSEED OIL ADVANCES 7 cents a gallon over last week's prices. This is quite a change to the tendencies of linseed oil a few weeks ago, as most dealers were then looking for lower prices. However, the present price is a firm one, and no lower prices are looked for for a few weeks. The prices quoting are as follows:

| | Raw | Boiled |
|---|---|---|
| 1 to 2 barrels, gal. | 2 52 | 2 55 |
| 3 to 5 barrels, gal. | 2 51 | 2 54 |
| 6 to 9 barrels, gal. | 2 49 | 2 52 |

Less than barrels, add 10c gal.

## *Turpentine Firm; Remains Unchanged*

**London, Ont.**

TURPENTINE shows the same price as formerly quoted, no change is imme-

diately expected though the condition of the market is very uncertain. The stocks in the South are said to be low if the demand is normal, but if the peace treaty is not ratified in the near future it may seriously affect the market. The price quoting now is as follows:

| | Per Imp. gal. |
|---|---|
| 1 barrel lots | 2 45 |
| 2 to 4 barrel lots | 2 44 |
| 5 gal. lots | 2 55 |

# WINNIPEG MARKETS

WINNIPEG, Nov. 19—Price changes during the past week include many items of interest to the hardware trade, including such lines as butts, hinges, barrel bolts, shelf brackets, bench axes, broad axes, Perfect handle wrenches, cow bells, annealed wire, coppered wire and bale ties. All the above lines registering advances over former quotations of from 5 to 60 per cent., while markets in all lines remain very firm.

Business still shows remarkable activity for this season of the year, there being a good demand for all lines of shelf goods, cutlery, sleighs, stoves, cut glass, etc., and an exceptional Christmas trade is anticipated.

## *Annealed Wire and Bale Ties Advance*

**Winnipeg.**

ANNEALED WIRE, BALE TIES.—Annealed wire and bale ties show a further advance during the week of 25 cents per 100 lbs., due to the withdrawal of lake and rail quotations, and present prices will no doubt stand till the spring as follows: Annealed wire: No. 9, $5.75; No. 10, $5.81; No. 12, $5.95; No. 14, $6.15; No. 15, $6.30; No. 16, $6.45 100 lbs.

Bale Ties, 14 ga., Winnipeg, $7.00; Fort William, $6.50, 100 lbs.

## 10 *Per Cent. Jump in Builders' Hardware*

**Winnipeg.**

BUILDERS' HARDWARE.— Prices on numerous lines of builders' hardware show advanced prices during the week, moving up approximately 10 per cent. above former quotations, based on advanced factory costs, and include barrel bolts, butts, tee hinges, step hinges, hinge hasps, shelf brackets, etc. Net prices and discounts are as follows:

Barrel Bolts: 406—2½ in., $1.95; 3 in., $2.45; 4 in., $2.65; 5 in., $3.10 doz. 1078—2½ in., $1.10; 3 in., $1.30; 4 in., $1.50; 5 in., $1.85; 6 in., $2.10; 8 in., $6.10 doz. 1077—2½ in., $5.00; 3 in., $7.00; 3 in., $8.25 doz. 1088—4 in., $3.35; 6 in., $3.80; 8 in., $5.30; 10 in., $8.65 doz. 1105—4 in., $1.55; 5 in., $2.10; 6 in., $2.30; 8 in., $3.25 doz.

Butts: 295, D2 and F—1½ in., $2.40; 2 in., $2.90; 2½ in., $3.15; 3 in., $3.40 doz. 800—1 in., 40c; 1¼ in., 46c; 1½ in., 60c; 2 in., 83c; 2½ in., $1.00; 3 in., $1.34; 3½ in., $1.85; 4 in., $2.65 dozen. 804—2 x 2 in., $1.10; 2½ x 2½ in., $1.32; 3½ x 3, $2.40; 3½ x 3½, $2.70; 4 x 4, $3.30; 4½ x 4½, $4.25 dozen. No. 838—1 in., 36c; 1¼ in., 42c; 1½ in., 54c; 1¾ in., 66c; 2 in., 75c; 2½ in., 91c; 3 in., $1.20 dozen. No. 840—1½ in., 77c; 2 in., 93c; 2½ in., $1.23; 3 in., $1.50 dozen.

Ornamental Hinges—1431A, D2 and F, $2.45 doz.

Butts, No. 241—2 x 2, 40c; 2½ x 2½, 44c; 3 x 3, 45c; 3½ x 3½, 46c; 4 x 4, 58c; 4½ x 4½, 88c; 5 x 5, $1.05 pair.

Light strap and tee hinges, as follows, 7½% on list; net prices:

Light Strap—3 in., $1.10; 4 in., $1.30; 5 in., $1.50; 6 in., $1.85; 8 in., $2.70; 10 in., $3.75 doz.

Light Tee—3 in., $1.10; 4 in., $1.20; 5 in., $1.40; 6 in., $1.60; 8 in., $1.95 dozen.

Heavy Strap Hinges—4 in., $3.25; 5 in., $4.00; 6 in., $4.30; 8 in., $5.30; 10 in., $10.35; 12 in., $12.80 dozen.

Heavy Tee—4 in., $2.75; 5 in., $3.45; 6 in., $3.90; 8 in., $4.40; 10 in., $7.85; 12 in., $12.50 doz.

Corr. Strap Hinges—4 in., $1.75; 5 in., $2.45; 6 in., $3.10; 8 in., $5.00; 10 in., $7.65; 12 in., $11.90 dozen.

Corr. Tee Hinges—4 in., $2.15; 5 in., $3.00; 6 in., $3.65; 8 in., $6.10; 10 in., $9.10; 12 in., $13.23 dozen.

Hinge Hasps—No. 67—3 in., $1.25; 4½ in., $1.40; 6 in., $1.60; 8 in., $2.45 dozen.

Safety Hasps—No. 915—3 in., $2.60; 4½ in., $3.30; 6 in., $4.70 dozen.

Shelf Brackets—No. 140—3 x 4, $1.00; 4 x 5, $1.35; 5 x 7, $2.05; 6 x 8, $2.55; 7 x 9, $3.05; 8 x 10, $3.60; 10 x 12, $5.10; 12 x 14, $7.65 dozen pair.

## *Screw-Drivers and Wrenches Are Higher*

**Winnipeg.**

SCREW DRIVERS.—Perfect Handle screwdrivers, wrenches, cold chisels, etc., show a further advance during the week of 10 per cent., and are selling today as follows:

Screw Drivers—No. 609—2 in., $4.55; 4 in., $4.55; 5 in., $5.35; 6 in., $6.45; 8 in., $8.60; 10 in., $10.75 dozen.

Monkey Wrenches—No. 615—6 in., $15.00; 8 in., $18.00; 10 in., $22.00; 12 in., $28.00; 15 in., $38.00; 18 in., $48.00 dozen.

Perfect Handle Pipe Wrenches—No. 643—8 in., $1.50; 10 in., $1.75; 14 in., $2.25; 18 in., $3.00; 24 in., $4.50 each.

Sharpen Eze Cold Chisels—No 17—½ in., $2.45; ⅝ in., $3.50; ¾ in., $5.10; ⅞ in., $7.25; 1 in., $8.50.

Sharpen Eze Cape Chisels—No. 18—½ in., $2.45; ⅝ in., $3.50; ¾ in., $5.10.

## *Big Advance Made In Bench Axes, Adzes*

**Winnipeg.**

BENCH AXES, ADZES.—Prices on bench axes show an advance this week of approximately 75 per cent. over former quotations, and as explained by the manufacturers the revision simply brings this commodity up to the point where prices show only a very nominal profit, this line having been sold formerly at a loss. To-day's prices are given as follows:

Bench Axes, No. 2, $20.00; No. 3, $22.50; No. 4, $24.50; No. 5, $27.00 doz. Carpenter's adze and broad axes also follow last week's advance in axes and are quoted to-day at the following prices: Carpenter's adze, $27.00 dozen. Broad axes, 6-7 lb., $55.00 dozen.

## *Stiff Advance in Holstein Cow Bells*

**Winnipeg.**

HOLSTEIN COW BELLS.—Holstein cow bells show a rather stiff advance this week, moving up from 10 to 15 per cent., based on new prices issued by manufacturers, and is due to increased production costs, to-day's discount being 10 per cent. on list, making the net prices as follows:

Holstein Cow Bells, No. 7, $2.75; No. 6, $3.30; No. 5, $4.40; No. 4, $5.50; No. 3, $6.60; No. 2, $8.80; No. 1, $11.00; No. 0, 13.20 dozen.

## *Linseed Oil Prices Are Holding Firmly*

**Winnipeg.**

LINSEED OIL.—Linseed oil prices hold firm on the local market at former quotations, with no indication of any drop. Sales are reported fairly brisk for this season of the year, while stocks are about normal. To-day's prices are confirmed as follows: Raw linseed oil in barrels, $2.75 gallon; boiled linseed oil in barrels, $2.78 gallon.

## *Turpentine Prices Holding Unchanged*

**Winnipeg.**

TURPENTINE.—Turpentine prices show no change during the week, holding firm with no indications of any revisions. To-day's market prices are given as follows:

Barrel lots, $2.65 gallon; ½ barrels, $2.68 gallon; 5 gallon lots, $2.70 gallon; 1 gallon lots, $2.70 gallon, plus the usual extras for containers.

# PITTSBURGH MARKETS

PITTSBURGH, Nov. 19.—Few union coal miners have returned to work since the officials of the United Mine Workers recalled their strike order under compulsion of the Federal court, but the steel industry is no longer seriously concerned since it is regarded as settled that enough coal will be mined to enable consumers to get along. There are stocks of coal of considerable magnitude, and there is heavy production at the non-union mines, this including the whole Connellsville district, which ships as much coal now as it makes into coke. Coal which the railroads have held instead of delivering it to consignees is likely to be released as occasion requires.

### Steel Strike End in Sight

The virtual end of the steel strike is in sight. The strike is now in its ninth week, and in the past three weeks men have been returning to work more and more rapidly in all but one of the affected districts that remain, the exception being the Wheeling district, which remains tightly closed. Operations are increasing rapidly in the Mahoning valley, more than 50 per cent. of the blast furnace capacity being in operation,

against about 90 per cent. just before the strike, while in Eastern Pennsylvania nearly as good a proportion. The Chicago-Gary district is rapidly approaching normal, while at Cleveland and Buffalo operations are increasing at a good rate. Western Pennsylvania has been practically free from strike for several weeks except in two spots, New Kensington and Monessen. The entire south has been running full throughout the strike, while in Eastern Pennsylvania. the same is true with two or three trifling exceptions.

### Supplies of Steel

Of course the steel market presents some appearance of there being a great shortage. Consumers are paying premiums for early deliveries of several descriptions of finished steel, and some buyers, particularly foreign buyers, find it almost impossible to make any purchases. The United States Steel Products Company, the export organization of the Steel Corporation, withdrew from the export market about a fortnight ago, and since then the Consolidated Steel Company, the company formed under the Webb Act and representing almost all the large independents, has likewise withdrawn from the export market. One of the large automobile makers is reported to have offered $30 a ton premium for steel sheets for bodies. Sales of black sheets on the basis of $4.50 to $4.65 for 28 gauge, or $2 to $5 a ton premium, have been common. Bars, which are officially 2.35c have readily brought 2.50c and more.

Making a general survey of the situation, however, and counting up the tonnage sought to be bought in proportion to the tonnage being produced, there is no wide scarcity of steel products. It is rather a small scarcity, very acute where it exists at all. In other words, a close estimate can be made that from the date of the strike, September 22, to date, the production of finished rolled steel has been between 2,000,000 and 2,500,000 gross tons less than it would have been if the rate of production in the first three weeks of September had been continued, nd there is no demand in the market for anything like such a tonnage of steel.

It does not follow by any means, however, that steel would have become a drug on the market if no strike had occurred. Jobbers and consumers had stocks, partly normal stocks and partly stocks built up in anticipation of a strike, for it must be understood that this strike, perhaps a much greater one than occurred, was expected, though nothing was said publicly about it beforehand by either manufacturers or consumers. Furthermore, the existence of the strike has caused many who would otherwise have been in the market to hold back, this applying particularly to those who had building projects. Finally, the strike occurred at the best time of year for producers and consumers in many lines. Thus the canning season was over and mill shipments of wire products for the usual fall distribution were ended. The pressure for deliveries of automobiles had begun to ease off, and the best time of the year for the inception of building operations had passed.

The strike, as a strike, will probably be practically over in two or three weeks, except possibly for the Wheeling district, but steel production will be restricted for a long time to come, through working forces being so disorganized. There will be after the strike, as there was before the strike, labor shortage, and there will be a desire on the part of the manufacturers to establish an eight-hour turn in place of the present twelve-hour turn, something that would require many more men if the entire mill and furnace capacity were to be operated.

With stocks exhausted all along the line and with various industries requiring much more steel in spring than in winter, and with the railroads likely to enter the market after their long absence, there is bound to be a very heavy demand for steel, a demand greater than can be supplied. The lucky consumers are those who are recognized regular customers of those large mills that are adhering to the March 21 schedule of prices and are willing to book their customers for additional tonnages, for 1920, as shipments are made on their present contracts. The casual buyer, or the buyer who has been in the habit of shopping around among mills seeking the most favorable turns and buying now from one mill and now from another, has practically no chance in the market at present, and is not likely to have much chance for months to come.

Many of the smaller independent mills have advanced prices. This means in substance that they are charging delivery premiums, as long as there are other sellers who will take business from old customers at March 21 prices. To what extent the large independents will do the latter is not known, but what the Steel Corporation has done is shown in its unfilled tonnage statement for October, made public last week. This statement showed unfilled obligations. at the end of October of 6,473,668 tons, representing an increase of 188,030 tons during October. As the Corporation's shipments in October were between 700,000 and 800,000 tons, probably close to the latter, its bookings in the month were nearly a million tons, and it is positively certain that none of this business was done at above the March 21 prices.

Except to an extent in Bessemer and basic iron there is no restraining influence in pig iron as there is in steel, and foundry pig iron continues to advance apace. A prominent merchant firm which buys and sells pig iron and also acts as agent, calls the valley market on foundry iron $34 at furnace for silicon 1.75 to 2.25 per cent. and $26 for silicon 2.25 to 2.75 per cent., with malleable at $33. The The $34 compares with $26.75 for the same kind of iron by the March 21 schedule. A prominent producing interest calls basic iron $27.25, valley and Bessemer $28.50, but one would have to be a customer of long standing, no doubt, to be able to buy at such prices.

The prices for foundry and malleable quoted above are, it is true, for early deliveries, and thus they might be considered premium prices, for delivery, were it not that there are no sellers for extended delivery and it is difficult to call a price a premium price when it cannot be stated over what price it is a premium. It appears to be a case of team work among the furnaces, to get a prompt market established and then endeavor to sell for extended delivery at the same prices.

## ENTHUSIASTIC OVER CANADA'S FUTURE

(Continued from page 51)

Country shortly, expecting to sail on the 25th of this month. He is enthusiastic about the future of this country, providing good relations can be maintained between the employers and labor. It is worth noting, in this respect, that the Baldwin plant, which employed at Swansea some fourteen or fifteen thousand hands, had no strikes during the war nor since, and good relations are maintained between the company and its men. It will be necessary for the Baldwin organization to bring to this country a number of skilled workmen, including those who will be in executive capacities.

## CONDITIONS AT SHEFFIELD

A report from Sheffield regarding business conditions says:

The rolling mills have as much work offered as they can deal with, a large proportion of it coming from overseas sources. The steel and iron foundries are still idle owing to the moulders' strike, and the prolongation of this dispute is causing heavy financial losses to industry and holding back the development of important trades. Engineering operations are gradually coming to a standstill. Another effect of the strike is the marked falling-off of orders for files and various small tools used in the engineering shops. The open-hearth furnaces are not fully employed, but the demand for billets is considerable. Local firms are not troubled with foreign competition on any considerable scale.

# The World is Painting: Buy Early

## Conditions Make It Imperative to Secure Wants Early if Demand is to be Met—President of Sherwin-Williams Company Sees Great Expansion of Industry

(Based on an interview with WALTER H. COTTINGHA M, President the Sherwin-Williams Company, by A. H. ILLSEY of Hardware and Metal.

"MANUFACTURERS have been urging the dealer to buy; to protect himself by making his purchases without delay. Now that the dealer is persuaded that he must buy, and that it is good policy to buy, will the manufacturer be in a position to meet the enormous demand that is developing?"

In answer to this query of HARDWARE AND METAL, Mr. Walter H. Cottingham, president of the Sherwin-Williams Company of Canada, Ltd., acknowledged that it was a big question, but unhesitatingly asserted that only one kind of advice could be commended to the retailer, that of buying early, and without delay. It is the man with the goods to deliver who will get the business, regardless of price, he says, for there will be a big demand and this obtains everywhere.

*WALTER H. COTTINGHAM*
*President of the Sherwin-Williams Company.*

"In England, for instance," he said, "I observed that a great deal of painting was being done, and especially in the east end. Work that had been put off for a long time was now being undertaken for the first time since the beginning of the war, and this will continue for a while; it simply could not be deferred any longer.

### SOME OF THE DEMANDS

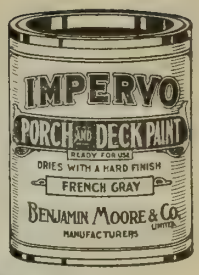
In looking at the requirements from a broad standpoint, Mr. Cottingham referred to the enormous quantities of paints and varnishes, as well as other finishes, which were required by the big industries. One of the biggest users of these products is, and will continue to be, the automobile manufacturers. Then there are the railroads. These customers are large buyers, but, in common with the rest of the big users, they have been dilatory in painting rolling stock and other equipment. Now this must be given attention. Not only is this true of Canada, the United States, and Great Britain, but on the Continent of Europe. This one outlet will take huge quantities of all kinds of paint products. In addition, there will be a tremendous call from the shipping industry, for, here too, the up-keep of boats has been neglected. And, of course, there are innumerable manufactured products that must be treated with some paint products, or several. Combined, the total requirements will, obviously, be very great—probably greater than they have ever been in the history of the trade. It does not take much meditation, therefore, to indicate the necessity of placing orders early.

### WHAT OF COMPETITION

Mr. Cottingham recently spent some weeks in Great Britain, and returns with the conviction that there will be plenty of business for all during 1920, and perhaps for a longer period. The havoc wrought by the war, or more correctly, by the lack of attention ordinarily paid to the preservation of property, was so great that it cannot be recovered immediately. Only in a gradual manner can this work be overtaken, and for the coming year there will be great activity.

In this connection Mr. Cottingham referred to Germany, one of the large producers of white lead. In addition to producing for her own requirements, and which of course are very great, she usually exports large quantities, but it is doubtful if she will be able to cater to outside demand just now. There is no immediate reason to anticipate unsatisfactory competition from that source, therefore.

And then, as was further pointed out, there is really a shortage of pig lead at the present time, taking a broad world view. It will be some time before the needs can be satisfied and surplus of the product afforded.



### WHAT OF CONTINUED EXPORT?

Asked as to the prospect of Canadian paint makers continuing to serve export markets as they are

doing at the present time, Mr. Cottingham stated, that he did not look for a big permanent business. This business may continue to come here for a time, but not indefinitely; the matter of competition will eventually probably eliminate Canada from catering to this business on a big scale. For instance, it is less costly to manufacture in Great Britain. Even now, wages, said Mr. Cottingham, are lower there than they are in Canada, and it also is possible to manufacture more cheaply there. Raw materials are, in many instances, less. And with intensified home demand, there will, Mr. Cottingham thinks, be plenty of demand for all production.

Continuing, HARDWARE AND METAL asked if the Canadian paint manufacturer would likely be in a position to take care of this export business. He said it was doubted if this would be possible on a large scale, in view of the needs from a domestic standpoint. The home requirements will be met first, and it is a question if there will be a great deal of surplus for export markets, anyway.

### CALLS FOR EXPANSION

In view of the demands which have been outlined in the foregoing, the question naturally arose — "What of the future?"

To this Mr. Cottingham replied, that, as far as his Company is concerned, there will be expansion all round. Additions will be made to the Montreal plant, and in England and also in Australia, the plants will be enlarged. Already, the various plants are well taxed to meet present requirements, and it is in order to take care of the new business that now offers that the additions are being made. At Montreal, as previously outlined in HARDWARE AND METAL, a considerable increase in storage capacity will be provided.

The Australian business, and which was originally a development from the Canadian company, has shown great growth. Asked as to whether the factory there was able to cater to a portion of the trade in countries nearest it, Mr. Cottingham said that the needs of the Australian field were great and quite sufficient to absorb all the product made there. And as to the advantage in manufacturing in the far Southern Commonwealth, Mr. Cottingham said that this field was well situated, in several ways, to developing paint manufacturing. There are, in the first place, great lead mines there, some of the best in the world. In addition to this, it is not a difficult matter to obtain the needed supplies of linseed oil from India. These two factors are very favorable to the expansion now projected.

Of course, while the Sherwin-Williams Company have been developing the Australian field for several years, and are said to have been the first to establish there, other British manufacturers are now planning to locate there and to manufacture.

### STILL SOME DIFFICULTIES

In looking ahead, and seeking to determine the trend of the market, it is to be borne in mind that there are still some difficulties which must be met and, if possible, overcome.

Raw materials are not obtainable yet as they are in normal times. Linseed oil is, and has been scarce. Whether it will be available in the necessary quantities as the season of heavy demand approaches, still remains to be seen. Reports are still incomplete, and the present indications are those of a strong market. Then again, lithophone, very extensively used to-day, is still scarce, while turpentine holds at a decidedly high figure and will perhaps continue to be high.

Added to this, the scarcity of lead, and with little time in which to provide an excess over the manufacturers' demands, (for his active manufacturing season is here), there is every reason to give these facts due consideration in planning forward. Wages, of course, will continue to be a big factor in the ultimate cost of the manufactured product.

### BRITAIN IS STRONG

Referring to the feeling in Great Britain, as to the prospect of returning trade, Mr. Cottingham is convinced that, even while the war was on, the Old Country was not asleep. The Englishmen, he pointed out, was, and is a most modest individual. He is almost a pessimist, even while things may be going well with him. He will be discussing business questions, and perhaps is doing well, but says little about it; is inclined to discount himself very much. In contrast with his American business friend, he is quite the opposite.

Mr. Cottingham observed this peculiarity while in London, and where the clubs and cafés are filled with men from all parts of the Continent and elsewhere, talking over big business matters and making plans. And, as to the ability of Great Britain to again take her place as a factor in world trade, there is no question; as a matter of real fact, she has not lost it. Furthermore, she is looked upon as a wonderful nation after her performance in the war. The greatness of her burdens have not killed her; they have rather shown the world what a wonderful nation she has always been, concluded Mr. Cottingham.

# Glidden Co., Ltd., Planning Further Expansion

## Erection of Large Factory at Toronto for the Manufacture of Insecticides is Contemplated—Manager Higgins Sees Record Paint and Varnish Business Coming in 1920

IN addition to the large extensions of the Canadian business of the Glidden Co., Ltd., Toronto, referred to in a previous issue of HARDWARE AND METAL, the firm is planning a further important development in the shape of a new plant for the manufacture of insecticides. This will, it is expected, be proceeded with next year and completed in good time to take care of the business of 1921.

"We believe there is a splendid business to be developed in this line," said Mr. Guy Higgins, manager of the Glidden Co., Ltd., in discussing the situation with HARDWARE AND METAL. "Business in all lines has been exceptionally good. This season's record will be at least fifty per cent. greater than that of last year. We have just finished adding another storey to our main factory in order to facilitate manufacture, and we are now manufacturing all our lines in Canada, except insecticides, and plan to do that as quickly as possible."

**Big Business Ahead**

"It looks to me as if the business of 1920 is going to break all records. There is no question that stocks all over the country are low. An enormous amount of painting has been put off because of difficulties in obtaining labor to do it and also by some in the hope of lower prices. In addition to these factors will be the demand from the building trades, and present indications are that 1920 is going to see all building records in Canada shattered.

"As far as prices are concerned, I do not see the slightest indication of any reduction. Take the matter of turpentine, for instance, which enters into the manufacture of paint. There is a short crop in the South and an enormous home demand. In addition Germany, who before the war was the largest individual buyer of turpentine in the world, is completing arrangements for credits and will call for large amounts. Then there is a big demand for linseed oil and other raw materials required in paint manufacture.

**Export Demand Active**

Mr. Higgins stated that the firm is constantly receiving large orders for its products from overseas points, and mentioned Australia, South Africa, South America, Java and Sumatra as places to which heavy orders for goods are being sent.

The Glidden Company, Ltd., is now occupying more than ten times the manufacturing space it had when it came to Canada in April of 1910 and purchased the factory of the Blackwell Varnish Co. in West Toronto. The recent addition of a ready-mixed paint line to the Company's list of products, and the proposed addition of insecticides, is an indication of the Company's faith in the future of the paint, varnish and allied trades in Canada.

# New Paint Plant Nearing Completion

## Entry of Hardware Wholesaler Into Paint Manufacturing Field an Interesting Development—Will Make Two Grades of Paint

WITH the near completion of the new paint factory of the Marshall, Wells Co., Ltd., at Winnipeg, the hardware trade will watch with interest the entry of a Canadian hardware wholesaler into the paint business. The new plant is to be equipped with strictly modern machinery, and deliveries are to be made towards the end of the year. Two grades of ready-mixed paints will be manufactured, the highest grade line under the name of "Marshall's First Quality." The second grade, it is expected, will enable the hardware merchant to compete more successfully with mail-order house competition when a cheaper line of paint is required by customers. Arnold Smith, who is in charge of the new plant, states that a complete line of ready-mixed paints and sundries will be produced at the new plant.

The progress of this new department of the hardware business will be watched with interest. It is stated that economies can be effected for the hardware merchant through purchasing paint from a hardware jobber, and concentrating the bulk of his business both in hardware and paints through one house. Whether or not this will work out remains to be seen. It is known that at least one large hardware jobbing house in Eastern Canada has, on a number of occasions, taken up the matter with a view to manufacturing and selling paint in the East. The war interfered to a great extent with the plans, but with the approach of normal conditions the question may be revived.

### MARITIME PAINT MEN PLANNING CAMPAIGN

Halifax.—The representatives in the Maritime Provinces of the paint and varnish industry met at the Board of Trade to discuss the "Save the Surface" campaign, and outline plans for developing it in the Maritime Provinces. Mr. Cyril Stairs, of William Stairs, Son & Morrow, occupied the chair. In addition to the representatives of the various paint manufacturers there were also present Messrs. M. O. Crowe, of Crowe Bros., and H. N. Stevens, of Douglas & Co., Amherst, representing the Wholesale Hardware Association, and Frank Reardon, representing the decorators.

Lionel Benison, of Montreal, outlined the "Save the Surface" campaign and its purpose. He told of the different methods being adopted throughout Canada to develop and foster this conservation movement. After a general discussion it was unanimously decided to bring the Maritime Provinces into line with the rest of the country, and a committee of ways and means was appointed. The committee consists of J. Ryan, chairman; W. Walsh, A. J. Taylor, George Helliar, J. Cleveland, F. R. Crafford.

### STILL ANOTHER PAINT COMPANY

Scarfe Varnish Company, Brantford, Ont., are building an addition to the present plant, and intend to enter the ready-mixed paint field. According to Mr. Reg. Scarfe, the company expects to begin production early in the new year.

### CONSULTING WITH DEPT. HEADS MAY PREVENT MIX-UPS

In conversation with the manager of a paint department in a large retail store, a representative of HARDWARE AND METAL was interested in the observations made by this department manager.

"How do you find the paint business and how has business been during the past season?" was asked.

"It has been rather poor lately, although there was a pretty good season. We have not had the stock as we needed it and the trouble has been that of not having on hand what was called for. For instance, a man would ask for a gallon of paint, and we would often have to take half gallons to make up the quantity wanted, likewise with half gallons and quarts. We have not been at all satisfied with the stock which the management has allowed us to buy and the customer does not like it if he asks for a half gallon, and is given two quarts."

Here is a case in point where the general management of a retail business should, obviously, confer often and closely with the department managers. He is in touch with the customer and knows what the customer wants. If his advice is not taken there is a big chance of difficulty arising, just such as was outlined above. It would seem good policy and more profitable in the long run for the proprietor to place more responsibility upon department managers, permitting them to make selections which they know will meet the needs of customers with whom they are dealing.

# Refinishing Jobs

Much of the varnish sold by the dealer is used for refinishing purposes, and is bought by consumers who are not finishing experts. It is to such consumers that Berry Brothers' Varnishes, Stains and Enamels are especially adapted.

While "Berry" finishes have been for a great many years appreciated by the experienced painter because of their uniform quality, their easy working and excellent drying properties are additional buying inducements among house owners who are unskilled with the varnish brush and do their own refinishing

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, November 20.—The feature of the week is that of an advance of one dollar per cwt. for standard grades of white lead in oil. While the market has been firm, paint men generally expressed their belief that there would be no increases of price at this time, and looked forward to the market holding until the 15th of December. Higher pig lead and unexpected holding of the spot oil markets have been contributing factors in the advances made.

Linseed oil is 5 cents a gallon higher, and there has been no relief in the matter of seed supply. Some now question the likelihood of early $2 oil.

The differentials have been advanced on half-barrel putty containers, and on one and two-pound containers the prices are higher, and all is attributable to the higher cost of containers. Turpentine is unchanged, as is also mixed paint.

### *Slight Advance is Made on Linseed Oil*

**Montreal.**

LINSEED OIL.—The markets are very much different than what it was anticipated they would be by this time. Seed deliveries have been very uncertain and little or no improvement is manifest. As a consequence, crushers have no improvement to report. Prices have, as a matter of fact, slightly advanced, and the present market is based at $2.32 per gallon for raw, and $2.34½ for boiled. Some question very much whether the $2 mark will be reached, as it was freely predicted awhile ago it would.

| | Imp. Gal. |
|---|---|
| **Raw—** | |
| Single barrels | 2 32 |
| 5 to 9 barrels | .... |
| 10 to 25 barrels | .... |
| **Boiled—** | Imp. Gal. |
| Single barrels | 2 34½ |
| 5 to 9 barrels | .... |
| 10 to 25 barrels | .... |

**NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.**

### *Turpentine is Firm And Price Unchanged*

**Montreal.**

TURPENTINE. — The market is steady and the basis entirely unchanged. There is not a great deal of demand, and supplies are therefore ample to meet present needs.

| | Imp. Gal. | |
|---|---|---|
| **Turpentine—** | | |
| Single barrels | 2 35 | 2 45 |
| Small lots | .... | 2 65 |

(Packages extra.)

### *Putty Differentials Are Somewhat Higher*

**Montreal.**

PUTTY.—The only change made in the putty markets this week is that for the differentials on half barrels and 1 and 2-pound cans. This is due, entirely, to the increased cost of these containers. The half barrel price per 100 pounds, on less than ton lots, is now $6.30, while that for 1 and 2-pound tins is advanced to $10.20. This is the only change made, the larger quantity purchases taking the differential obtaining heretofore.

| | 5 ton | 1 ton | Less Quanty. |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 50 |
| Do., ½ barrels | 5 15 | 5 40 | 6 30 |

### *An Advance is Made For White Lead in Oil*

**Montreal.**

WHITE LEAD IN OIL.—Quite contrary to expectations, an advance has been made in the price of white lead in oil. It has been pointed out in HARDWARE AND METAL that the market was firm, but a wide enquiry last week revealed the fact that nearly all jobbers expected prices to hold until the 15th of December. Continued advances for pig lead and high market prices for linseed oil are the contributing factors in effecting the advance now operative. This amounts to $1 per cwt. on standard brands and to 50 cents per cwt. on "grade" leads. The new prices effective, therefore, will now be: Five ton lots, per 100 pounds, $16.50; ton lots, $17, and smaller quantities $17.35. These prices are operative unless something unforeseen intervenes, until May 15 next.

### *Mixed Paint Sells In Seasonable Lots*

**Montreal.**

MIXED PAINTS.—The market conditions are steady, and for this time of the year the output is maintained on a very satisfactory basis. Orders are reported satisfactory as against spring requirements, and the dealers have been ordering quite freely from points to which shipment is made in the fall, to take care of early spring sales.

## TORONTO

TORONTO, Nov. 20.—Linseed oil maintains its present price and no lower prices are expected for a few weeks at least. The crushers, it is stated, are not getting the quantity of seed they expected and which they require. Seed remains at a high figure on the market. The quotations are $2.52 to $2.60 for raw and $2.55 to $2.63 for boiled.

Paint is reported to be moving well and so far exceeds last year's sales. Spring bookings are very active and dealers are buying with more confidence than last year.

White lead in oil shows an advance this week of $1.00 per 100 pounds, and is now quoting at, ton lots, $17.35, and less than ton lots, $17.70.

Turpentine is not showing any change yet, but the market is very certain and it all depends on certain conditions whether it will go up or down. There were a great many deals hinging on the ratification of the peace treaty, and as it was not signed there will no doubt be many changes, as it was generally felt that it would go through almost immediately. The stocks in the South are very low, it is stated, and if the peace treaty had been signed the demand was looked to exceed the supply. Many are under the impression that the supply of turpentine is normal, it is thought, and the large shipments of scrapings which are coming through is thought to be the reason for thinking so, it is stated, though, that this season has been a long one and the weather ideal for getting this out.

Jobbers state they are well equipped to handle orders locally for some time to come as they have stocked heavily in view of the present shortage. The quotations are $2.45 per barrel.

### *Turpentine Scarce; Price Remains Firm*

**Toronto.**

TURPENTINE.—No change in price is noted in turpentine on the local market. The situation, though, is in a state of unrest, owing to the peace treaty not being ratified, as a number of large deals are hinged on the signing of the treaty. The shortage of turpentine in the South is very noticeable, some are lead to believe that large shipments are coming, but it is stated that most of this is scrapings, which are moving

# This Can on your shelf brings customers into your store

The exceptional quality of B-H Paint is so well known all over Canada that you will make sales as a matter of course.

Hundreds of agents up and down the Dominion have proved it a steady general business builder—why not you?

**Write for the B-H proposition —it will pay you.**

**BRANDRAM-HENDERSON** LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

earlier this year, owing to a favorable late season. Quotations are as follows:

| Turpentine— | Imp. gal. |
|---|---|
| 1 barrel (barrel included) | $2 45 |
| 2 to 5 barrels (barrel included) | 2 44 |
| 5 gallon lots | 2 55 |

## *White Lead Up* $1.00 *Per* 100 *Pounds*

**Toronto.**

WHITE LEAD IN OIL shows advance of $1.00 per 100 pounds. This is, no doubt, due to the high price of linseed oil. Pig lead is much higher and general production costs considerable more than formerly. The price quoting now is: less than one ton lots, $17.70; ton lots, $17.35.

## *New Linseed Oil Firm Unchanged*

**Toronto.**

LINSEED OIL.—The new oil for spot delivery is holding very firm and the tendency is a higher one, although a lower price would not be surprising in the course of a few weeks. The crushers, it is stated, are unable to get the seed in any quantities. The continued high price of seed on the market also continues to be a factor. The quotations are as follows:

| Linseed Oil— | Raw | |
|---|---|---|
| 1 to 2 barrels, gal. | 2 52 | 2 60 |
| 3 to 5 barrels, gal. | 2 51 | .... |
| 10 barrels and over | 2 49 | .... |
| | Boiled | |
| 1 to 2 barrels, gal. | 2 55 | 2 63 |
| 3 to 5 barrels, gal. | 2 54 | .... |
| 10 barrels and over | 2 52 | .... |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

## *Prepared Paint Showing Good Demand*

**Toronto.**

PAINT ready mixed is reported to be moving in good volume and manufacturers state that this is the best season they have had for some time. It is believed they state that owing to so many dealers being fooled last year they are taking more precautions this fall and are booking ahead for spring with more confidence. Prices remain firm but show no changes although it would be hard to say what will hapen in the near future, especially since white lead has advanced.

## *Plate Glass Advances* 10 *Per Cent.*

**Toronto.**

PLATE GLASS shows an advance this week of 10 per cent. The market has been firming for some time and the scarcity is beginning to be more seriously felt each day. One large jobber stated to HARDWARE AND METAL that it would be a year at least before the situation would be relieved. Belgium is practically out of the market for the present at least. It is said they are not accepting bookings for future delivery. the assumption being that they are booked to capacity, and that their Government allowed a small percentage to come to Canada to link up with their old established trade.

It is estimated that 90 to 100 million feet of plate glass alone will be required for the year of 1920, and the estimated production will not be more than two-thirds of this. Jobbers state they are anxious to keep prices down to as low a level as possible, and it has been noted that prices for glass in some of the American cities are higher per sq. ft. than in Canada. The prices now quoting are over $100 gross list. 10 per cent. off f.o.b. car destination under $100 gross list net list. On glass delivered north and west of North Bay freight charges are added from North Bay to destination.

Putty prices are as follows:

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels | $5 35 | $5 60 | $5 95 |
| Do., 100 lb. iron | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels | 7 10 | 7 35 | 7 70 |

# Active Demand for Glass is Expected in 1920

## No Possibility of Any Lower Prices, Says Pittsburgh Firm in Letter to the Trade

THE Johnston Brokerage Co., Pittsburgh, Pa., has sent the following letter to the trade regarding the outlook for glass:

To the Trade:—

The present operating period will terminate December 8, and many of the factories will have their glass made before that date and have business sufficient to take their product until they close down. We don't wish to decline business, but for a few days we will be unable to know time of delivery on orders sent us or specifications submitted for quotation. A great deal of this business will have to be produced in next blast. The information we get is that the factories will start up on the 1920 blast the early part of January. The Wage Committees are holding a preliminary conference today, and we will know more about the situation a little later in the week. While we expect to be able to take care of any normal demand and make deliveries within a reasonable time, at least as soon as any of our competitors, we thought a little explanation as to the situation at the factories would be fitting.

On heavy glass we are compelled to withdraw quotations. We can furnish a limited quantity of 34 and 39 oz. glass, but before definitely accepting same, we would like specifications to be submitted and we would advise what we could handle, time of delivery, and name prices.

We have some glass in stock, and a fair amount of first three bracket single, but at the rate this glass is moving it will soon be exhausted. It looks as though there would be a strong demand for window glass in all sizes and qualities for several months, which will take such glass as is on hand and what we produce for a considerable period. We don't think you would make any mistake in anticipating your needs, even in small glass. There is absolutely no possibility of lower prices, as the workmen are contending for increased wages, and other costs, such as lumber, fuel, etc., are higher, and we all feel more or less uneasy over transportation matters. If anything like the demand develops that is predicted by contractors, sash and door houses and glass distributors generally, those who have well-assorted stocks in their warehouses are going to get the preference in the large business that we will enjoy in 1920, and which we are in the midst of at the present time.

### BUILDING FIGURES SCORE NEW RECORD

Montreal's building permits are rapidly increasing, and show big gains over previous months. Up to November 11, permits totaled no less than $395,620. These provided for twenty-six houses, thirty-four dwellings, four stores, two warehouses, three factories, and seven garages. Permits for repairs during this period totaled upwards of $50,000. At this rate there would be in all probability upwards of half a million dollars' worth of property for which permits were issued within the first half of the month.

The largest building permit of the present year to date was for $200,000, granted to the Alaska Bedding Company of Montreal. This building will be three storeys high and will occupy an area of 280 by 80 feet.

It begins to look as if the builders' supply trade for 1920 will be a bummer. It will be well worth the while of dealers to look into their requirements and to anticipate these early. All indications point to an active season next year, and it is the man who has the stock on his shelves who will receive the business and reap the profits.

### ALBERTA WANTS A SHARE

EDMONTON.—A deputation from the Municipalities of Alberta Convention has asked Premier Stewart that steps be taken to secure Alberta's share of the $25 000 000 which the Dominion Government has set aside for the Provincial housing scheme, and to make it available for the purpose intended. Alberta's share on the population basis was placed at $1,500,000. The Premier expressed his willingness to take the matter up, but said that a Provincial scheme might be devised that would be even better for the local situation than that offered by the Dominion.

## *Automobile* SKATES

The Skate with Aluminum Tops

Dear Sirs:—

We would like to get your Automobile Skate to sell this season. ———— sold your skate, but as he is out of business we thought we might get them, as we consider them the real skate on the market. Please let us know, and oblige,

Yours truly,

This is a copy of a letter recently received by us. It speaks for itself. Are you acquainted with this famous selling line? If not, write for particulars.

# Glidden Has Made Paint for Nearly 50 Years

Paints for marine uses, paints for floors, paints for agricultural implements, are some of the kinds of paint that have served Glidden users during the last half century.

So it was a simple step when the Glidden Company announced the addition of Glidden Endurance Paint to its line of products. The Glidden reputation for paint making was immediately associated with the new product.

Here, then, is a new product with an established reputation. It is worthy of your immediate investigation. Write for complete data.

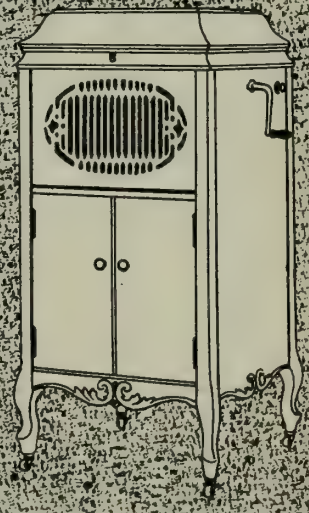
# Have you noticed the Brunswick Horn Ads. in the Papers?

The Brunswick

ALL PHONOGRAPHS IN ONE

## What Shape IS A Horn?

They sing INTO a round horn, and the Brunswick sends it OUT in a round horn.



That's a simple "secret," isn't it. And yet no one has ever made a round WOOD horn before—and more than that, no one else ever will, because this is one of the exclusive patented features of the Brunswick.

Another exclusive patented Brunswick feature is the All-record, All-needle Ultona. It is not an attachment. It plays every make of record without taking anything off or putting anything on. No needles to change. A twist of the wrist and it is ready for anything.

These facts—and others—are being forcefully advertised to phonograph buyers, creating good business for Brunswick dealers.

Write us for details of our dealer proposition.

Write TO-NIGHT!

Distributors:

**STURGEONS LIMITED**
**TORONTO**

Our Moulding Shop, Chelsea Green, London, Ont., owned by Beatty Bros. employees.

# Beatty Bros. Limited Bulletin

The photo above shows our Chelsea Green Moulding Shop where the grey iron castings for the BT Goods are made. The employees of this firm from their own pockets provided most of the funds to build this up-to-date shop.

### Twice as many Pumps Sold

Twice as many BT pumps have been sold in the first two months of our fiscal year (September and October) as in same time last year. The Ready-to-Ship line is immensely popular with hardware dealers. You'll find R.T.S. pumps in every agricultural community of Canada from coast to coast.

No. 5 Ready-to-Ship Stock Pump

**MR. M. J. BEATTY**
**General Sales Manager**

Mr. M. J. Beatty, who has been in the West for some time visiting our Western branches, finds business splendid. The crops turned out better than expected and our Western branches show large increases in sales.

### No. 5 Ready-to-Ship Stock Pump

Mr. Anderson, of Swan Lake, Manitoba, used one of our No. 5 pumps in a 40' well all last winter. He watered 60 head of stock of his own and some days as many as three tanks of water were drawn away by the neighbours. He says it is the largest and best capacity stock pump he ever saw and it never was frozen up once during the whole winter, although there was no pump house over it.

For large capacity and easy pumping the No. 5 is the best stock pump in the world.

### Red Stars and Time Savers Sell as Fast as we Can Make Them

Our washer sales for the first two months of our fiscal year are four times as great as in September and October of last year. Our highest salesman for October is Mr. Banville, Quebec Territory, whose sales were mostly washers.

*Push washers for Christmas presents. We'll help you with plenty of advertising material.*

# Clothes Washing

Practically every woman in every home, once a week, has to face the wash-day problem. And if you have something to offer her that will really free her from the dreariest and weariest of household tasks, it is bound to appeal.

**The Eden**

fills every requirement of wash-day labor-saving. It saves work, clothes and money and is the one machine that once sold, stays sold.

Simplicity of operation is an Eden characteristic. It has been designed from the woman's point of view and with this in mind it has been so constructed that all moving parts are enclosed and nothing to confuse or annoy the woman in her work.

# One Fact Sells Silkstone—Economy!

## Tell Customers the Facts

Silkstone Flat Wall Colours are cheaper than wall paper, more sanitary and lasting; Silkstone can be washed often and never rubs off; it gives a beautiful, soft, silky finish that will outwear any other wall covering. The economy of this splendid finish, that costs so little to apply and serves so satisfactorily, is an appeal to every customer.

While economy is a forceful appeal to housewives and furnishes a motive for an enormous purchase of Silkstone, it is a profitable article for the dealer. We suggest that you write us and so give opportunity for us to prove two things—that Silkstone sells, and that it is profitable to you. Better yet—write us about the benefit to you in an agency.

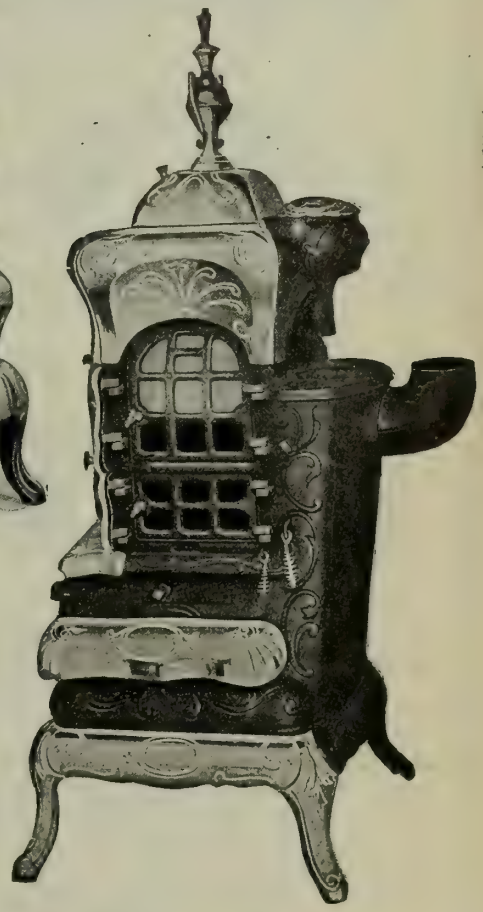
## Base Burners

### No. 14. Leader

The Leader has easily renewable fire pot, duplex grates and shaking ring. A heater of marvellous heating capacity due to a two-flue construction. It includes direct and check dampers for perfect control, a large, roomy magazine with handsomely nickel-plated cover. The large ash pit is provided with a generous ash pan with an ever cool handle.



### Gem Stewart

This handy heater has a large coal magazine, tea-kettle top at rear, base flue cleanout, heavy, cast-iron pipe elbow, strong-bailed, extra large, steel ashpan, double heater attachment with hot air pipe collar, system of fire travel which gives full base circulation, perfect system of tight dampers gives absolute control of fire and saves fuel. Beautifully finished in nickel plate.

### No. 16. Leader

is greatly improved by the additional feature of a double heating attachment which enables hot air to be carried to other rooms by pipe. This greatly increases the usefulness of the heater as it warms other parts of the house.

Both heaters are equipped with a shelf at the back with removable lid suitable for boiling kettles, etc.

*You can sell*

# Galt Couch Hammocks

## *Sales Have Increased 150%*

Sell them at prices your competitor can't touch. The sales increased 150% over 1918, and dealers handling them made good profits. If you missed it last year be prepared for 1920. Our salesmen are out now and will show the exclusive designs that pull big sales.

While labor conditions and supply of material are still difficult, *we guarantee deliveries as usual.*

# The Demand Is Like the Product— It "Covers the Earth"

In every community—wherever paint and varnish is used—there is a big, insistent demand for the Sherwin-Williams lines.

People know Sherwin-Williams Products. Quality and aggressive consumer advertising have created for them a degree of goodwill that makes the Sherwin-Williams agency a source of better paint and varnish profits for every S-W dealer.

When you show Sherwin-Williams Paints and Varnishes you have back of you this Quality Reputation and this Sales Pulling Publicity that will put many extra dollars in your pocket.

*Just ask us by post card to tell you all about this "better than usual" paint agency proposition.*

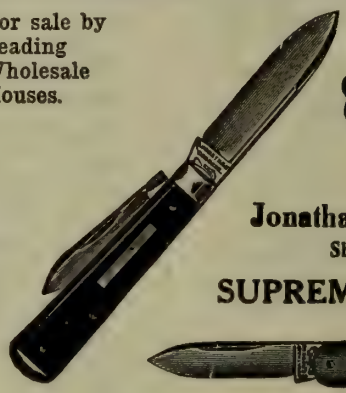
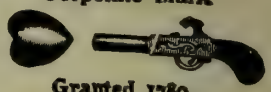
*Prompt attention and quick delivery assured.*



**The Best is Cheapest**

in the long run. C. & L. Fire Pots and Torches are always the cheapest in the end for they produce more heat, burn less fuel, are stronger made and will outlast several of ordinary make. We have made many improvements that improve, but have never experimented at the expense of the user. Be Wise and buy the Best. Jobbers supply at factory price. Send for catalog—it's free.



No. 32 Torch.
List Price, Each, $16.00.

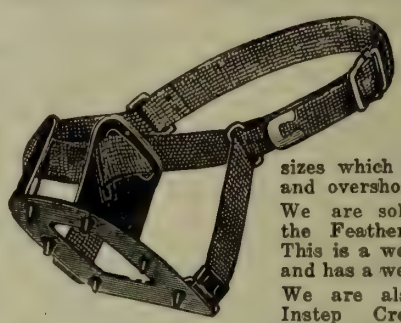
**SUPREME CUTLERY**

**Chair Seats---In Three Ply Veneer Staple Patterns**



Every C.V.C. chair seat is made of best material, well glued nicely formed and carefully bored; corners of seats well rounded, edges smoothed, sand-papered and finished with real church pew varnish.

**Ask for samples, and compare with any other make.**

**Canadian Veneering Co., Inc.**
Acton Vale, Quebec
Distributors: Richardson & Bureau, 55 St. Francois-Xavier St., Montreal.

**CHURCHILL'S "ICE GRIPPER"**

Our "Ice Gripper" is made with an equalizing strap which adapts itself to shape of heel. It cannot slip off. It is made in three sizes which fit all sizes of shoes and overshoes.

We are sole manufacturers of the Featherweight Ice Creeper. This is a well known Ice Creeper and has a well established demand.

We are also manufacturers of Instep Creepers and Woven Straps for all purposes.

# FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

## Subscription price of HARDWARE AND METAL is $3 per year or less than six cents per issue.

# Economy of *Ford* Service

WEAR is unavoidable even in the best car, but certain parts wear out more quickly than others. There is no need of scrapping your car because the piston rings have seen their day, because the platinum points of the vibrators are worn out. Probably the rest of the car is as good as new.

Medical men agree that the human body is renewed, cell by cell, every seven years. You can do the same with your Ford Car and prolong its life at minimum cost by replacing worn parts from time to time.

Ford service has been the means of doubling the lives of hundreds of Ford Cars, and cutting down the cost of motoring. The fact that a Ford Touring Car, which costs $690, f.o.b. Ford, Ont., can be purchased part by part separately for $917 is ample proof of the economy of driving a Ford Car.

It will pay you to have your car overhauled during the winter months. 700 Canadian Dealers and over 2,000 Service Garages supply genuine Ford parts and prompt repair service.

When buying, choose a Ford, and take advantage of the economy of Ford service. 135

Dip your hands into our Treasure Chest

The B-H Chest of advertising material is a veritable "treasure chest." It contains the most complete assortment of sales helps ever offered the Canadian Paint Dealer.

Let us give you more complete details of our agency proposition. It will place you under no obligation.

"Save the surface and you save all" *Paint & Varnish*

**BRANDRAM-HENDERSON** LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

# *Be Enthusiastic---IT PAYS!*

On the shelves of the hardware store, there is no product more worthy of the merchant's enthusiasm than O-Cedar Polish.

If you are not enthusiastic about the merits of this product, it must be because you do not really *know* O-Cedar.

A trial of it in your own home—on your own furniture — or to polish your motor car will arouse your enthusiasm to that degree which is needed to make the O-Cedar sales you *should* make.

**O-Cedar Polish**

The hardware merchants who are making real money out of O-Cedar sales are the merchants who know this product through the experience of their wives and themselves. Their confidence in O-Cedar is such that they give this product a place of prominence in their stores—they "play it up" in their advertising—they tell of its merits whenever opportunity offers. The result is that their customers — having noted the claims we make for O-Cedar in our own newspaper advertising—make their first trial purchase of our polish in the stores of these enthusiasts—and they go back to those same stores for "more O-Cedar" after being convinced of its worth.

O-Cedar products—the polish and the mop —sell freely in every store that handles them. But in one block there will often be two merchants, one selling an average quantity of O-Cedar, and the other selling nearly double the amount of his neighbor. The one merely hands out O-Cedar products when asked for them. The other, having *experienced* the satisfaction of using O-Cedar, just cannot help featuring it, and so gets the lion's share of the O-Cedar trade in his neighborhood.

# Suggest Safety Razors *for* Xmas

**ALL STYLES**

***Gillette Safety Razors***

Every day from now until Christmas will see much buying of articles suitable as gifts—gifts for mother, father, sister, brother—gifts for the individual, gifts for the home.

The hardware store is gaining in popularity with Christmas shoppers and will continue to attract so long as dealers stock lines suitable as gifts and keep them to the fore at this season of the year.

We suggest that you emphasize safety razors in your window and store displays. They offer splendid gift suggestions.

**Don't wait for the "Rice Lewis" man, write for a few lines to sort your stock.**

## Post Yourself So You Get Your Share of the Auto Supply Business

# YOU HARDWARE MEN!

## What are YOU going to do about it - - - - ?

**YOU no doubt have often thought of adding automobile supplies to your hardware line, but for the lack of knowledge you have felt a hesitancy in doing so.**

**We now offer you the opportunity to take up this profitable line.**

**Write us for our proposition. We guarantee to start you right and not land you with a lot of dead stock.**

### OUR SALES MANAGER SAYS:

If accessory dealers are able to secure what they require to meet the trade needs of 1920 they will be very fortunate. This is a plain fact borne out by the actual conditions surrounding manufacturers today.

In an interview with John A. Frazer, sales manager of Lewis Bros., Ltd., Montreal, HARDWARE AND METAL was informed that the outlook is one of great encouragement as far as actual business possibilities are concerned. When it comes to anticipating the procuring of stock, however, the situation commands close and special attention.

### ONE DEALER SAYS:

"We started in a very small way as we wanted to make sure before we went ahead. Right from the first we have had a steadily increasing call for accessories, and we are planning to considerably enlarge our present department as we find car owners continually asking for things which we have not yet in stock. We are developing a nice business in accessories, and I am expecting it to develop into one of our best departments."

**These clippings were taken from "HARDWARE AND METAL," dated November 15th, 1919, pages 59 and 63, and should be interesting to hardware merchants who expect to add automobile supplies to their line.**

## Here's the Place to Buy!

## LEWIS BROS., LIMITED
## MONTREAL

# *The foreman says.*

"I suppose it's because I used them myself when I was at the bench, but it does seem as though the best men in the shop have a preference for Starrett Tools.

"Of course, most of them sort of got into the habit of relying on Starrett for fine work when they were apprentices and journeymen.

"Speaking of apprentices — that little red book there, 'The Starrett Book for Machinists' Apprentices,' has saved me more time and helped more young fellows to learn how to do things right than anything else in the shop.

"When a young lad asks me how to do this or that, I usually tell him or show him, and then ask him if he has one of those books. I've noticed that as soon as he gets one of them he doesn't have half so many questions to ask.

"Starrett gets out another book, 'The Machinists' Data Book,' that's just about as big a help to the experienced machinist. It's got all the tables and formulas and so on that he ever needs, and it isn't cluttered up with a lot of engineers' stuff that he doesn't use.

"Yes, I bought one of each of the books down at the hardware store, as soon as they came out. They cost me seventy-five cents each, but they're worth it."

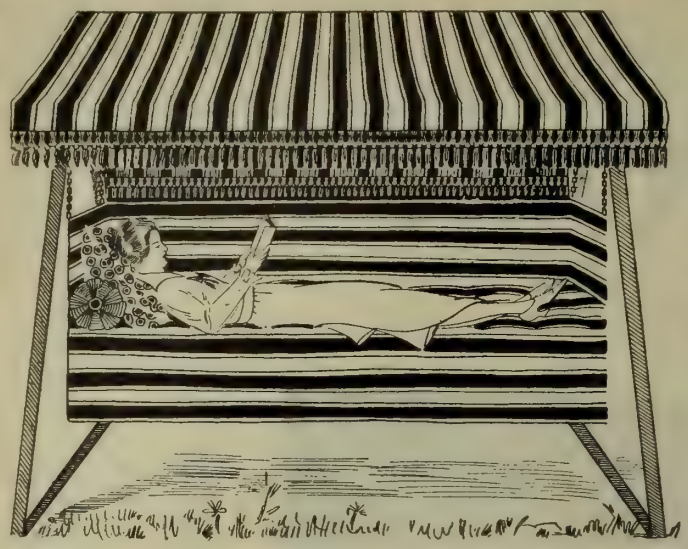
# No. 77 Flexible Storm-Proof Door Hanger

This strong useful hanger combines the good features of the No. 66 Storm Proof Hanger, and in addition a flexible hinge joint. When the door occupies its normal position there is no vibration in the hanger yet it is free to swing before a bump that displaces the door. This feature partly accounts for its popularity with the trade.

The connecting-strap and drop-strap are heavily embossed, increasing the already great strength of the Hanger. The method of attaching connecting-strap to truck permits the free action of the equalizing-pin, and holds the truck firmly in an upright position. The steel used in drop-strap and connecting-strap is 3/16-inch thick.

Oil-holes for bearings are also provided.



Packed one pair in a box, with bolts, for attaching the Hangers to door; also lag-screws and end-stops for the rail. Each box contains, also, a set of illustrated directions for attaching the Hangers and rail.

**Packed one dozen pairs in a case. Weight, per dozen pairs, 95 pounds.**

*Packed the Unusual National Way*

*Manufacturers of all that's Best in Builders' Hardware*

# WHEN GRANDFATHER FIRST READ BY THE KEROSENE LAMP

ONE evening in 1826, Grandfather removed the candlestick and waxed taper from the table and lighted a new "contraption" which he called a kerosene lamp. But it was not until nearly thirty years later that mineral oil lamps, improved and perfected, began generally to displace the wax tapers and the lamps which produced light from animal oils.

Two years before the first kerosene lamp was lighted, nearly forty years before the discovery of petroleum in America, the workers at Plymouth began making rope—rope so good that when the demand came for drilling cables to open up the vast stores of petroleum beneath the earth's surface, Plymouth was ready, and for sixty years Plymouth Drilling Cables have played a very important part in the production of petroleum.

For every rope and cable use Plymouth delivers full value and more.

THIS LETTER IS SUBJECT TO THE TERMS PRINTED ON THE BACK HEREOF

BURNHAM, MIFFLIN CO., PA. July 7", 1919

The Stark Rolling Mill Co.,
Canton, Ohio

Gentlemen:-

We are in receipt of your favor of the 30th ultimo with regard to the service we have been getting from Toncan Metal, and in reply would say that about twelve years ago we roofed a part of our plant with Toncan Metal Sheets.

They are still in use and appear to be as good as when first put on, which we regard as highly satisfactory service.

Yours truly,

*David Thomas*
General Manager.

B/DT

# In Good Condition After Twelve Years

It is a significant fact that a great many manufacturers of Metal and Metal Products are large users of Toncan Metal for their own buildings.

Another big Steel Company recently used more than sixty carloads largely in Roofing and Siding.

These are men who know metal.

They know that where corrosive conditions exist, Toncan Metal is by far the best and most economical sheet metal to use.

For Roofing, Cornice, Conductor Pipe, Refrigeration and every severe sheet metal service, it will pay you, and your customer, every way, to use Toncan Metal.

# How We Carry the Disston Message To All Classes of Tool Users

CONSIDER the different people to whom you sell saws and tools. There is the carpenter and mechanic—the professional tool-user. There is the home-owner who has a set of tools for use around the house. There is the farmer who is his own carpenter. There is the business man who spends spare hours at a work-bench. There is the boy who has learned to make things at the manual-training school.

There are any number of these men, particularly the older men, to whom seeing a Disston advertisement is like reading an item of news about an old friend. But there are also every year new purchasers of tools.

Disston advertising seeks to quicken the friendship of the old and to make the acquaintance of the new. It is so planned as to reach every one of the different classes of tool-users mentioned above.

In future pages of this magazine we will discuss in detail how we reach each of these various classes and the effectiveness of this work in helping your sales of good saws and tools.

# Announcing—

WILLIAMS' "Vulcan" Forged-Cutter Tool Holders give unequaled service to those who prefer the solid, forged-type of cutting tool. Each Holder, by the mere insertion of small High Speed Forged-Cutters, is adapted to the heaviest service on Lathe, Planer, etc.

The economy and convenience of this line, when installed as standard shop equipment, is at once apparent, as all blacksmith work, to say nothing of the very considerable investment necessitated by heavy, solid forged-tools of costly High Speed Steel, is eliminated.

Absolutely simple in construction, yet possessing all the advantages of the solid tool without its expense.

Cutters, drop-forged from the finest grade of High Speed Steel, in stock in a great variety of sizes and types, finished and hardened ready for use.

# THE APPROACH OF CHRISTMAS

always brings up the **Gift Question.** Every dealer will find profit and satisfaction in encouraging the purchase of **KRIBS** Washers as most welcome, useful and appropriate Christmas gifts.

**There is a KRIBS to suit the need and purse of every type of customer.**

The beautiful Electric is unsurpassed in efficiency and marks a high standard in washer manufacture.

Where electric current is not available, the **Gasoline Motor** machine is a winner.

The **Water Motor** machine fills a very proud position and relieves from hours of toil, doing excellent work.

The **Hand Power** machines win praise everywhere for the splendid results they give, for easy action and fine appearance.

## Kribs Washing Machines are "Different"

The wood, the construction, the unshrinkable tubs, the cut gears and general "classy" appearance make them a splendid selling line. **They add distinction to the dealer's stock** and buyers of KRIBS machines learn to regard the KRIBS dealer as a man who sells **Quality** goods.

If not familiar with all the reasons, write us at once, or ask your jobber. Information and prices gladly and quickly furnished.

# Those Hard-To-Get-At Nuts

In every garage, machine shop, blacksmith shop and factory in your locality there's a lot of unnecessary cussing that you can turn to profit.

Those nuts that are so hard to get at with an ordinary wrench are easy prey to the Original "Westcott" adjustable "S" Wrench. The "Westcott," besides being the most convenient and useful wrench for ordinary use, can be used in places inaccessible to the Monkey-Wrench. It stops the cussing and adjusts the nut quickly and effectively.

"Westcott" Wrenches are fully guaranteed to do their duty. We empower you to refund the purchase price of any "Westcott" that fails.

The "Westcott" is easily adjusted by the hand that holds it. Its handle is made of first-class refined malleable iron and the jaws of forged steel scientifically h treated.

If your jobber cannot supply the "Westcott," write us and we will tell you who can.

More sold in Canada than any other make. **STILL'S HANDLES** are made with exacting care from high quality Canadian woods, durable and lasting to an unusual degree. Axe, Pick, Sledge and Hammer Handles, Cant, Hook and Peavie Handles. There are good profits for the dealer and an abundance of customers' satisfaction in all **STILL'S HANDLES.**

**J. H. STILL MFG. COMPANY**
**ST. THOMAS . - ONTARIO**

# RALPH CONNOR

## *On "The New Canada and Its Needs"*

RALPH CONNOR, the famous Canadian novelist, who served for several years at the front and saw the war from many angles, is convinced that Canada must be prepared to make important changes if she is to profit by the lessons of the war. He has written a series of articles embodying his views and calling vigorously on patriotic Canadians to awake to the needs of the hour. The articles, which deal with economic, social and Imperial topics, were written for MACLEAN'S MAGAZINE and the first appears in the November issue, under the title: "The New Canada and Its Needs."

## Every Mother Who Lost a Son at the Front

will read with deepest feeling Nellie McClung's wonderful story, "Men and Money," which also appears in November MACLEAN'S. Mrs. McClung wrote this story with a purpose—to show the ease with which the world forgets the contribution these mothers made. But it is also a very fine story—real, human and gripping.

## "The Idle Hands at Ottawa"

*By J. K. MUNRO*

The recent session of the Dominion House was in many respects an idle one. There was not a great deal done, so the members had a lot of time to stir up things, and the result was some hugely interesting political situations. All of which J. K. Munro tells about in his usual unsparing and tersely humorous way.

## *Remarkable Features of a Remarkable Number*

The November MACLEAN'S is cram full of other big features—famous writers on vital subjects and everything Canadian. Look over this list:

**Baroness Orczy.**—The author of "The Scarlet Pimpernel," best seller of best sellers, is represented by a serial story, "His Majesty's Well Beloved."

**Robert W. Service.**—The great poet of the Yukon and the battlefront contributes a strong poem, "The Outlaw."

**Basil King.**—This great novelist who lives abroad contributes an interesting discussion on "Why I Remain a Canadian."

**Janey Canuck.**—An article on Mrs. Murphy's experiences as the first woman magistrate in the whole of Canada.

**Camilla Kenyon.**—A new novelist who promises to become a great favorite, tells a humorous story of adventure, and treasure, "Spanish Doubloons."

**Stephen Leacock.**—A humorous sketch entitled, "My Memories and Miseries as a School Master."

**"Two Men and an Idea That Grew and Grew and Grew."**—By Charles Christopher Jenkins.—A sketch of two remarkable and practically unknown Western Millionaires.

**"A Little Bit of Chicken Feed."**—By Allen C. Shore. A bright story combining love and business themes.

**"The Rainbow Death,"**—By Madge Macbeth. An intensely interesting detective story.

**"The Search for Missing Men."**—By Gertrude Arnold. An article on hospital experiences at the front by a young Canadian V.A.D.

# MACLEAN'S will be Twice-A-Month

starting February 1st, next year. An important point to remember. If you want to keep up with things **nationally Canadian**, you'll have to get the MACLEAN'S Twice-A-Month habit.

# Accessories for Christmas Presents

## Hardware Merchants Have a Chance to Make Some Splendid Profits and Help Many People Select a Gift That Will be Greatly Appreciated by Any Car Owner—Suggestion for a Seasonable Ad Along This Line

FEWER cars will be laid up this winter than ever before," said A. M. Bottcher, of Hyslop Bros., Ltd., Toronto, in discussing with HARDWARE AND METAL opportunities for the sale of automobile accessories during the winter months.

The automobile is an established economic factor in the industrial life of every community. Hardware merchants who handle automobile accessories have not been slow to realize this and they have added considerably to the volume of the year's business by dealing in them. But they have not always, perhaps, been as quick to realize that the automobile is increasing its use for a greater part of the year than it did when it was first used.

### Use Cars All Winter

So many accessories have been introduced and such improvements have been made from year to year that cars can now be used almost with as much comfort during the average winter months as any other time of the year. In the articles and devices that have been placed upon the market, there is a big field of profit for the hardware merchant. Automobile accessories for winter months make excellent Christmas presents. The Marshall Field Co. of Chicago, this Christmas, is making a special display of accessories for Christmas buyers and featuring them for those who are looking for something away from the customary lines of Christmas gifts.

"Prior to the war," said Mr. Bottcher to HARDWARE AND METAL, in discussing the whole matter, "a tendency had already developed, where motor car owners in northern climates were becom-

*Note how effectively the wall and window displays shown in the illustration combine. They have produced excellent results says George A. Elliott, of Brantford, Ont. He also puts in window displays of auto accessories regularly and backs up the entire display by attractive newspaper advertising.*

ing more and more inclined to lengthen the operating period of their car, to increase the number being used all the year round. It was during the war, however, that automobiles, trucks and motor ambulances proved their absolute independence of weather and road conditions, whether abroad or at home, and demonstrated conclusively their reliability, expediency and even comfort when in operation during the cold winter months.

**Driving in Comfort**

"Fewer cars will be laid up this winter than ever before. Even the ordinary touring car can provide travelling in luxurious comfort during the cold weather. With the top enclosed or any of the convertible types of enclosed tops mounted on an open touring body, it keeps out the cold air, rain or snow. A good heater deriving heat from the exhaust may be installed at a nominal sum, and it is suitable for passenger cars or trucks. Warm lap robes and wool-lined gauntlets add to the comfort of the driver or occupants. Tire chains enable the car to be propelled along slippery streets and through deep snow with perfect ease and safety. Anti-freeze solutions and engine hood covers obviate the injury from motor freezing trouble.

**An All-Year Proposition**

"Against this array of facts there can be no logical reason why a car should be put in storage for the winter. The time has come when motoring in all its phases can be considered an all-the-year proposition.

"Car dealers this fall and winter will receive a far larger quota of automobiles than during any previous corresponding season. They will be mighty glad to get them, after manner in which cars have been doled out to dealers this summer, and with customers anxiously waiting for deliveries—many for several months.

**Record Business**

"With a record volume of fall and winter business in new cars it behooves the manufacturer, jobber and dealer of automobile equipment to be prepared to take care of the demand for equipment and supplies for same. Such goods are required when automobiles are delivered in the spring and summer, and they will be needed just as much when cars will be out on the roads during the cold weather, with the added advantage of making sales of specialties peculiar to the season to insure comfort and safety in operating the car."

Hyslop Bros. are making a special effort themselves, to promote the sales of winter accessories to automobiles. In addition to their usual large catalogue, they have issued a fall and winter bulletin which is especially adapted to the requirements of the season. It contains many useful suggestions for Christmas presents.

**Window Displays Help**

If the hardware merchant who is in the habit of handling accessories makes a special display window of them, he might be surprised to find how they promote Christmas trade. There are many useful and inexpensive articles that make attractive Christmas displays. Some of these are non-freezing liquid freezometer, combination radiator and engine hood cover for various makes of cars, driving gauntlets or fur gauntlet mitts, foot warmers, engine heaters, fur motor robes. And there are many others along the same lines that have special use in cold weather.

A Western Ontario dealer this week had this advertisement in the newspapers as an introduction to a long list of auto accessories:

**WHAT ARE YOU GOING TO GET FOR DAD?**

"'Dad' is a hard chap to buy presents for. Generally, he has about everything you can think of. Why not make it a different Christmas for him this year and buy something for his car? How about a new tire, a spot light, a robe, a pair of gloves, or something of that sort?"

There is no present more appreciated by a motorist than something useful for the automobile. Hardware men have a rare field of opportunity in the handling of automobile accessories, and with prospects for a bumper Christmas trade never better, it should be a most profitable one as well.

## DECISION GIVEN AT OTTAWA IN SCRAP CASE

Ottawa.—In the Supreme Court, the case of the Canada Cycle & Motor Company vs. J. Mehr & Son was taken up. The parties signed an agreement as follows:—

"J. Mehr & Son hereby agree to take the accumulation of scrap from the Canada Cycle & Motor Company, for a period of one year, the prices to be as follows:"

Prices were then set out for different kinds of steel. It was signed by the company, and signed "Accepted," by Mehr & Son.

This agreement was acted on for some months, when Mehr & Son were notified that the company had no more accumulations to deliver, and, having to buy scrap from other parties, brought action for the difference between the prices paid and those payable under the agreement.

The only question to be decided, is whether or not the company was bound to deliver all its scrap to respondents during the year, or if its only obligation was to accept the prices named, if it chose to deliver it. The Trial Judge and the Appellate Division held that it was the former.

## FORM CUTLERY ASSOCIATION

ATLANTIC CITY.—The cutlery industry of the nation will soon be organized. Men representing 80 per cent. of the production of cutlery in the entire country are in closed session here to organize. The ground work for a national association was laid, and an executive committee, of which Charles Rothwell, of Meriden, Conn., of the Miller Bros. Pocket Cutlery Company, was named chairman, and elected to perfect details.

A nation-wide advertising campaign in periodicals, newspapers and trade publications to acquaint the people of the United States with the desirability of using American made cutlery will be started shortly.

# Paint and Varnish Prices Expected to Remain on Present Basis Until June

## Manufacturers at Meeting in Montreal on Thursday Discuss the Situation and See No Likelihood of Any Immediate Reduction

At a meeting of members of the Canadian Paint, Oil and Varnish Association, held in Montreal Thursday, it was decided that prices of paints and varnishes will hold on the present basis until June 1, 1920, unless conditions in the meantime warrant revision. The opinion was generally expressed that markets are expected to be very firm.

One commodity has held higher than expected—that of linseed oil. It was expected, a while ago, that this would have reached the $2 mark by this date. Seed shipments have been tardy, and the trend of price downward has been deferred. Deliveries are now a little improved over those ruling a couple of weeks ago. It is also understood that Argentine seed is arriving from the South.

Then, again, pig lead has been creeping higher, and the market has settled down to a fairly steady level on a high basis. Some expect that it will continue to hold on this level for some time. Others again look for advances of price. Labor is still high and wage increases have totalled much higher than ever before. Of course there has been an increased production of many products, and the demand has been big this year. With such continued prosperity and with staffs fully employed, the overhead charges to the manufacturer would be more favorable than would be possible if there had been a big slump in orders. All reports indicate that the fall business has exceeded the turnover of previous years, and at present there is great activity.

It seems probable that there will be no reduction of prices at this time, probably none for some time to come.

# Seasonable Window Suggestions

*Window display of silverware is always attractive and if shown now will bring many of the early Christmas shoppers into your store as purchasers. Note the simple but effective background in the above arrangement and the display of prices. This is always an important matter, but during the holiday season when people are trying to make their gift appropriations go as far as possible, it is especially essential.*

*The above window display which was used during Christmas week last season, by the Aikenhead Hardware of Toronto, proved a big business getter. With so much building in sight for the spring, sales of tools are likely to be more brisk than ever and by letting the people see what you have in stock, increased turnover will result.*

# Will Sell Tires Only to Dealers

## Manufacturers Endeavoring to Straighten Out the Problems Which Have Developed Through the Taking On of Commercial Accounts—Black Ball List is Now in Force in England

BY leaps and bounds, the sale of automobile tires in Canada has progressed, and the manufacture of these tires has gone on in exact proportion. With the development of this business, there have developed, also, a number of problems with regard to the handling of them from the time they are a marketable article in the hands of the manufacturer until they reach the hands of the consumer. At heart, many men are free-traders, in that they will buy an article where they can get it the cheapest. Should, therefore, the consumer be permitted to buy his tires from the manufacturer, either directly or through a friend, or should he be obliged to purchase them through a dealer entitled to a legitimate profit? If the manufacturer sells direct to the consumer, can he reasonably expect that the retailer will give the best attention to those tires, if he has been deprived of the profit of sale? On the other hand, will the dealer equip his store with an up-to-date vulcanizing outfit to prolong the life of the tires which he mends, if he has no immediate interest (because he has made no profit on sales) in maintaining the good reputation of the tires which he handles?

### Refuse the Accounts

These are some of the problems which have developed with the business, and which, in all probability, will continue to develop for some time to come. So far as HARDWARE and METAL is able to find out, the largest rubber companies are gradually refusing commercial accounts, that is, accounts with the man who wants to buy tires, either for himself or a friend, because he sells hot water bags, rubber coats, rubber shoes, etc.

With corporations having at their disposal a fleet of cars ranging from ten upwards, they do not follow this policy, nor, so far as we can discover, does the dealer want them to hand over these accounts to him. But the dealer has insistently demanded that the manufacturer refuse to sell tires to small commercial accounts, such as those mentioned.

### Black-Ball List

In England, a black-ball list is compiled of manufacturers who violate this principle of trade; but in Canada, the law would not permit, as yet, of such treatment. And the tendency of the big rubber companies seems to be to refuse commercial accounts. There will be, from time to time, manufacturers of new kinds of tires who, to market their goods, will violate this principle of trade; but the dealers seem to have organized so strongly in this country that it would not be worth their while to pursue this policy for any considerable length of time.

The manufacturer wants the dealer to get his legitimate profit, and he wants the trade all through to either make the sale of tires a legitimate business, with standard profits, or leave it alone altogether. The man who buys a set of tires for a friend, because he happens to be dealing in some kind of rubber wares is, so standard manufacturers say, throwing a monkey wrench in the machinery, and causing a lot of unnecessary trouble.

### Working Out the Problem

It seems that the whole matter will very soon have reached a satisfactory conclusion. It has been before the Retail Merchants' Association for some time, and exchanges of views seem to have about determined that harmony shall prevail. The dealer wants to handle the tires as a legitimate accessory to his trade, with legitimate profits, and the standard manufacturer seems willing that he should.

According to W. H. Wilkinson, chairman of the Toronto Branch of the Retail Automobile, Garage and Accessory Dealers' section of the Retail Merchants' Association of Canada, the outcome of the present struggle between manufacturers and dealers will profoundly affect the latter's yearly business. He admits that there are a number of commercial accounts which the dealer can not hope to get, such as the account of a large corporation, be it either civic or private. But he firmly believes that it should stop there. Because, for instance, some man may be working in the office of a corporation, is no reason why he should secure auto tires from the manufacturer at the same price that the dealer has to pay for them, through the office of the corporation for which he may be working. He figures it out that the dealer is being robbed of the very cream of the business that is legitimately his, namely, the sale of tires. He says he is selling about $5,000 worth of tires per month, and he ought to sell $25,000 worth

### Same Conditions

The same conditions apply to other dealers, so Mr. Wilkinson believes. He feels certain that not more than a dozen garages in the city of Toronto are really paying the owners more than a fairly decent salary a week. Repair work, unless conducted on a very narrow and scientific basis, does not pay.

Not only is the garage dealer robbed of the cream of the business, according to Mr. Wilkinson, but such accounts as do come to the dealers for the sale of tires are the poorest accounts.

### Get Poor Accounts

"We get the poor accounts," said Mr. Wilkinson, "and the manufacturer gets the cash accounts." In other words, if a man has the cash to pay for tires, he goes to the manufacturer; if he hasn't, he buys them from the dealer, who has to carry the account for months.

Mr. Wilkinson is hopeful that the dealers will win out in the struggle. One firm, he says, already refuses to sell to other than the dealers, and others say they are going to fall into line. All over the province, dealers are taking up this question, and he feels that the manufacturers will, ultimately, comply with dealers' requests, that tires be sold through the dealers and not direct to commercial accounts.

## WESTERN MAN URGES CLOSER TRADE CO-OPERATION

L. A. Guertin, of Vancouver, B.C., was the speaker at a meeting last week of the Montreal Chambre de Commerce. As a former French-Canadian, who had made good in the Western Provinces, he was given a hearty reception by the Montreal body of Canadian business men and spoke regarding the development of closer trade relations between the East and the West.

Mr. Guertin pleaded for the development of closer trade relations between the province of his birth and the one with which he has chosen to associate himself in his business life. He particularly pointed to the fact that United States firms control nearly all the Western trade, and the possibilities of which, he said, apparently have been overlooked by the eastern part of Canada. He deplored the fact that capitalization of various promising industries of his adopted province, Eastern Canada, and particularly Quebec, holding a metropolis, has not taken the initiative, but has left it to the interests of the United States. As a means of opening the eyes of the Eastern manufacturers to the possibilities in the West, the speaker suggested that an excursion to that city be taken.

In expressing his appreciation for the address of Mr. Guertin, Jos. Quintal, president of the Chambre de Commerce, voiced his hope that trade development between the two provinces would improve and hoped that this matter would be studied.

# Your Christmas Window Display

A LITTLE more than three weeks remains for Christmas shopping. Hardware men, as well as all other merchants, are looking for the biggest Christmas trade of history. The year has been a prosperous one, and the phenomenal success of the Victory Loan campaign indicates that there is an abundance of ready money in the country.

### An Efficient Salesman

One of the most effective salesmen in the organization of any merchant is his window. At this time of the year, Christmas shoppers are eagerly scanning window displays for the purpose of getting ideas for suitable and useful Christmas presents. No merchant has more useful and durable or attractive Christmas gifts than the hardware merchant, gifts which will give years of service and are ornamental as well. The Christmas windows should be a cash-producing proposition; and the experience among most hardware men is that they have been. The present year is an exceptional one so far as this opportunity is concerned.

### Win a Cash Prize

Not only can the window be made to be the medium of a big turnover of stock and a large return of profits, but it may win a cash prize at the same time from HARDWARE AND METAL. The annual competition for the best window display has only one condition attached to it, that is, the goods there displayed must be for the Christmas trade. It is open to hardware merchants from coast to coast. These windows are already being planned by merchants who realize the full value of the well-dressed window as a promoter of big sales.

### Keep This in Mind

When planning them keep in mind the cash prizes offered by HARDWARE AND METAL. Make your ingenuity and skill of double value, because of what it can sell for you and for what it can bring you in the nature of a cash prize for successful window display. Keep in mind the usefulness of your window as a stock-seller as well as an attraction. Your window may look pretty enough without bringing you much business. In the trade, there are scores of suitable Christmas gifts; and the attractive display of such in a window that acts as a salesman twenty-four hours of the day will help to make Christmas 1919 a record-breaker.

# Do You Keep Accounts Cleaned Up?

## Collection is One of the Most Important Features of Conducting a Successful Business —Some Suggestions for Getting After Any Delinquents You May Have

EVIDENCE steadily accumulates that the days of unrestricted credit to customers, especially in the rural districts, are past. Recent statistics show that more and more of the country's business is being done on a cash basis. Many hardware merchants, of course, have accounts with factories, contractors or others where immediate settlement for goods ordered through workmen or others is impossible, but in such cases there is a regular time set for payment and they see that it is not overrun.

People are able to pay and will pay if the retailer lets it be understood that his business is conducted on a system that is more or less strictly cash.

### Causes of Failures

More failures have been caused through carelessness on the part of the retailer with regard to his accounts than by faulty methods of doing business. And there are still some customers who defer payment of their legitimate accounts. These are the people the retailer wants to get after, and there is no better time to get after them than right now. The phenomenal success of the recent Victory Loan is an indication that there is an abundance of ready money in circulation; and the retailer is entitled to the account which is due him. If he does not get it, the fault is, possibly, equally between the retailer and the customer.

### Afraid to Collect

Many merchants are poor collectors because they dislike "boning" people for money; on the other hand, there are many customers who only need a reminder that an account is due to pay it. But there are also a number of customers who are "hard pay" and with such more strenuous methods have to be adopted.

### Personal Touch

A number of methods have been adopted by various merchants throughout the country. Some have inserted advertisements in local papers; others send out letters, while still others make calls for their accounts. In conversation with the credit manager of one of the largest wholesale hardware houses in Ontario, HARDWARE AND METAL was advised that a good policy to follow was to, if possible, give a personal touch to such letters. The merchant, being on intimate terms with his customer, will, in all probability, know some grounds on which he can interject in his letter this personal touch.

### Seasonable Appeals

Still another method to follow is to make the letter seasonable. If it is in the spring of the year, state to your creditor, for instance, that it is the beginning of your year's business, that you have many accounts to clear away and that you would appreciate an early attention to the matter. If it is in the fall, you might say to him that the harvest has been garnered, that the result of the year's effort has been gathered and that you would appreciate his co-operation in cleaning old accounts off your books. This might be carried through the four seasons of the year.

Other methods to be followed are suggested in the following letters. Here is a letter inserted by a Western Ontario merchant on the front page of his home weekly. It is straight to the point and should not give offence to anyone

**IT IS DISAGREEABLE**

to send or receive an account with a footnote on it such as "Please," "Your kind attention is requested," "Please favor us," etc., etc. Our accounts are never rendered unless they are due. Our terms are, and have been for some time, strictly 30 days (the large Toronto stores do not give one day). Conditions in trade have changed greatly. It now requires nearly double the capital to swing a business. Goods are scarce and difficult to procure. Formerly

manufacturers and wholesalers were more lenient in their terms—now the majority of them ask for payment in ten days after the merchandise is shipped (actually before the goods are received, if they are routed by freight). Any thinking person can see the necessity of prompt payment. We ask it in the same courteous manner that we solicit your esteemed trade; both are necessary for our success.

This week upwards of six hundred (600) accounts, running from $3.00 to $300, will be sent out from our office, every one of them due and payable. Many of them are rendered for the first time, many have been rendered many times before. Our experience in rendering the above number of accounts is that abouty fifty (50) of them will be paid promptly—the remainder will have about as much effect as water on a duck's back. It is expected that all accounts leaving our office this week will be paid on or before November 23rd.

We would like very much to carry these four or five hundred accounts for several months if we were strong enough—but we are not.

**A Gentle Reminder**

Some people only need a reminder in the shape of a letter to bring them into the store with the cash. A politely worded note something like the following will very often suffice:

Dear Mr. ———

Your account is quite a bit past due. We are in need of additional funds and ask, therefore, that you drop in and make some arrangements for paying your account now or as soon as possible.

We do not like to write a letter of this kind to any patron of our store, that you know. We, however, buy for cash and sell on that basis, in order that we may make prices to our patrons that are right. We did to you.

Come in and see us so that we may make some arrangements to settle this account. We will greatly appreciate your doing so.

May we look for you some time this present week? Thank you.

Yours very truly,

**A Little Stronger**

If this does not bring them in try something a little stronger. Keep right after them. Persistency pays in cases of this kind. Here is a follow-up letter to be sent a week after the first one went out:

Dear Mr. ———

It seems a bit strange to us that so far you have paid no attention to our recent letter asking you to call and settle your past due account.

Our policy has been to buy on a basis of spot cash and sell the same way. We made you prices accordingly, as you know. In other words, we gave you the benefit of spot cash prices and agreed to wait for our "spot cash."

Now, we think you owe it to yourself and us to come in and settle up. We really are in need of the money, as all retailers are at this particular time.

If you are unable to pay in full, we will be glad to have you pay some on account and give us an understanding as to when the balance will be taken care of.

Come in, then, to-morrow or next day, and make arrangements to settle this. Do not disappoint us this time. We shall look for you soon.

We wish to remain,

Yours very truly,

**Need the Money**

Before taking any drastic action merchants sometimes find it advisable to send a third letter, in which it is intimated that if the party cannot pay the account in full he should come in and at least reduce it. Many of those owing fair-sized accounts will respond to this appeal. A third letter may be worded as follows:

Dear Mr. ———

Here we have asked you twice to come in and make some sort of payment on your old account.

We believe the reason you delayed doing so was because you lacked ready money. So do we.

We need money to carry on our business, and we must, by all means, get it in.

We never like to make trouble of any kind for a patron of our store. When it becomes necessary to do so, he generally loses more than we do. He loses the advantage of cash prices on the goods he gets here, and also loses money and local repute by the law course. We do not want to take such a step now. We say this in all fairness.

Can we, then, depend upon you to square up the old account by the first of the week? Pay at least something on it.

In the hope that you will so favor us, we are,

Yours very truly,

**Must Take Action**

If all these appeals prove fruitless it means that the party probably does not intend to pay. A fourth letter along the lines indicated below should be sent and the most important point in connection with this is in meaning what you say. It is useless to tell a delinquent you will take action and then never follow it up. It gives him the impression you are afraid. One of the most successful collectors in the country to-day tried all methods of persuasion and appeal before threatening action, but once he says he is going to take the case to the courts he always does so. In this way he has established a reputation for himself that goes a long way with "slow pays." Once they know that R—— has been given the account to collect, they know he means business, and is prepared to go the limit. They also know that if they are temporarily hard up and show by their attitude that they are willing to do the best they can and are honest and will pay a little at a time, he will give them every consideration.

The final letter to be sent out before taking legal action may be worded as follows:

Dear Mr. ———

This makes the fourth letter we have written you, asking that you make some kind of settlement of your long past due account.

So far you have not paid any attention whatever. Do you think this course on your part is right? Place yourself in our shoes and see how you would like it.

Unless some arrangement is made to pay this account by the 10th of this month, we shall consider it our duty to hand same to the attorneys.

We have enjoyed doing business with you, and believe you have found us fair and square. But ignoring us as you have does not help one bit.

So please step in and pay up the account, or a part of it, before the 10th. Save us and yourself expense, and we shall be glad to continue with you as formerly. There is no personal feeling in this letter at all; we simply need the money due us.

Thanking you in advance for the courtesy of a settlement by the date mentioned, we are,

Yours very truly,

# Sees Active Building Year in the West in 1920

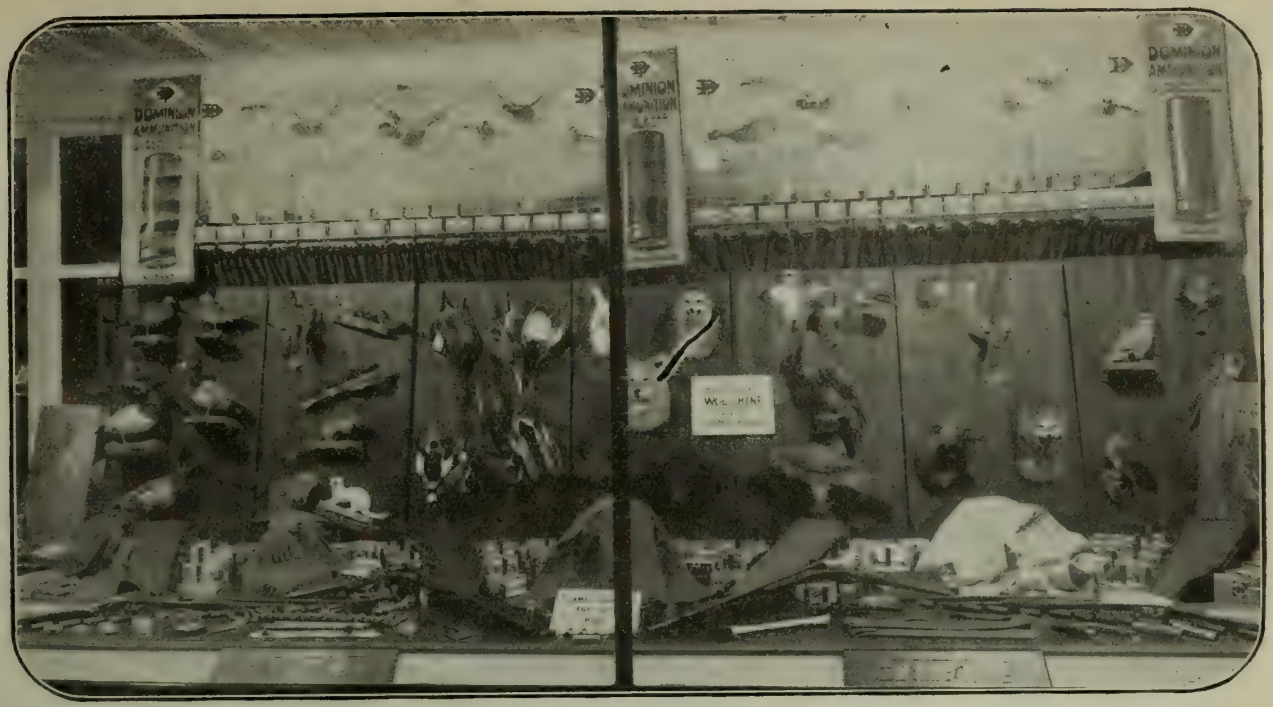
INTERVIEWED in regard to the business outlook in Western Canada, A. E. Dykes, manager of the wholesale department of the J. H. Ashdown Hardware Co., Winnipeg, expresses the opinion that business in the Western Provinces of Canada will continue good throughout the year 1920.

"Business has been very brisk and promises to continue so," says Mr. Dykes. "The demand for goods is keen all through the West, even in those districts where the crop yield was light. All classes of hardware are being bought and paid for to a large extent in cash. Collections are as good as at any time in the history of the company.

Referring to the future, Mr. Dykes anticipates much activity in the first six months of 1920, during which time building will be resumed all over the Western country and immigration will make itself felt.

"The returned soldiers will also add to the activity and the demand for goods. All business houses will be doing their utmost to secure goods to meet this demand," says Mr. Dykes.

"At the conclusion of the business of the spring and early summer in 1920 business men anticipate there will be a pause until there are some indications of the kind of crop we are to have. If the prospects are fairly favorable the fall trade will continue very active. For the balance of the present year it is only a question of getting goods. Merchants in all parts of the Prairie Provinces, with the exception of the areas where crops were the worst, report great activity."



With reference to deliveries, Mr. Dykes stated that there had been more labor trouble in the United States than the Canadian people were aware, hence the protracted delay in securing manufactured goods. In some cases United States plants had been closed down for two months due to labor troubles.

# British Manufacturers Are Coming Back Strong

An Eastern jobber informed HARDWARE AND METAL this week that his firm was in receipt of several consignments of British-made goods, and that the shipments of these were increasing. He intimated that they were most welcome, and that, while an order had been placed for some of these about three years ago, and in the meantime goods covering this requirement had been bought elsewhere, they were taken right into stock. It was further anticipated that British cutlery was now arriving, and that shipments are expected to be more regular.

This is but one of the instances which HARDWARE AND METAL has been brought face to face with of late, indicating that goods formerly secured from British manufacturers are beginning to arrive on the Canadian market. There are evidences, on all sides, that Great Britain has not been idle, and that her manufacturers are coming back strong, and soon.

The Parsons Hawkeye Manufacturing Company of Newton, Iowa, will open a branch house at Calgary and stock a full line of thresher supplies and washing machines. Walter Gilson has been appointed manager for Alberta and British Columbia.

*This striking and attractive window display arranged by the Sommerville Hardware Co., Ltd., of Edmonton, shows originality and enterprise. There are suggestions here which any hardware merchant may adopt in arranging his own windows.*

# Profits in Metal Construction

## Action of the Government of Saskatchewan Will Open Up New Field Which Western Hardware Merchants May Develop to Advantage

THE action of the Government of Saskatchewan in advising farmers in the dry areas to erect supports covered with corrugated iron in order to catch as much precipitation of rain water, snow meltings, etc., as possible, suggests a new channel of trade which the hardware dealer of Western Canada might exploit to good advantage.

The dry areas referred to are very numerous in various parts of the West. The term has reference to those districts in which it is impossible to secure water by the sinking of wells, and which renders it necessary for the farmer so situated to make use of other natural resources available. The best of these is the use of rain water. This source of water supply has, of course, been used for some years by the customary method of placing a barrel under the eaves of the farmhouse and other farm buildings.

### Contained Impurities

In most cases these buildings had wooden shingle roofs and the result was that the water secured contained impurities. Another important factor was that shingle roofs did not shed the maximum amount of water due to absorption. The impurities in the water were increased at certain periods due to the fact that particles of sand and soil being carried on the wind easily lodged in the wooden shingles and later found their way to the water barrel.

### Iron or Metal Roofing

The logical deduction from the action of the Saskatchewan Government, and from the disadvantages connected with water supply under the circumstances described, is that the farmer should adopt corrugated iron roofing or metal shingles on his house and farm buildings in order to insure an increased supply of purer water than secured under the old conditions.

In this connection it is interesting to note that a sufficient supply of water can be secured from this source, from farm buildings offering 1,800 square feet of roof, to amply supply the average farm requirements. A heavy dew such as is found in many parts of the West in the early fall mornings, will produce half a barrel of water from a surface of 1,800 square feet, providing that surface consists of corrugated iron or metal shingles, and not wooden shingles.

### Immunity From Fire

The value of metal roofing is again exemplified in its immunity from fire caused by lightning. The importance of this factor is proved by the fact that in one province alone the monthly loss in barns destroyed by fire from lightning averages close to $100,000. This loss can be practically eliminated by the use of metal roofs on farm buildings. As a lightning arrester a metal roof cannot be improved upon, providing the four corners of the roof are connected with a ground wire.

In many of the dry areas in the Western Provinces farmers and ranchers dig holes in the ground into which the water from rain and snow meltings will run. This water is for the stock. Water secured in this manner is, of necessity, less pure than the water secured from the wooden shingle roofs of the farm buildings, and the practice is likely to result in harm to those using it.

### Offers Wide Scope

Having in mind the fact that a metal roof on the farm buildings will provide an ample supply of water for farm requirements, the improvement of the conditions as described offers a wide scope for effective salesmanship work on the part of the hardware dealer in those districts. In the past a good deal of this kind of business has gone to barn framers because the hardware dealer has not been sufficiently active in making suggestions along this line. Dealers situated in districts where this improvement could be adopted to advantage can get the first line on such business in an effective manner by broaching the subject to farmers when visiting the store

on other business. Better still for the hardware dealer to pay a personal visit to the farmer at his home and go into the details as affecting that particular case.

**Made Good Profits**

While it might appear to some dealers that the percentage of profit in this business has not been such as to make it profitable for them to devote time to it, an investigation of the subject reveals the fact that barn framers have been making a substantial profit in this kind of work. An important point to remember is that the goods are not brought into the store and kept on the shelves where their percentage of profit is being steadily consumed by overhead charges. In the case of metal roofing or siding business the material is shipped direct to the customer without any further handling by the dealer. Furthermore, when a farmer gives an order for such material it is not for any small shipment, but one which at the prevailing percentage gives the dealer a very fair profit for his work. This class of business can best be handled by the hardware dealer for his recommendation generally carries more weight with his farmer customers than that of any other trade.

# Not Looking For Any Reduction in Pipe Prices For Six Months

ACCORDING to information given to HARDWARE and METAL by the Page-Hersey Iron, Tube and Lead Company of Toronto, the heavy demands for steel, the shortage of the supply due to the big strike in the United States, and the uncertain deliveries resulting from strikes of various kinds across the border, are three factors affecting, to a considerable extent, the output and prices of pipe.

The steel strike, which commenced in the United States some weeks ago, has seriously affected a number of industries which have this as a basic product of their manufactured article; some of the units of this firm itself are idle because of lack of supplies with which to go on. In addition to this, there has been a dislocation of transportation facilities, and this is resulting in uncertain deliveries. Until these conditions right themselves, it is the belief of this firm that there cannot be any appreciable, if any, reduction at all of prices. They do not look for any reduction for, at least, six months.

**Are Paying Premiums**

As a matter of fact, so HARDWARE and METAL was informed, premiums are being paid, to a considerable extent, by consumers and contractors for deliveries. While it is the disposition of the manufacturers to hold the prices down, the reasons given above may result in some advances all along the line. This firm, however, does not look for anything in the nature of a runaway market, that is, judging from present conditions, which are affecting the market. The market is standing remarkably firm, and gives no indication of sharp fluctuations one way or the other.

**Obtain Supplies**

For the benefit of the trade in general, the firm advised that any retailers who are drawing up contracts for work, will do well to obtain their supplies as soon as possible. They do not hold out any inducement that pipes will be any cheaper for some months to come, because of the immediate effect of the steel strike on supplies and the aftermath of an incident that has so upset production all over the country.

Business is good, said this firm, and the prospects for the coming year are decidedly encouraging, if conditions will so settle down that raw materials are assured, and the general labor situation so improves that more dependence can be placed upon the regularity of output. Under such conditions, production would not only be greatly augmented, but there would be the possibility of a drop in prices.

# Non-Shipment of Coke May Cause Foundries to Close

## No Reserves in Stock and the Situation is Causing Considerable Anxiety in Many Quarters—Coal Shortage Not Causing Any Immediate Danger

IF the bituminous coal strike in the United States is prolonged for any length of time, there is grave danger that many of the foundries throughout Canada will be compelled to close down until the situation is relieved. The non-shipment of coke from the United States into Canada is aggravating this situation rather more than the scarcity of bituminous coal, as coke is largely used for mou'ding purposes. There are some foundries engaged largely in the turning out of car wheels, and large quantities of coke are used for this purpose.

**Coke Supplies Small**

Unfortunately, users of coke in Canada have been living on a hand-to-mouth policy, and they have practically no reserve of coke on hand. Manufacturers who use bituminous coal are more fortunately situated, though inquiries reaching the Manufacturers' Association and the Fuel Controller are multiplying from these sources in which some anxiety is expressed with regard to the future. No bituminous coal has come into Canada in any considerable quanties for over a month; and though many of the manufacturers seem to have sufficient supplies to do them for from one to three months, they are becoming somewhat apprehensive that their situation beyond that time may develop unfavorably if the strike on the other side of the line is not settled and production again commences on a large scale to make up for the time that has been lost.

**May be Released**

The coke situation, however, is threatening the foundries to a considerable extent. Word that 150 cars of coke are to be released for distribution in Canada is encouraging, and if this is done, there will be a temporary relief. It is believed that this coke will be distributed according to the immediate needs of the several foundries dependent upon coke for their output. Some time ago the Manufacturers' Association sent out a letter advising manufacturers how they could secure coal if it were absolutely necessary. Advantage has been taken of this assistance in the case of coal, and now that foundries have been threatened, at least one foundry has already applied for information which would help him to secure needful supplies.

On the whole, there is a growing anxiety over the situation, though there seems to be no immediate danger of a dislocation of industry on account of coal shortage.

## HARDWARE FIRM SOLVES THE HOUSING PROBLEM

One way of getting around the housing problem has been found by the Marshall-Wells Company. The Herald of Duluth, Minnesota, says:

"One of the most gigantic projects on record in the way of "moving a city" was announced by the Marshall-Wells Company yesterday, when the fact that the company intends to bring 100 houses to Duluth for the housing of its employees was made public. The houses are to come from Barksdale, the "Dupont powder village" near Washburn, Wis., where they were purchased by the Duluth firm. The project is gigantic, not so much because of the number and type of houses to be moved, but because of the distance they are to be brought. Another feature of the situation involving extraordinary possibilities lies in the announcement that the dwellings may be brought here on barges, Lake Superior being the transportation medium.

The dwellings were completed just before the signing of the armistice a year ago, and it is understood that few, if any, have ever been occupied. They will be placed on the Marshall-Wells property at Morley Heights, near Hunter's Park. It is believed that the housing shortage in the Hunter's Park section will be materially alleviated."

# Larger Stocks for Western Paint Trade

## Western Dealers Have Reduced Stocks to a Low Point and Already Buying Ahead—New Equipment Will Ensure Speedier Delivery During 1920, Says Managing-Director

THE Western Canada hardware dealer has made a good clean-up on his stocks of paint and painting material, and will be ready for newer and bigger stocks for 1920. This is the expressed feeling of Mr. W. S. Fallis, managing director of the Sherwin-Williams Company of Canada, Limited.

Interviewed by HARDWARE AND METAL on his return from a Western trip, Mr. Fallis was very much pleased with the prevailing business conditions there, and the outlook is very satisfactory for the future. In support of his observations, Mr. Fallis referred to a number of important things which indicate that the West is sound, and that conditions point to a continuation of the activity that has obtained, in a business way, for some time past.

The dealer has, in the first place, taken advantage of the good buying spirit of the consumer, and has cleared out his stock, reducing this to a small compass, and particularly with regard to odd lots that might have accumulated. With his shelves cleared of such accumulations, he is now in a position to order fresh supplies, and this he is doing.

### Will Carry More Stock

Mr. Fallis stated that his firm would so increase facilities as to afford their customers a ready and steady supply of paints and paint products. This will be done by installing new equipment in Montreal, Winnipeg and Vancouver, and the increased capacity will be materially greater than that of the present. Installation of new equipment and machinery will be undertaken at the above points, with a view to placing increased stocks at the disposal of the trade. If the present trade prospects develop, 1920 will be a heavy business year and increased production will be very definitely called for.

In referring to the dealer's position, with regard to stocks, Mr. Fallis stated that, while the value of an average stock might be greater, owing to the higher price of paint, his gallonage would not be materially greater, if any greater, than before. He had been selling his stock regularly, keeping it moved out from month to month.

### Great Activity—Collections

At the present time, Mr. Fallis states that the paint industry is very active, even more active than it generally is at this season of the year. From a comparative standpoint, material increases have been attained in all districts, and the figures for 1919 will be greater than for any previous year. It is usual, at this time of the year, for conditions to quiet down a great deal, but there was, as yet, little or no evidence of a cessation of orders. Stock orders, for instance, have been very heavy of late.

Referring to collections in the West, Mr. Fallis stated that they had been very satisfactory. The totals for 1919 will be just as large as those for 1918, it was pointed out, and this indicates that the Western merchant has been doing a healthy business, getting his money and selling a considerable quantity of goods for cash.

*W. S. FALLIS*

*Managing Director of the Sherwin-William Company of Canada, Limited.*

Altogether, the outlook for a big business in 1920, as suggested to Mr. Fallis on his Western trip, is a promising one. The farmers have been making money and have been buying freely. With much building likely to be undertaken, and for which there is a great need everywhere, the demand for materials makes the outlook for the dealer a satisfactory one.

### PROSPECTIVE IRON AND STEEL COSTS

"If wise and conservative counsels prevail in the iron and steel industry, prices in future are going to hinge chiefly upon production costs rather than upon the law of supply and demand," says the American Metal Market. "Some producers are ready to go even farther than that, there being steel interests willing to proceed on the basis of March 21st prices for steel products even though they have to absorb some increases in cost of manufacture. On the other hand there are some interests that are entitled to advances over prices ruling last summer on the basis that their products did not then command a fair price in relation to cost of manufacture.

"Starting with iron ore, it appears that the Lake Superior ore producers have no intention to seek advances, for the 1920 seasons, over prices lately ruling. If this philosophy is carried out it will mean that iron ore will not be higher, at Lake Erie dock, and may be a shade lower owing to possible reductions in freight rates from mine to Lake Erie ports."

### AUSTRALIA MIGHT GIVE CANADA PREFERENCE

H. S. Bare, of the Thermos Heating System, Ltd., delivered an address at the Montreal Weekly Electrical luncheon on his impressions of conditions in the Antipodes. In referring to the business conditions in that part of the world, Mr. Bare stated that labor troubles had been quite upsetting for a great many years and that difficulties continued to exist. Some of these are similar to those which Canada is at the present time herself passing. In referring to selling organization in Australia, the speaker stated that if the retailer wished to purchase anything he required to go direct to the manufacturer to obtain it. If he did not do so very little effort was made on the part of the latter to secure the business. While this, to an extent, or quite decidedly in some cases, eliminates the middleman or the jobber, Mr. Bare said that it did not seem to make the cost of living any less and that the standard of living there and its cost was about the same as in Canada.

The speaker thought that something might come of reciprocity, which is being much talked of in the Antipodes at the present time. If anything should come of this Mr. Bare believes that Canada will receive a preference.

### GIVES THE BOYS A CHANCE

J. A. McKenzie, Justice of the Peace at Kincardine, Ont., is adopting an original method in the correction of two boys who got into trouble recently. The boys appeared before him charged with stealing money from a cash register in the hardware store of Peter Shields. The J. P. ordered the boys to go to the public school regularly, attend Sunday School every Sunday and a service once a Sunday for a year. In case of violating these conditions they will appear again. Mr. McKenzie warned them that should this happen he would send them to the Reformatory.

# EDITORIAL COMMENT

WITH SO MUCH loafing going on the term "social unrest" seems to be a bit misleading.

* * *

DON'T keep any "shelf warmers." If you find you have a line that is not turning over as it should, replace it with something that will make money for you.

* * *

THE kinds of goods that keep moving are the kinds the public like and are the kinds that bring the profits. No merchant ever made any money out of shelf warmers.

## *REAL DEMAND IS YET TO COME*

SOME figures not only interesting but rather startling are given by Professor Melvin T. Copeland, Director of the Bureau of Business Research, Harvard University, who has been conducting a personal investigation into the cost of doing business. In his report, he says in part: "In practically every instance we found that the stores with a high rate of stock turn were operating at a substantially lower expense than the stores with a low stock turn. Furthermore, there is less loss through depreciation, shrinkage and obsolescence in stores which turn their stocks rapidly. We also found that many merchants do not know what it is costing them to do business. Frequently we had merchants tell us specifically that they did not know what their total expense was. In the retail grocery trade and in the retail drug trade I judge that probably fifty per cent. of the storekeepers do not take an annual inventory. As regards expenses, I am led to believe that an even larger proportion of retail merchants, have no accurate knowledge of their operating costs. An amusing instance was furnished by a retail grocer who returned the form we sent him with the following statement written across the face: I have no detailed records, but my cost of doing business is five per cent.' Even under present conditions when losses are far less frequent than in ordinary times owing to the demand for goods, there are still quite a number of retail stores that are being operated at a loss. We can look ahead to a period of great business prosperity. Yet before we realize that we will have to go through some adjustments. The active demand in retail trade that is now resulting from inflation is particularly unstable. This demand has risen largely from consumers who have enjoyed a sudden, rapid increase in their incomes. Workmen, for instance, are buying silk shirts and many other luxuries to which they were not previously accustomed. There is an accumulated demand for new homes, yet this demand is not being filled in a great many cases, because prices of building materials and labor are so high. In other words the great demand that we have witnessed in recent months is not primarily the demand that has accumulated during the war, but rather a new demand that has resulted from inflation. Sooner or later the accumulated demand of the last four or five years will have to be taken care of and eventually the process of deflation will help to bring this about."

## *STABILIZING THE DOLLAR*

THE appointment of a committee of bankers and business men in the United States to investigate and see what can be done to "stabilize the dollar" is timely. For a long time the decline in the purchasing power of money has been arresting the attention of business men. They realized thoroughly that the time must come when a stop would have to be made or serious disturbances in both economic and industrial relationships would occur. Obviously this condition has arrived. It is not nearly as acute in Canada as in the United States, but because of the close relationship between Canadian and American business men, Canada is very directly affected by conditions which obtain across the line. Investigations so far indicate that the situation has been brought about largely because a paper or credit dollar has driven both gold and silver practically off the monetary stage. Not only America, but practically the whole world, has got off the gold and silver basis and is working largely on paper. Added to this is the fact that throughout the world there is an acute shortage of goods. The problem the investigators have to solve is anything but an easy one in that they have to find means of granting credit and at the same time removing credit inflation. Having diagnosed the case some of the brainiest men in the commercial world of the United States are busy figuring out the best remedy to apply.

## *BIG DEVELOPMENTS COMING*

IT is said that straws show which way the wind blows and an indication of what business men are looking for in regard to the future of Canadian trade may be seen in the unusually large lists of incorpor-

ations of new companies which have been issued with great regularity of late. In addition to the new companies there is a long list of old-established firms who are asking permission to double or treble their capital in order to provide for plant extensions, installation of additional machinery or something else designed to take care of more business. All these are certainly very, very healthy signs. There is another one also and that is the great number of American firms who are locating branches at various points in Canada. Some of these firms are capitalized at many millions. It may be accepted as a fact that Canadian business men do not put their money into new companies and new factories just for the fun of investing. They see business ahead and they are preparing for it. The same is true of the American firms coming to this country. It seems to be the general opinion in the commercial world that Canada is just commencing a period of development and industrial expansion that will easily eclipse anything that has occurred in the past. No country in the world is richer in natural resources and in undeveloped farming territory and the eyes of hundreds of thousands of people all over the United States, England and the continent of Europe are on Canada. Sooner or later immigration is bound to be resumed and every new comer will be a customer for goods of one kind or another. In addition to what has been mentioned is the steadily growing export trade which Canada is building up. All of these things are factors in and account in one way or another for the new factories, the extensions and so on.

### *MEANS MILLIONS FOR FARMERS*

THE action of the United States Grain Corporation in lifting the important embargo on wheat means millions of dollars for Canadian farmers. While the States is only after No. 1 and No. 2 Northern hard wheat the lifting of the embargo will create a much wider field for the Ontario and Quebec product, and naturally higher prices. It is estimated that at least 5,000,000 bushels of wheat could be exported to the States, and as the prices over there are anywhere from 30 to 70 cents per bushel higher than in Canada, despite the fact that there is a fixed price, it means that the Canadians will benefit to an enormous amount. It also means that less wheat and more of the other grains will be used as feed. This will likely create firmer markets for oats and barley.

Consumers will have to pay a considerable sum more for bread. Already there has been a feeling created amongst city folk that an export embargo should be put on wheat, but as the Canada Wheat Board, through which all grain is sold, was brought into existence for the sole purpose of "getting the best world prices for the farmers" it is hardly likely that there will be any attempt on the part of the Government to make a change in the present programme.

### *SILVER'S LEVEL MAY HURT BUSINESS*

SILVER has now reached such high levels that some people are hoarding it and others are said to be melting it for bullion. While money can possibly be made in this way it speaks very poorly for business generally. In France at the present time there is a great scarcity of silver coin, and as a consequence trade is greatly handicapped. If Canadian coins find their way to the melting pot in any great numbers it is more than possible that business in small stuff will be placed in an embarrassing position. For instance, if there are only a few five, ten and twenty-five cent pieces, how are the grocer, the hardware man, the "five, ten and fifteen cent stores" and many others going to carry on business? It may create a position where the grocer will be forced to carry more accounts and other trades carry on business under different methods. In short, it is a serious question, and one which calls for attention.

### *AN EVER-INCREASING RADIUS*

SOME interesting figures were recently procured which show how the automobile has changed the merchandising methods of the farmer, and also the need for the retailer changing his methods if he is going to continue to get business. Four hundred farmers were asked to state how far they travelled in their cars to buy hardware, auto accessories, dry goods, musical instruments, and other things. The replies showed that these men travelled on an average in their cars 34 miles in order to buy the necessities and comforts of life they needed. Only 25 per cent. of the men purchased their clothing in the home town and only 23 per cent. of the women. These farmers were all comfortably off and well able to buy whatever they required. In order to get it they were willing to motor many miles, and pass many stores on the way in order to get what they considered either better goods or a larger selection to choose from. This shows that it is wisdom on the part of the merchant to carry the stock and also to let the people in his community know that he has it. If he does not, the farmer, by driving in his car for half an hour can reach some competing centre and do his shopping in a store that advertises and carries the stock. Just how important a matter this is may be seen from the enormous purchasing power of the farmers to-day. It has been said with a good deal of truth that the farmer to-day is the biggest and wealthiest purchasing agent in Canada. Figures show that the farmers are buying automobiles in thousands and all this means that every year will see prospective customers all over the rural districts in a position to reach shopping points within thirty-five miles of their home.

# EVENTS IN THE TRADE

## Business Changes

Toronto.—J. W. Hopkins succeeds Ingram & McMaster, hardware.

**Toronto, Ont.**—Dempsey Bros. have purchased the estate of Elias W. Chard, hardware.

**Tilbury, Ont.**—E. Rosenburgh & Son have purchased the hardware business of Mrs. Mary Stewart. Possession January 1.

Toronto.—H. N. Joy, who recently sold his hardware business at South Porcupine, has purchased the hardware of Frank A. Noden, 2894 Dundas Street W., Toronto, Ont.

## New Firms

Lauzon & Trudeau, hardware, has been registered at Montreal by Henri Lauzon and Joseph Trudeau.

Crocker Bros. have opened a new hardware store at Truro, Nova Scotia, at the corner of Prince and Waddell Streets.

Russell Beattie, of the Purdom Hardware Co., London, Ont., plans to open a new hardware store shortly on Richmond Street North.

## Personals

J. A. Henderson of Brampton, Ont., was in Toronto on business during the week.

## Trade Notes

The St. Lambert Hardware Co. of St. Lambert, Quebec, has been dissolved.

The Acme Hardware Co., of Toronto, has been dissolved, James H. Smith retiring.

Wood, Vallance & Company, Ltd., contemplate the erection at Regina, Sask., of a branch warehouse to cost $175,000.

The New Empire Wall Paper Company, Ltd., has been granted permission to change its name to Empire Wall Papers, Ltd.

## Montreal News

Geo. J. Shepherd, Montreal, president of the Canadian Pneumatic Tool Co. of Montreal, has been confined to the hospital from the effects of a stroke. His many friends hope for him a speedy recovery.

W. S. Fallis, managing director of the Sherwin-Williams Co. of Canada, Ltd., returned from a trip to Winnipeg.

B. C. Lewis, sales manager of T. S. Simms and Co., Ltd., St. John, N.B., left Montreal on Saturday last for the head office. Mr. Lewis has been in Montreal rearranging the sales staff, and spent two or three months here.

R. Bernier, Quebec representative for the Martin-Senour Company, Montreal, was on the train which collided with another, near Terrebonne, early this week. Beyond a few scratches, Mr. Bernier was none the worse for his experience. He attributes his lucky escape to being thoroughly "saturated" with "100 Per Cent. Pure."

A meeting of the Canadian Paint, Oil and Varnish Association was held in Montreal on Thursday of this week.

Fred Hadley, for many years connected with the sales staff of the James Walker Hardware Co., first as manager of the sporting goods department, and more lately in the auto accessories department, has resigned and is going with the Hall-Thompson Co., and who, it is stated, are about to operate a factory in Montreal.

J. O. Linteau, president of the Montreal Automobile Trade Association, returned from an extended trip to Europe, and where he visited France, England and Italy.

The Canada Metal Company, Montreal, announce the appointment of George C. Thompson, late of Toronto, as Montreal city traveler.

W. J. Egan, Canadian Trade Commissioner to South Africa, sailed from Quebec on the Empress of France, returning via England to his duties at the above point.

Among the passengers sailing for England on the Empress of France this week was Harrison Watson, Canadian Trade Commissioner in London.

## Western News

Wood-Vallance, Ltd., bowling team had three victories to its credit in the competition last week.

C. W. Furrow, factory superintendent of West-Woods, Ltd, Winnipeg, has resigned and is being succeeded by F. O. Storey, who just recently joined the company, having come to Winnipeg about two months ago from Port Arthur, where he was previously identified with the Port Arthur Waggon Company.

The Tower-Canadian Company have opened a branch office and warehouse at 259 Stanley Street, Winnipeg, to give better service to the Western trade. J. W. Bryant is manager of the new branch.

In a reorganization of the business of H. L. Perry Ltd., Winnipeg, Mrs. Perry, widow of the late H. L. Perry, is the new president. H. W. McConnell, formerly of A Ramsay & Son Co., of Toronto, is vice-president, and M. Feely is secretary-treasurer and manager. In addition the new directorate includes G. B. Cooke, of D. Ackland & Son, and H. B. Lyall, of the Manitoba Bridge and Iron Works, Ltd.

The retail store of J. H. Ashdown Hardware Co., Winnipeg, is being enlarged by the taking over of the two top floors of the Ashdown block on Main Street. By the change, the house-furnishings department will have double the floor space formerly used. The sporting goods, electrical and auto accessory departments will also be doubled in size. A new elevator is being installed to handle the traffic for the six floors.

Cookson Bros. is a new Western firm with headquarters in Winnipeg, to act as selling agents for the Imperial Varnish and Color Co in the Western Provinces. J. P. Cookson, until recently Western manager for Imperial Varnish & Color Co., is the active head of the new firm. W. B. Cookson, railroad representative of Imperial Varnish & Color Co. for the whole of Canada will be a partner in the Winnipeg firm, though continuing in the former position.

W. J. Bland, who has been sales manager of the linseed oil and paint business of the Canada Paint Co. at Winnipeg, has resigned and accepted a position with Glidden Company. The latter company plans to open a warehouse in Winnipeg to attend to the Western business of the company. Mr. Bland is well known among the Western trade.

### COLLECTED $86,000 FOR LICENSES

Windsor, Ont.—Approximately $86,000 has been collected in automobile and motorcycle licenses in Essex county during the present year, according to figures collected from the license issuers. From the office of Captain H. Browning, Royal Bank Building, Windsor, 4,700 passenger licenses were issued, 440 commercial and 120 motorcycle. From the office of F. W. Johnson in Walkerville, 1516 passenger licenses were issued and 200 commercial. Approximately 200 commercial licenses were issued for Detroit trucks coming into Windsor and Walkerville.

## Incorporations

Windsor Petroleum and Refining Co., capital $700,000, head office Montreal, plans to prospect for and refine oils, etc.

C. and C. Motors, Ltd., capital $100,000, head office Toronto, plans to manufacture and deal in autos and auto accessories.

Universal Battery Company, Ltd., head office Hamilton, Ont., capital $40,000, plans to carry on a general automobile repair business and deal in batteries and accessories.

Hills Jansen Company, Ltd., capital $40,000, head office Walkerville, Ont., plans to manufacture and deal in auto accessories.

Canadian Phonograph Motors, Ltd., capital $100,000, head office Stratford, Ont., plans to manufacture and deal in phonograph motors and accessories.

National Steel Car Corporation, head office Toronto, capital $500,000, plans to manufacture and deal in steel cars.

Moore, Cameron & Hill, Limited, head office Montreal, capital $100,000, plans to manufacture marine, foundry, mining and contractors' supplies.

Celex Manufacturing Company, Limited, head office Ottawa, capital $30,000, plans to manufacture wood and metal specialties.

Phonograph Specialties, Limited, head office Montreal, capital $150,000, plans to carry on a general business in parts of machines and hardware.

La Compagnie de Glacieres, C. P. Fabien, Limitee, capital $100,000, head office Montreal, plans to manufacture and deal in refrigerators, sash and doors, etc.

Baldwins Canadian Steel Corporation, Limited, head office Toronto, capital $500,000, plans to carry on a general business as iron smelters, etc.

Crescent Motors, Limited, capital $100,000, head office Montreal, plans to manufacture and deal in motors, tire casings, greases, oils, etc.

The Emerson Canadian Company, Limited, capital $500,000, head office Toronto, plans to manufacture and deal in phonographs of all kinds.

Elliott Machinery Company, Limited, head office Belleville, Ont., capital $250,000, plans to manufacture and deal in electrical equipment.

The Western Auto Accessories Company, Limited, head office Qu'Appelle, Sask., capital $60,000, has been granted a charter.

Firestone Tire & Rubber Company of Canada, Limited, capital $5,000,000, head office Hamilton, Ont., plans to manufacture and deal in rubber products, automobile accessories and metal rims.

### C. B. STENNING GOES WITH DOMINION CARTRIDGE

C. B. Stenning has joined the advertising department of the Dominion Cartridge Co. as assistant to E. M. Putnam. Mr. Stenning returned from France after seeing service with the British Air Force, and after his return was connected with the advertising department of the Gazette Publishing Co. of Montreal. His experience in advertising circles include service department Montreal Herald and Family Herald, Weekly Star, Montreal.

# Plan to Make 1920 Convention Biggest and Best on Record

## Arrangements for Four-Day Session at Hamilton in February Were Discussed at Meeting of the Executive

A MEETING of the executive of the Ontario Retail Hardware Association was held this week at Hamilton, Ont. It was decided to hold a four-day convention during the third week in February at the Royal Connaught Hotel, Hamilton. Arrangements have also been made for hardware exhibits to be shown in Oddfellows' Hall. Provision has been made for 51 booths, which it is understood the Ontario Retail Hardware Association will allot to the exhibitors of hardware. Sizes of these spaces range from 8 by 9 feet, to 15 by 15 feet and skeleton booths will be erected and decorated. The preparation of the programme is now under way and the officers of the association are convinced that they can make the 1920 convention the best and biggest on record.

Secretary MacPherson reports a good increase in membership since last convention and now that more help is available it is believed that the retailers will attend the convention in large numbers.

## E. H. Gurney, President of Gurney Foundry Co.

E. H. Gurney, who, since the death of W. Cromwell Gurney recently, has been acting president of the Gurney Foundry Co., Ltd., Toronto, has been appointed president.

Mr. W. R. Gibson has received the appointment of general manager.

### PREMIER DENIES RUMOR

Premier Drury denies all knowledge of a story published in the Bracebridge Herald, to the effect that a representative of his had asked the member-elect for Muskoka, G. W. Ecclestone, to resign his seat to make room for the Minister of Agriculture, Hon. Manning Doherty. "I have absolutely no knowledge of any such thing," he said.

Mr. Doherty also denied that he had made any such request of Mr. Ecclestone. While he had no personal knowledge, the Minister of Agriculture would not say that some friend of his might not have made such a proposal to the Muskoka member. The story as published was to the effect that when Mr. Ecclestone had been approached with a proposal to resign he had rejected it, and that in this course he had been supported by the Conservative organization of the riding.

### WEYBURN FIRM REORGANIZED

The Hoshal Carmichael Co., Limited, hardware, Weyburn, Sask., has been reorganized, and in future will be known as C. Hoshal Co., Ltd. The new firm will be under the personal management of C. Hoshal. This change was necessitated by the death of Mr. Hoshal's former partner, K. M. Carmichael, who was killed in action in France, on October 8, 1916.

### TURNS MISHAP INTO PROFIT

Taking advantage of unusual happenings to promote one's business is the mark of alertness which distinguishes the wide-awake retailer. Recently in Oak Park, Illinois, a suburb of Chicago, a truck belonging to a neighboring bakery became unmanageable and plunged into the plate glass window of the Nicholas Hardware Store. The proprietor wasted no time in bemoaning the accident. Instead, he put his wits to work. The wreckage attracted passers-by. Out of curiosity, they lingered to examine the extent of the damage. The owner reasoned that it would be foolish to let so much attention go to waste. Accordingly, he placed a big sign on a portion of the glass which remained intact. The placard bore this wording: "Our Windows and Prices So Attractive Folks Insist on Driving Right In. There's a Reason Why." Thus he turned a mishap into profit for his store.

### TO ESTABLISH IN MONTREAL

The Hall-Thompson Co., HARDWARE AND METAL understands, are about to establish a factory in Montreal for the manufacture of auto polishes, top dressings, etc. Details are not, at the present time, available, but HARDWARE AND METAL expects to make a more complete announcement at an early date.

### CUTLERY TO BE FREER BY SPRING

In speaking this week with a cutlery importer he intimated that, while the difficulties in filling orders have been great for a long period, there is much better hope of the conditions improving for next year. The manufacturers have been slow, seemingly, in securing a larger output. This, in part, has been occasioned by a necessary alteration of plants to meet the needs of after-war industry. Some of the British manufacturers have established a reputation for a certain high-grade output, and this they are bound to maintain—that is, the quality—at any price. The return to anything like normal conditions has been quiet, as it is to be expected, but gradual.

# Convention of A. Ramsay & Son Co.

## Four-Day Gathering Held at Montreal Was One of the Best in the History of the Firm

KEYED to the point of enthusiasm from the very outset, the salesmen of the A. Ramsay & Son Company, Montreal, concluded one of, if not the very best, Sales Convention in the history of the firm, after a four-days' gathering at the head office in Montreal. And that it was a success was attested at all sessions. Beginning on Monday morning, November 10th, the opening session, and most of the subsequent conferences, were held in the Old Colony Club, at the Windsor Hotel.

President Walter B. Ramsay, occupying the chair, sounded a most timely and effective note when he referred to the many thousands of houses that were planned for Canadian communities in 1920. With such a prospect, there is no trade that will benefit more than that of the paint and varnish trades, and the salesmen seemed to grasp this fact and make it the basis of the enthusiasm they evinced during the progress of the convention.

### Splendid Progress

Continuing, in his address of welcome, Mr. Ramsay referred to the splendid progress which had been made by the company, and, in this respect, instanced the connections that had been made in foreign countries, particularly within a comparatively recent period. His pleasantries, as each of the salesmen from outside and home territories were introduced and asked to explain the situation and report the outlook on their respective fields, met with favor. Some of these men had come from far-away fields, and it was refreshing to learn of conditions there.

### Many Excellent Talks

Following the President, Arthur D. Brown, the manager, gave an effective address on "Salesmanship." This made a strong appeal to the assembled delegates, and it was requested that copies of Mr. Brown's address be made available for each of the salesmen, containing, as it did, friendly advice which each man could apply to his own case. Mr. Brown dwelt upon the great place which the salesmen of to-day holds in the process of creating a market for his company's goods, and stimulating and increasing sales. So many excellent points were developed, that the speaker was able to prove his point, that the salesman is engaged in one of the greatest games in all the world.

E. J. Sutcliffe delivered a strong address on advertising, and this was warmly applauded. Mr. Sutcliffe left little doubt as to the absolute necessity of advertising; outlined many important considerations as to the classes of advertising which are effective for various products; indicated how we all are advertisers from the moment we are born; and altogether made his points well, and carried them home in the process of his definite and clear reasoning. This was decidedly appreciated.

The importance of "Credits" was dwelt upon by E. Jones, secretary, who pointed out how very helpful the salesman can be in furnishing his firm with facts concerning clients, and which, while on the ground, he can obtain more readily than any one else. Mr. Jones referred to the necessity of supplying the "house" with such data as was necessary to make a proper estimate regarding the many customers who are served.

### From the Salesmen

"Ten Minute Talks" was the interesting caption of brief talks which followed, and which were delivered by the various representatives in the several provinces of the Confederation.

The men from the West were modest in their statements, notwithstanding the fact that, as Mr. Ramsay suggested, their actual returns had been very satisfactory, orders having been large from the territorial representatives who were now in attendance. All of the speakers were confident, however, that bigger and better business would be secured in 1920.

H. C. Douglass spoke on the prospects in British Columbia; J. D. McDonald for Southern Alberta; W. E. Greer and G. R. Colville on Northern Alberta; H. W. McConnell on Manitoba and Saskatchewan; J. A. Donnelly on "English-speaking Quebec," and L. Beaudry on "French-speaking Quebec"; Wm. McCormack on New Brunswick, Nova Scotia and Prince Edward Island. Mr. Edginton spoke of the prospects in Ontario.

In addressing the convention on "Canada as a prospect for larger paint consumption," H. J. McAdie, sales manager, dwelt upon the remarkable growth of the Dominion in the past forty years, and gave actual figures to show what a large increase there had been in the purchase and use of paint. Mr. McAdie pointed out, however, that there was room for a greater per capita use of paint on the homes of the people—a great percentage of the paints and finishes that had been bought having been used by the large railway companies and other big industrial concerns. There had been great opportunity for intensified paint selling to the domestic trade.

### Inspections Made

Immediately after luncheon at the Old Colony Club, on Monday afternoon, the session adjourned, to meet at the head office, where a group photograph was taken, followed by inspections of the various departments.

Inspection of the paint factory, supervised by H. B. Booth, proved of great interest to the salesmen, especially some of the new processes of manufacture adopted by the Company, which were explained in detail, and were greatly appreciated by those present. Mr. Booth also gave a comprehensive and instructive address on paint pigments, which

*Salesmen and executives who attended the four day convention of A. Ramsay & Son Co., at Montreal. The gathering was one of the best and most enthusiastic in the history of the firm.*

was followed by a very interesting discussion.

Inspection of the Varnish Plant, under the supervision of Tom Ramsay, was also instructive to the salesmen, as a very complete explanation of the processes followed in the manufacture of varnishes was listened to with keen interest by the men.

Inspection of the Advertising for the year 1920 campaign, supervised by H. J. McAdie, proved of great interest to the salesmen, and produced considerable enthusiasm, as the campaign outlined was most complete.

During the meetings that followed, at the Old Colony Club, Tom Ramsay gave an interesting address on the history and advancement made in the manufacturing of varnishes by the company, covering a period of forty years.

W. Jauce also gave an instructive discourse on varnish making, questions being answered afterwards, such as arose from the introduction of a topic of this nature.

**The Entertainment**

Luncheon was served in the Old Colony Club each day at 12.30, and this afforded the salesmen an opportunity for making new, and renewing old, acquaintances.

On Thursday evening, a banquet was held at the Montreal Club, and this proved to be a delightful function, when all cares were set aside and a real jolly time was enjoyed. Just before dinner, a flashlight group photo was taken, that the men might have a memento of the occasion.

At eight o'clock, the assembled salesmen and guests sat down to a fine spread, President Ramsay occupying the chair. Tables were so arranged as to afford the most social "atmosphere," and the menu was such as to whet appetites, if any there were, which needed this. Among the unique ideas carried out in the table decorations, were gummed stickers, applied to the drinking glasses, bearing the words "The Right Paint to Paint Right," and a neat little oval menu card. A few of the old-timers were provided with real old-fashioned drinking mugs, and these were filled, some of them, most a dozen times, with the best that Montreal now permits.

The toast list was brief; Mr. Ramsay had promised the boys that there were to be no speeches. "The King," "The Ladies," and "Our Guests," were the three appearing on the printed program, but the genial toastmaster of the evening permitted "The Outside Staff," "The Inside Staff," and "The Foreign Department" to be added. Then, before the close of the evening, "Our Host" was proposed, and his health heartily drunk.

One of the finest musical programs possible was afforded by the management in securing Eckstein's Jazz Band, and "Jimmie" Rice, with his retinue of superb singers and other entertainers. At sight of these, the evening's pleasure was assured, and it is quite impossible to adequately describe the pleasure of the guests as they listened to the rich tenor of "Tommy" Cowan's voice and to the deep, resonant bass of "Little" Jos. Beauchamp. Repeated encores were most kindly entertained by both these well-known singers, while "Jimmie" Rice, as he always does, simply "boiled over" with his witticisms and new recitations. The guests just would not leave; they stayed on and insisted on more—and then some.

A pleasant feature was that of calling the juvenile drummer, Roy Decarie, to the president's chair, and whose occupant made him the recipient of a crisp five-dollar banknote, amid much ap-

# Agent-General F. W. Sumner Stricken Suddenly at St. John, New Brunswick

## Head of the Sumner Company Was Very Active in Business Life and a Public-spirited Citizen

FREDERICK W. Sumner, head of the hardware firm of the Sumner Company, Moncton, N.B., died very suddenly from an attack of acute indigestion while in St. John on Thursday, November 21. Accompanied by his wife and daughter, he had gone to attend a meeting of the New Brunswick Telephone Co., and after dinner while sitting in the rotunda of the hotel, smoking, he was taken ill and died within a few minutes.

Mr. Sumner was 64 years old and a son of the late Wm. H. T. Sumner. He

*LATE F. W. SUMNER*

*Head of the Sumner Co., Moncton, N.B. Who died very suddenly at St. John.*

was born in Moncton, and was from his early years associated with his father in the hardware business. He was one of the most public-spirited and aggressive business men in the province, and was interested in many development projects, including lumbering and milling operations.

Of late years he assisted more largely than ever in the creation of industries for the upbuilding of Moncton and the province at large, being president of the New Brunswick Petroleum Co., president of the Atlantic Underwear Ltd., president of the N. B. Wire Fence Co., president of the Kent Freestone Co., and being on the board of directors of the N. B. Telephone Co., the N. B. Gas and Oil Fields, Ltd., Humphrey's Glass Works, the Moncton Tramways, Electricity and Gas Co., and The Times Printing Co.

In the recent Victory Loan campaign he was chairman of the Westmoreland County organization, which made a splendid record.

He served as president of the Moncton Hospital and as a commissioner of the Jordan Sanitarium at River Glade, and gave generously of his means to every worthy cause. He was mayor of the city for six terms, serving in this capacity from 1890 to 1894, and again in 1900. He was a member of the New Brunswick Legislature from 1895 to 1899 and unsuccessfully contested Westmoreland in the Conservative interest against the late Hon. H. R. Emmerson in 1908. For some years he had been representing the province in England as Agent-General, a position which he accepted only on condition that there should be no salary attached. In this capacity he made frequent trips to England at much personal sacrifice, and during the war he rendered splendid service in looking after the interests of New Brunswick soldiers overseas.

Mr. Sumner was twice married. His first wife was Margaret, daughter of the late Thomas and Rebecca McEwen, who died some years ago. He married his second wife, Miss Hazel Mulholland, of Toronto, who survives him, in June, 1917. Mr. Sumner is also survived by two daughters, Mrs. Herbert M. Wood, of Sackville; Mrs. Stanley G. MacDougall, of Moncton, and one son, Capt. Frederick Roval Sumner.

Representative men of the Province and thousands of citizens of Moncton, representing every walk of life, paid a last tribute to the late Agent-General, at the funeral which was held Sunday afternoon. The streets of the city along the route of the funeral procession were lined with citizens, and the mark of esteem was the greatest ever paid to the memory of a citizen of Moncton. Prominent among those present from outside the city were ex-Lieutenant-Governor Josiah Wood, Sackville; Attorney-General O. T. Daniels Halifax; H. J. Logan, Amherst; R. S. Barker, Fredericton, representing the Government of New Brunswick, and M. E. Agar, St. John.

# THE CLERKS DEPARTMENT

## Sincerity is Dominant Quality of Great Britain's New Envoy

### Handicapped by Approaching Blindness, Lord Grey is Tackling the Biggest Work of His Life With Enthusiasm and Determination

A TRULY "ambassador extraordinary" is Viscount Grey, K.G., of Fallodon, Great Britain's new representative in the United States, says John Webster, in "The New Success" Magazine. His task is to promote good-will—and there is probably no man in Great Britain better equipped to do it. Like most of England's great men, Grey was a commoner. Twenty-five years ago, John Morley, the historian and keen student of the world's great figures, said: "That young man will go far. He will be Prime Minister some day."

On September 26, Lord Grey landed at New York to take up his great task of strengthening the bonds of friendship between the American and British peoples—to aid in the straightening out of problems which have arisen through the world war and which affect the peace and prosperity of the entire world. He is called an "aristocratic gentleman"—a most apt term—for Lord Grey is a broad-minded gentleman of the old school, yet a true lover of liberty and of humanity.

#### Is Going Blind

Grey took up his task after several years of retirement from public life, caused by failing eyesight. Handicapped by approaching blindness, he nevertheless has set himless to his new task with an enthusiasm and a determination that should prove an example to many younger men of sound health and sight. His first words, upon touching American soil, are full of hope and encouragement—full of the magnitude of his mission—which is to spread the propaganda of good-will and brotherly love.

"I regret that my failing health makes it impossible for me to undertake the duties of a permanent ambassador to the United States," Grey said. "We have made a new start after the war to repair and to rebuild the old world, which the war has left in ruins. We wish to build a better one. But the British Empire, in common, I am sure, with other countries, feels that without good understanding and friendship with America, international progress is impossible, and even international security doubtful. I do not come to put forward any new proposals for treaties or alliances. Good understanding can best be established on cordial feeling between peoples."

#### A Common Language

"There are some things that do not exist in common between any other two countries—a common language is one of them—which make for friendship between the British and American peoples. On the other hand, there are some things which cut across this happy tendency and make for misunderstanding. My hope is that these things may by time, by wise and sympathetic policy and a fuller knowledge of the facts and difficulties, be dissolved and disappear. But these difficulties cannot be eliminated by ignoring or underrating them. But it would be an even greater error to underrate the strength and possibilities of the growth of things that draw us toward each other.

"Between the enemies in this war there have been bitterness and hatred. It will take time and confidence and good faith in good intentions to alter this. But, in time, I hope that the feeling will change into a hatred of war itself—a hatred of wrong things and not a hatred of peoples against each other.

"It will be the object of my mission, while it lasts, to promote the good-will—so far as I have strength and opportunity—between the American and British peoples, in the hope that this may be one great element of security leading to great international good-will on the broadest possible basis."

#### In Parliament at 23

Edward Grey was born on April 25, 1862. His father was Captain George Grey of Northumberland. Young Grey entered Parliament when he was only twenty-three and was repeatedly re-elected until 1916, when King George elevated him to the peerage for distinguished services. Gladstone, when Prime Minister, said that Grey could be anything he chose to be—"but he chose to go fishing." That is why he is known as the world's greatest authority on fly-casting, and his one book is "Fly Fishing." But Grey also chose to succeed in his chosen profession of politics—and he did so.

He is known as the "silent pilot of British diplomacy." Only history can divulge the magnitude of his services to his country and to the world during the world war.

Fourteen years ago he was made Foreign Minister of Great Britain. In 1912, King George created him a Knight of the Order of the Garter, the only Commoner ever so honored in the history of England. As Foreign Minister, Viscount Grey began the task of strengthening the ties of friendship between Great Britain and other countries—a thoughtful work of prompting good-will among the world powers—and an early effort to avert the great conflict which started in 1914. He worked unceasingly—until the shadows of the great war indicated that his ambitions were temporarily frustrated.

#### Averted a War

In 1911, it was his skill that averted a war between Germany and England; but, against his principles, he was forced to announce, in 1914, that England would stand shoulder to shoulder with her allies against the German invasion of Belgium. He has guided England through perilous days, always calm, quiet-spoken, determined and a valiant soldier for the right.

Many men would have broken down under the strain, but Grey did not even seem to age—despite his failing eyesight. "In strenuous times one must work long and under great pressure," he said. "I have been through it in the early days of the war and I know how difficult it is to keep fit. The strain did not bother my health at all, but it did hurt my eyes severely. That is why, difficult as it is, I urge every man to keep himself in good physical trim."

#### A Picturesque Figure

A picturesque figure was Lord Grey when he stepped from the Mauretania on her last arrival in New York, his second visit to the United States. Unless one looked carefully into his fine, calm face, and into his quiet, failing eyes—still farsighted and shrewd—one would not have picked him as a British peer and the Ambassador of Friendship to the United States. He was simply dressed in a grey sack suit and a sport cap. He is proving himself democratic and friendly. "In fact," Grey said in a quiet tone, a touch of humor in his expression, "these days you will find royalty about as democratic as any other folks."

Grey is keenly aware of the heavy responsibilities of his mission to the United States. He considers it the greatest of all the honors which have been bestowed upon him—the crowning glory of his career. With him is a little group of carefully chosen men who are prominent in British political, education and military work. With them he means to work to the utmost and to leave no stone unturned to the attainment of his goal—a true and lasting international relationship between the two great English-speaking peoples—on the basis of right and honorable regard.

#### His Dominant Quality

Sincerity is his most dominant quality. It is this which has made him the one logical man for the authorities of Downing Street to send to America at this time. He is worshipped by Englishmen—he has won the regard of America's greatest men—and his personality at once makes him the idol of all who meet him. He was the close friend of Theodore Roosevelt and of Walter Hines Page, our late ambassador to England. To these two men Grey spoke freely, unburdened his soul, and profited by their advice. Their deaths were deeply felt by him.

#### Loves the Outdoors

It was back in 1910, while wandering through English forests and talking of trees and squirrels, that Grey and Roosevelt found a kindred spark in their great souls. Like Roosevelt, Grey is an ardent lover of the outdoors and of manly sports. Like Roosevelt, too, Grey was a high priest of liberty. It was in the days when the world wondered what course America would take, that Grey learned to know and respect Ambassador Page. All through those tedious times, when more than once the entente cordiale between the two countries seemed to be in jeopardy, Grey was unfailing in his determination to retain America's regard and respect. He never once lost confidence in the people of the United States and their love of fair play and liberty. Then, in 1917, Grey's dream came to pass. In speaking of America's entrance into the war, he said:

"In Great Britain last year we saw hundreds of thousands of American soldiers passing through our islands to fight side by side with the Allied forces in France. We felt as we saw your soldiers and heard of their courage and enthusiasm on the battlefield that they were animated by one patriotism and that your whole nation was fighting for an ideal.

# See Larger Canadian Markets Developing Rapidly

## Move of American Concerns Which Was Interrupted by the War Has Been Resumed—Some of the Big Plants and What They Are Doing

THE movement of American concerns to Canada to establish branch houses in this country is commented on by the Wall Street Journal, which publishes a list of some of the larger factories that have been established here since the signing of the armistice, by American companies. Tariff considerations led to the location of between four and five hundred branch plants in Canada in ante-war days. The European conflagration put a temporary stop to the movement, but is once more gaining momentum. This fall has seen a start towards location of at least a score of new plants in suitable industrial centres, while agents of several important American corporations are now spying out the land.

### Automobile Business

With the expenditure of $15,000,000 by General Motors of Canada on plants now nearing completion at Oshawa and Walkerville, Ont.; with the placing of the Willys-Overland of Canada plant at West Toronto on a producing basis; with extensions to the capacity of the Ford Motor Car of Canada at Ford City, Ont.; and with expansion in other automobile manufacturing plants, the automobile trade has been a factor in the movement.

Goodyear Tire & Rubber Co. of Canada is adding to its factory at New Toronto to increase production from 2,500 to 3,500 tires a day. Canadian Consolidated Rubber Co. is spending $1,000,000 on its plant at Kitchener, Ont., and the Firestone Tire and Rubber Co., of Akron, O., will locate a branch factory at Hamilton, Ont., with an initial capacity of 3,000 tires a day. This company has bought 80 acres of land and will spend over $1,000,000 on the undertaking.

### Other Companies Established

In the musical instrument field the most notable development has been the acquisition by the Columbia Graphophone Co. of New York, of the extensive plant of Canadian Aeroplanes, Ltd., in Toronto. General Phonograph Corporation of New York has taken over an existing plant in Kitchener, Ont., and will extend it, and New York interests, under the name of the Canadian Phonograph Motor Co., Ltd., are locating a plant in Stratford, Ont.

In the field of pulp, paper and paper products one of the outstanding enterprises is that of International Paper Co. at Three Rivers, P.Q. At Peterboro, Ont., the Nashau Gummed & Coated Paper Co. of Nashau, N.H., is locating a branch plant in a building acquired for the purpose. They expect to get going by January.

### Other Industries

Other companies placing branch industries in Canada are the Robbins & Myers Co., the Western Clock Co., and the Hoover Suction Sweeper Co. The first-mentioned is erecting a plant with a capacity of 125,000 motors per work year and employing 500 persons in Brantford, Ont., and hopes to start operating in January. The second is locating in Peterboro, Ont., where it is taking over an existing building and also hopes to be producing by January. The third has just about completed the erection of a large plant in Hamilton, Ont.

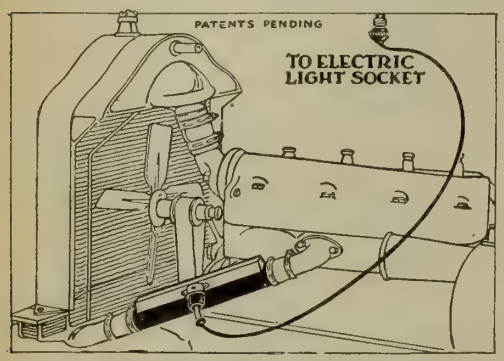
Under the name of the Niagara Wire Weaving Co., the Lindsay Wire Weaving Co. of Cleveland Ohio, is spending $220,000 on the erection of a plant at Niagara Falls, Ont., which will employ 150 hands in the manufacture of wire cloth and wire-weaving machinery. The Railway Steel Spring Co. of New York will start the manufacture of steel tires for railway equipment at Montreal in January under the name of the Canadian Steel Tire & Wheel Co. The Elgin Gas Motor of Elgin, Ill., is erecting a three-storey factory in Winnipeg which will be producing 15 engines a day by December.

### SAYS ALCOHOL IS THE COMING FUEL

A bulletin issued from the Washington, D.C., headquarters of the National Geographical Society quotes Dr. Alexander Graham Bell as saying that alcohol is the coming fuel of the world. He points out that there is one obstacle to further advance in mechanical development, in the increasing price of the fuel necessary to work machinery. Coal and oil are going up and are limited in quantity.

"There is, however, one other source of fuel supply," declares Dr. Bell. "Alcohol makes a beautiful, clean, and efficient fuel, and can be manufactured cheaply. Wood alcohol can be employed as a fuel, and we can make alcohol from sawdust, a waste product of our mills.

"Alcohol also can be manufactured from corn stalks, and, in fact, from almost any vegetable matter capable of fermentation. Our growing crops and even weeds can be used."



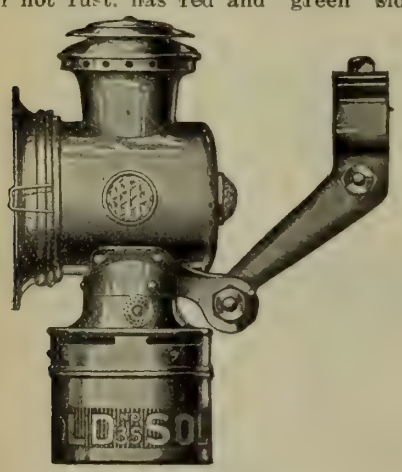
By McKee.

# NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

### MOTOR HEATER

The Myall motor heater, which is manufactured by Motor Sundries Limited, 420 Foy Building, Toronto, may be installed, it is stated, in ten minutes, without any trouble. The manufacturers



*Myall Motor Heater*

claim that it is adaptable for use in any of the standard makes of cars, and that it will keep the engine warm and ready for instantaneous service, in any garage, in any weather. It is quickly attached to any electric light socket.

### BICYCLE LAMP

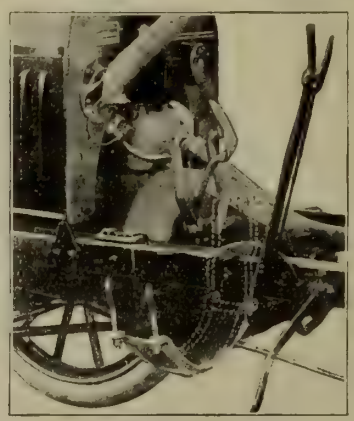
The "Old Sol" Kerosene bicycle lamp manufactured by the Canada Cycle and Motor Co., Limited, of Weston, Ont., is a new model which the manufacturers claim cannot be put out by vibration, wind or rain. It is stated that it will give a bright, steady light, is attractive and will not rust. has red and green side

*"Old Sol" Bicycle Lamp*

jewels and a polished reflector. It is equipped with a new type bracket for either front fork or hand bar stem, and will burn about fourteen hours at one filling. While this lamp is made especially for bicycles, it is well adapted for use on motor cars, carriages and other vehicles. It is 6¾ inches in height.

### CLAPPER HORNS

Blow Bell clapper horns, manufactured by Ferdinand Strauss, Inc., 7 West 22nd St., New York, are, it is claimed, the noisiest horns on earth. The manufacturers claim that they are



*Blow Bell Horns*

a horn, a bell and a rattler all in one, made of standard metal with patent clapper, patent corrugated bell and knocker and wooden mouthpiece. They are ten inches in length and have a bright finish.

### MOTOR SUPPORT

The Liberty Motor Support, manufactured by the oMtor Support Co., 42[illegible] S. Dearborn St., Chicago, for use on Ford cars and trucks, can be installed, it is stated, in twenty minutes. It is claimed that it stops vibration by reinforcing the regular Ford arms with

*Motor Support*

"U" shaped hangers by following the lines of the Ford arms, locking over them on top of the frame and connecting to the saddle on each side of the crank case. It is also stated that it stops oil leaks if installed before this trouble originates by forming a complete saddle support for the motor and taking the strain off the regular arms. There are no bolts to loosen, no nuts to take off and the support gives a three-point suspension.

#### Electrical Fixtures

William MacGregor, 86 Ennerdale Road, Fairbank, Ont.—Please inform me who handles Red Star Roofing, also where I may procure electrical fittings and lamps, like one sees on bargain days?

Red Star Roofing is manufactured by the Barrett Manufacturing Co., 172 King Street East, Toronto. The electrical fixtures may be procured from the Victoria Electric, 77 York Street, and Toronto Electric, corner Bay and Adelaide Streets, both Toronto, Ont.—Editor,

#### Champion Oak Heater

R. A. Eddie, Glencoe, Ont.—Please inform me where the Champion Oak Heater is made.

Clare Bros. & Co., Ltd., Preston, Ont., manufacture these.—Editor.

#### Wire Window Guards

Henry Gilles, St. Jacobs, Ont.—Please inform me where I may get wire window guards, etc., to order.

Dennis Wire & Iron Goods Co., London, Ont., also Canada Wire & Iron Goods and B. Greening Wire Co., both of Hamilton, Ont.

#### Silk Lamp Shades

Cochrane Hardware Limited, Copper Cliff, Ont.—Can you give us any information concerning names of manufacturers of silk electric lamp shades?

These may be procured from the following: Duggan & Levy, 166 King West; Harvie Robert, 11 Colborne Street; E. F. W. Salisbury, 49 Wellington East; Silk Shade Co., all of Toronto; also Miss H. E. McMillan, 591 St. Catherine Street, Montreal.—Editor.

#### Who Knows About This?

C. G. Olander, Lethbridge, Alta.—Can you tell us the names of the makers of the Mite Range. No. 7B, also No. 215 Ideal Oak Heater?

McIntyre & Taylor, 503 Queen Street West, Toronto, Ont., have repairs for the Ideal Oak Heater. Could any of our readers inform us regarding Mite Range No. 7B?—Editor.

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

THE tendencies generally throughout the entire hardware line are firm and upward. There are numerous changes noted this week. These may be expected to continue until such time as the industrial disturbances cease to be a factor. Owing to the coal crisis great difficulty is experienced in getting shipments through, and should the proposed curtailment of train service be carried out, the difficulties will undoubtedly increase, accentuating further the present shortage of goods generally.

Advices point to further increases for the coming year, as manufacturers, generally, are refusing to accept orders for shipment beginning on December 31. While generally speaking, it is not advisable to carry stocks around inventory periods, some of those best informed advise stocking up at the present wherever goods may be most satisfactorily procured, even if these goods will not be required for three of four months as the investment would be a sound one.

Amongst the many advances are noted sash cord, which is now quoting at, No. 8 to 12 at 83c; No. 7 at 84c and No. 6 at 85c. This may possibly go higher; some firms in the United States are already quoting 5 cents higher over our corresponding prices. 1847 Rogers flatware is quoting at 30 per cent. discount, being an advance of 2½ points. Canadian padlocks and night latches, as predicted by HARDWARE AND METAL last week, have advanced 10 per cent.

Plain galvanized wire No. 9 is quoting at $5.60 per cwt. and $6.00 for barbed. Champion scales are slightly higher, the new prices are: No. 4 E. B. at $6.00; No. 10 E.B. at $8.10; No. 240, $13.70; No. 600 at $30.60; No. 1200 at $37.80; No. 2000 at $53.00.

Sash weights are now selling at $3.00. Woodenware comprising ladders, bake boards, ironing boards, clothes horses, etc., have advanced and the new lists, it is expected, will be released from the publishers about December 1. The American Window Glass Co. have withdrawn their lists and it looks as if higher Canadian prices are pending. Stoves and ranges are up 5 to 10 per cent. and it is expected the new prices will be available by December 1.

Wrought nipples are higher, also roller breast snaps, Rochdale pruners, Canadian Beauty electrical appliances, Trimo wrenches and parts, solid handle screw-drivers, Rayo lamps, made up logging chains.

# MONTREAL MARKETS

MONTREAL, Nov. 26—Advances have been recorded this week for steel and iron bars and the increase for steel is 30c, while that for iron is 15 cents per 100 pounds. These advances were forecast last week in the market service of HARDWARE AND METAL. Various gauges of galvanized wire have also advanced again 25 cents per 100 pounds. Auger bits, in sets, are marked higher. Sash cord is up in price, as are horse and wool cards, also. Builders' hardware of various manufacture is advancing frequently and this line is selling very actively. Manila and jute fibres are decidedly firm, but there have been no rope or cordage changes. Wares and stoves are very firm and material for the manufacture of these lines is said to be getting scarce. Galvanized and black sheets are marked up again and the market is getting bare of the necessary supplies. Pig tin is up two cents a pound, while spelter and antimony are up somewhat.

There are strong tendencies on gas pipe and advanced prices are not improbable. Lead pipe and lead sheets, solder and other lead products may go higher at any time. Business is reported to be very brisk.

### *Auger Bits in Sets Are Marked Higher*

**Montreal.**

AUGER BITS.—The price of Irwin auger bits, in sets, is marked higher. The genuine Irwin are now, for the No. 9, $4.80 per set; $7.40 for the No. 13, while for the solid centre the respective sizes are $3.60 and $7 per set.

### *Nipples Are Higher; Pipe Firm; May Advance*

**Montreal.**

NIPPLE AND PIPE.—The advances already reported in some quarters for nipples are now made general, and the market is firm. Pipe prices, too, under the recent stiffening of the market for raw material, and its scarcity, suggest that increased prices for various sizes may be made effective before long.

### *Sash Cord Higher; Horse and Wool Cards*

**Montreal.**

SASH CORD, WOOL CARDS.—Advanced prices are effective for sash cord and the new net prices are: No. 6, per lb., 85c; No. 7, 84c, and 8-12, 83c.

Wool and horse cards are both advanced, the advances being around 10 per cent.

### *Frequent Advances on Various Builders' Hdwe.*

**Montreal.**

BUILDERS' HARDWARE.—Various increases are being effected for builders' hardware and Springer and Peterboro lines are marked up 7½ per cent. The

tendencies are strong and the indications suggest further advances on some lines.

## *Manila Fibre Firmer; Rope Sales Light*

**Montreal.**

ROPE AND CORDAGE.—The movement of rope and cordage is light, and while there has been no change in the basis, manila fibres in particular are ruling high, as are also jute materials. The present basis for pure manila rope is 31c; Beaver or British manila, 27c; and sisal, 23½c.

## *Coal Oil and Gasoline Held; Are Moving Well*

**Montreal.**

COAL OIL, GASOLINE.—The markets are active, seasonably speaking, and no change has been registered for either coal oil or gasoline. Coal oil prices range from 22 to 25c per gallon, according to grade, while gasoline is selling for 33c per gallon, motor grade.

## *Wares Are Very Firm; Stove Material Scarce*

**Montreal.**

WARES AND STOVES.—In view of the fact that raw materials are now obtainable only at a premium, and sometimes not at all, the market on wares is a very firm one. Prices on the various lines are ruling on a strong basis, and the tendencies are upward.

The same condition may be said to prevail regarding stoves. The manufacturer is dependent upon the mills entirely, and if it were not for the fact that some have protected themselves on supplies many months in advance, scarcity would have been the result of the manufactured articles long ere this. There is a brisk demand for all lines.

## *Nails Are Big Sellers; Wire Price Advances*

**Montreal.**

NAILS AND WIRE.—The movement of nails continues active on the advanced basis reported last week. Supplies are fair, and the trade in nails has been really active for some weeks. The base price for both wire and cut is $5 per keg.

Various gauges of wire have again been advanced and the changes are made to the following figures: Plain galvanized, No. 9, $5.50 per 100 lbs.; No. 12, $5.65; No. 13, $5 75; galv. spring, No. 9, $5.55; No. 12, $5.70; No. 13, $5.80.

## *Steel Advances 30c; Common Iron Up 15c*

**Montreal.**

STEEL AND IRON.—The market on both steel and iron has been advanced, steel bars being 30c per cwt. higher, and iron 15c. The tendencies of the market were very definitely forecast in HARDWARE AND METAL last week, and the market is firm, and the movement of supplies to the trade continues to be quite active. No change has been registered in the higher-priced grades of steel, such as tool and mining steels.

IRON AND STEEL

| | |
|---|---|
| Iron finish machinery steel | 4 10 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 25 |
| Spring steel | 5 00 |
| Sleigh shoe steel | 4 05 |
| Tire steel | 4 25 |
| Toe calk steel, per 100 lbs. | 4 95 |
| Band steel | 4 05 |
| Harrow tooth steel | 4 20 |
| Mining tool steel, per lb. | 0 22 |
| Black Diamond tool steel, per lb. | 0 22 |
| Black Diamond cast steel, per lb. | 0 22 |
| Common bar iron, per 100 lbs. | 3 90 |
| Refined iron, per 100 lbs. | 4 90 |
| Mild steel | 4 05 |

## *Sheets Move Upward And Supplies Light*

**Montreal.**

SHEETS AND PLATES.—The movement of price is steadily upward, and particularly on galvanized sheets. Prices are 25c per cwt. higher on some gauges this week, and the tendencies are that further advances will be recorded before prices are readjusted downward. Supplies are hard to obtain. Black iron sheets, too, are firmer, and the prices have been readjusted, in some cases various gauges being marked up.

| | | |
|---|---|---|
| **BLACK—** | | |
| 10 gauge | 5 90 | 6 20 |
| 12 gauge | 5 95 | 6 25 |
| 14 gauge | 6 00 | 6 30 |
| 16 gauge | 6 10 | 6 40 |
| 18-20 gauge | 6 55 | 6 70 |
| 22-24 gauge | 6 60 | 6 75 |
| 26 gauge | 6 70 | 6 80 |
| 28 gauge | 7 00 | 7 00 |
| **GALVANIZED SHEETS—** | | |
| U.S. Standard— | | |
| 10¾ gauge | .... | 9 00 |
| 28 gauge | .... | 8 85 |
| 26 gauge | .... | 8 75 |
| 22 and 24 gauge | .... | 8 40 |
| 20 gauge | .... | 8 25 |
| 18 gauge | .... | 8 25 |
| 16 gauge | .... | 8 00 |
| English Standard— | | |
| 28 gauge | .... | 9 75 |
| 26 gauge | .... | 9 50 |
| 24 gauge | .... | 8 90 |
| 22 gauge | .... | 8 55 |
| 18 and 20 gauge | .... | 8 35 |

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

## *May Be Advance At Once on Lead Products*

**Montreal.**

LEAD PRODUCTS.—The market is so firm that an advance of price appears to be imminent. Pig lead is ruling firm, and some of the jobbers and manufacturers have been anticipating an upward trend to the quotable basis. Solder, too, owing to the advancing markets for tin, in London, is very firm. An advance is not at all unlikely, even before the week-end.

| | | |
|---|---|---|
| Lead pipe | .... | 0 12½ |
| Lead waste | .... | 0 13½ |
| Note.—Lead pipe is subject to a discount of 10%. | | |
| Lead traps and bends | .... | 15% |

| Lead sheets, 3 to 3½ lbs., sq., ft., lb. | .... | 0 12½ |
| Lead sheets, 4 to 8 lbs., sq. ft. | .... | 0 12 |
| Cut sheets ¾c lb. extra, and cut sheets to size, 1c lb. extra. | | |
| Solder, guaranteed, lb. | .... | 0 37½ |
| Solder, strictly, lb. | .... | 0 33 |
| Strictly, commercial, lb. | .... | 0 32 |
| Solder, wiping, lb. | .... | 0 30 |
| Solder wire (8 gauge)— | | |
| 40/60 | .... | 0 36 |
| 45-55 | .... | 0 38¾ |
| 50-50 | .... | 0 41¼ |
| Zinc sheets, casks | .... | 0 16 |
| Do., broken lots | .... | 0 16½ |

## *Old Material Active; Old Iron Especially*

**Montreal.**

OLD MATERIAL.—Prices are quite firm on old cast iron and the heavier kinds of old scrap. These are in demand by some of the manufacturers and the movement continues to be quite brisk. Prices are quite firm, but are without change this week.

| Dealers' Buying Prices— | | |
|---|---|---|
| Old rubbers, boots and shoes | 0 07 | 0 08 |
| Overshoes, lumbermen's rubber boots | .... | 0 05 |
| Overshoes, etc. (trimmed) | 0 05 | 0 06 |
| Bicycle tires | .... | 0 03½ |
| Automobile tires | 0 03¾ | 0 04 |
| Yellow brass | 0 10 | 0 11 |
| Red brass | 0 15 | 0 16 |
| Light brass | 0 07½ | 0 08½ |
| Scrap zinc | 0 05½ | 0 06 |
| Light copper | 0 16 | 0 17½ |
| Heavy copper | 0 17 | 0 18 |
| Wrought iron, No. 1, per gr. ton | .... | 18 00 |
| Malleable scrap (ton) | 15 00 | 16 00 |
| Pipe scrap, ton | .... | 11 00 |
| Stove plate, ton | 20 00 | 21 00 |
| No. 2 busheling | 7 00 | 8 00 |
| Machinery, cast (ton) | 25 00 | 26 00 |

## *Tin Market Advances And Also Antimony*

**Montreal.**

INGOT METALS.—The features of the week are advances for tin and antimony. Lead has settled down to a steady basis.

COPPER.—There is very little new feature on this and the market movement has been limited and sales few. Price is shaded ¼c to 23¾c per lb.

TIN.—The London market has had two stiff advances of about £4 each, and the local quotation is advanced 2c per lb. to 60c.

LEAD.—This has steadied down somewhat, and the price, while remaining unchanged, is firm. Declines are not looked for now.

SPELTER.—The market is quite strong and a little change of price is recorded, ⅛c per lb. increase brings the quotation to 10¼c.

ALUMINUM.—Very little business is obtaining for this and the price is held at 34c.

PIG IRON.—A base price of $50 per ton still rules on this, for what little business there is.

# TORONTO MARKETS

TORONTO, Ont., Nov. 27—The upward tendencies in hardware line generally are very pronounced. It is stated that no lower prices of any consideration will take effect till production increases, and it is believed that increased production is the pivot that will turn all high prices back to normal.

The coal crisis is no doubt one of the chief causes of the great difficulty experienced in getting shipments through, and should the proposed curtailment of train service be carried out, the difficulties will increase, accentuating further the present shortages of goods.

Manufacturers are generally refusing to accept orders for shipment beginning on December 31, and advices point to further increases for the coming year. It is not generally advisable to carry stocks around inventory periods, however some of those best informed advise stocking up at the present wherever goods may be most satisfactorily procured, even if these goods will not be required for three or four months as the investment would be a sound one.

Some of the new quotations are sash cord which may again advance, 1847 Rogers flatware, Canadian padlocks and night latches, plain galvanized wire, barbed wire, Champion scales, and sash weights.

Stoves are up 5 to 10 per cent. and the new lists are expected to be out by December 1. The lists for woodenware, comprising ladders, bake boards, ironing boards, clothes horses, etc., are also expected December 1. Wrought nipples are higher. It is noted that the American Window Glass Co. have withdrawn their lists; this may reflect in the Canadian market.

## *Sash Cord Up; May Go Higher*

**Toronto.**

SASH CORD shows a higher price this week and is now quoting as follows: 8 to 12 at 83 cents per pound; No. 7 at 84 cents; No. 6 at 85 cents. A further advance to this of 5 cents per pound has gone into effect in the United States and it would not be surprising if this were to affect the prices quoted here, as a higher tendency is noted.

## *Canadian-Made Padlocks Advance* 10 *Per Cent.*

**Toronto.**

CANADIAN-MADE PADLOCKS follow the lead of the American manufacturers as predicted last week by HARDWARE AND METAL, and are now quoting approximately 10 per cent. higher.

## *Champion Scales Slightly Higher*

**Toronto.**

CHAMPION SCALES show higher prices and are now quoting: No. 4 E.B. at $6.00; No. 10, E.B., $8.10; 240 lbs. at $13.70; 600 lbs. at $30.60; 1,200 lbs. at $37.80; 2,000 lbs. at $53.00. These prices include stamping charges.

## *Galvanized and Barbed Wire Prices Are Up*

**Toronto.**

GALVANIZED AND BARBED WIRE —Plain galvanized wire has advanced, making the new price for No. 9 on a basis of $5.60 per cwt. Barbed wire is now quoting at $6.00.

## 1847 *Rogers Flatware Up 2½ Per Cent.*

**Toronto.**

SILVER FLATWARE. — 1847 Rogers flatware is now quoting at a new discount of 30 per cent., being an advance of about 2½ points.

## *Sash Weights Up To* $3.00 *Per* 100 *Lbs.*

**Toronto.**

SASH WEIGHTS show an advance of 25 cents per 100 and are now quoting at $3.00 per 100 pounds.

## *Woodenware Advanced; Prices Being Revised*

**Toronto.**

WOODENWARE. — Many lines of woodenware have advanced, such as step ladders, clothes-horses, ironing boards and stands, bake boards, etc. The new prices are as yet not available. However, it is expected the new lists will be released from the publishers about the first of December.

## *Stove Bolts Now* 60 *Per Cent. Discount*

**Toronto.**

STOVE BOLTS show an advance of approximately 5 per cent. and are now quoting at 60 per cent. off the list.

## *Iron and Steel Bars Scarce; Still Hold*

**Toronto.**

BAR IRON AND STEEL.—Canadian mills are well filled with orders, and are only taking orders for specified tonnages, it is stated. It is hard to place any orders with American mills as it is reported they are booked to their present capacity, and as conditions are so unsettled they do not seem to be able to figure on future deliveries. It is not expected conditions will show much relief till probably February or March of next year. Present quotations are as follows:

| | | |
|---|---|---|
| Common bar steel | .... | 4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 50 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 70 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | 4 25 | 4 50 |
| Band steel | 4 25 | 4 50 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## *Sheets and Plates Show No Relief*

**Toronto.**

SHEETS AND PLATES.—Some jobbers state their stocks are cleaned out and do not know where further stocks are to come from for some time to come. It is stated that some iron is coming in. In fact, this week shows the biggest returns for some time back, it is stated. Besides the crisis caused by the steel and coal strike and other disruptions, there looms up a possible shipping curtailment caused by the reduction in transportation facilities. This will no doubt be a further factor in the detriment of shipments. Quotations are as follows:

**BLACK SHEETS—**

| | | |
|---|---|---|
| 14 gauge | 5 45 | 6 50 |
| 16 gauge | 5 60 | 6 65 |
| 18-20 gauge | 5 15 | 6 55 |
| 22-24 gauge | 6 20 | 6 60 |
| 26 gauge | 6 30 | 6 65 |
| 28 gauge | 6 45 | 6 75 |
| 3-16 inch plate | 4 90 | 5 25 |
| ¼-inch boiler plate | 4 50 | 5 80 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

**GALVANIZED SHEETS.**

| | Premier | | Apollo | |
|---|---|---|---|---|
| 10¾ oz. | 8 90 | 9 50 | 8 25 | 9 25 |
| U.S. 28 | 8 30 | 9 90 | 7 85 | 8 55 |
| U.S. 26 | 7 90 | 8 50 | 7 55 | 8 20 |
| 22 and 24 | 7 70 | 7 90 | 7 40 | 8 00 |
| 18 and 20 | 7 50 | 7 70 | 7 25 | 7 80 |
| 16 | 7 25 | 7 50 | 7 10 | 7 60 |
| 12 and 14 | 7 05 | 7 25 | 6 95 | 7 35 |

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Wrought Iron Pipe Remains Firm; Scarce*

**Toronto.**

WROUGHT IRON PIPE.—The shortage in this line is being keenly felt, and it is stated if conditions do not soon assume something of the old production basis the shortage will be serious, with the inevitable result of higher prices. The present quotations show no change and are as per our current quotations.

## *Brushes Very Firm; Bristles Scarce*

**Toronto.**

BRUSHES.—Bristles continue to be a scarce necessity in the brush industry. One manufacturer stated to HARDWARE AND METAL, referring to prices, we can expect anything at any time except a decrease in prices. The output of the makers is booked up till about February and anyone that can get promised deliveries is very fortunate.

## *Corn Brooms May Go Higher*

**Toronto.**

BROOMS may advance. A small crop with a poor quality of corn may be the biggest factor. It is stated that owing to a very dry season some of the corn crops did not turn out well. In some places the whole crop was tainted, and owing to the rust and other conditions, considerable was unfit for first class corn. Other places, it is stated, the corn grew too long, and as it is sold by weight considerable is wasted on account of requiring to be cut off and no other use for the pieces cut.

## *Stoves and Ranges Advance 5 to 10 Per Cent.*

**Toronto.**

STOVES AND RANGES.—A change in price will soon be put into effect by all stove manufacturers. Some have withdrawn all prices while others are revising their lists. It is expected that all changes will be through by the first of December. The present conditions of labor, higher costs of raw material, curtailed production, increased demand, have caused the manufacturer to carefully check up and base his selling price on actual cost. This will account for some lines remaining at the old figure. The new advance will approximate from 5 to 10 per cent.

## *Scrap Iron and Steel Firm; Copper and Brass Weaker*

**Toronto.**

SCRAP METALS AND WASTE MATERIALS.—Iron and steel are showing a stronger feeling and new and higher prices would not be surprising, strike conditions and transportation being the main factors. Copper and brass may possibly go to a lower figure and are depending on certain developments whether this will take place or not. The present quotations are as follows:

DEALERS' BUYING PRICES

| | | |
|---|---|---|
| Tea lead | .... | 0 03½ |
| Heavy lead pipe | .... | 0 05¾ |
| Pipe scrap | .... | 8 00 |
| Stove plate, per ton | .... | 17 50 |
| No. 2 busheling | .... | 11 00 |
| Yellow brass | .... | 0 10 |
| Red brass | .... | 0 16¾ |
| Light brass | .... | 0 07 |
| Scrap zinc | .... | 0 06 |
| Heavy copper | .... | 0 18½ |
| Wrought iron, No. 1, per gr. ton | .... | 14 00 |
| No. 1 machinery cast | .... | 22 00 |
| Heavy melting steel | .... | 14 00 |
| Old rubbers, boots and shoes | .... | 0 06 |
| Overseas, lumbermen's rubber boots | .... | 0 04 |
| Bicycle tires | .... | 0 01½ |
| Automobile tires | .... | 0 03 |
| Tea lead | .... | 0 03½ |
| Heavy lead pipe | .... | 0 05¼ |

## *Boiler Tubes Firm; Show No Change*

**Toronto.**

BOILER TUBES are still holding at a firm price. No immediate change is expected. Some tubes are coming in from the United States, but the shipments are not heavy, and although tubes are scarce no business is being turned down. The prices are quoting as follows:

| BOILER TUBES— | Per 100 feet Seamless | Lapweld |
|---|---|---|
| 1 inch | $27 00 | ..... |
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## *Corrugated Sheets Firm; Show No Change*

**Toronto.**

CORRUGATED SHEETS are not showing any change in price, but are holding firm at the present price quotations. There seems no prospect of any early relief in the flat sheet situation, and as corrugated sheets depend on flats for their production, they are seriously affected. Some sheets are coming in, but in such limited quantities that it hardly appears to be a factor. The present quotations are as follows:

| Corrugated Sheets— | Per 100 square Feet Gal'zed | Painted |
|---|---|---|
| No. 28 gauge | $8 25 | $7 00 |
| No. 26 gauge | 9 00 | 8 00 |
| No. 24 gauge | 13 50 | 10 00 |
| No. 22 gauge | 16 00 | 12 50 |
| No. 20 gauge | 19 00 | 16 00 |
| No. 18 gauge | 24 00 | 19 50 |

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

## *Lead and Zinc Products Are Holding Unchanged*

**Toronto**

LEAD AND ZINC PRODUCTS are still holding steady. The demand still continues to be a fair one and the volume of business being handled for this season of the year is excellent. The price, although unchanged, is holding firm, and is quoting as follows:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | .... | $0 12½ |
| Lead waste pipe, list, per lb. | .... | 0 13½ |
| Do., over 8 inches, list, per lb. | .... | 0 14½ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | .... | 15% |
| Lead wool, lb. | 0 11 | 0 12½ |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 12 | 0 13 |
| Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra. | | |
| Solder, guaranteed, lb. | 0 35½ | 0 38 |
| Solder, strictly, lb. | 0 34½ | 0 37 |
| Solder, commercial, lb. | 0 32½ | 0 35 |
| Solder, wiping, lb. | 0 31½ | 0 34 |
| Solder, wire, lb. | 0 35½ | 0 41 |
| Zinc sheets, per lb. | .... | 0 17 |

## *Shelf Hardware Generally Shows Advance of 10%*

**Toronto.**

SHELF HARDWARE, generally, has taken a further advance of 10 per cent. and comprises awning pulleys, screw pulleys, door springs, chest handles, cobblers' sets, etc.

## *Wrought Nipples Up; New Discount 75% Off*

**Toronto.**

WROUGHT NIPPLES.—New quotations on wrought nipples are 75 per cent. off the list for 4 inch and under.

## *Fuel Oil Up ½ Cent Gallon*

**Toronto.**

FUEL OIL shows a further advance this week of ½ cent per gallon.

## *Tin is Stronger; Copper Unsettled*

**Toronto.**

INGOT METALS show little change this week. Tin is considerably firmer, while copper is unsettled. Although lead is showing easier tendencies, the local market is unchanged. Antimony is quiet while a good demand is noted for spelter.

TIN shows advances and the tendency is a firm one. Local quotations are 60 cents per pound.

COPPER remains very unsettled but based on operating costs the present market is not high, it is stated. Quotations are 24 cents per pound.

LEAD has been showing lower tendencies. The local market is still holding at 8¼ cents per pound.

SPELTER is firm with a good demand showing. The present price is 10½ cents per pound.

# LONDON MARKETS

LONDON, Ont., Nov. 27—New and higher quotations are effective on a number of lines this week, including oiled and annealed wire, which is up 25 cents per 100 pounds; fence staples, which advance 25 cents per 100 pounds; roller breast snaps, Gilmour auger bits, common auger bits, wrought nipples, which advanced ten per cent.; Rochdale pruners, Canadian Beauty electric appliances, sash cord, which is five cents a pound higher; Trimo wrenches and parts. solid handle screw drivers, Rayo table lamps and made-up logging chains.

## *Annealed Wire Up 25 Cents Per 100 lbs.*

**London, Ont.**

OILED, ANNEALED WIRE.—New quotations on these lines show an advance of 25 cents per 100 pounds. The base price is now $5.25. Quotations are as follows:

Net prices, No. 11, $5.47 per 100 lbs.; No. 12, $5.55 per 100 lbs.

Hay baling wire in rolls, No. 14, $5.65.

## *Higher Quotations on Fence Staples*

**London, Ont.**

FENCE STAPLES.—Fence staples are up 25 cents per 100 pounds, quotations being on the following basis:

Galvanized, kegs, $6.10 per 100 lbs.; 25 lb. boxes, $6.60 per 100 lbs. Bright, kegs, $5.35 per 100 lbs.; 25 lb. boxes, $5.85.

## *Roller Breast Snaps Register an Advance*

**London, Ont.**

ROLLER BREAST SNAPS.—New and higher prices are now in effect on roller breast snaps, the figures being: No. 439 x 1½ in., $3.25; No. 439 x 1¾ in., $3.35; No. 439 x 2 in., $3.60 per dozen.

## *Auger Bits Are Revised Upwards*

**London, Ont.**

AUGER BITS.—Prices on auger bits have been advanced and the new quotations are:

Gilmour auger bits, 17½ per cent. off list.

Common auger bits 40 per cent. off list.

## *Ten Per Cent. Advance in Wrought Nipples*

**London, Ont.**

WROUGHT NIPPLES.—New quotations on wrought nipples are ten per cent. above former figures and are 75 per cent. off list on 4 in. and under.

## *Electric Appliances Have Been Advanced*

**London, Ont.**

ELECTRIC APPLIANCES.—New lists which show advances have been issued for Canadian Beauty electrical appliances. Quotations are as follows:

Irons and toasters up 50 cents each. Irons, $6.50, list; Toasters, $6.50, list. Net price figured at 27½ per cent. is $4.71 each.

Grills up $1.00 on list. Grills, No. 402, list $11.00; less 27½ per cent., net price $7.98 each.

## *Rochdale Pruners Moving Upwards*

**London, Ont.**

ROCHDALE PRUNERS. — New prices on Rochdale pruners show an advance. The quotations are:

No. 35, $17.00; No. 38, $20.00 per dozen.

## *Sash Cord Advances Five Cents a Pound*

**London, Ont.**

SASH CORD.—An advance of five cents a pound has been made in sash cord, the new quotations being:

No. 6, 85c; No. 7, 84c; Nos. 8, 9, 10, 11, 12, 83c lb.

## *Trimo Wrenches and Parts Are Higher*

**London, Ont.**

TRIMO WRENCHES.—Trimo wrenches and parts have been revised upwards and the new price is 37½ per cent. off list.

## *Higher Quotations on Screw Drivers*

**London, Ont.**

SOLID HANDLE SCREWDRIVERS. Peck, Stow and Wilcox solid handle screwdrivers have been advanced, the new quotations being:

No. 3 x 3 in., $4.75 per dozen; 4 in., $5.00; 5 in., $6.00; 6 in., $7.00; 7 in., $8.25; 8 in., $9.40; 10 in., $11.70.

## *Table Lamps Higher; Heaters Selling Well*

**London, Ont.**

ELECTRIC HEATERS, TABLE LAMPS.—Rayo table lamps have been advanced, the new quotations being $4.35 each.

Majestic heaters are selling well. Quotations on No. 7 are $7.25 each.

## *Wire Nail Supply is Still Limited*

**London, Ont.**

NAILS.—Cut nails are up 25 cents, the new price being $5.00 base. There is a good sale for wire nails at the new price quoted last week of $4.95 base. The supply of wire nails is still limited.

## *Cross Cut Saws and Handles Unchanged*

**London, Ont.**

CROSS CUT SAWS, HANDLES.—There is a good demand for crosscut saws and handles. Quotations are as follows:

Cross-cut Saws—Maple Leaf, Premier, Lance, Racer, Simonds, No. 22, No. 13, Panburn—5 ft., $4.95 each; 5½ ft., $5.85 each; 6 ft., $6.60 each.

Cross-cut Saw Handles—No. 3, $5.30 per dozen pairs; No. 4, $4.05; No. 6, $4.05; No. 6½, $4.05; No. 5, $7.20.

Lion, one man, $5.00 dozen.

## *Higher Prices Named on Logging Chains*

**London, Ont.**

MADE-UP LOGGING CHAINS.—Higher quotations are in effect on this line, the quotations being:

5-16 in., 15c; ⅜ in, 13c; 7-16 in., 12½c lb.

## *Weather Strip and Ash Sifters Moving*

**London, Ont.**

WEATHER STRIP, ASH SIFTERS.—There is an active demand for weather strip. Prices are as follows:

Frost King, per dozen packages. Swan hardwood, 75c set. Wood and felt, 55/5 per cent. off list.

Ash sifters are also selling well. Quotations are: Wood sides, $3.00 per dozen; Banner, $3.15 each; Rocker, No. 1, $4.75 each.

## *Putty, Window Glass in Brisk Demand*

**London, Ont.**

PUTTY, WINDOW GLASS.—Good sales of both putty and window glass are being made. Quotations show no change and are as follows:

Putty—Standard, 100-lb. drums, $6.80 per 100 lbs.; 25-lb. drums, $7.05. Pure, 100-lb. drum, $9.30 per 100 lbs.; 25-lb. drum, $9.55.

Window Glass—Single Diamond, 25 per cent. off list; Double Diamond, 25 per cent. off list; Cut Lights, 10 per cent. off list.

## *Dollar Advance Made in White Lead in Oil*

**London, Ont.**

WHITE LEAD IN OIL.—An advance at $1 per 100 pounds is shown in white lead in oil. There is a seasonable demand. Prices are as follows:

Pure, tons, $17.35; less tons, $17.70; Elephant, tons, $17.95; less tons, $18.30 per 100 lbs.

## *Linseed Oil Prices Holding Unchanged*

**London, Ont.**

LINSEED OIL.—Prices of linseed oil are holding without change, the quotations being:

| | Raw | Boiled |
|---|---|---|
| 1 to 2 barrels, gal. | $2 52 | $2 55 |
| 3 to 5 barrels, gal. | 2 51 | 2 54 |
| 6 to 9 barrels, gal. | 2 49 | 2 52 |

Less barrels, add 10 cents gallon.

# WINNIPEG MARKETS

WINNIPEG, Nov. 27—Price changes during the week again show all lines to be advancing as predicted in recent issues of HARDWARE AND METAL and higher prices in many of the other staple lines are to be expected after January 1. Among the lines affected by this week's advances will be noticed black and galvanized iron sheets, hand saws, sash balances, Miller padlocks and night latches, stove pipe and Stevens' rifles.

## *Galvanized and Black Sheets Are Advanced*

**Winnipeg.**

GALVANIZED AND BLACK SHEETING.—Prices on galvanized and black sheets have been revised during the past week, both lines showing an advance of 25c per 100 pounds, and from present indications higher prices are to be expected, as all mills are booked to capacity for many months ahead, and this week's advance in prices is directly due to the premiums asked for prompt deliveries and does not represent an increase at the mills. Unless production is greatly increased higher premiums will be required to secure any deliveries. To-day's ruling prices are given as follows:

Galvanized Sheets, Apollo or Premier.—10¾ oz., $9.95; 28 ga., $9.55; 26 ga., $9.25; 24 ga., $9.10; 22 ga., $9.10; 20 ga., $8.95; 18 ga., $8.95; 16 ga., $8.80 per 100 lbs.

Black Iron Sheets.—28 ga., $8.05; 26 ga., $7.95; 24 ga., $7.90; 22 ga., $7.90; 20 ga., $7.85; 18 ga., $7.85; 16 ga., $7.25; 14 ga., $7.15; 12 ga., $7.10; 10 ga., $7.05, per 100 lbs.

The usual extra applies on Galvanized Sheets, 28 and 30 ga., 36 in. wide, of 20c per 100 lbs.

## *Some Lines of Saws Revised Upwards*

**Winnipeg.**

SAWS.—A slight revision in prices on saws is recorded during the week showing an approximate advance of 5 to 7½ per cent. on certain lines, while other styles show no change. The saws affected by the change and the net prices are given herewith:

Hand Saws.—S. & D., 26.5 x 20 in., $14.75; 22 in., $16; 26 in., $16.85 doz.

Hand Saws.—"Arrowhead," No. 1 x 20 in., $24.50; 22 in., $26.50; 24 in., $29.50; 26 in., $32.50 doz.

## *New Discounts Named on Sash Balances*

**Winnipeg.**

CALDWELL SASH BALANCES.—Caldwell balances also show a further advance during the week, based on new discounts now ruling at the factory, due to higher production costs and from present indications further changes are imminent within the next few months. To-day's ruling prices are given as follows:

Caldwell Sash Balances: 6 lb., $2.50; 8 lb., $2.60; 10 lb., $2.85; 12 lb., $3.05; 14 lb., $3.30; 16 lb., $3.55; 18 lb., $3.75; 20 lb., $4.00; 23 lb., $4.70; 29 lb., $5.30; 35 lb., $6.45; 41 lb., $7.05.

## *Padlocks, Night Latches Up 15 to 20 Per Cent.*

**Winnipeg.**

PADLOCKS, NIGHT LATCHES.—The Miller Lock Co. have just issued new prices covering their entire line of padlocks and night latches, which show an upward trend of from 15 to 20 per cent., and represent the largest increase in their products since 1914, and is due solely to labor troubles and shortage of materials. To-day's ruling prices on the principal lines are given as follows:

Padlocks.—No. 4, $18.65; No. 1, $21.10; No. 18, $3.60; No. 18B, $3.60; No. 21, $4.70; No. 21B, $4.70; No. 19, $4.15; No. 19B, $4.15; No. 55B, $4.50; No. 72B, $5.90; No. 76, $10.15; No. 105, $5.90; No. 125, $17.35; No. 500, $3; No. 500B, $3; No. 505, $6.15; No. 506B, $6.15; No. 555, $4.75; No. 100, $2.75; No. 700B, $6.20; No. 50, $10.90; No. 1805, $3; No. 1805B, $3; No. 1905, $3.55; No. 5438, $10.05; No. 5905, $3.65; No. 5905B, $3.65; No. 5441, $12.65; No. 216, $8.85; No. 479, $2.95; No. 477, $2.80; No. 214, $9.30; No. 217, $12.80; No. 221, $13.40; No. 22, $6.82; No. 121, $6.05; No. 34, $25.35 doz.

Padlocks on display cards—No. D, $5.90; No. V, $3.30; No. 1-52, $7.85; No. B, $6.75 each.

Miller Night Latches—No. 64, $8.35; No. 178C, $13.95; No. 170, $11.60; No. 137C, $18.65; No. 378 IB, $13.95; No. 4978, $23.10.

## *Stove Pipes Show 5 Per Cent. Advance*

**Winnipeg.**

STOVE PIPES.—Following the recent advance in tinware, galvanized ware, etc., new prices are now ruling on stove pipes, which move up about 5 per cent. over former quotations, and are selling to-day on the following basis.

| | 6-inch | 7-inch |
|---|---|---|
| Riveted pipe, 100 lengths | $19 60 | $21 10 |
| Ready to rivet, 100 lengths | 19 10 | 20 60 |
| Patent, 100 lengths | 20 10 | 21 60 |

## *New Prices Named on Stevens Rifles*

**Winnipeg.**

STEVENS RIFLES.—New prices are now ruling on Stevens rifles based on new factory quotations, and are now quoted as follows:

Stevens Rifles—"Little Scout," $6.00; "Crackshot," $7.25; "Favorite," $10.75; "Marksman," $9.00; "Repeater" No. 70, $17.75 each.

## *Advance Expected in Linseed Oil*

**Winnipeg.**

LINSEED OIL.—Linseed oil prices continue firm on the local market during the week, but from present indications further advances are expected in the near future, in fact some of the eminent paint men predict linseed oil will be selling from $3.00 to $3.50 gallon next year. To-day's ruling prices are as follows: Raw Linseed oil, $2.75 gallon; boiled linseed oil $2.78 gallon.

# PITTSBURGH MARKETS

PITTSBURGH, Nov. 27.—The union coal miners are still out, despite the recall of the strike order required by the Federal court. The officials of the miners' union are enjoined from paying strike benefits or encouraging the strike in any way, but there is room for suspicion that the striking miners are being kept in line by self-constituted committees at the individual mines. Meanwhile, negotiations on a wage scale are proceeding in Washington.

The steel industry has not actually suffered from shortage of coal to any extent, and is likely to get through the whole operation without much difficulty. The mills, as a rule, were well stocked with coal, and there are fairly heavy shipments, notwithstanding the strike, the non-union districts being in full operation, while the "open-shop" mines have been producing more or less. In the first full week of the coal strike, production in the United States was 29 per cent. of the average during the four weeks preceding the strike, when production had been particularly heavy, and 37 per cent. of the average during the first ten months of the year. The Connellsville region is non-union, and this helps greatly, as the region ships large quantities of coal, besides the coal it converts into coke in the region.

### Steel Strike Crumbling

Last week was the ninth of the iron and steel strike, and during the week the strike was crumbling, instead of waning gradually, as in preceding weeks. The Wheeling district, the strongest strike region in the country, made a beginning of operations. While the beginning was a small one, it was very important. Last week also saw a resumption at the great plant of the Cambria Steel Company at Johnstown, 100 miles east of Pittsburgh, previously entirely closed. More than half of the men reported for work during the week. In the Mahoning Valley and at Cleveland, the resumption of work continued, and at a somewhat more rapid rate than in previous weeks. The Chicago-Gary district got still nearer to a stage of full operation.

The way the steel producers now look at the situation is that the strike is now so nearly over, and the virtual end so plainly in sight, that the strike itself disappears as an important factor, and the situation after the strike is the important matter. The after-effects of the strike will remain for a long time, probably from three to six months, with a labor shortage, as there was before the strike, with working forces more or less demoralized and requiring fresh lining up for efficient operation, and with the men more or less indisposed to do good work. Losing the strike does not make the men more anxious to render efficient service, and during the strike some of the men in employment have been more or less spoiled, because mill managements were so anxious to keep men on the payroll.

Production of steel in August, the last month for which a report of production has been made, was about 80 per cent. of actual capacity, according to a conservative estimate. In the first three weeks of September, just before the strike, production was probably a shade under 85 per cent. When the strike is entirely over, in the sense of there being no strikers left, production will hardly be more than about 75 per cent. of capacity, and it may be some time before an 85 per cent. rate is reached. Doubts are entertained whether it will ever be possible to reach 100 per cent. production with a general labor shortage in the country.

such as exists to-day, and is likely to exist, as long as times remain good.

### Steel Shortage

In the early weeks of the strike, it seemed strange that so little shortage of steel was in evidence. From the present viewpoint, it appears that this was due to consumers having stocks to fall back upon, for, with production materially greater than a month ago, steel is scarcer than at that time. Consumptive requirements may not increase materially in the next couple of months, but in early spring it is practically certain that requirements will greatly increase in nearly all lines. In addition, a large amount of building, involving the use of structural and other steel, is contemplated, and the only question is how much of it will have to wait. Already, fabricating interests are being asked to set aside jobs they are on and get to work on new jobs, offered at a premium. The railroads are, of course, certain to be in the market for some material when they have bought practically nothing for so long a time. The roads will be returned to their owners January 1, according to schedule, and in all probability the Government guarantee of earnings will be extended for a short time, while Congress determines the position the roads are to occupy eventually.

### Keeping the Lid on Prices

The Steel Corporation's policy, decided upon many months ago, of holding the March 21 price schedule from any advances, is now fully worked out into practice, as the corporation subsidiaries have been selling large tonnages of steel for such deliveries as it can make, and all at not above the March 21 prices. For several weeks it has had no tonnage to sell, except for delivery after January 1. The last lines in which the corporation entered the market for 1920 were sheets and tin plates, the American Sheet & Tin Plate Company having opened its books November 15 for contracts with jobbers covering the first quarter of the year, and with large manufacturers for the first half of the year.

The Steel Corporation's policy will be followed by the large independents, generally speaking, but some of those that have been much affected by the strike, finding that it will be some time in March before they can complete their 1919 obligations, are indisposed to sell at this time for the later period. Possibly they hope that conditions later will be such as to permit them to sell at advanced prices, without incurring criticism of their regular customers for not following the Steel Corporation's policy.

The producers who thus sell far ahead, naturally sell only to regular customers of long standing, and when the prospective tonnage is not sufficient to go around, they must cut down inquiries. Their selling at March 21 prices will not necessarily hold the entire market to that level, for the unsatisfied demand will seek steel where it can be found, and that, undoubtedly, would mean premiums being charged by the smaller mills, such as keep their order books relatively clear, so as to profit by delivery premiums when obtainable. Prospects are that the premiums will increase in size and apply to more products, as the months pass. At present, there are premiums on sheets, merchant bars and wire products, also, in many cases, on tubular goods, particularly on large orders for line pipe. A fair guess seems to be that the premium market will be in very flourishing condition through the spring, and it may last longer.

## CONVENTION OF A. RAMSAY & SON CO.

Continued from page 63

plause. Honored, indeed, were the assembled company, for this band entertained the Prince of Wales when he lunched at the St. James Club recently.

Mr. Ramsay revealed himself as a singer of some "note," as he enlisted the two soloists of the evening in a trio, "For They Are Jolly Good Fellows," referring to the guests.

Wilson McDonald, introduced by Mr. Rice as a Post-Magician, proved himself the master of some difficult tricks. One of these took him seven years to master, although he had acquired some of the ordinary palming tricks with a few minutes' practice.

The presentation of a silver cigarette case was made, immediately following the taking of the flashlight, to H. W. McConnnell, the Toronto representative, who was leaving for Winnipeg, to represent the company there. The presentation was made by J. A. Donnelly, and Mr. McConnell made appropriate acknowledgment.

## NEW BRANCHES OF INDUSTRY

The post-war resources of Sheffield works were well exemplified at the exhibition organized by the City of Sheffield Development Committee for the recent Institute of Metals Conference. The collection was one of the most remarkable ever assembled in Sheffield, and the guests were deeply impressed by the evidence of manufacturing enterprise. Attention was specially directed to new branches of manufacture. Of these there is a long and ever lengthening list, from the tiny gramophone needle made by the million to the heavy implement for rolling non-ferrous metals. To name a few other manufactures wrested from foreign control, there were carbonless metals and alloys shown in surprising variety: carbon electrodes, the supply of which has secured British independence; and permanent magnets, produced in a variety of types not found outside Sheffield. For at least 150 years has lens-making been settled in Sheffield—the home of the English optical industry—and the collection of lenses for spectacles, telescopes, etc., and for larger instruments for the stage and the cinema instanced the scope for development here. From the University came evidence of scientific research of rare value, and the samples of electric lamp globes and laboratory ware showed how war-time problems were tackled with enormous advantage to peace time pursuits. Finally the exhibition was enriched by a unique display of Old Sheffield Plate.

## H. H. EAGER APPOINTED WESTERN MANAGER OF SHERWIN-WILLIAMS CO.

Announcement is made to HARDWARE AND METAL by Mr. W. S. Fallis, managing director for Canada of the Sherwin-Williams Company, that H. H. Eager, Winnipeg, has been appointed Western manager. Mr. Eager's headquarters will be at Winnipeg.

The connection of Mr. Eager with the Sherwin-Williams Company dates back some sixteen years. This service with the company brought Mr. Eager in touch with the Western Canada trade, and to many he is well known.

Born in Hamilton, Ontario, Mr. Eager went to Toronto while a young man, where he engaged with Aikenhead and Crombie. Leaving for the West twenty-five years ago, he has seen much of the business development there. His experiences in the early days were with Hose and Canniff, of Kenora, and later, with Graham and Robson, Winnipeg. From here he left, in 1903, to join the staff of the Sherwin-Williams Company.

## TO MANUFACTURE WHITE LEAD IN OIL, ETC.

The Dominon Metal Company, Ltd., Sherbrooke, Que., announce that they will shortly manufacture a number of lines to be sold through the Canadian hardware trade. N. B. Pritchard, the president and manager, informs HARDWARE AND METAL that they will also grind white lead in oil in the near future, and that red oxide of iron paint, white paint, and metallic cement, will be prepared by the firm and offered for sale to the Canadian trade.

## NEW SALES MANAGER FOR CANADA PAINT CO. WESTERN DISTRICT

W. S. Fallis, vice-president of the Canada Paint Company, Ltd., makes announcement of the appointment as sales manager of the Western district, of W. C. Boyd, with headquarters at Winnipeg.

Mr. Boyd has been with the Canada Paint Company for the past five years as travelling representative and covering the three Prairie Provinces. Last year he travelled in British Columbia.

# All Sails Set for Record Business

## Increased Buying Power of Both City and Country People and Demand for Better Homes and Conditions Means Splendid Trade for the Merchants Who Are Selling Paints and Varnishes

WITH subscriptions of more than $673,000,000 for the 1919 Victory Loan, it hardly looks as though Canada's financial conditions were anywhere near the brink of the toboggan slide that some people have been predicting ever since the armistice.

Financially, Canada's job has been insured for at least another year or so. With plenty of credit at her disposal and unlimited natural resources with which to feed the hungry demand of European countries, we are in a position to hum merrily along for some time.

A rather surprising statement from one of our banks came to view the other day in which it was shown that the ordinary savings deposits, drawing interest in Canadian banks, was 1,000% greater than previous to the war. Old H. C. L. has gone up, but nowhere in proportion to this increase. This statement does not include Victory or other bond investments and is a healthy indication of the reserve buying power of Canadians at large.

If time permitted it would be possible to indicate many other signs of increased buying power. And the dear old buying public will retain its same old weakness of buying whenever it has the available cash for so doing. Every commodity from automobiles and phonographs to paints and varnishes will be in for a strong demand during 1920.

With booze backed off the map and fading rapidly into a mere ghostly remembrance, a lot of money wasted at the shrine of Bacchus will be used in home improvement. The housing problem has nowhere been solved and the demand for houses will be as great during 1920 and 1921 as it has been during 1919. This will create paint and varnish demands of a decided stable character.

### Typical Incidents

The writer was interested in two very typical incidents which came to his attention just last week. Visiting the home of a friend in the city he became interested in the industrious activity of a man across the street who was busily painting up the inside of his house. I remarked about the matter and my host stated that this chap had recently bought the house and that he had been wielding the brush for the past three weeks during his spare time. He said he didn't think that there was a room in the house but what had been thoroughly painted. Naturally a discussion arose about paint and painting. "Let me show you something else," said my friend as he led me to the back of the house, "see that row of houses over there, they're occupied by a better class of wage-earners and small salaried men. About every other house has been renovated and the attics fixed up with beaver board and then painted. Every one of them is doubling up with some other family for the winter. I don't know when I've seen so much after-hour painting as I've seen around this community this fall."

### A Common Thing

Subsequent observations and enquiries have brought to light the fact that this has become a common thing in all parts of the city amongst the average classes.

Despite the high cost of homes and property, many people have decided to dispense with the uncertainty of renting and have bought property of any description wherever available. Being of a class that were not afraid to spend their evenings in overalls, they have invested in paint in order that it may be made habitable or brought up to their idea of what it should be in the way of decoration.

Doubling up, with a view of bringing in a little extra revenue and reducing living costs, has necessitated renovating and painting up in order to make the place attractive and to get the price that would make it worth while.

### Want Better Homes

In reviewing possibilities for next year many manufacturers point out that the long prices that farmers have been obtaining for their produce will continue for at least two years. This means simply an accumulation of what they have already piled up. Now a farmer is just as frail as other humans in his weakness for a new home or better living conditions and no small portion of this surplus accumulation of wealth will find its way into investments in paints and varnishes.

There is only one fly that is likely to crawl into the ointment and that will be the possible difficulty of obtaining raw materials by manufacturers sufficient to cope with the demand that is anticipated. Every manufacturer, both in the United States and Canada is showing some concern in this direction.

Never before has there been such an optimistic feeling throughout the trade in regard to the demand of an approaching season.

In this connection it has been peculiar that all through the war every season has been approached with more or less fear and trepidation as to what the demand would be. The necessity of advanced prices caused an epidemic of

# The Brush Department

*Keeping your brushes well displayed is one of the most effective methods of increasing sales. The striking arrangement shown in the illustration is inexpensive and is not at all difficult to make.*

## People Are Interested in Brushes All the Year Round

### Keep Your Stock Out Where People Can See It and Increase Sales—Move It Around Frequently, But Always Have the Various Lines in a Conspicuous Place

THERE is no month in the year when people are not interested in brushes of one kind or another. Hardware merchants obtain excellent results by keeping their stock conspicuously displayed all the time. This does not mean that one display should be arranged and then left in its place all the rest of the year. The best results are obtained when the stock is moved about frequently. But care is always shown to keep the brushes out where everyone who comes in will see them.

It may be the woman who is interested in floor brushes or brushes for cleaning purposes. Or it may be the man who wants a brush to do some painting around the house. Or it may be any one of the thousand people who are always prospects for a brush of some kind. If you keep your stock out where they can see it they will remember their needs and buy.

Many hardware merchants have both counter and wall displays of brushes and state that they get splendid results. They find, they say, that cutting the price on each size or style is a great help. They also find that advising the prospective buyer about the best kind of brush to use for the work he is planning is service that is greatly appreciated and makes for better business all round.

Keeping the stock in good shape is another important matter. Buyers, especially women, do not like to handle brushes that are full of dust and dirt or that are cut and scratched, through rough usage, and general neglect or knocking about. On the other hand, a clean, well-kept, attractive looking display of brushes invites attention and inspection and leads to sales.

## ALL SAILS SET FOR RECORD BUSINESS

(Continued from page 76)

predictions that they would kill the trade but when the season came the worry was how to get raw materials and then make them up to satisfy the demand.

Happily this does not appear to be the condition of the trade as 1920 approaches. Everybody is optimistic and anticipates unprecedented demand.

### The Trend of Affairs

These forebodings are not merely attempts at pure prophecy. Buyers in large manufacturing concerns have sensed the trend of affairs as never before during the war and are contracting ahead as far as they possibly can for every form of finish that they may require. Retail dealers are not showing the same hesitancy exhibited last year in arranging for spring stocks. In this way they are very wise.

But there is this to be remembered: the possibilities for the use of paint so far have overshadowed the greatest demand the trade has ever experienced. The demand has never been so great but that it has had the opportunity of being much greater. There always has been and there is likely to be for some years to come unlimited opportunities for developing more paint and varnish trade by every dealer throughout the country.

### Many Opportunities

No dealer has yet tapped the full opportunities of the paint and varnish business in his community. There is nothing in sight to indicate any reason for a halt in the advance and development of Canadian paint and varnish trade. Nor has it reached the stage where aggressive initiative has cause for relaxation for reason of no new worlds to conquer. Advertising, both by retailer, wholesaler and manufacturer, has yet to make tremendous strides before it can be said that it has adequately impressed upon the public the economic necessity of paint.

And the outlook for 1920 promises much for the aggressive dealer who piles on top of the natural demand that will come, his own initiative to develop the trade as far as he possibly can within his own community.

# BOECKH'S
## RUBBER SET
# SHAVING BRUSHES

BOECKH'S Rubber Set Shaving Brushes have every beneficial feature known to the art of modern shaving brush manufacture incorporated in them.

Their wearing qualities are almost permanent, and the soft, yet elastic bristles will not break off or come out.

With a Boeckh shaving brush you can work up a real lather without scraping or injuring the face.

Recommend and sell Boeckh's Shaving Brushes always. It means satisfaction for yourself and customers.

# Financial Expert Says Siberia Wants Canadian Goods

WHILE there is a great demand in Siberia for almost kind of manufactured goods that Canada produced, H. E. Braithwaite of Montreal, who was in Siberia last winter as financial expert with the Canadian Trade Commission for that country, says that the present is not an opportune time to carry on active export. It might be cited that notwithstanding the facts that a recent issue of the Weekly Bulletin of the Trade Department of the Dominion Government dealt with the possibility of export, the speaker contended that nothing of consequence could be done at the present time to absorb Canadian products in that country, and owing, particularly, to the lack of railway facilities. There also is a lack at the present time of a stable currency.

**Three Important Points**

"There are three points to consider," said Mr. Braithwaite: "How are you going to get the goods to Siberia? How are you going to deliver them when you land them? How are you going to get money or goods in exchange?" There is no regular line of steamships running through Vladivostock from Canada. The one railway from Vladivostock to the interior is incapacitated and insufficient for trade purposes The rouble, by latest report available here, now stands at 125 to the dollar, while before the war it was worth about 50 cents."

It was pointed out by Mr. Braithwaite that although an effort had been made by an international commission to look into the matter, the Trans-Siberian Railway System is practically broken down. At Vladivostock alone, and where Mr. Braithwaite was last spring, a million and a half tons of merchandise was lying loose in the fields there because the warehouses were filled to capacity, and the railway was unable to carry the goods to the interior. They are piled up, guarded by Russian soldiers, millions of dollars' worth, some of them shipped there in the early years of the war.

**Careful Plans Needed**

Continuing, Mr. Braithwaite said, "England and France, the United States, Canada, and to a certain extent, Japan and China, have forbidden importation of the rouble. Even if the allied countries do make loans to the Siberian Government for trade purposes, little can be done without greatly improved railway facilities. For the same reason barter is not practicable. The railway cannot carry goods into the interior for distribution, and it cannot carry out the products from the country in exchange Under these conditions how is trade to be developed? Goods cannot be brought in by rail from the West on account of the Bolsheviks.

There are some great rivers, the Ob and Irtish, emptying into the Arctic are available only during the summer season. It means, therefore, that for six months of the year the populous part of Siberia is dependent upon 5,500 miles of thoroughly disorganized railway."

**Should Be Represented**

Mr. Braithwaite advised that Canadian firms looking forward to trade with Siberia should send representatives across and get acquainted with conditions. If some feasible plan was thus determined, the Government might possibly be expected to assist in bringing about trade. As to the means of getting Canadian goods to this market Mr. Braithwaite is of the opinion that the Atlantic route would be the most practical.

The speaker pointed out that it was necessary to ship goods arriving at Vladivostock a great distance before they reached the ultimate consumer. For instance, when they reach this port they are still 2,000 miles away from the fringe of population, and which is Irkutsk on Lake Baikal. Assuming normal conditions in Russia, the logical route would be via the Baltic port of Riga, Libau and Windou. By this route Canada would come into direct competition with England and the European countries, as well as with United States. Except by a system of heavy bonuses the trade would not be forced out of its natural channels.

# Maritime and Western Sales Managers Named

Ralph C. Blakeney has been appointed Maritime sales manager of the Benjamin Moore Co., Limited, Toronto, and will take over his duties on December 1st, with headquarters at Halifax. Mr. Blakeney has been with Brandram-Henderson Limited for sixteen years. He was on the road for ten years, and for five years sales manager in the Maritime Provinces. He also represented the firm in the West Indies and South America.

*RALPH C. BLAKENEY*
*Who is going to Halifax as Maritime sales manager for Benjamin Moore Co., Limited.*

The Benjamin Moore Co., Limited. has made another appointment also, that of John B. Cleveland, as Western sales manager, with headquarters at Saskatoon. Mr. Cleveland has had several years' selling experience in the West. He will take charge of the Western territory about the first of the year.

*JOHN B. CLEVELAND*
*Appointed Western sales manager with headquarters at Saskatoon.*

**EUREKA PLANTER CO.**

The Eureka Planter Co., of Woodstock, Ont., have issued a new catalogue, No. 2016, illustrating combined seeders and cultivators, also the line of wheel and hand cultivators, wheelbarrows, hay racks, churns, root cutters, sprayers, planters and seeders, fountains, combination anvil and vises and lawn mowers manufactured by the firm. This catalogue consists of twenty five pages and is profusely illustrated. Readers of HARDWARE AND METAL may obtain a copy on request.

**AFTER GLASS TRADE**

London, England.—British capital has launched into the glass industry—with the intention of capturing a large share of the world's plate glass business.

The British Window Glass Company has been formed, and an offering of 300,000 preferred shares recently was largely over-subscribed.

# Varnish Troubles

When varnish goes wrong the dealer who sold it usually gets a share of the blame from the buyer, although this is usually unjust.

Dealers who carry Berry Brothers' Varnishes, Enamels and Stains do not have varnish troubles. The uniform dependability of all "Berry" products makes their sale safe and easy, and the great demand for them is always growing greater.

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, November 27. — Right down to the present time the activity of paint makers has been decidedly marked, and there is no let-up in the bookings that are coming to hand. Prices have been steadily held all around and there is practically no change from last week on any of the basic materials.

The linseed oil situation is no more difficult than it was, but November seed was quoted on Wednesday at $5 per bushel, Fort William basis. Canadian seed has been arriving to an extent but is still slow and will probably be slow in arriving. Some state that a great deal of the crop never was taken under cover, and that, as a consequence, it will be spring before this can be threshed. Prices hover around $2.35 per gallon for the pure oil.

Turpentine is steady and rather scarce, $2.35 being the low price on single barrel lots, per gallon. There has been no change on putty, and white lead is holding at changed prices announced last week.

### *Turpentine Scarce And Holds Its Price*

**Montreal.**

TURPENTINE. — The market conditions are unchanged, and prices are firm and steady. Some have asked between $2.35 and $2.45 for single barrel lots, per gallon. It is rather difficult to obtain adequate supplies, although, aside from manufacturing needs, the regular retail trade is really limited at this season of the year.

| Turpentine— | Imp. Gal. | |
|---|---|---|
| Single barrels | 2 35 | 2 45 |
| Small lots | .... | 2 65 |

(Packages extra.)

### *Linseed Oil is More Steady; Seed at $5.00*

**Montreal.**

LINSEED OIL.—Practically no change has been made in the market basis for linseed oil, and what slight change there is indicates greater strength of undertone. Supplies of seed from the Canadian West have dribbled in to the crushers, but reports indicate that the early winter in Western Canada has made it impossible to harvest the flax, the same standing out in the stook in many cases, and precluding the possibility of its being threshed before next spring. In the meantime, certain quantities of seed are coming to hand from the Argentine. Practically none of the factors care to hazard an opinion as to what the immediate future of prices wil be. A price of $5 per bushel, Fort William, on November seed, was ruling the middle of the week. Sales are seasonably fair.

| Raw— | Imp. Gal. |
|---|---|
| Single barrels | 2 34 |
| 5 to 9 barrels | .... |
| 10 to 25 barrels | .... |
| **Boiled—** | **Imp. Gal.** |
| Single barrels | 2 36½ |
| 5 to 9 barrels | .... |
| 10 to 25 barrels | .... |

NOTE.—Owing to fluctuations seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

### *Putty Basis is Firm With Maintained Sales*

**Montreal.**

PUTTY.—The undertone of the putty market is steady, and the sales of this to the trade are now improving. With oil holding high there is no prospect of any substantial reductions on putty, and in fact no factors have been suggested which would indicate anything but a firm market.

**PAINT AND VARNISH ASSOCIATION DECIDES NOT TO BOOST PRICES AT PRESENT**

**The Canadian Paint and Varnish Association meeting at Montreal on Thursday of this week decided to hold prices at present levels until June 1, unless conditions intervening warrant revisions in prices.**

| | 5 ton | 1 ton | Quanty. |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 6 30 |
| Do., 100 lbs. | 5 85 | 6 10 | 6 45 |
| Do., 25 lbs. | 6 10 | 6 35 | 6 70 |
| Do. 12½ lbs. | 6 35 | 6 60 | 6 95 |
| 3 and 5 lb. tins | 8 10 | 8 35 | 8 70 |
| 1 and 3 lb. tins | 8 60 | 8 85 | 10 20 |
| Do., in 100 lb. cases | 7 15 | 7 40 | 7 75 |

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%. 15 days, net 60

### *Much Booking For Prepared Paints, Etc.*

**Montreal.**

PAINTS AND SPECIALTIES.—The bookings for next year on both paints and various lines of specialties are very heavy. Supplies are said to be much reduced, that is, in the hands of the dealer, and necessitating his ordering ahead for the coming season. The various paint manufacturers have been very busy of late, and the manufacture of paints is being carried out at present on a large scale. Prices are steady without change. It is expected that a decision will be arrived at, soon, by the manufacturers, with regard to the basis to rule for the coming season on various manufactured lines.

## TORONTO

TORONTO, November 27.—Turpentine continues to be scarce in the South, and it is stated that if the Peace Treaty were ratified and the longshoremen's strike were satisfactorily settled, turpentine would likely go higher. It is noted that shipments are very much deferred of late, and are very unreliable. It is believed to be the popular opinion that there is abundance of turpentine in the South ready for shipment. However, the large shipments of rosin that are coming owing to the excellent weather for shipping this commodity may account for this opinion.

Rosin, although showing slight signs of weakness at present, is liable to soar to high prices. Some of the best-informed give it as their opinion that rosin will reach the highest demands yet known, and claim it would be a sound investment to stock requirements for this commodity.

Linseed oil is still scarce although it is said to be coming in in fair quantities. An early advance would not be unexpected, and some have already raised their prices.

Paint is showing good sales, and merchants are buying with more confidence. White lead in oil is holding firm at the new prices quoted last week and is showing a very good demand.

### *Prepared Paint Firm; Remains Unchanged*

**Toronto.**

PREPARED PAINT.—The white lead has not materially affected paint as yet although it is holding firm. This has been one of the best years, the manufacturers state, that has been noted for some time. Merchants and consumers are begining to realize that the paint situation, compared with previous years, is a changed one, and are purchasing with more confidence. This, it is claimed, is better for all concerned, as it gives the manufacturer a chance to study his requirements and buy accordingly. It is stated that it also eliminates shortages in rush seasons, as most merchants will have the stock on their shelves,

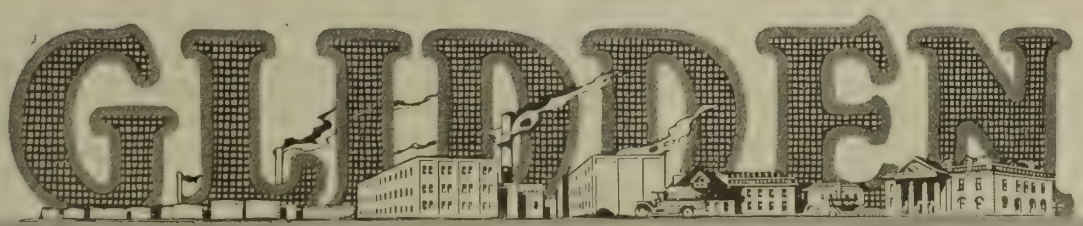
# Made by the Makers of Jap-a-lac

This statement is assurance of paint quality in the fullest possible measure.

It is assurance of a continuous demand and a frequent turn-over.

It is a guarantee of satisfactory profit.

It is assurance of prompt delivery and satisfactory service.



It means that the Jap-a-lac success will be repeated in another Glidden product with greater reputation and more profit for Glidden dealers.

The addition of Glidden Endurance Paint to the Glidden line represents a very real opportunity for paint and varnish dealers.

We will gladly state our proposition by letter or have our representative call when next in your vicinity.

THE GLIDDEN COMPANY, LIMITED, TORONTO, ONTARIO

*Branch Office and Warehouse at Montreal, Quebec*

PAINTS - VARNISHES - COLORS - INSECTICIDES

leaving only the sorting orders for the manufacturers to take care of.

## *Window Glass Prices May Change Soon*

Toronto.

WINDOW GLASS.—The American Window Glass Co. have withdrawn their prices on window glass. While this does not actually affect the Canadian market immediately, there seems little doubt that a change will take place in the very near future. The demand all over is greater than the supply. The European glass manufacturers cannot be looked upon to relieve the situation, and thus it throws the larger bulk of the demand on a smaller number of manufacturers who were already working almost to capacity. Putty shows no change, and prices are as follows:

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels | $5 35 | $5 60 | $5 95 |
| Do., 100 lb. iron | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels | 7 10 | 7 35 | 7 70 |

## *Linseed Oil Firmer; May Advance*

Toronto.

LINSEED OIL.—Spot delivery oil is very unsettled and an immediate advance would be in order according to present conditions. Flaxseed has been coming in but not in sufficient quantities. Some have it that a large quantity of seed in the Western provinces is not under cover and will not be accessible probably till the spring. If the demand from Europe should prove a large one, it is believed it will also be a big factor. Containers for both linseed oil and turpentine are charged as follows: 5-gallon jacketed cans, $1 each; wood buckets, $1.25; 3-gal. jacketed cans, 80 cents; 2-gal., 70 cents; 1-gal., 40 cents. Also 1-gal. plain cans and stone jars, 40 cents. These containers are charged extra, but are returnable if in good order, and express or freight is prepaid. The following is the present quotation for linseed oil:

| Linseed Oil - | Raw | |
|---|---|---|
| 1 to 2 barrels, gal. | 2 57 | 2 60 |
| 3 to 5 barrels, gal. | 2 56 | .... |
| 10 barrels and over | 2 54 | .... |
| | Boiled | |
| 1 to 2 barrels, gal. | 2 60 | 2 63 |
| 3 to 5 barrels, gal. | 2 59 | .... |
| 10 barrels and over | 2 57 | .... |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

## *Turpentine Firm; Still Scarce*

Toronto.

TURPENTINE.—Turpentine shows no change in price this week, and practically the same conditions apply as last week's market. The Southern holders claim shortages, and it is stated that the market is in a very unsettled condition. The ratification of the Peace Treaty has caused considerable uneasiness, many deals depending on the signing. The longshoremen's strike also appears to be a factor as shipments are materially held up. Some jobbers state that they have been able to foresee this for some time and have stocked accordingly, and state that they do not expect any acute shortage on the local market and that their stocks are ample to supply the demand coming through their regular channels. Prices are quoted as follows:

| | Per Imp. gal. |
|---|---|
| 1 barrel lots | 2 45 |
| 2 to 4 barrel lots | 2 44 |
| 5 gal. lots | 2 55 |

## *White Lead in Oil; New Price Holds*

Toronto.

WHITE LEAD IN OIL shows a good demand and is holding firm at the new advance quoted in these columns last week, of $1.00 per 100 pounds.

## *Rosin Prices May Soar It Is Predicted*

Toronto.

ROSIN. — The weaker tendencies shown are no indication, it is said, of the actual tendencies of rosin. Some jobbers who are in close touch with actual conditions, give it as their opinion that rosin will soar to higher prices than have been known for some time, and state that present stocking of this commodity would be a sound investment.

# Must Stand Trial on Charge Laid Under Ontario Bulk Sales Act

A CASE of interest to retailers in general was heard in a Toronto Court this week, when a butcher named Putnam sold his business to a man named Wingfield. In the presence of Wingfield's solicitor Putnam stated, it was alleged, that he had only one creditor—the amount owing him being about $600, and forthwith this amount was paid. The business was then disposed of to Wingfield for about $1,100. It subsequently developed that Putnam's liabilities, over and above the $600, were nearly $1,000, and the creditors began to make claims upon the new purchaser of the business. Putnam, it was alleged, made false statements, and had preferred one creditor to the disadvantage of others.

The case was heard in the Assize Court on Wednesday, November 26. Putnam was found guilty and sentence was reserved for one week.

The case was brought up by the Canadian Credit Men's Association, which has a fund set aside for the prosecution of just such cases.

### Protecting Purchasers

For the information of the trade, and for the information of a number of returned men who are purchasing small businesses, it is wise to call attention to the Ontario Bulk Sales Act, under the provisions of which a prospective purchaser is amply protected.

This Act states that the purchaser, before paying any money or giving notes or securities on account of purchase price (excepting a sum not exceeding $50.00, which may be paid to bind the deal), must obtain from the vendor a written statement, verified by affidavit, giving the names and addresses of all creditors of the vendor, and the amounts in question. Unless this is done the sale is void and the stock liable to seizure under execution by the creditors, unless they are paid in full out of the proceeds of the sale.

### May Obtain Waiver

Upon obtaining such statement, a waiver of the provisions of the Act from creditors, representing 60 per cent. in number and value of claims of $50.00 and over, as shown by the statement, may be obtained and delivered to the purchaser. If this is done, the purchaser is safe to complete the sale, and is free from responsibility to the creditors of vendor.

If the consent of the creditors is not asked, or cannot be obtained, then the purchaser, for his own protection, must deposit purchase money, notes or securities with the trustee, for the purpose of distribution on a pro rata basis amongst the creditors.

### Must Comply With Act

It is unnecessary to comply with the provisions of the Act, providing creditors are paid in full, and, in many instances, the intending purchaser may be satisfied to complete the purchase without referring to creditors or depositing the funds with a trustee. There can be no objection to this, providing the purchaser is willing to assume the responsibility of the vendor settling his liabilities out of the proceeds of the sale, but if he does not do so, the purchaser is liable.

### NEW DIRECTORS APPOINTED

At a meeting of the directors of the Pressed Metals Company, Limited, the following were added to the board: Benjamin Lowenstein, president Nassau Smelting & Refining Company, New York; Morris Moskin, of Moskin Bros., New York; Edward Hay, late general manager Imperial Bank; W. R. Johnston, of Toronto; Eugene Coste, E.M., of Calgary.

The board previously consisted of C. E. Calvert, president; J. W. Leighton, vice-president; Simon Goldsmith, of New York; H. L. Nussbaum, of Toronto; J. R. L. Starr, K.C., Toronto; who remain, together with the men appointed.

Fire, which started from a spark from a locomotive, caused a loss of $25,000 in the sash and door factory of Wm. Gerry & Sons, at London, Ont.

# Brushes Built for Real Service

## Why Not Sell Brushes that Give Real Service?

TRADE SIMMS SET IN RUBBER MARK

**PAINT BRUSHES**

can be used in alcohol, varnish, parafine, crude oil, grease, kalsomine, glue, paste, paint remover—**anything**—and yet retain their usefulness.

**There is nothing known that will cause the bristles to come out.**

The composition used in Simms brushes will stand any kind of usage or misusage—and not a bristle will loosen.

For years your painter customers have been looking for just such a brush.

Stock up and secure their trade and goodwill.

***Our other products are also of the same high quality***

# System In Selling Paint Oils

No System—Lots of Waste and a Very Dangerous Fire Trap.

Haphazard methods in selling paint oils are dangerous and usually a losing proposition for the dealer.

There is one thing absolutely necessary to systematic and profitable handling of paint oils. That is modern storage equipment.

The Bowser Way—Pumps are on floor above. Systematic, Clean, Safe, and Saving.

## Bowser Paint Oil Storage Systems

are to the paint business what bookkeeping machines are to accounting—an economic necessity. They store the oils without loss from leakage or evaporation; give accurate measure, keep the oil room clean, make the labor of handling a small item.

If you are not using Bowser Storage Systems you are missing an opportunity to profit in your paint oil business.

---

**J. E. Banville**

Highest salesman for October, the first man of our 65 salesmen. He has a territory in Quebec and washers make up 95% of his sales. Mr. Calvert of Winnipeg is a close second.

# Beatty Bros. Limited Bulletin

## Washer Sales Double

Our Washer sales for October almost doubled washer sales of last year —and last October was a mighty big month.
The best record was made by our Winnipeg branch which shipped out more than 8 times as many washers as they did a year ago.

## The Red Star and the Time Saver Popular

The Red Star (operated by hand) and the Time Saver Electric are the two most popular washers in Canada. These are the washers that seem to appeal to the people. They are the best sellers in Canada to-day.

## Cut Showing Washer in Operation

Drip Pan Big Advantage.

This is one of the foremost advantages of the Time Saver. The tub is still, not revolving or oscillating, and there are no heavy gears or racks or other awkward mechanism on it. It is, therefore, possible to use the drip pan to receive the clothes when put through the wringer out of the bluing water. It is not necessary to catch each separate piece by hand and lift it into the basket. The clothes run right over into the basket, saving the operator much awkward work.

This one feature has sold Time Saver Electric Washers against the competition of other machines. It is only one of the many advantages.

# They See The Can—
# Recall The Brand—
## *And You Record a Sale*

Stephens REGISTERED TRADE MARK has already impressed many minds favorably. An average display is all that's necessary to start a train of thought in the customer's mind that leads from your store to an unpainted home. Your cash register becomes the closing link in the series of events suggested by your display of Stephens' Paints. This doesn't happen once—it happens many times. Are you making the most of such opportunities? Have you the right brand of paint? If not, your paint turnover is not all it might be.

*Suppose you write us about an agency. There's money in it.*

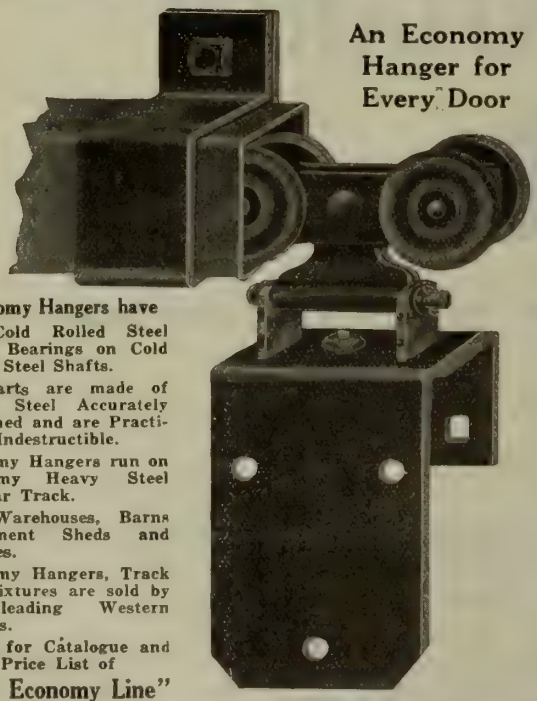
# Clothes Washing

Practically every woman in every home, once a week, has to face the wash-day problem. And if you have something to offer her that will really free her from the dreariest and weariest of household tasks, it is bound to appeal.

**The Eden**

fills every requirement of wash-day labor-saving. It saves work, clothes and money and is the one machine that once sold, stays sold.

Simplicity of operation is an Eden characteristic. It has been designed from the woman's point of view and with this in mind it has been so constructed that all moving parts are enclosed and nothing to confuse or annoy the woman in her work.



**The Eden IS THE MACHINE FOR THE LIVE DEALER**

## EUREKA Tough and strong as Gauge Glass can be made

There is only one best and that is the "Eureka" manufactured by Joseph Tomey & Sons, Birmingham, used with utmost satisfaction by railways and larger plants throughout Canada and United States. We are Canadian representatives and carry a stock in Winnipeg for sorting orders and shorts. Let us quote you either F.O.B. Winnipeg or Liverpool.

The great shortage of Gauge Glasses makes it to your advantage to place import orders as early as possible.

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

*The Trade Mark Behind Canada's*
*Largest Wholesale Hardware House*

## Buckeye Incubator and Fittings

Proof that their success and great sales are founded on merit is shown by their continued use at Canadian institutions like MacDonald College, Ontario Agricultural College and by many Canadian poultry farms.

Like all the lines handled by Ashdown's, they're good sellers. For half a century Ashdown's has had the confidence of manufacturers of the best lines.

Let us put a Buckeye in your store to demonstrate and boost your trade.

On all incubators and brooders shipped this Fall we will give a dating of net 30 days, February 1st, 1920.

**Sold under a broad guarantee.**

# Lowe Brothers Paints

Lowe Brothers Limited

# Worth While Service to You

Lowe Brothers' Service means something worth while to you—it is not just a nominal "service"—the kind you hear much about, but see very little of that's tangible.

This efficient Service is a permanent and perpetual business builder—we bring local business to your store.

"Save the surface and you save all" *Paint & Varnish*

Lowe Brothers' High Standard Liquid Paints prove their supremacy in use. They meet every paint test there is with added prestige.

We can prove our claims for Lowe Brothers' Paints, ask and—

*Let us Show You*

# "Brighten Up For Christmas"

can be made a reasonable slogan by the dealer. Thousands of households would be delighted to know that the old light-colored furniture or woodwork, of which they are so tired, *could be changed to beautiful Mahogany, Walnut, or Dark Oak* shades with little effort and without destroying or removing the excellent varnish finish which may be now on the wood.

## WINDSOR SOLVENT STAINS

### 9 LOVELY SHADES—DO ALL THIS

Don't miss a splendid opportunity. These stains make a sensation, and when sold to one customer you will soon find his friends and neighbors inquiring. *Get the line working for you without a day's delay.* Write us about it, or better still, *wire for sample shipment.*

# You can't have a Speedometer on your arm

Even if you could, it would not make you turn at a certain speed every time you used a separator. Own a separator that you do not have to coddle by turning at a fixed speed or by using speedometers and other contraptions. Do the sensible, practical thing and buy a Sharples.

American ingenuity has perfected a principle in the Sharples that enables you to turn the handle fast, slow or "as you like it." You can loaf along, or speed it up—and you do not lose a cent's worth of butterfat nor change the thickness of your cream. From a straight, money-making standpoint alone, the Sharples is the only separator you can **afford** to buy.

## AFTER READING THIS SHARPLES AD--- PUT YOURSELF IN THE FARMERS' PLACE

Would you buy a separator that was as contrary as a fixed feed separator—that had to be coddled? Or would you do what thrifty farmers **have done**—invest in the Sharples Suction-Feed that "Skims Clean At Any Speed?" Why not apply the same logic to the line of Separators you handle—and follow the line of least resistance—with the Sharples. Not all dealers can qualify for a Sharples Contract, but correspondence is invited from progressive dealers. Address nearest office.

*There are no Substitutes for Dairy Foods*

# CARTER'S

**A Display of Carter's Genuine Red Lead will prove two things—**

Its Saleability and its Profit Making Qualities.
Painters find Carters' Genuine Dry Red Lead a pure, uniform and economical paint and preservative for metal-work, steam pipes, etc.
Made from the highest grade of Canadian Pig Lead, highly oxidized and ground very fine. Used with pure Linseed Oil it is very easily applied and has unusual Covering Capacity.
Every sale means a satisfied customer, a good profit and a sure "repeat."
We also make Carters' Genuine Dry White Lead, Carters' Genuine Orange Lead and Carters' Litharge.

**May we send you prices and particulars?**

# HOMESTEAD Liquid Red

## *For Barn and Silo*

¶ This is a beautiful, rich, red paint that flows easily, covers well and dries with a smooth, even appearance. Two coats over the oldest and most weather-beaten wood, will produce a beautiful finish. Don't let another season go by without having a stock of HOMESTEAD LIQUID RED on hand.

¶ We are creating the demand for you—right in your own community. Our consumer-advertising is educating the farmer to the fact that Homestead Liquid Red is a real protection for his barns and silos.

¶ Get your share of this profitable paint demand by placing your order with us at once.

Save the surface and you save all" *Paint & Varnish*

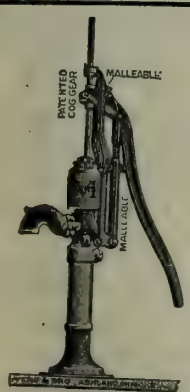
# FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.



# CROWBARS

**No. 102-A—CHISEL POINT**

We offer you bars of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Write for price list and catalogue.

**B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.**

# MYERS
**"HONOR-BILT"**
**Hand and Power PUMPS**

We have built something more than ordinary goodness into every Myers "Honor-Bilt" Hand or Power Pump. We have endowed them all with sound pump knowledge put to practical use through many individual features which make their installation easier, reduce pumping labor and insure dependable service.
The aggressive dealer handles the MYERS — Ask your jobber or write us.

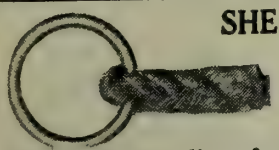
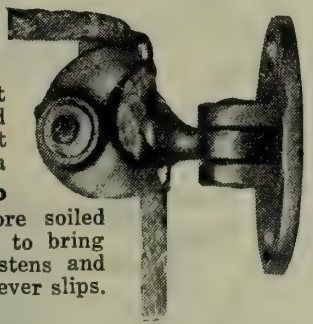
The Season's Rush Proves the Necessity of Gipe-Hazard Service in Your Store



Time and labor saved is money earned. Absence of salesmen from their posts when customers are waiting diverts many of the latter to other stores where service is better.



With Gipe-Hazard service you will have the satisfaction of knowing that you have the best, and it will enable your staff to remain at their posts instead of running for change. Watch your out-of-date system during the busy season, and you will be convinced.

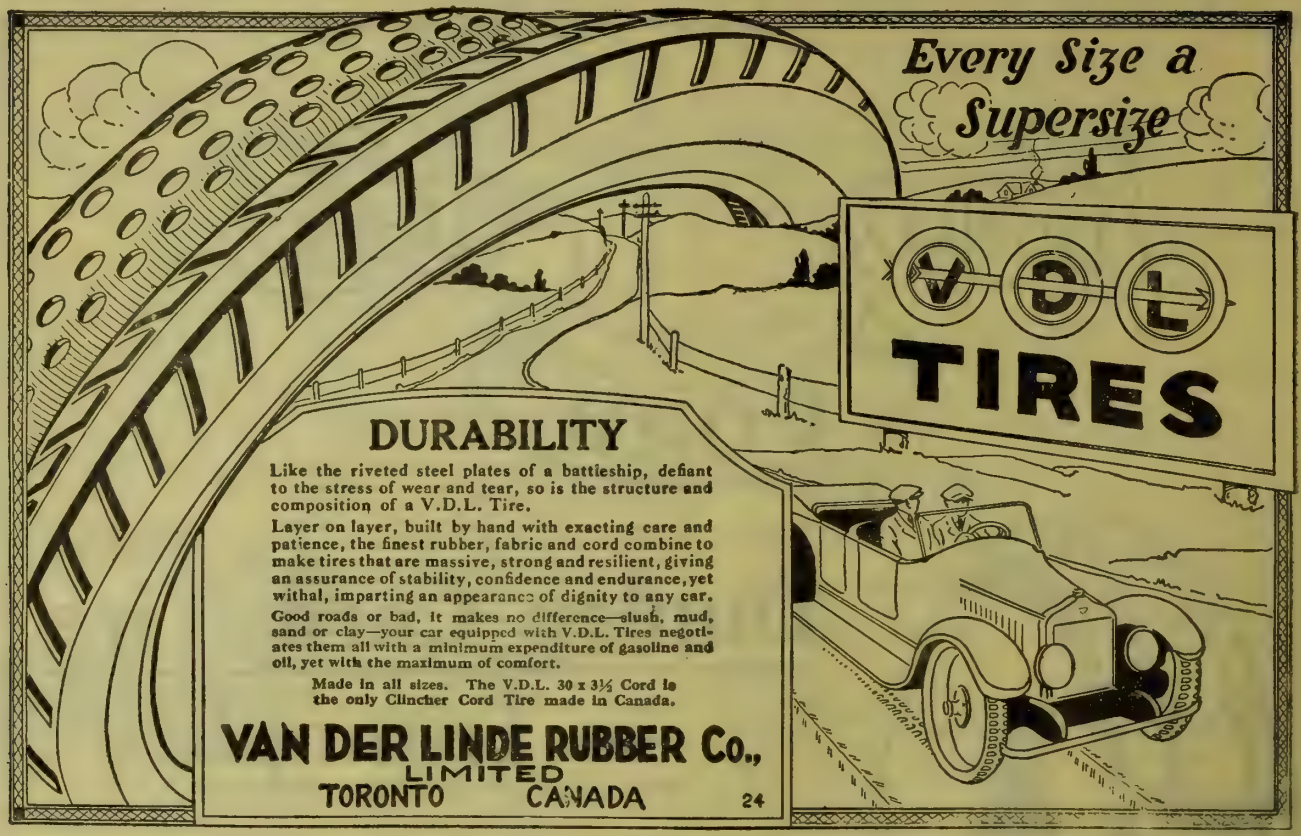
DUNLOP TIRES
SEAL OF QUALITY
CORD

# Dunlop Cord Tire —a Triumph

The tremendous popularity of Dunlop Cord Tires to-day is because of the actual lower tire cost per mile when the car is equipped with them; the greater freedom from road shocks, the smaller gas consumption, our fair and square price list and many other features, both money-saving and nerve-saving.

Test Dunlop Service at any Dunlop Depot.

Dunlop Cord Tires, either tread—"Traction," "Ribbed."



Dunlop Fabric Tires obtainable in "Traction," "Special," "Ribbed," "Clipper" and "Plain."

All sizes—30 x 3½ to 37 x 5.

**Dunlop Tire & Rubber Goods Co.**
**Limited**

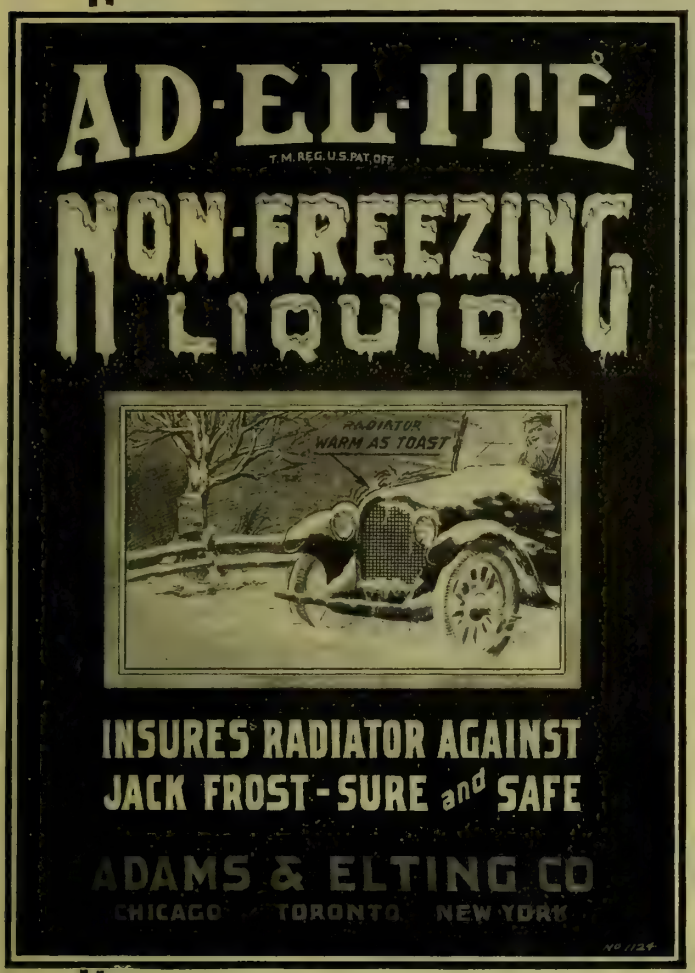
**Head Office and Factories: Toronto**

**Branches in the Leading Cities**

# TIRES THAT MAINTAIN THEIR PRESTIGE

It is only human to feel pleased after having done something good, and, when you sell a V.D.L. Tire you have just cause to rub your hands together and smile with satisfaction. You have conferred a benefit on your customer by selling him a mighty fine product; one that will give him a deal of satisfaction.

V.D.L. Tires, by living up to the claims made for them enable you to build up a dependable tire business.



Besides there is a liberal margin of profit in V.D.L. Tires and Tubes. Write to any of the following Distributors, they are all keen on V.D.L. products, and any one of them will co-operate heartily with you in boosting sales.

# A PRIME SAVES TIME, WORRY, BATTERIES, STARTER and GASOLINE

# Champion

# Priming Plugs

**Champion Priming Plug Price $1.50**

guarantee this time-saving because they put the gasoline into the heart of each cylinder at the sparking point and start the motor humming on the first turn-over.

They are the Plugs needed by every man who insists on getting the most comfort and service out of his motor in cold weather.

From now till next April you can drive your car or truck in the coldest weather, stop your engine when you stop your car and be certain of a quick start if each cylinder is equipped with a Champion Priming Plug.

If you sell automobile accessories your stock should include Champion Priming Plugs.

They enable you to give a service that keeps customers coming to you for all their requirements.

Look over your stock and order from your jobber at once.

Roller Bearing in Place

*Quick Turnover*
*Good Profit*
*Forceful-*
*Advertising*

Thrust Bearing in Place

### Chapman Roller Bearings

A Ford or Chevrolet car is subject to rapid wear in the cup and cone bearings of the front wheel, because the hub is too small to take a cone bearing with a sufficient factor of safety. Chapman Roller Bearings overcome this difficulty and are easily installed.

Every Ford and Chevrolet is a prospect.

### Chapman Differential Thrust Bearing

readily substituted for the plain, flat washer in the differential of Ford or Chevrolet. The flat washer wears out due to heavy end thrust. When worn there is lost motion in the gears and incorrect contact of teeth, causing extreme wear and noise.

The Chapman Differential Thrust Bearing exactly replaces the washer with no other changes required.

It takes the pressure on steel balls, reducing friction to a minimum and holds the gears in perfect mesh.

Differential Thrust Bearing

**Get our dealer proposition by a post card to-day.**

VERY little verbal argument is necessary to effect a sale in the case of

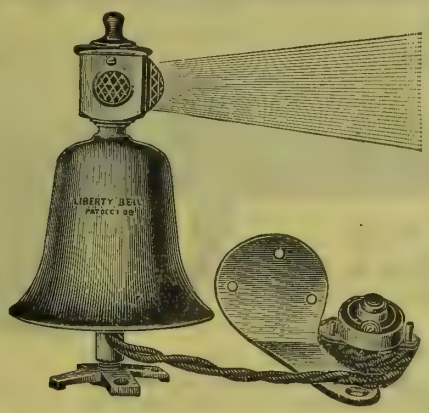
## "SPHINX"

**England's Most Durable Plug**

interest is at once created in the attractive green metal box with the ingenious sealing band permitting the lid to be opened and the identification card to be perused. The sterling merits of the plug enclosed are vouched for by the Guarantee, unequivocal and without time limit, printed plainly on the box.

It is easy to sell Sphinx Plugs—and profitable. I shall be pleased to quote and to send you literature on request.

Sole Agent for Dominion: Wm. T. Evans, 1684 St. Urbain St., Montreal



Manufacturers: Sphinx Mfg. Co. Birmingham, England

# 'SPHINX'

## England's most Durable Plug

**The Signal of Distinction**

An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

## WARNS BUT DOES NOT OFFEND

This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

# "LIBERTY BELL"

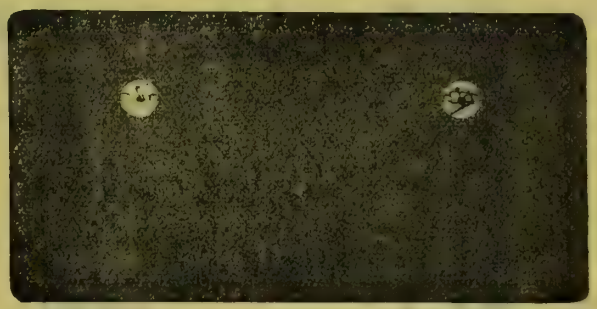
## DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

### GETS THE RIGHT OF WAY

This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.

### A POLITE SIGNAL



***We have an attractive proposition for you. Write for prices.***

# THE "MAYALL" MOTOR HEATER

***—Keeps the engine warm, ready for the morning start***

**Retail Price:**
**Ford Car Size, $10.00**
**Other Sizes, $12.00 to $12.50**

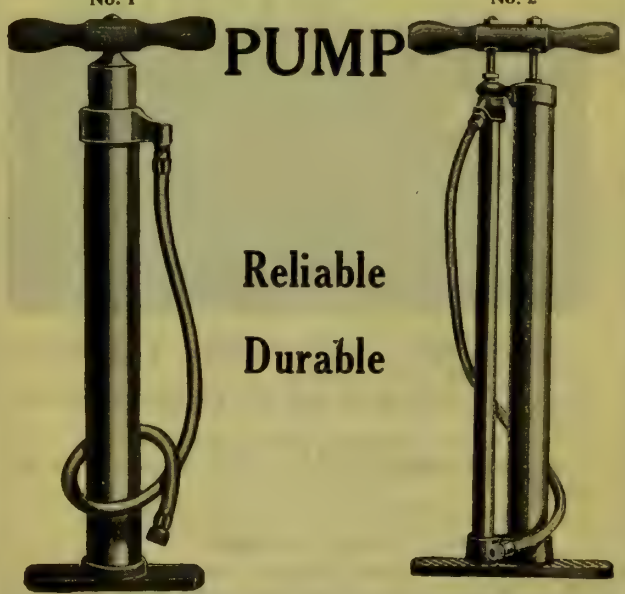
***Note---The "Mayall Motor Heater" is protected by many patents granted or pending, and any departure from our standard sales policy will be treated as an infringement.***

A "MAYALL MOTOR HEATER" installed in the circulation system of a car will keep the engine warm and ready for instantaneous service in any garage in any weather. Quickly attached to electric light socket.

It is the only logical heating system and merits your early investigation. Many thousands of these heaters are now in use throughout the world and every owner is an enthusiastic booster.

The "MAYALL" Motor Heater can be installed in any standard make of car in ten minutes.

Sold under our positive guarantee. Dealers everywhere are boosting for this heater.



Ask your jobber for the "MAYALL." If he can't supply you, send us his name.

with the

"STADCO No. 40"

STADCO TRADE MARK

## Breakproof Hydrometer

During the cold months—when batteries need more frequent attention and motorists look for a hydrometer—the STADCO Breakproof Hydrometer will quickly prove that it's a big winter seller.

It is made of glass, with rubber bulb and tip, like any other hydrometer—but it has a special rubber protector that prevents breakage from ordinary use.

## STADCO WINTER SELLERS

**SEE-SAFE Wind-Shield Wiper, 75c**
**Breakproof Hydrometer, $1.00**
**No. 21 Quadruple Spark Plug Wrench, 15c**
**No. 10 Pet Cock Wrench, 20c**
**Door Anti-Rattler, 20c**
**Chain-Type Valve Lifter, $1.00**

The STADCO Line includes only QUALITY PRODUCTS that are Winter Necessities—therefore every one is a big winter seller. Well made of the best materials—and popular-priced—they are always in big demand.

**Order from Your Jobber**

Make the "dull" months your most profitable months. Ask your jobber for full information about the STADCO line—place your order with him now—or write us for full particulars, dealers' discounts, etc.

# IS THIS THE SOLUTION?

Another scheme to rectify the distressing prices now prevalent, by other than sound economic measures, was outlined before the Union of Canadian Municipalities which recently convened at Kingston.

## THIS RESOLUTION HITS YOU WHERE YOU LIVE

"We submit the principal root of the evil is the present wasteful, inefficient and antiquated method, or rather lack of method, of distributing the goods from the producer and manufacturer to the consumer—wasteful of time, labor, health, happiness and even human life—inefficient and antiquated in this age and to such an extent that even the huge economies effected by the greatest array of labor-saving machinery the world has ever seen are in a large measure rendered null and void. An ever-increasing army of unregulated distributors and relatively an ever-decreasing army of producers with the leaders of all these practising profiteering and price-manipulation as their fancy may dictate or opportunity may permit.

"Among the minor causes are the various classes of idlers and usurers, who in devious ways levy toll on labor and industry. Waste of time in high schools and colleges teaching dead languages and other unpractical subjects to the partial or total exclusion of vocational training, economics and useful branches of learning which would be of greater value for purposes of mind development and discipline and thereafter more useful to the individual and the country."

## SAYS THE FINANCIAL POST IN REPLY:

"It is, of course, possible that there might be a dissenting voice, heard above this chorus of condemnation. A voice that might suggest, for instance, that the fact that the producer is getting $24.50 per hundred for hogs, where he formerly got $6, might, perhaps, have as much to do with the matter of increased cost as the inefficient handling that gives to the packer 5-16 of a cent per pound on bacon, or to the retailer a bare 5 cents a pound. Or the fact that the farmer is now guaranteed a price of $2.15 a bushel for wheat that formerly he sold with satisfaction for 70 cents, may be as much responsible as the half cent a loaf profit of the baker, or the cent profit of the retailer.

"It is a question, too, whether all the blame for the trying conditions of the present time should be laid at the door of established trade, any more than at any other door. There seems no good evidence for believing that the business morals of the merchant class are worse than any other, and there might be those who might reply to the stricture that our schools and colleges are not devoting their attention strongly enough to the bread and butter needs that "man does not live by bread alone."

The frank object of this resolution was "to attain a substantial reduction in the cost of living generally, but without increase of hours of labor or reduction of wages." It is the possibility of this which THE FINANCIAL POST doubts.

You want to read such discussions as this. They appear weekly in THE FINANCIAL POST.

A·G·M·CO VIKO ALUMINUM

Fortune favored the ships of the Vikings of old.

Today there is fortune in the handling of Viko. This famous aluminum ware is bringing big profits to progressive dealers everywhere.

ASK YOUR JOBBER

Triplicate Sauce Pan—One of the many Viko utensils

# VIKO

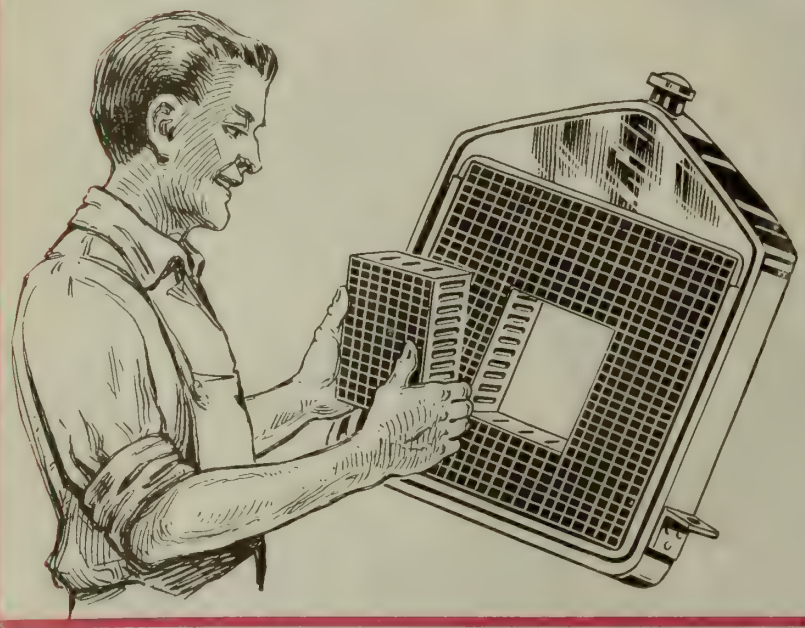
## The Popular ALUMINUM

# McKINNON RADIATORS

## *Really Cellular*

The very simplicity of the McKinnon Radiator is what appeals to the car owner. He knows that injuries to his radiator can be easily and quickly repaired. He knows that if an accident happens and his radiator is punctured he can still proceed on his way. He merely plugs up the leaking cells with wooden plugs, chewing gum, tire dough or any adhesive substance, and drives on to *your* repair shop.

You quickly cut out the damaged cells, fit in a new cell or two, and solder the outside edges, front and back. You can make these repairs without much delay.



*Simplicity of temporary repair and rapidity of permanent repair* are good selling points for McKinnon Radiators.

McKinnon Radiators are carefully tinned inside and out to prevent corrosion.

The sides are straight downward and corrugated, thus agitating the water and increasing the cooling power of the radiator.

Every dealer and garage man should carry our "really cellular" radiators.

The most serviceable radiator made.

# A Store is Judged Largely by its Delivery

"WHEN can you send it?" "Can I get it to-day?"—these are the questions you hear day in and day out from your customers.

"It will be there before noon—before 5 o'clock." "It will be there before you get home." These are the answers that please your customers and bring them back to trade at your store.

When you buy a Ford One-Ton Truck you will surprise your customers by prompt delivery. It will take the place of three horses and three men, and for the occasional long trip to the next town, to the outlying country, for delivering and bringing in supplies—it will prove invaluable.

138

Ford One-Ton Truck (Chassis only) $750 f. o. b. Ford, Ont.

# UNIVERSAL ALUMINUM WARE

FOR over fifty years "Universal" devices have led a consistent crusade against the crudities that encumber the home kitchen and turn it into a warehouse. Countless thousands of housekeepers have bought "Universal" kitchen utensils—to their satisfaction. They are the women to whom you can now sell the new Universal Aluminum Ware—the better kind for **cleaner cooking** and **easier cleaning.** "Universal" is built stronger to last longer than the usual run of aluminum ware. Proof is yours for the asking. Ask to-day.

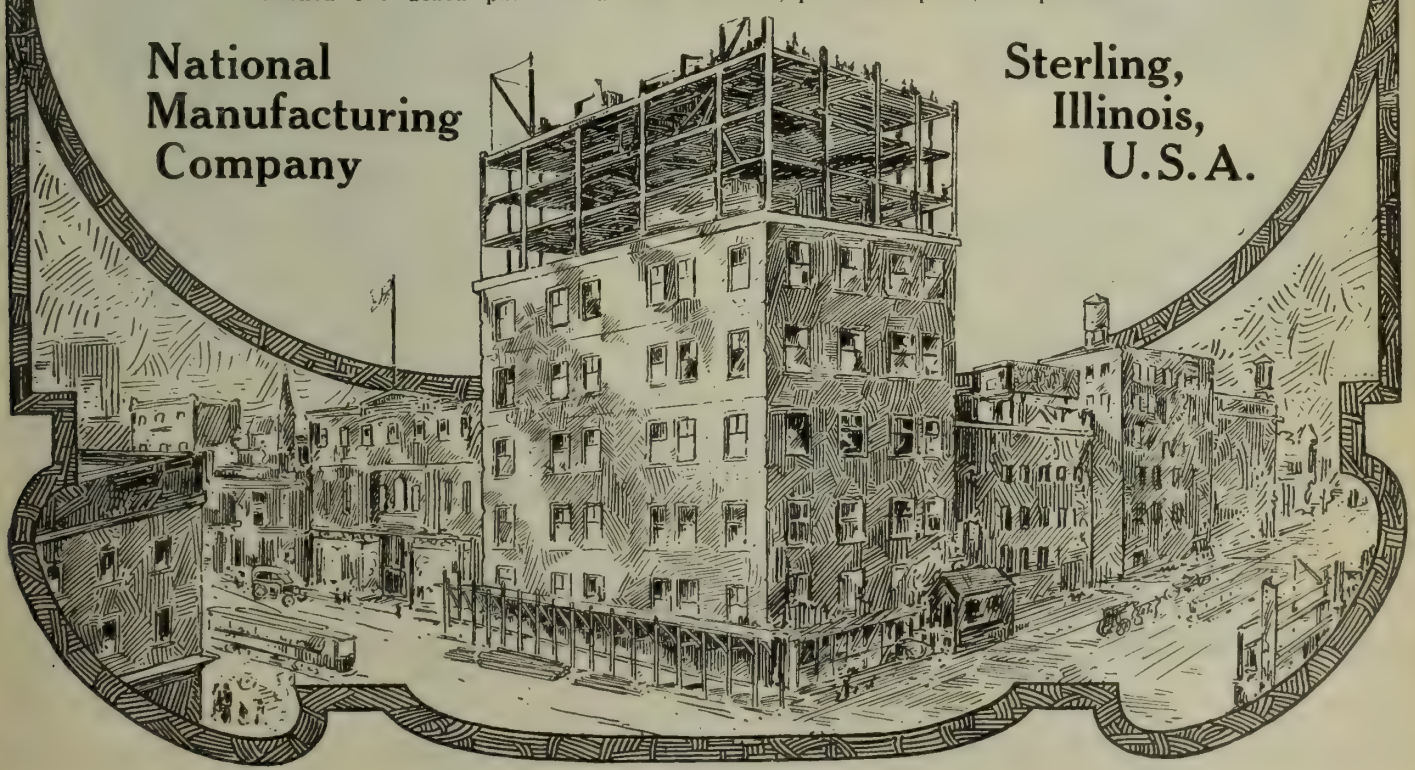
# "88"

# Storm Proof

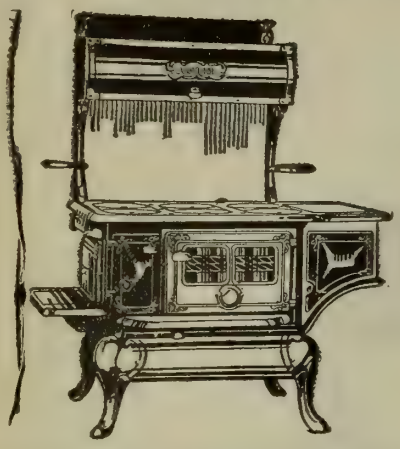
This illustration shows the model of the "88" Storm Proof. The articles shown are all full size—taken from stock. We also furnish a similar model demonstrating the No. 66 or No. 77 Hangers.

These models are a great selling help. You should have one.



The 88 Hanger carries the door closer to the retail than others. It has adjustments both laterally and vertically. Examine the model shown.

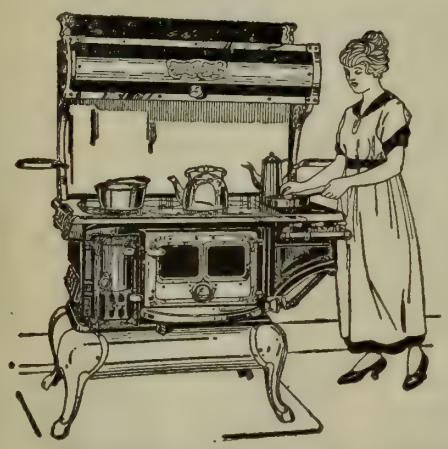
The Hangers are packed one pair in a box, with bolts for attaching the Hangers to the door; also lag-screws and end-caps for the rail. Each box contains, also, a set of illustrated directions for attaching the Hangers and rail.



**Packed one dozen pairs in a case. Weight, per dozen pairs, 113 pounds.**

**National Manufacturing Company**

**Sterling, Illinois, U.S.A.**



# PROFIT PRODUCERS

**SOUVENIR CAST IRON RANGE WITH RESERVOIR**

One of the best selling ranges. Well made and highly finished. Guaranteed to cook and bake perfectly. Fitted with large and roomy cast-iron fire box with corrugated linings which add life to the fire box and heating surface to oven. Exceptionally well made in every particular.

**SOUVENIR COMBINATION COAL AND GAS RANGE**

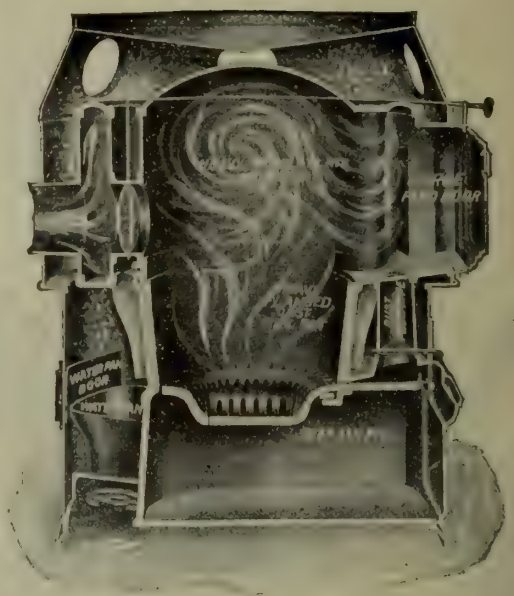
An ideal range which eliminates all worries about fuel supplies. This range bakes and cooks perfectly with coal, coke, wood or gas. Coal or gas can be used separately or both at the same time. Can be changed from coal to gas without the use of tools, in one minute. Every range guaranteed. Six holes for coal, three for gas.

SOUVENIR Ranges and New Idea Furnaces create sales which reward the dealer liberally.

The chief reason for selling Souvenir Ranges and New Idea Furnaces is—you make money by it.

The second reason is—you are giving your customers a stove or furnace which will more than satisfy them; one which will compel their admiration and praise. Every time your customers boost you receive the benefit—so the first thing to do is sell a few Souvenir Ranges and New Idea Furnaces to the people in your locality and a steady, ever-increasing trade in this line will soon be built up.

Don't be satisfied with good enough—get more. Here is your chance. Sell Souvenir Ranges and New Idea Furnaces.



**THE SOUVENIR CAST IRON RANGE**

A range which gives absolute satisfaction and can be depended on to bake and cook perfectly. Every range is guaranteed. Made in a new plan pattern, this range is easy to keep clean and bright. Glass oven doors, oven thermometer, white porcelain enamel back and wide warming closet

**THE NEW IDEA WARM AIR FURNACE**

The proper, satisfactory way of heating homes, business houses, etc., is with this New Idea Furnace. The New Idea combines all the latest and best known features for supplying moist hot air, where you want it, when you want it and in any quantity you want. The New Idea is a perfect piece of workmanship.

The fire pot is in one piece, very heavy and guaranteed for five years. The New Idea is fully guaranteed and is the premier furnace for giving real service.

# "CLINTON'S DITCH" THEY CALLED IT

THE crazy notion of a visionary man. But De Witt Clinton had faith—faith that the Erie Canal would open up to America and the world the untold riches of the middle west, and on October 26, 1828, the first boat arrived at Albany.

Beside the little stream at Plymouth the wheels hummed in the rope walk (then four years old) as the fiber was spun into yarn and the yarns twisted into tow lines for use on the canal, and hawsers and rigging for the merchant marine which was to help open to the world the great riches of America.

Plymouth was good rope then, it is good rope now. It is the rope you can trust.

# When Quality, Moderate Price and Satisfaction Go Hand-in-Hand

The selling of household necessities such as Ranges, Furnaces, Heaters and Cooking Utensils, gives the retail business man an exceptional opportunity to use his foresight and judgment. These articles, in daily use, call for ready sale when properly handled and marketed. To convince your clientele make them feel that for money expended they have received more than equal value. Do so, by accepting the verdict of more than three generations of Canadian consumers and handle

## McClary's PRODUCTS

### Makers of Good Stoves and Cooking Utensils For Seventy-Three Years

Two of our leaders—the famous "Sunshine" Furnace and "Pandora" Range. Always acceptable to the discriminating buyer because they have never lost their unique standard of quality. Both have lived through a long period of exceptional tests until to-day they are in universal use.

One point of "Sunshine" superiority—the Dome and Radiator is made of "Armco" rust resisting iron—a pure iron of remarkable durability that successfully overcomes the injurious effects of coal gases.

The nickeled oven of the "Pandora"—keeps the oven clean, fresh and sanitary. The buyer, who understands the value of good baking results will accept the Pandora Oven as the irreproachable standard.

Those who have helped to market these two dominating products have done so, because they have been consistent sellers—accept the opportunity to add to your profits for the coming year of 1920. Our nearest branch will appreciate sending you the complete information.

# Include a "1900" Washer In Your Christmas Display

Let your Christmas window contain useful gifts, displayed in such an attractive manner that the man shopper cannot fail to step inside and become your customer. We suggest as the "centre-piece" for such a window a "1900" Cataract Electric Washer. Many a man passing that window will think of his wife's problem over "getting the washing done"—and will decide that the "1900" Cataract Washer is worthy of investigation.

And with this washer—"to investigate" is "to buy."

You can convince him—easily—that this "Cataract" is a real, all-the-year-'round solution to one of the greatest problems in his home—that our exclusive "figure eight" motion washes clothes in a manner that beats the old "tub-and-rub" way; and that—unlike many machines—it cannot tear or injure the clothes.

If you are interested in profits, you should be interested in the "1900" proposition. The line includes all types of washers—hand power, water power and engine power—each the best of its type. Not only has the "1900" dealer the quality wherewith to make sales—but he has also the "well advertised" line. A continent-wide campaign is carrying the message of "1900" superiority into every home in the land.

Do not delay—get busy to-day—and write us for the information that will convince you of the profits you can make selling this make of machine.

## Files with a Reputation that promotes Sales

It is easy to sell Famous Five Files, because they are known to mechanic and employer as the standard tools in their line.

Made from high grade steel, accurately ground and cut, and scientifically hardened, they have stood the test of fifty years of leadership in market and workshop.

Over 60,000,000 Famous Five Files are sold each year. Share in the profits of this trade, on this enormous sale.

Specify Famous Five Files when ordering. They are:

E. Roy,
65½ St. Andre St., Montreal, Que.

A. S. Butchart,
26 Adelaide St. W., Toronto

C. C. Cartwright,
Union Trust Bldg., Winnipeg

**4 Good Reasons --READ 'EM!**

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

# Good Men

DO you need the services of a good retail salesman, traveller, or manager? The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

# More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered. The cost of repairs is dead loss of time and temper. The dealer suffers.

"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

Dealers, ask for prices and terms. Get real profits on your metal pump sales.

# Finds Electrical Goods Move Quickly

## Care in Purchasing is Essential if Trouble is to be Avoided, Says W. F. Moon—Hardware Merchant Gives Many Practical Pointers on How He Handles His Steadily Growing Trade

Based on an interview by J. H. COLE, of Hardware and Metal, with W. F. Moon, of Toronto

"I WOULD not advise any hardware man going into the electrical business too strongly at first, but, rather start with a small assortment and by careful management and good judgment, work into a larger stock which necessarily would have the demand, owing to the demand being the main factor which would cause the stock to grow." This is the plan followed with success by W. F. Moon, 2924 Dundas St. W., Toronto, who now controls three hardware stores, one being located at Bloor St., one at Mount Dennis and the one mentioned above.

Electrical goods, says Mr. Moon, are a profitable line and if handled right will grow very quickly into a healthy revenue getter. On the other hand though, there are a lot of conditions to contend with, especially if one goes in for contract and other outside work.

### Must Buy Carefully

"One department it pays to study is the purchasing," said Mr. Moon to HARDWARE AND METAL. "There are so many salesmen coming around continuously with specialty lines, and I must admit their propositions often look more genuine than they really are, not saying that all salesmen are dishonest, but one is liable to stock heavily a line that turns out to be a poor seller or probably one that the inspectors will not pass. Then when another salesman comes along with a really good article and probably an established good seller, in some other place, one may turn it down and thereby lose a good opportunity, and opportunity is really one of the main assets of a profitable business.

### Advertised Goods Move Faster

"My idea, and I think it is becoming the most general amongst hardware men, is to buy as far as possible only lines that are the most extensively advertised in reliable papers and trade journals. I find that sales are more easily made and customers are better satisfied if you can show them articles they know about. And if they happen to have seen the goods at a friend's or read about them, it's usually only a case of wrap them up and take the money. For instance, take electric irons. I always stock two makes, one of the best advertised and a cheaper line. I find it pays to set both irons out on the counter so the customer can handle them. Some minds cannot seem to register an article until the owner has handled or felt it; others judge by the sound, while it is only necessary for some to look at it in order to impress its different qualities on the mind. There are several advantages of setting a variety before the customers. In the case of the irons if I only showed the higher-priced one the customers would probably think, 'this store is very dear. I saw electric irons advertised elsewhere for less money,' and probably walk out of the store with the old remark. 'I just wanted to know the price,' or 'I'll be in again.' By showing the two together it can be seen at once that electric irons are not all alike and just 'electric irons.' This is what many think, and in most cases they will pick the highest-priced one to make sure of securing the best.

### Must Pass Inspection

"Another thing that comes to my

*Some splendid practical ideas in regard to arranging windows are given in the accompanying article. You may be able to adopt many of them for arranging your own displays. The illustration shows how attractive Mr. Moon keeps his windows.*

*Attractive store arrangement is a most important factor in keeping merchandise moving says W. F. Moon. Keep your stock out where people can see it, he says, and keep it looking its best, and sales will take care of themselves.*

mind," said Mr. Moon, "is that the most staple lines often do not show as big a margin of profit as we think they should, therefore, you are tempted to stock something a little different that's supposed to be as good. Notice our feelings when the inspector or commissioner will not accept in his final inspection (and practically all electrical work requires to be inspected) we then have to go to the expense of ripping it all out again and putting in the old reliable, with the result that the whole job is showing a loss as well as shaking the customer's confidence in the firm's reliability.

**Carry Good Profits**

"I find electrical lines one of the best revenue getters. There are so many electrical appliances that are almost a necessity in the modern home, such as portable heaters, toasters, irons, grills, broilers, table lamps, not to mention sockets, plugs, switches wire, in fact, the whole line just bristles with opportunities for the hardware man. I might again mention that it pays to handle the well-advertised lines; in fact it is just a matter of displaying properly, whereas a line that is not so well-known often takes considerable time to sell, and then probably the customer is not thoroughly satisfied and is more or less dubious till she has found out from experience. For this reason she gives it a more severe test than otherwise, and if it did not stand up or last as long as Mrs. Brown's, the merchant that sold the article and not the manufacturer gets the blame, and perhaps the customer deals elsewhere. For this reason I always deal with reliable wholesale houses, and go slow in stocking electrical goods, 'appliances' especially, till I find out for sure if they are reliable and suitable for my stock."

**System is Necessary**

Mr. Moon is a very busy man as he has the three stores under his personal supervision and necessarily requires a good system of handling his business. He keeps all contract and outside work entirely separate and charges a proportionate share to the general overhead expense, and is therefore enabled to keep down actual costs.

The Dundas St. store is splendidly laid out. The two windows in the front allow one electrical and one hardware display to run continuously. These displays are changed every week with few exceptions, and it is found that one line helps out the other, both in sales and displays, for instance, take the window displaying silverware, two electric table lamps are shown in the background. At night the other window lights are turned out and only these are burning. The effect is striking as the view of all else but the display mentioned is eliminated, leaving the concentrated effect of the glittering silver showing out distinctly and harmoniously against the black background. The illustration hardly does the window justice, as most of the color effects are missing, and it is said to be one of the most important features to get the right color combinations. One reason given for this is that there is so much motion of different colorings shown on a busy street, even automobiles, street cars, clothing, in fact anywhere and everywhere the eye glances some color moving or stationary unconsciously attracts the eye, and in order to be more conspicuous it is necessary to have some pleasing coloring effect in order to draw attention to the goods displayed.

**An Excellent Window**

The window just mentioned is a fine specimen. On the floor was placed boxes, pedestals, etc., in irregular positions. Over the top of these was laid a piece of rich black corded velvet. The irregular heights of the boxes beneath gives the appearance of a wavy effect and each article shown seems to be imbedded individually. The bright silver also shows out very distinctively against the black background. In order to relieve this there is a panel running all around the back and wall side of the window. This is about three feet wide and on it is pasted an attractive pattern of wall-paper with mottled colorings. The two lamps also have rich colored shades, and especially when lit, lend a tone and distinction to the window which is hard to surpass.

**Is Seasonable Also**

As will be noted this makes a very seasonable display, as it informs passersby who already are making up their Christmas lists that an article of silverware such as displayed is just the thing for a "married sister" or some girl or lady friend, or perhaps reminds "hubby" that his wife's collection would be almost complete if she had just such a piece as shown. He may not come in at once and purchase it, but would keep the store in mind.

The electrical window is also a good

Continued on page 60

# *To the Hardware Clerk—*

How do your employers' window displays look to you? Are they good—could you improve them? You no doubt can give your employer many good suggestions. Not only this, but you have every chance of winning a splendid cash prize in the Christmas Window Display Competition of HARDWARE AND METAL.

If your employer finds that you are efficient at this important work perhaps he will turn over the responsibility to you. Window trimming requires keen attention and good judgment. With a little time and thought you can soon become efficient in this most important work and make yourself more valuable to your employer. Start now to put your ideas into effect. Try out a window or two and note carefully the results and then prepare for the grand display that will bring the Christmas shoppers into the store and set the cash register jingling.

# HARDWARE AND METAL WINDOW DISPLAY COMPETITION

has started many hardware clerks on the road to successful window trimming. It can do the same for you. Read the following details now and enter one or more window display photographs in this competition:

**EIGHT CASH PRIZES**

**Are Offered as Follows:**

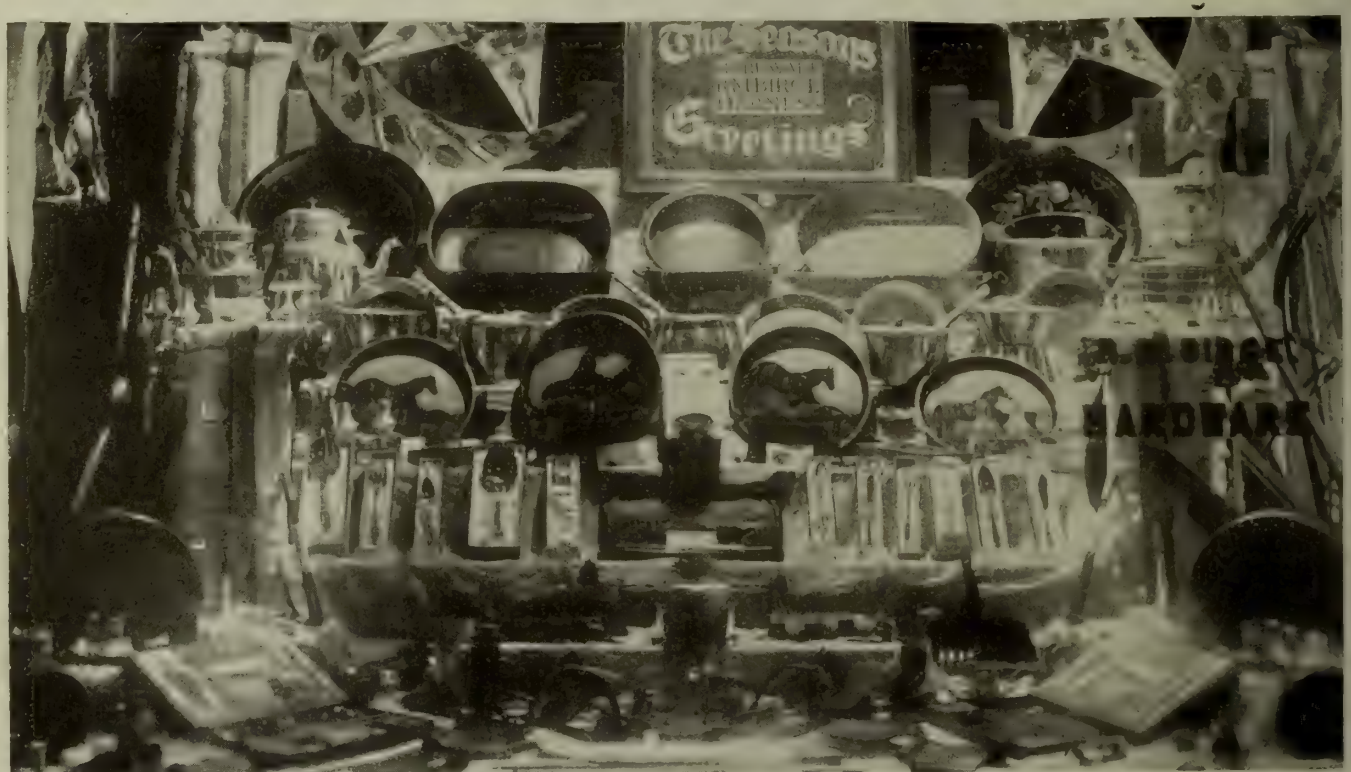
| (Places Under 5,000) | | (Places of 5,000 and Over) | |
|---|---|---|---|
| First Prize | $10.00 | First Prize | $10.00 |
| Second Prize | 5.00 | Second Prize | 5.00 |
| Third Prize | 3.00 | Third Prize | 3.00 |
| Fourth Prize | 2.00 | Fourth Prize | 2.00 |

This means an absolutely fair and equal chance for the hardware man in the small town or the big city. The field is wide open to the window-dresser with ideas.

The only condition in connection with this contest is that the windows must be dressed with merchandise for the Christmas trade. The winners will be those who in the opinion of the judges have put the greatest "pull" into their displays.

The contest closes on Thursday, January 1. Photos received after that date will not be entered unless there is proof that they have been delayed in transit.

All matter must be addressed to "The Editor, HARDWARE AND METAL," 143-153 University Ave., Toronto, and marked "For Christmas Window Contest."



***Competition Open to All Hardware Dealers or Their Clerks***

**Get Busy and Win a Cash Prize!**

# Suggestions for Arranging

*This window dressed by G. E. Hammond, for the Mills Hardware Co., of Hamilton, won first prize last year in Hardware and Metal's Christmas window contest. There is nothing in this display that does not carry an appeal to the shopper seeking something useful and serviceable as a gift for Christmas.*

*F. S. Newton, of the hardware firm of R. M. Birce, Essex, Ont., dressed this window which carries a particular appeal for the people it was intended to reach, a prosperous farming community.*

# Your Christmas Windows

*The free use of price tickets and a fine showing of hardware lines suitable for gifts made this window a winner. It was dressed by H. G. Binns, of the Binns Hardware Co., Newmarket, Ont., and won first prize for the best window last year in towns under 5,000.*

*"Do It Electrically" is a slogan that is more popular every Christmas. Electrical goods not only look well in a window or store display but they offer a wide range of really useful, serviceable and practical gifts that will be appreciated by anyone.*

# Who Will Get the Powder Business?

## Educational Campaigns to Create Demand for Explosives—Lifting of Restrictions Will Make Transportation Easier—Good Profits to be Made

A FIELD for profit-taking that bids fair to become a more or less prolific one, is that of selling farm explosives. Almost right away, a large Canadian manufacturer of these lines is instituting an educative campaign showing the various operations reuired to remove stumps, rocks and other land impediments, or barriers that stand in the way of cultivating farm lands. It is very evident that the possibilities attaching to this development so closely affect the hardware merchant, that he may, with profit, give the matter of stocking these lines his careful consideration. And particularly now. The farm, or agricultural development of Canada is merely in its infancy, and with a program of development in prospect, greater and vaster than any yet contemplated, it is well to consider the possibilities of profit-taking, even before the need is more manifest than it now is. With the educational features that are contemplated, there is doubtless a big opportunity to link up with these advantages, and take the accruing profits, from selling explosives.

### Methods of Education

One of the most outstanding features of the contemplated campaign of education, which will be conducted in all parts of Canada, is that of introducing on the screen, moving pictures of the various operations required to remove stumps, boulders, rocks or other obstacles that impede the progress of the plow while turning over the sod on farms. These films are said to be most interesting, the camera-man having secured pictures just at the moment when the blast has spent its force, and the mass of rock and earth has expanded to a diameter of many feet.

The depicting of the operations required, begins with the initial preparations of going to the scene of blasting, drilling the holes, inserting the charges, and igniting the placed fuse. Each motion being shown as it actually occurs, makes the picture decidedly realistic, and where shown in rural centres, or where farmers have access to the movies, the accruing value is considerable.

### Where the Dealer Comes In

Of course, there is great growth in store for stumping powder or dynamite where ditching is required. The products have now been worked out in such a way as to permit of shipment being made in any desired quantities, so that car lots do not have to be bought. That is to say, the transportation companies will accept, HARDWARE AND METAL is informed, small shipments of such explosives without the old-time necessity of forwarding full carloads. This suggests that the explosives have been manufactured in a way that eliminates, or greatly minimizes, the possibility of a premature explosion while in transit.

The hardware merchant, being closely in contact with the farmers, is the logical handler of these lines, and the manufacturer states that a good profit will be afforded the retailer. It is therefore a matter of studying one's district; sizing up the needs of one's farmer customers and suggesting to them ways and means of getting the use of every acre of soil. With a beginning in this way, and linking up, as before stated, with the educational work of the movies, and with that of the magazine and other consumer advertising, this looks like a line which will yield profit for the wide-awake dealer who is making the best use of his sales organization and buying the lines that give him a good margin. It will be interesting to watch the growth of this business. It will bring custom for fuse and detonators, too, and for crowbars, shovels, and other lines that are regularly handled by the hardware merchant.

### BUILDERS' HARDWARE VERY ACTIVE

In all sections of the country there has been an increasing sale for builders' hardware. This is due, doubtless, to a variety of conditions. HARDWARE AND METAL is informed that many dealers permitted their stocks to get very low during the war period. In some cases lines were reduced to a very few gross or dozens, as the case might be, and with the prospect of building operations speeding up, there is now a desire to sort up. "Sort up" is scarcely the right expression to use, for it has been, with many, more like "stocking up."

There is this to say: If the building that is required next year, in all sections of Canada, can be undertaken and completed, then the demand for all kinds of builders' hardware will probably exceed the available supply. Prices, if one can judge by the wage increases and the continued high cost of raw materials, are not likely to decline. It is obvious, then, that to buy now is to protect oneself against shortages just when the goods will be most required.

### CONDITIONS AT SHEFFIELD

Reports from Sheffield, England, state that the overseas demand for mild steel, and to a less extent for crucible steel, is very active, and more open-hearth and crucible furnaces are working than a month ago. The output of mild steel has to be restricted, however, through a deficiency of rolling-mill capacity, which is holding up a lot of business. The position is aggravated by the moulders' strike, as, owing to the closing of the heavy foundries, mills are unable to replace their worn rolls. All branches of manufactured steel and tools are handicapped by delays in obtaining materials and machinery parts, without which goods cannot be finished.

# Electric Wiring Contractors Must Obtain Permits From Inspector

OTTAWA. — Electrical contractors who violate the law by installing wiring in any building without first notifying the district electrical inspector and obtaining from him a proper permit for such work, are likely to find themselves in serious trouble.

A Toronto contractor was heavily fined in one of the North Ontario towns recently for failure to observe this regulation, and his case is cited by the local insector of the Hydro Electric Commission as a warning to be observed by local men who might be tempted to follow his extmple.

This contractor installed work in a town in the County of Simcoe, and failed to notify the district electrical inspector and obtain a proper permit for such work, which, it is aileged, was found to be defective. This violation was quickly discovered by the Inspection Department, and although they gave him every warning and plenty of time to attend to it, such warnings were ignored, with the result that the contractor was summoned to Police Court, and the magistrate handed out the fine of $450 and costs for first having failed to take out a permit and, secondly, for having failed to remedy the defects when notified.

The Electrical Inspection Department of Ottawa was recently visited by the chief inspector from Toronto, and it is anticipated that a crusade will be made against violators of the commission's regulations, and the local inspectors are on a still hunt for wiring contractors who instal work without proper notice to the Inspection Department before such work is commenced.

# What Will Happen When Prices Decline?

## Indications That the Peak Has Been Reached in Many Lines—Suggestion That Prices Should be Guaranteed to Protect Retailer From Loss

WHAT'S going to happen when the prices drop? This question has been made the title of a most interesting article on the present price situation as applied to the manufacturer, the wholesaler and the retailer—as well as the consumer—by G. A. Nichols in "Printer's Ink." In answering, Mr. Nichols presupposes that the peak of the high price movement has been reached and that it is only a matter of time until readjustment is commenced.

### Is Problematical

Whether that readjustment will be sudden or protracted he regards as problematical, but investigations indicate that people are developing a disposition to save money where possible and are looking for more moderate-priced goods or postponing purchases in the hope of lower prices to come. Mr. Nichols' inquiries have provided him with a composite picture of the whole situation and the conclusion is reached: That there is a noteworthy agitation on for lower retail prices and that it is spreading far outside its original limit of things to eat. Up to the present, however, the only specific direction in which it is being felt is the hesitancy on the part of dealers to place advance orders for ready-to-wear, including work clothing.

### Shortage of Goods

From inquiries in the Canadian markets there appears to be as yet little indication that the time for a decline in prices is at hand. There is a marked shortage of goods in almost every direction, and there seems to be little chance of anything like a slump while this condition continues. That the effort of rising prices will eventually be to check buying is inevitable, but as the advance is a result of the shortage and it will be a matter of increased production to make up this shortage—and production is increasing very slowly, if at all—it would seem logical to anticipate that any readjustment will be gradual and spread over a considerable period.

### Meeting the Situation

Manufacturers, wholesalers and retailers are all affected by this question of price adjustment. The actual losses to be faced in relation to goods on hand are in themselves a problem, but a still larger question is the placing of orders. In short, it is not so much a question of taking a loss on stock actually in hand, but of the uncertainty as to what the market may be three or six months hence for goods and materials which may be ordered to-day. Under such circumstances the safer course to pursue would be to work on a hand-to-mouth basis in making purchases, but this is a doubtful if not actually impossible policy when there is a prospect on the other hand that there will be an actual shortage of goods.

### Guaranteeing Prices

One question which has been raised under the conditions prevailing has to do with the advisability of manufacturers guaranteeing prices for the protection of their customers. This is the policy which will be followed by a big concern manufacturing men's furnishing goods; the general manager says:

"We are going to meet this situation by guaranteeing prices, There is no use in temporizing with a proposition like this. I don't blame the retailers for being conservative. We are telling our customers that they need not hesitate or hold back. They can safely place their advance orders at present prices. Then if the market drops between now and the time for delivery of the goods, they will be billed at whatever the price is. There is nothing particularly new about this policy of ours. We used it to good advantage during the slow buying days brought about by the wartime merchandise crisis.

### Likely to be Gradual

"Of course, in making this proposition to our customers we do so on the supposition that any decrease in prices that may come will be gradual. If the totally unexpected should happen and prices should drop all in a heap, I don't know just what would be the outcome. I do not think it would be any fairer for us to bear all the loss in this case than it would be to ask the retailer to bear it. But to think about this possibility is merely to borrow trouble. There isn't the slightest chance in the world for prices to slump over night. They will go down so gradually that the reduction can be absorbed without any distress. People manufacturing and selling goods may not make so much money, but I am sure they need not fear disastrous consequences.

### Remove Timidity

"If manufacturers and jobbers generally were to guarantee their prices as we are doing this would remove much of the timidity retailers now are displaying. Most of the jobbers and manufacturers are insistent that the price decline will be gradual and that nobody need fear. All right then—let them have the courage of their convictions and guarantee their prices on advance purchases. We have no fear at all as to the consequences to us. And we are very sure that our customers will get a fair deal. I suppose that we are the most stiff-necked people in the country when it comes to cancellations. We want our customers to know their needs intimately enough to order merchandise that they really want. When we accept an order we expect to fill it. We have to manufacture or buy the goods to fill that order and we have a right to expect the retailer to make good on it. I suppose our cancellations owing to this policy do not amount to more than five per cent. But if a retailer should get up against it owing to price drops or any other reason, what is there to do other than to meet him at least on a fifty-fifty basis? Guarantee prices now so as to speed up the buying for future delivery and then later proceed with the dealer on a live and let live basis. This is our policy and we have no misgiving as to what may happen."

### Careful Consideration

This question of guaranteeing prices to the trade is one which should not be adopted without careful consideration. In some lines of manufacture it may be successfully worked out and may justify itself by maintaining the demand of the retailer. In other cases it will be found to only have the effect of postponing the necessary adjustment. Much would depend also upon the position of the producer in relation to his raw materials. If he does not have to book ahead for his own supplies on a definite basis and has confidence in his ability to judge what is going to happen he may find it good business to take such a course, but if he has to make definite purchases at top levels in order to protect his own supplies it would seem to be going far to endeavor to protect the trade against loss.

### Would Be Absorbed

There would appear much to support the contention of many experienced merchandisers that just as there were benefits all along the line on rising prices, so there will be losses to be borne on stocks on hand on any readjustment to lower levels, but in a gradual change such as is anticipated these should be absorbed without serious consequences. Advances on goods and materials in stock were justified on the ground that there would probably be a time of declining values, but no one looks to see such declines attain anything like the proportions of the advances. There should be no apprehension as to the various branches of trade and industry generally being able to meet the situation out of the profits of several prosperous years without being crippled.

## NEW IMPORT RESTRICTIONS IN AUSTRALIA

Advice from the Prime Minister of Australia to the effect that a proclamation has been issued prohibiting the importation of the undermentioned goods except by license: Muntz or yellow metal, nickel silver, German silver, and Britannia metal sheets; bronze and gunmetal bars, rods and ingots; gilding metal sheets; antimony, star antimonial and lead compounds, viz., type and linotype metal, antifriction, and plastic metals; brass, viz., angles and tees, bars and rods, pipes and tubes, plate sheet and strip; copper, viz., angles and tees, bars and rods, pipes and tubes, plate sheet and strip, wire; phosphor copper—bars, rods, and ingots; zinc and spelter—bar and ingot; railway and tramway materials, viz., rails, fishplates and fishbolts, tie plates and rods, switches, points, crossings, and intersections; beams, channels, girders and joists rolled iron or steel; manganese or chrome steel parts for grinding, crushing or pulverizing machinery; accumulators or storage batteries; wire, electrical cotton-covered; tubes, collapsible; iron and steel pig-iron, ingots, blooms, billets, bar, rod, angle, tee, high-speed tool steel bars, rods and ingots; oils, coal-tar, viz., benzol, naphtha (solvent), naphtha (heavy); paints and colors, viz.: dry white lead, kalsomine water paints and distempers in powder form, white lead in oil, paint ground in liquid in packages weighing over 14 pounds, plaster of paris; veneers, three-ply; strawboard; frames for side-cars in sets; wheels, steel and steel-rimmed (including tires), for use on railways and tramways; axles and other parts for such wheels; panels and mudguards for motor cars.

# EDITORIAL COMMENT

## *RED BLOOD NEEDED*

NOMINATION day is almost at hand, when a selection will be made of the men who are to direct the affairs of municipalities, large and small, all over the Dominion. There never was a time in the history of this country when red-blooded men were so badly needed as right now. Real problems exist which, if not solved wisely, will affect conditions for many years. Such matters as the housing shortage, the fuel problem, the settlement of labor difficulties and similar important questions are general. Experience has proven that businesslike handling of big problems is only possible when business men take hold of them. One of the most regrettable things in connection with municipal and public matters generally in the past has been that so few business men, comparatively speaking, are to be found taking an active part. This has resulted in many situations arising that would not have been possible had men with business training been at the head of things. Men who are used to settling matters quickly and efficiently every day are invaluable at any council board. They are needed always, and especially just now. It was the business men who led the fight against the extremists in Winnipeg last summer and quickly and effectually stamped out Bolshevism as soon as it raised its head. The results of last week's elections in Winnipeg may be attributed to the good work of the business men. They aroused the right-thinking people of the community to the real dangers that exist if the extremists gain control of civic matters. Fortunately for the country at large there are very few such problems to be solved as that in Winnipeg. But there are any number of others which the business men can and should lend a hand in settling. Their experience is needed and their counsel has a value that is far beyond a mere dollars and cents basis. If you are asked to be a candidate, even though you are a very, very busy man, give the matter your most earnest consideration, and if possible accept. Remember that with more business men at the head of affairs there will be less cause for future trouble.

## *A STEADILY GROWING FIELD*

AS a result of the situation that has arisen out of the scarcity of coal, not only this year but in former years, electricity is displacing steam in many places. Manufacturers of motors and many other lines of electrical apparatus are simply swamped with orders. This is only one phase of the situation. Another is the general demand on the part of the public for electric equipment. The increase in electric lighting each year is an enormous item in itself. This is not confined to the city, but throughout the country farmers are putting in their own systems. This opens up a big field for hardware merchants in the sale of fixtures and various utilities, and many of them are reaping handsome profits on this business. To HARDWARE AND METAL many of the men who are handling these lines state that the business is one of the nicest to handle in their whole stores, and one which holds a big future. With the construction of new power lines out into the country districts and the installation of their own power plants by farmers who are either out of reach or do not wish to depend on these lines, a business is developing that now runs into many hundreds of thousands of dollars every year. It is a gratifying fact that hardware merchants are now one of the largest factors in the distribution of electrical supplies and equipment.

## *WATCH YOUR ADVERTISING*

ATTENTION has frequently been drawn in HARDWARE AND METAL to the importance of giving careful attention to advertising copy and keeping it well arranged and seasonable. An example of what happens when this is not done is before the writer. A merchant in a Northern Ontario town comes out this week with the announcement in display type three-quarters of an inch high, "Summer Goods," and then goes on to state that "The hot summer weather is on us in full blast and everyone is grabbing for a straw hat or other articles calculated to keep them cool and comfortable." He then goes on to state that his stock is complete, and that his prices are low and that his service will be found satisfactory. It would be far better for this merchant to have omitted his advertisement altogether than to pay good money for a nice double-column space and then fill it up with such stuff as this. A real message just now about the Christmas goods he has to offer would mean good profits for him, but people who read his announcement will either think that he is trying to have some fun with them or is asleep at the switch. Either opinion is not calculated to bring them into his store or secure them for permanent customers.

### *A NEW S.O.S.*

EVER since the advent of the wireless telegraph the letters "S.O.S." have come to mean in the public mind boats in distress, and an urgent call for help. For some time past hardware merchants and manufacturers all over the country have been busy with an S.O.S. all their own. Just how many letters, telegrams and messages of one kind or another "Send On Supplies," have been forwarded there is no means of knowing, but without doubt they are legion. Instead of decreasing the situation as a result of general conditions, labor shortage, coal scarcity, removal of trains, difficulty in getting raw materials is getting worse. One class of people who have been having troubles of their own are those who are building. Any number of houses which were started with the hope of helping to relieve the scarcity of dwellings are standing partly finished. In some cases bricks are unobtainable, and the frames stand waiting their coming. In others it is plumbing or heating goods. All over the country there is a scarcity, and as a result hundreds of thousands of dollars' worth of construction work cannot be completed. Not only this but several millions of dollars' worth of new building was not even started. Those who had planned to build hope to get started some time during the winter or early spring. There is no doubt that if the weather remains open for any length of time so that men can work outside, and if materials are to be obtained, that a great deal of new building will be started as soon as possible. There is every indication that next spring and summer will see a building boom that will far surpass anything in the history of the Dominion. Everything points to a record trade in all construction work. All this means business for the hardware merchants and opportunities for excellent trade. In the meantime high rents and housing problems are going to remain because many would-be builders cannot get the materials to proceed.

### *AN OPTIMISTIC VISION*

CHARLES M. SCHWAB made some interesting observations this week at the memorial service of the Carnegie Institute at Pittsburgh. He stated that there never was such a riot of luxurious expenditure as at present, and yet he did not think there was anything wrong with the people Present conditions, he thinks, are "the natural aftermath of the war," with other forces contributing to it. The cause of a lack of production is inefficiency, but it is on the side of employers as well as labor. We have all "got to go through some sort of crisis before we realize just what it means." He thinks the present "labor crisis" is not big enough to produce the desired effect. There must be a greater one which the people will have to go through before they learn the importance of efficiency. He would not make remarks to be quoted about the general labor situation at this time, but he did "believe in the common sense of the people," which would bring everything out all right.

### *HELPS BRITISH FIRMS*

MUCH has been said in recent discussion of the necessity for bringing the European exchanges back to par, and of stabilizing them. Some have thought that if this were accomplished all the difficulties of trade with Europe would be straightened out. The best European comment on the situation, however, is of a different character. A distinguished Frenchman, for example, recently said: "It is not an exchange problem, it is a production problem," meaning thereby that France must increase her production, so that exports would balance imports. Others in Europe are emphasizing the necessity for straightening out financial conditions, and for rectifying currency disorders, as necessary preconditions to anything like normal conditions. The decline in sterling has been regarded by the best authorities in Britain as far from an unmixed evil. They have looked upon it as a means of checking their imports and of increasing their exports. Every decline in sterling makes foreign goods cost more in Britain, and British goods cheaper in foreign markets.

### *THE COAL SITUATION*

AS stated in HARDWARE AND METAL previously, Canadian manufacturers, except foundries, are suffering no immediate dislocation of operations as a result of the bituminous coal strike in the United States. For the most part, their supplies for the present are adequate; but, according to information from the Manufacturers' Association, they are showing considerable anxiety over reports from Washington that, in spite of the promise made that one hundred and fifty carloads of coal would be forthcoming daily into Canada, not a single carload has yet crossed the line. Should this continue for any length of time, it can only mean that measures will have to be taken to make present supplies hang out longer, either by shutting down for certain days in the week or restricting the hours of the working days.

The effect of the cancellation of many trains in Ontario upon the commercial travellers and the houses which they represent, can, as yet, hardly be measured. The sales manager of one of the large hardware wholesale houses of Toronto informed HARDWARE AND METAL that, as yet, the only noticeable effect was that many of their travellers were being put to considerable inconvenience. They have been obliged during the past week to do much more driving by automobile than formerly in order to make their calls.

The cutting off of many trains also means disruption of the mail service and delay in deliveries.

# EVENTS IN THE TRADE

## Personals

George M. Rice, of Whitby, was in Toronto during the week.

W. B. Gillespie, of London, Ont., was in Toronto for a few days this week.

W. A. Rankin, hardware merchant, Ottawa, has accepted the invitation of a large number of friends to become a candidate for the Ottawa Public School Board. Mr. Rankin has been taking much interest in public matters, being an active Rotarian, a member of Stewarton Presbyterian Church, a director of St. Andrew's Society, and past chief of the Sons of Scotland.

Alex. Prudhomme, of A. Prudhomme & Fils, Ltd., has been confined to his house through a rather severe attack of heart trouble. Mr. Prudhomme has been at business regularly until very recently and has been enjoying good health. The last reports indicate much improvement in his condition.

## Trade Notes

The Oriental Paint Oil Co. has been registered at St. Basile, Que.

The St. Marys Cement Co., of St. Marys, Ont., has been incorporated.

Aikenhead Hardware, Ltd., Toronto, has just opened a new electrical department.

The Verdun Broom Co. has been registered at Verdun, Quebec, by Adrien Robert and Leo Rilley.

T. N. Dunn, hardware, Ingersoll, Ont., is remodelling the interior of his store and putting in a new front.

The Vlit Manufacturing Co. of Montreal has been dissolved and will be continued under the same style by Thomas H. Higginson.

Soren Bros., Toronto, has purchased a site on Van Horne Street, on which they plan to erect a large new factory for the manufacture of tinware.

E. C. Stearns & Co., Inc., of Syracuse, N.Y., hardware manufacturers, have completed arrangements by which Prescott W. Robinson of Montreal will represent their lines in Canada.

The Brantford Cordage Company, Brantford, Ont., was a heavy loser as a result of the big blow on Saturday night. About 325 feet of roofing on its warehouse was torn off.

Captain W. S. Montefiore, who went overseas early in 1915, and has been with the Imperial Army on the Western front, Egypt and Palestine, upon his return to Montreal recently has been made a partner in Spielman Agencies, Regd.

## Western News

A. E. Boyle, secretary of the retail trade and the wholesale trade bureau of the Winnipeg Board of Trade, has resigned.

Mr. Craig, of C. C. Craig & Co., of Winnipeg, is on a business trip through the West and will visit Pacific Coast points.

C. D. Hobbs, manager of the Western Hardware & Steel Co., Ltd., Vancouver, has left for England, where he will buy for the Vancouver, Victoria and Duncan branches of the firm.

The Winnipeg Paint and Glass Company has completed its removal of offices and warehouse to new premises next door to the building formerly occupied on Notre Dame Ave. E.

Wade H. Owens, who has for some time been associated with the British American Paint Co., has been placed on the sales staff of the H. L. Perry Co., Ltd., Winnipeg, and will make his headquarters in Moose Jaw, covering the Province of Saskatchewan in the interests of Messrs. A. Ramsay, Son & Co., Montreal, whose products are controlled by the H. L. Perry Co., Ltd.

## Montreal News

Thos. M. Birkett Jr., of Thos. Birkett & Son Co., Ltd., Ottawa, was in Montreal recently.

D. A. Rogaff, representing the Durham-Duplex Razor Company, Jersey City, N.J., was a Montreal caller this week.

J. A. Hossack, of the Lufkin Rule Co., Windsor, Ont., was in Montreal in the interests of his firm.

Walter H. Cottingham, president of the Sherwin-Williams Company of Canada, Ltd., was in Montreal from his home in Cleveland.

"Dick" Terrill, sales manager of Caverhill, Learmont & Co., wholesale hardware, has been detained from business for a week or ten days through illness.

Alex. Gibb Jr., was in Quebec City recently calling on the trade in the interests of Alexander Gibb, wholesale metals.

J. N. Young, who has been the London, Eng., representative of the Thos. Davidson Mfg. Co., Ltd., returned to Canada on Sunday last.

Harry Harrison, Peterboro, who represents the Ontario field for Lewis Bros., Ltd., on automobile equipment, was in Montreal this week.

Fred R. Whittall, managing director of the A. R. Whittall Can Co., Ltd., Montreal, was chosen one of the team captains in connection with this week's drive for new members for the Board of Trade.

## Incorporations

National Varnish Company of Canada, Limited, head office Montreal, capital $50,000, plans to manufacture and deal in paints, oils and varnishes.

The Regal Tire & Rubber Company, Limited, capital $75,000, head office Sherbrooke, Quebec, plans to manufacture and deal in tires and rubger goods.

The Canadian Aseptic Cotton Works, Limited, head office Montreal, capital $250,000, plans to manufacture and deal in paints, varnish, pigments, cut glass, rubber goods and other products.

Special Auto Service of Canada, Limited, head office Montreal, capital $100,000, plans to deal in auto parts and accessories.

Dominion Hair Felt Company, Limited, capital $25,000, head office St. Johns, Quebec, plans to manufacture and deal in insulating materials.

### MAY ERECT STEEL PLANT

Press reports from Belleville, Ont., state that A. P. Gillies, on behalf of the Tivani Electric Steel Company and allied interests, has applied to the Hydro-Electric Power Commission for quotations on a block of 50,000 horse-power, to be delivered at their proposed steel plant, to be erected presumably at Belleville. New York mining and engineering experts have visited Belleville and North Hastings the past week. They looked over the various iron ore deposits in Tudor and Wollaston townships, and have been most favorably impressed with the ore bodies awaiting development.

### CLERKS PLAN ORGANIZATION

London, Ont.—A branch of the Retail Clerks' International Protective Association, affiliated with the American Federation of Labor, is to be organized in this city shortly, according to local labor men. This association will include all retail clerks in the city, both male and female, and the purpose of the organization is to bring about early closing in London. A petition was circulated last spring by the London Chamber of Commerce among the local retail stores, but owing to the fact that a sufficient number of signatures was not secured it was impossible to have a by-law passed by the city council enforcing early closing.

### ADVOCATES FREE IRON AND STEEL

An interesting address was delivered in Montreal on Saturday by A. Rives Hall, K.C., who spoke on the necessity of iron and steel in its primary stages of manufacture being admitted in the Dominion free. The speaker quoted from views of various economists and also produced statistics to indicate that whatever necessity there was many years ago for high tariff in order to foster infant industries the purpose of the National Policy as outlined by the late Sir John Macdonald had been eventually to bring about a reciprocity between Canada and the United States, which would result in the abolition of all tariff. The speaker pointed out that while the Federal Government was exercising every effort to increase export, it at the same time deprived the country of the advantages that might ensue by excluding as far as possible import.

### MAY RAISE EXPORT DUTY ON IRON ORE

Press reports from St. John's Newfoundland, state that Hon. W. F. Coaker, leader of the fishermen's party, and the controlling power in the Government, declared in his address at the fishermen's annual convention, outlining the new Government's policy that the export duty on iron ore from Wabana Mines will be advanced from 7½ cents per ton to an amount which will net the Treasury a larger sum than at present.

Should the Newfoundland Government embark on such a policy at this time it would be of vital importance to the Dominion Steel Corporation and the Nova Scotia Steel and Coal Co., Ltd., which between them control the entire iron ore deposits on the Island of Wabana.

Both companies are understood to have been preparing to resume exports of iron ore on a large scale. That part of the business of both companies was entirely shut off during the war. Prior to 1914 a large quantity of the Newfoundland ore was shipped to European countries.

It is understood that the recent purchase of a large block of Dominion Steel shares by British interests was closely associated with a plan to embark on a broad policy of both coal and ore export to Europe, which it was figured could now be more profitably undertaken under existing conditions affecting the markets for raw materials generally, not only in Great Britain, but throughout Europe as well.

### WOMAN IS APPOINTED

George L. Storm, chairman of the American Safety Razor Corporation, announced this week the appointment of Miss Jane Carroll as general manager of the $20,000,000 corporation's subsidiary export company. Miss Carroll is a Cornell graduate, and served her apprenticeship in foreign trade as foreign trade promotion manager of the American Express Company.

# All Lines of Wrought Hardware Will Advance Immediately

## Higher Quotations Are in Effect in the United States—Steel and Wire Are Higher and Deliveries Are Anything But Satisfactory

AN advance has been made in all lines of wrought hardware. American manufacturers have already advised the trade that prices of bright butts japanned butts, strap and tee hinges have been increased by 12½ per cent., while plated butt hinges have gone up 10 per cent., half-surface butts 25 er cent., and all other lines of wrought hardware 15 per cent.

Canadian manufacturers of these lines adopted the same course, owing to the increase in the cost of labor and also the increase in the price of all materials entering into these lines.

Steel and wire recently had a sharp advance, and the probability is that these materials wil be so scarce that it will be almost impossible to make deliveries in any way complete.

Owing to the trouble in the coal mines, many of the steel manufacturers in the United States are unable to obtain coal and have already closed down, and the railroads having withdrawn so many trains from their systems owing to the shortage of coal, cannot begin to bring forward the materials which the Canadian manufacturers will require to use. It may, therefore, be a serious matter if merchants do not provide themselves with any goods which they can obtain delivery of.

# Manufacturers Accede to Request of Tire Dealers

THE annual meeting of the Toronto Retail Automobile, Garage and Accessory Dealers, held on Friday, took the form of a luncheon at the Carls-Rite Hotel, Toronto. The president, W. H. Wilkinson, occupied the chair. Guests from the London, Guelph, Woodstock, Kitchener and St. Thomas branches were present.

One of the most important matters to be discussed and settled was that relating to the sale of tires by manufacturers to commercial accounts. A previous conference had been held between the dealers and the manufacturers; and at the meeting on Friday the announcement was made by the manufacturers of their policy of 1920.

#### Will Discontinue

By the adoption of this policy they have agreed to discontinue the solicitation of any future five or ten car contracts. The existing lists will be curtailed and the difference of existing accounts will be credited to the dealers, pro rata, to their purchasing power from the tire manufacturers. This concession met with the hearty approval of the dealers generally and it is felt that it will be conducive to the better interests of the trade.

#### A Provincial Policy

The policy will be from a provincial standpoint and simultaneous announcements have been made in the other branches of the Association.

The Chevrolet Company, through G. E. Gooderham, has offered ten per cent discount to all bona-fide members of the Association, the offer being accepted and the thanks of the Association tendered to Mr. Moore on behalf of the Gooderham Company.

S. H. Rowed, of London, Ont., provincial president, gave a short address on organization and reviewed the many things which the association had accomplished since its inception. He intimated that the association had now over 200 members, comprised of the most representative dealers in the province and requested that the slogan of 1,000 members be adopted at the January convention.

#### Election of Officers

The election of officers of the Toronto branch then took place and resulted as follows:

President, H. B. Moore; 1st vice, Warren McBride; 2nd vice, Claude Pearce, 3rd vice, G. B. Baby; treasurer, W. C. Warburton; secretary, W. C. Miller; advisory committee, Messrs. Mayall, Daniels, Tulloch, Harpin, Adams, Crighton, Secord, Moore, Breakey.

### BELGIAN GUNS FOR FALL OF 1920

A Montreal jobber states that Belgian guns will be available for the fall season of 1920. Orders for delivery in time to reach the trade for selling next fall are now being booked. HARDWARE AND METAL understands that, for the present, much the same lines will be available as those sold before the war. Of course the prices will be materially higher than they used to be. Many of the guns were made formerly, it is stated, in the homes of the people, while now, with better living conditions, workmen will attend to their chosen vocation of gun-making at the various factories.

# Ten British Firms Working Together for Canadian Trade

WITH a view to securing business in the Canadian field the British firms, having as their chief output automobile accessories, are trying out an interesting experiment. Under the name of the Associated British Industries of Canada, Limited, with a capital of $50,000, they have opened an office in the Ryrie Building, Toronto, with Sidney A. Rowlandson and N. E. O. Storey as Canadian manager and assistant manager.

"It occurred to the firms," said Mr. Rowlandson, in discussing the project with HARDWARE AND METAL, "that they could open an office and be represented on the spot, ten industries as well as one. So, they have combined and formed this syndicate. It is purely a try-out; many of them have their business here at the present moment, while others have not. We are principally aiming at jobbers' trade, as with ten firms represented it would be impossible for us to handle goods, as many of the travellers do, and call upon individual merchants."

The ten British firms represented and their manufactured products are: Abingdon Ecco, Ltd., of Tyseley, Birmingham: wrenches, automobile accessories, cycle and motorcycle fittings, tools and component parts. Accles and Pollock, Ltd., Oldbury, Birmingham: Weldless steel tubing for all trades, tools and motor accessories, press work specialists, airplane construction experts. Amac, Ltd., Aston, Birmingham: Carburetors for all types of engines, also accessories for motors and motorcycles. W. and A. Bates, St. Mary's Mills, Leicester: Pneumatic tires for cycles, motorcycles and automobiles, rubber sport goods, elastic thread, and elastic for all purposes. Benton & Stone, Ltd., Birmingham: Engineering and automobile accessories in brass, pumps, valves, cocks and allied productions. J. B. Brooks & Co., Birmingham: Saddles for cycles and motorcycles, accessories in leather and canvas for the automobile trade, tool bags, hold-alls, etc. Harvey Frost & Co., London: Vulcanizers, material and equipment for operating same, tools, rubber preparation proofed canvas, etc. Powell & Hanmer, Ltd., Birmingham: Lamps (electric, oil and acetylene) for automobiles, cycles and motorcycles; also dynamos, and self-starters for automobiles. Rotherham & Sons, Ltd., Coventry: General engineering supplies for the automobile trade, grease and oil cups, taps and cocks, speedometers, etc.; also chronometers and watches. Sphinx Manufacturing Co., Birmingham: Spark plugs for all types of internal combustion engines, also general accessories for the automobile and allied industries.

## WANTS TARIFF BOARD

"That the council of the Montreal Board of Trade strongly advocates the establishment by the Dominion Government of a tariff board to act under the jurisdiction of the Minister of Finance."

Such was the resolution unanimously adopted by the above body regarding the tariff. This action was taken in view of the recent arguments which have been set forth regarding the appointment of a permanent tariff board to handle these important matters, aside from political affiliations.

The Montreal Board of Trade has always taken a great interest in matters of this kind and its action has embodied in the foregoing resolution that the result of their ideas concerning the importance of appointing a definite board to handle these important questions

## HERE'S A FUNNY ONE

Brantford, Ont.—The big windstorm here Saturday night played a strange freak. It blew over an outer shed in the east ward, under which the rifles and ammunition stolen from the Gott hardware store recently had been hidden. The owner found that his son, under 16 years of age, with another youth, had committed the robbery and reported the matter to the police. Restitution was made, the juvenile defendants being remanded.

## POWER SUPPLY LIMITED

HAMILTON, Ont.—This city's supply of Hydro power has been cut by 4,500 h.p. and will remain cut until the end of the year at least. At a special meeting the Hydro Commission demanded that Hamilton's peak load of 17,500 h.p. be cut to 13,000 h.p. In view of this fact the commission decided that no further applications for power or light would be accepted from local consumers.

## NEED 500 RESIDENCES

SARNIA.—This city needs or will need by spring 500 new houses. The housing situation has been serious for months and all indications point to an even more serious situation in the spring when the proposed new industries start breaking ground and when the plants already established erect their proposed additions.

In HARDWARE AND METAL of November 22 in the Letter Box, the name of Gurney Tilden & Co., Hamilton Ont., was inadvertently omitted from an inquiry, asking, "Who makes a large hotel range with the fire box at the end?"

The Dominion Roofing Co., of Toronto, has been dissolved.

**F. Parks & Co., Cranbrook, B.C.**—Will you inform us where we may procure Chinook bread mixers? We understand they have the handle on the side instead of at the top.

Can any of our readers supply this information?—Editor.

**A. Spratt & Sons, Inglewood, Ont.**—Where may we procure self-feeder for Art Garland No. 30, made by Bowes-Jamieson?

Canada Stoves Limited, Grimsby, Ont., manufacture repairs for stoves formerly made by them.—Editor.

**McLeod & Joynt, Lucknow, Ont.**—Where can we procure lanterns suitable for horse-drawn vehicles such as buggies and cutters?

These may be procured from the Ontario Lantern & Lamp Co., Hamilton, Ont.; E. T. Wright Co., Hamilton, Ont., and Sheet Metal Products Co. of Canada, Toronto, Ont.—Editor.

**Matthewson Bros., Strassburg, Sask.**—Please advise us where Keeper exhibition chicken coops and fronts may be purchased.

Model Incubator Co., Ltd., 196 River St., are Canadian agents.—Editor.

**Cowan Hardware Co., London, Ont.**—Will you please inform us if there are any fireless cookers made in Canada?

These may be procured from the Royal Fireless Cooker Co., Ottawa, Ont.—Editor.

**Saskatoon Hardware Co., Saskatoon.**—Will you please give us the names of Canadian manufacturers of packing twines?

Shurley & Derrett, 1080 Bloor St. W., Toronto; Doon Twines Ltd., Doon, Ont.; Consumers Cordage Co., 9 Church St., Toronto, Ont.; Independent Cordage Ltd., 55 Colborne St., Toronto, Ont.; Hamilton Cotton Mills Ltd., Hamilton, Canada.—Editor.

**Base Burner Repairs**

C. B. Brown & Co., Aylmer, Ont.—Where can we get repairs for Bowes-Jamieson Art Garland Base Burner?

These may be procured from the Canadian Stove Co., Grimsby, Ont.—Editor.

**Gold Leaf**

James Cowan & Co., London, Ont.—Kindly advise us of names and addresses of Canadian manufacturers of Gold Leaf.

National Refining Co., 69 Grosvenor Street, Toronto; also Wickett and Smith, 71 Lombard Street, Toronto.—Editor.

# British Buyers Want Prompt Delivery

## Big Market for Canadian Goods if Sent so as to Reach Market in Good Time, Says J. M. Young, of Montreal, Just Back From England

IN AN interview with J. N. Young, London representative for the Thos. Davidson Mfg. Co., Montreal, and who returned on Sunday from the Old Country, HARDWARE AND METAL was informed that the British market is ready for, and can absorb considerable quantities of Canadian goods so long as delivery can be made promptly. Mr. Young has been in England for almost a year and has made two trips there. He has found the British buyer to readily purchase any offerings which are made, and in this respect Mr. Young expressed his appreciation of the British buyer for the splendid parts that he possesses as a business man. "The buyers there are nice people to do business with and they want to do it on the dead square," said Mr. Young.

The British people, as a rule, are not inclined to the "brass band" stuff, which is the stock-in-trade of some salesmen, and the average buyer over there will not stand for this. If you have a proposition to put before him, Mr. Young states, he is very glad to entertain it and to tell you on the spot whether or not he is interested. Once the confidence of these people is won there is no difficulty in perpetuating their connection.

### Price Is No Object

In connection with the various wares which Mr. Young has been selling for his company and with other products generally which are imported into the country, the average buyer makes very little stipulation regarding price. There is an immediate need for various goods, and if they can be supplied the buyer is willing to pay what the goods are worth, and even an abnormal price.

As to a continuance of demand for these goods, Mr. Young pointed out that no one could tell how long there would be a demand for goods outside of England. Of course a great many of these goods are produced at home, under normal conditions, although for enamelled ware, the imports into the Old Country, as before pointed out in HARDWARE AND METAL, are approximately 90 per cent. of the consumption. Because of the unsettled conditions that prevail there at the present time and the uncertainty of their duration, it is out of the question for any one to form an accurate opinion as to what the future will develop.

### Labor Difficulties Exist

Mr. Young pointed out that the difficulties which manufacturers have had with labor still exist. All classes seem to have considerable amount of money and for this reason they are happy and do not care, particularly, whether they are employed or not. Life is taken as a matter of course from day to day, and there has been very little inclination on the part of some to return to their labor in an old time way. "As soon as the unemployment problem is settled things will go ahead and be very much better than they now are," said Mr. Young. Up to the present time there is not a great deal of change there, and in connection with the home or domestic trade, the manufacturers in England are not people to take care of the trade.

With regard to the prices on various commodities which are made there, Mr. Young pointed out that manufacturers were afraid to give definite quotations. They do not know just where they are at with regard to supplies of raw material, and for this reason they will not commit themselves to a definite delivery proposition.

Altogether Mr. Young pointed out that he was more than ever, if that is possible, a Canadian. "One of the most welcome sights I have ever seen was that of the appearance when we steamed up the St. Lawrence, of the banks of this great river. It did seem good to get back to Canadian soil again."

## DEVELOPMENT OF ALUMINUM INDUSTRY OF BIRMINGHAM

According to reports, Birmingham is greatly strengthening its hold on the aluminum industry, to which it claims to be the principal centre in the United Kingdom. The metal is not rolled there but used chiefly in manufacture, both in the making of bodies and the beating of panels for motor cars, and the production of hollow ware. The raw material is principally secured from home sources, and attention has been directed lately to the desirability of increasing the output, though at the present time there is no great difficulty in the securing of aluminum since the release of the metal from war purposes. The principal difficulties in the trade have been in the direction of labor and lack of equipment. There is a good deal of new plant needed and the reconverting of old machinery and tools to normal service has been slower than was anticipated when the armistice was signed.

### Large Increase in Output Expected

A number of new firms have entered the industry as a result of the war. They have learned by experience that aluminum is an easy metal to work and has valuable characteristics of its own. It is stated that the present output of aluminum hollow ware in Birmingham exceeds that of pre-war days, and it is anticipated that six months hence the output will be very much larger than it is to-day. During recent months the trade has profited greatly by the inadequate supply of enameled hollow ware and the high prices which it commanded. Machine processes are said to be displacing hand labor to a considerable extent in the factories devoted to aluminum hollow ware; stamping presses are being largely used where the spinning lathe was formerly relied upon. The economizing of costs by standardizing models and a nearer approach to mass production is going to give a notable impetus to the industry.

### Large Demand for Cups for Collecting Latex—Hollowware Trade

An interesting branch of the industry is in the production of cups for collecting latex from the rubber trees in foreign parts of the world. Enormous numbers of these cups were manufactured in Birmingham prior to the war, and an output of three to four million a year was not uncommon from single factories.

The enameled hollowware trade appears to be on a somewhat different basis. Prior to the war the Germans held a dominating position in the trade, nine-tenths of the imports coming from Germany, and it was estimated that the German were doing between half to three-fourths of the business in this country. Strenuous efforts are being made by British manufacturers to supply the goods which were formerly bought from outside.

### American Flyer Mfg. Co.

The American Flyer Mfg. Co., P.O Box 196, Chicago, has issued a catalogue listing the line of miniature railroads manufactured by the firm. The catalogue is most attractively printed in colors and is well illustrated. The pages are 9 inches by 12, and contain much information regarding toys for boys. Readers of HARDWARE AND METAL, who desire copies of the catalogue, may obtain same upon request.

## IVER JOHNSON BICYCLES

"Iver Johnson Bicycles—New Edition," is the title of a neat catalogue, No. 20, just issued by this company. Under the caption, "The Quick Way to Anywhere," the reader is introduced to advantages possessed by the bicycle for those living in suburban districts, in rural sections or in towns and cities. Then follow various specifications, together with illustrations of the various models made by the company at its Fitchburg, Mass., plant, together with illustrated styles of saddles, handle bars and sundries. The new catalogue is of 20 page, and readers of HARDWARE AND METAL who are interested may secure a copy upon request.

## WILSON AUTO SPECIALTIES CO.

Bulletin No. 11, issued by the Wilson Auto Specialties Company, of Hamilton, Ontario, lists winter necessities and driving comforts for the motorist. The bulletin contains sixteen pages and is generously illustrated. Copies may be obtained by readers of HARDWARE AND METAL upon request.

# THE CLERKS DEPARTMENT

## "ONE GRADE ONLY—THE BEST" ROBT. McLAUGHLIN'S MOTTO

### Obstinacy of a Farmer Who Wanted Too Much for His Land Started Him on Road to Success—Hard Work Took Him There

"IT was fate — fate and an obstinate farmer—that started Robert McLaughlin on the road that led him to the place he occupies to-day in the industrial life of Canada as the founder and still the head, in spirit and name if no longer in activity, of Canada's greatest motor car manufacturing and distributing organization," says F. S. Chalmers in "Financial Post."

Fifty years ago, when Mr. McLaughlin was thirty-three years old, his father gave him a fifty-acre farm near Enniskillen, Ontario. But in those days eggs did not bring $1.20 a dozen on the market, and wheat had not soared to $2.25 a bushel. A fifty-acre farm was not large enough to be worked with any degree of profit and the McLaughlins, or rather Mr. McLaughlin, Sr., for Robert refused to take any interest in anything pertaining to agricultural matters, decided to enlarge their holdings.

**Refused to Pay It**

There was a farmer nearby who owned fifty acres adjacent to the McLaughlin farm. Mr. McLaughlin, sr., tried to buy it. He offered $90 for it. The other farmer demanded $100. He was obstinate, and held out for the extra $10. Mr. McLaughlin refused to pay it. That settled Robert McLaughlin's career. The deal was off, so his father allowed him to move into town, where he set up a little blacksmith shop on a corner and began to make wagons and "buggies." He has been making vehicles ever since, but in place of "buggies" he is making automobiles. The little blacksmith shop with a manager and three employees—Mr. McLaughlin and his apprentices—has grown into a vast plant that employs 2,500 people, covers a million square feet of floor space, and has half a thousand dealers throughout the country handling the 40,000 motor cars it turns out every year.

**High-Grade Work Counts**

Fate started Robert McLaughlin on the road to success, but it did not carry him there. Something else was needed and Robert McLaughlin supplied that. "Hard work," answered Mr. McLaughlin when I asked him the secret of his rise from blacksmith to manufacturer. "But hard work alone won't do it," he added. "There are several kinds of work. There is poor work and there is high-grade work. When I made my first wagon I pounded every rivet until I knew it was perfect, and I shaped every spoke until I knew it, too, was perfect. My motto was: 'One grade only and that the best,' and I've stuck to it ever since.

"I used to make my wagons and buggies just a little bit better than I thought anybody else could make them. I made them good and solid and then I painted them up and added little decorations that looked nice. I even painted landscapes on some of them. I had the knack of handling the brush, and I liked to do that.

**Work Was Interesting**

"The work was interesting to me, and I believe it means a lot for a man to get into the line of work that he is best fitted for. My father tried to make a farmer of me. I was born and brought up on a farm. I made a very poor farmer. I got very tired of it, and I used to make cutters in my spare time. I made my first cutter in the old log cabin on the farm in 1863. Even when I settled down on the fifty-acre farm in 1864 I continued to make cutters in one corner of the barn. I got more fun out of that than out of the farming, and when fate and that farmer combined to set me up in the manufacturing business, I think it was the luckiest thing that ever happened to me. It would have been a mistake if I had stuck to the farm."

**He Moves to Oshawa**

By 1872 Robert McLaughlin's blacksmith shop had grown so that eight men were employed, and there is still a photograph in existence of the shop and its staff, taken in that year. The business kept on growing as the reputation of the "high-grade work" spread, and in 1878, Mr. McLaughlin borrowed $3,000 and moved to Oshawa, and started a carriage shop in that town. There was a furniture factory in Oshawa that had been a failure from the start. It went to the town for unpaid taxes, and Robert McLaughlin, who in fifty years of business has never missed an opportunity of extending the scope of his work to even the slightest extent, made a deal with the town whereby he traded his own shop for the furniture factory. It was a big factory, and his little organization was swallowed up in one end of it. But not for long. Soon they were making buggies and cutters and wagons in the whole factory and there were additions outside.

Then came a blow that might have disheartened any man. In 1899 the entire plant with its stock of seasoned wooden carriages was swept by fire. Was Robert McLaughlin downhearted? No. Hardly had the flames died down when the town printer was distributing through the town hand-bills bearing the words:

ONE THING THAT WILL NOT BURN IS THE SUPERIORITY OF McLAUGHLIN CARRIAGES.

But the fire really brought bigger things with it. Two years later the McLaughlin Carriage Company was incorporated. Formerly it had been a partnership between Robert McLaughlin and his sons.

**Motor Company Formed**

The next step in the growth of the organization was the formation in 1907 of the McLaughlin Motor Car Company, Ltd. Robert McLaughlin foresaw the development of the automobile and although he did not expect that the industry would grow to the size it has reached to-day he thought that motor cars would be a good "sideline" for the carriage industry. He built the first motor cars in Canada. Since then the history of the company has been public property. The McLaughlin Company saw that building motor cars would be almost too much for a self-contained plant so they entered into an agreement with the Buick people of Flint, Michigan, under which the Buick concern supplied a number of the parts, while the McLaughlin people manufactured the cars.

That agreement was the beginning of a number of similar arrangements, which have consummated in the recent acquisition by the General Motors Corporation of a large share of the McLaughlin interests and the formation of the General Motors of Canada, Ltd., the management of which is still in the McLaughlin family, and which makes McLaughlin and Chevrolet cars and will shortly be turning out Canadian Oldsmobiles.

**Other Developments**

"We have never tried to tell anybody that the motor cars we turn out here are 100 per cent. Canadian, as we have always imported a large number of our parts from the United States," Mr. McLaughlin told me, adding that he hoped shortly that the cars would be entirely manufactured in Canada in the McLaughlin plants. When the units at present under construction in Oshawa and Walkerville are completed the capacity of the organization will be over 50,000 complete automobiles every year, a mighty output when compared to the infinitesimal production of the blacksmith shop in Enniskillen where Robert McLaughlin and his two or three employees hammered high-grade work into spokes and wheels.

**Relaxes in Painting**

At 83, Robert McLaughlin is still a busy man. He has long since given over the active control of his business to his two sons, George W. and R. S. McLaughlin, the latter of whom is president of the General Motors of Canada, Ltd. But although not active in the routine affairs of the company, he is at his office at eight o'clock every working day, giving advice and sage counsel to all who seek it, and attending the weekly meetings of leading employees who are called together to discuss problems that arise. When he has any time to spare he spends it with his paint brush. In his office are landscapes and portraits that he has painted, including a pastel of the late Lt.-Col. Sam Sharpe, M.P., and a portrait group of Mr. McLaughlin and his three sons.

**Only One Strike**

In fifty years of employing labor, Mr. McLaughlin has had but one strike. Twenty years ago when he was in Western Canada on a business trip, an agitator from across the border came to Oshawa to stir up trouble in the plant. Some of the employees listened to his unwise counsel and a strike was threatened although the strike leaders promised to wait until Mr. McLaughlin should return from Winnipeg before calling

out the men. Mr. McLaughlin hastened East, but the strike leaders broke their promise and called out the men. At first the men had the sympathy of the townspeople until Mr. McLaughlin opened up the company's books and showed that the men on strike had been drawing the highest wages in the town. Sufficient loyal employees remained at work to keep the plant going, and not a day was lost by the strike. It was not long before the entire organization was running smoothly once more. The strike failed because it was ill-advised and absolutely unnecessary.

**Advances His Own Men**

"We never go outside this organization to pick our big men," said Mr. McLaughlin. "We give every man a chance to advance himself as high as he wants to go, and many of the managers of our divisions and branches started with us twenty or thirty years ago as jointers, trimmers, etc.

"The employees are able to buy stock in the company if they want to on very easy terms and we have a systematic investment plan which enables them not only to save money, but to double their money while they save. The result is seen in the fact that 60 per cent. of our employees own their own homes."

This is the man who started a business that, with additions now being built, will cover thirty acres of ground, pays out $3,000,000 a year to its employees, and turns out more than one hundred motor cars every day. Some of his secrets of success, if indeed, they could be called secrets, have already been given. Another of his favorite bits of advice is: "Put character into whatever you do and never try to turn a short corner or do a crooked trick on anyone."

## FRENCH FAIR AT LYONS

The spring session of the Lyons Fair, to be held at Lyons, France, from March 1 to 15, 1920, is now in course of preparation. The preliminary work of gathering together those manufacturers who will display their products at the exposition has already begun, and especial attention is being paid to American articles.

The fair has been divided into two parts. Until now there has been but one single showing from the first to the fifteenth of each March. Since the termination of the war, however, the increased number of visitors has compelled the committee to divide the various trades into two lists, one exhibiting at the spring fair and the other at the autumn fair to be held from October 1 to 15. Each trade section is open to exhibitors once a year at one of the fairs only, and the grouping is done in such a way as to prevent buyers of similar articles from having to visit the fair twice in the same year.

The trade sections are as follows:

**Spring Fair**

Heating and lighting
Electrical lighting
Medical requisites
General chemicals
Textile machinery
Church requisites
Silk goods
Furs and skins
Ladies' and men's hats
Men's clothing
Shirts, collars and ties
Ladies' clothing
Ladies' underclothing
Hosiery
Haberdashery
Woollen goods
Cotton goods
House furnishing
Footwear
Leather
Leather goods
Earthenware and glassware
Perfumery and toilet requisites
Toys and fancy goods
Paper and cardboard
Printing and publishing
Stationery and office requisites
Photographic requisites
Motor industry
Jewellery
Clock and watch making
Fire arms and ammunition
Technical schools
Decorative arts
Aircraft industry

**Autumn Fair**

Industrial supplies
Light hardware
Metallurgy
General engineering
Agricultural products
Dry foodstuffs
Liquid foodstuffs
Agricultural machinery
Industrial buildings
India rubber goods
Electrical engineering
General building
Musical instruments
Colonial and imported products
Foreign and colonial governments
Transports and touring

# Hardware Clerks Hold Social Evening

St. John, N.B.—The members of the St. John, N.B., Hardware Clerks' Association not only attend to matters affecting their interests in business but have a good social time quite often as well, going on the slogan, "All work and no play," etc. They held a very pleasant social gathering this week in the rooms of the Y.M.C.A. Many games were indulged in, including basketball, bowling and swimming, and keen and friendly rivalry prevailed among the teams from the different houses. In basketball the W. H. Thorne & Co. team, consisting of Willett, McLennan, Doherty, Hood and Armstrong, defeated by a score of 12 to 11, the team from Emerson & Fishers, Ltd., composed of Thorne, Stinson, Hoyt, Henderson and Keeley.

Those represented in the various games were the employees from S. Hayward & Co., T. McAvity & Sons, Ltd., Emerson & Fisher, Ltd., W. H. Thorne & Co., Ltd., and Robertson Foster & Smith. In the bowling matches some of the young ladies took part, to the no small interest and amusement of the spectators. Three ladies and two men from each firm composed the teams.

Refreshments were served by the young women, and a very enjoyable time had by all present.

## SEEK TO STAY APPLICATION EARLY CLOSING BY-LAW

Action is being entered in the Montreal Practice Court to restrain the City of Montreal from the operation of the recently-passed by-law, requiring retail stores to close their places of business at 7 p.m. This action is brought by the introduction of an injunction against the city.

—Gale, in Los Angeles "Times."

FROM ONE WHO KNOWS

# SHER-WILL-LAC

A SHERWIN-WILLIAMS Product. A modern finish for interior woodwork. A combination of transparent Stain and Varnish that gives new life to old, shabby floors, furniture, sashes, wainscotting, woodwork, etc.

*Dealer's Name*

Produces on new wood a genuine representation of any hardwood finish, closely resembling the beauty of the natural grain.

Used over Sher-Will-Lac Ground on old, soft wood surfaces, it gives a handsome grained effect in any desired shade.

Cherry, Rosewood, Light Oak, Dark Oak, Light Mahogany, Dark Mahogany, Golden Oak, Green, Walnut, Ground, Ebony, Dull Black and Natural.

## *Another Product That Will "Cover The Earth"*

Absolutely Waterproof—Will not scratch or mar easily—Repeated washing will not spoil its lustre.

**SHER-WILL-LAC is put up in quarter pints, half pints, pints, quarts, half-gallons and gallons —all full Imperial measure.**

*Made in 13 different shades*

## *HARDWAREMEN! IMPORTANT!*

This is the line to tie up to for the coming season. Do not wait for the Sher-Will-Lac man to call; write us to-day for full particulars. Ask us about our selling plans—they are effective sales creators, guaranteeing, with the co-operation of the merchant, very large increases in his sales at an exceptionally good profit. Let us tell you about our Free Sample and Bonus Plans.

THE SHERWIN-WILLIAMS CO.
of Canada, Limited

"Save the surface and you save all" *Paint & Varnish*

### ELECTRICAL GOODS MOVE QUICKLY

Continued from page 44

selling one, and it has been remarked that owing to the war and other reasons people are giving more useful gifts of late years, and instead of some expensive bauble are presenting something more serviceable. Where then, is it possible to procure more serviceable lines than electric iron, vacuum cleaners, in fact, electrical appliances of any kind, also not forgetting other hardware lines?

A feature of the electric window shown is: a good length of lamp cord was connected in series with very small colored light bulbs such as are used for decoration purposes. This is woven in and out through the display over the entire bottom of the window. When lighted these give a very pleasing, as well as novel effect and direct special attention to the goods shown.

#### A Striking Display

On entering the store it would be impossible not to notice the fine display of fixtures which are attached to the ceiling at the back of the store. A sample of all kinds carried in stock are shown, as well as other lines, which are made up or brought in as the case may be. Mr. Moon considers this the ideal place for them as they are readily seen by all coming into the store, and it gives prospective purchasers a better chance to see them, especially if the store is busy, as it eliminates interruptions. It is also more convenient to the stockroom, which is just in the rear, and odd parts are more readily shown.

#### Many Show Cases

It would be hard to enter Mr. Moon's store and not notice the fine show case displays which are on each side of the store; electrical on the east and hardware, cutlery and silverware on the west. The first case on the east side has a fine display of electrical irons, toasters, grills, broilers, and other electrical appliances, while the next one shows a line of sockets, bulbs, wire, in fact a sample of the supplies most generally used for constructive work. Joining this is a counter case displaying flashlights and flashlight batteries, which are popular sellers.

#### A Cutlery Display

On the west side is shown a cutlery display. This case is devoted practically to pocket-knives, razors and shaving supplies, and a line of strops, brushes, hair clippers and shaving requirements are shown. This stimulates sales. When a razor is sold it is a very simple thing to bring out a strop and in a casual way comment on its quality. The general customer appreciates this as he likes to feel that he is receiving special attention. It also is a good source of knowledge for the salesman, as often a customer will bring up some experience that he has had with razor strops and the salesman is often able to pick out some good pointers for making his next sale.

Another feature of the cutlery is the surplus stock which is kept in drawers behind the showcase, and after the customer has pointed out what he wants it is very convenient to get what is required from this stock rather than disturb the display which has taken time to arrange.

It may be noticed that one case, both in the electrical and hardware departments have on display practically the same lines as are shown in the window. This has the effect of doubly impressing on the minds of the customers the articles shown.

Mr. Moon carries a big line of well-advertised paint, and finds an ever-increasing demand for it. He also notices that women are becoming enthusiastic painters. It is not so long ago that painting was considered a man's job, and necessarily any small jobs around the house would have to wait the opportunity or convenience of the man of the house. This line is put up so attractively and handy, and as people are becoming more educated to its use it is fast becoming one of the most popular household necessities.

## Says Getting Delivery Will be More Important Than Prices

IN spite of the uncertainty of supplies of steel as a result of the strike in the United States, and in spite of a general unrest in labor circles which has resulted in lower productive power by many workmen, the aim of many of the big producers of steel is, according to Mr. G. G. Complin, sales manager of the Metallic Roofing Company of Canada, to keep quotations steady and prevent, as far as possible, any sky-rocketing in market prices. Mr. Complin hesitates to don the robe of a prophet with regard to future prices, other than to say he does not see any decline for a considerable time to come. Smaller, rather than big, producers may influence to a greater extent prevailing prices. But what he regards as more important than prices is delivery, that is, for some time to come at all events. These are very uncertain; and there seems to be no immediate prospect of better conditions prevailing in this regard.

#### Raw Materials Scarce

Discussing the whole matter with HARDWARE AND METAL, Mr. Complin said: "The situation in the steel market for some time past has been very trying for a manufacturer using steel as a raw material. It has been a case of either a feast or a famine—we had the feast for a few months after armistice, and for the past few months the general market has been working up to a state of famine which is surely approaching, or may, indeed, be said to exist now in many places.

"None of our departments have been actually closed down by the shortage. We have not been able to maintain our usual stock of manufactured goods, resulting in slight delays in orders for certain materials; but so far we have been able to keep ahead on staple lines, such as shingles, corrugated iron, eavetrough and conductor pipe."

#### Expects No Decline

As to the future of prices, all I can say with any degree of certainty is that there will be no decline for a long time. Any change is bound to be upward. Certain big producers are adopting a policy of holding prices steady and they are greatly to be commended; but, unfortunately, they cannot furnish all Canada's requirements and prices may depend largely on the action of a number of smaller producers. The steel market and the general situation change very rapidly. Even though mill prices on the whole remain stable, there will probably be considerable fluctuation in re-sale prices, regulated by supply and demand at time of re-sale.

"The exchange situation is another serious factor; at 5 per cent. it is not an item that manufacturers can continue to absorb as we have been doing for some time past.

#### Get the Goods

"Generally speaking, an advance in prices is not improbable; but leaving price out of the question, the best advice I can give the prospective buyer of steel or sheet metal goods is to get under cover quickly, so as to assure himself a supply. In my opinion, delivery is going to be a more important feature than price for some time to come.

"The labor situation is still difficult. Plenty of men are anxious to draw wages, but few seem to have any real appetite for work. In one of our departments we are paying twice the money paid five years ago, but actually getting out only about half the work.

"Business has been good and I look for it to continue so. A large amount of new construction is going on, as well as considerable repair work deferred during the war. Many farmers and others put off building or repairing in the expectation of lower prices, and these are now realizing that present prices are as low as may be expected for a long time and are consequently proceeding with their work. I confidently look for good business.

### PRESS REPORT WAS UNFOUNDED

Denial is given to press reports that the Humber Nut and Bolt Factory was to be closed down and part of the plant removed to Brantford. Manager J. B. Detwieler, of the Steel Company of Canada, stated that no such move was in contemplation.

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

THE upward tendencies in the general hardware lines are continuing and some of the changes noted this week are very important. The scarcity throughout the entire hardware line is becoming more pronounced every day and it is stated that manufacturers generally are refusing to accept orders for shipment after Dec. 31, except at prices prevailing at date of shipment.

The sheet, bar iron and steel situation is serious. The mills have again advanced their prices $5.00 per ton and this is partly reflected in sheets and plates and they are recorded at an advance of 30c over base prices.

Other advances are wrought butts, light and medium tee and strap hinges, 12½ per cent. All builders' hardware, including locks, knobs and lock sets, advance approximately 10 per cent.; stove pipe wire, 50c per 100 pounds higher and mica 20 per cent.

Nails are very scarce and are holding firm. Sweat pads are up 90c per doz., while hame straps, aluminum leg bands, Everlastic roofing cement, steel stove pipe dampers, Victor mouse traps and rat traps and alarm clocks all show higher prices.

# MONTREAL MARKETS

MONTREAL, Dec. 4—The features of the week include important advances for a number of lines. Coil chain is advanced materially and there are general advances for all lines of small chain also. Galvanized sheets are up another quarter of a dollar per cwt. Pig lead and spelter are higher. Bar solder advanced about two cents per pound. Sweat pads are up 20 to 25c per dozen. Cotton twine, in balls and in the cone, has been advanced about 3c per pound. Stove pipe wire is higher and new prices are out for various preserving sealers for 1920. Old iron, particularly the heavier machinery grades, is in demand and higher buying prices prevail.

There has been some weakness in ingot copper and the price is slightly reduced. Pig tin also is lower. Sisal rope is ruling with an easier undertone and a decline may be effected. Coal oil is firm, but without change. Gas pipe is very firm and some expect increases to come at any time. Lead products continue to rule with a very firm undertone, but no advances have been made this week. These are anticipated.

## *New Prices Out For Various Glass Sealers*

**Montreal.**

GLASS SEALERS.—1920 prices are announced on various grades and makes of sealers. The new prices on the Crown and Improved Gem are: Small, per gross, $11.50; medium, $12, and large, $15. The Crown, Imperial measure, are $12 for pints; $13 for quarts, and $17 for half gallons. Perfect Seal prices: small, $12.50; medium, $13, and large, $17 per gross.

## *All Coil Chain Is Marked Higher*

**Montreal.**

CHAIN.—New prices, recording an advance, have been made effective for coil chain. The new net prices are as follows: Electric weld, ⅛ in., $18.95; 3-16 in., $17.25; ¼ in., $15.85; 5-16 in., $13.30; ⅜ in., $10.50; 7-16 in., $10.20; ½ in. and ⅝ in., $9.95. Firewe'd proof: ⅜ in., $11.05; 7-16 in., $10.80; ½ in., $10.40; ⅝ in., $10.65; ¾ in., $9.95; ⅞ in., $9.65; 1 in., $9.50. B.B.B.: ⅜ in., $13.70; 7-16 in., $13.30; ½ in., $12.95; ⅝ in., $12.75; ¾ in., $12.20; ⅞ in., $11.90, and 1 in., $11.80.

## *Sweat Pads and Stove Pipe Wire Are Higher*

**Montreal.**

SWEAT PADS, WIRE.—Advances totaling from 20c to 25c per dozen are applied to sweat pads, and are effective at once. An increase has been effective for stove pipe wire, this following the recent advanced prices for all wire products by the mills. The No. 18 is now quoted at $8.25 per 100 pounds, and the No. 19, $8.75.

## *Cotton Twine is Up; Pipe May Go Higher*

**Montreal.**

COTTON TWINE, PIPE.—There is an advance this week for cotton twine, and this is equal to about 5 per cent. New prices are about 3c per pound above those ruling last week. Cotton wick, too, is very firm, and the tendencies are upward on all cotton goods. The outlook for higher prices on gas pipe is a prominent feature among market tendencies. There is no change as yet, but with coil chain, bars and steel products already advanced, the outlook suggests increases for this line soon.

## *Various Small Chain, Cow; Cattle Ties Up*

**Montreal.**

CHAIN.—The market has advanced on nearly all lines of chain. This applies to cow and cattle chains, ties, stall fixtures, and ordinary and special bright chains. Dog chains, also, are included. The increase is approximately 10 per cent.

## *Heater Orders Big; Wares Active, Too*

**Montreal.**

STOVES AND WARES.—The heater trade is reported to be a very active one, "repeats" coming to hand freely from the retail trade, and indicating that the trade of the latter is brisk. Naturally, the undertone of the market continues firm at the recent advances. Just whether there will be enough stoves to

meet the needs of the trade will depend upon the severity of weather conditions and the consequent demand from consumers. Ranges have been actively in demand, too. Buyers can be assured of no drop in the market, and as a consequence of this it would seem well to anticipate needs for the earlier part of the coming season, as raw material suppliers are away behind with orders. The demand for seasonable wares is an active one, and prices on these have been firmly held at the recent advances, but without change.

## *Solder Advanced; Lead Pipe Firm*

**Montreal.**

SOLDER AND LEAD, ETC.—Prices are advanced on bar solder. This is in definite accord with the market reports appearing in HARDWARE AND METAL. The tendencies continue strong on lead pipe and lead sheets, but the manufacturers have not, as yet, made any advance. There is a fair demand for various lines.

| | |
|---|---|
| Lead pipe | 0 12½ |
| Lead waste | 0 13½ |
| Note.—Lead pipe is subject to a discount of 10%. | |
| Lead traps and bends | 15% |
| Lead wool, lb. | 0 13 |
| Lead sheets, 3 to 3½ lbs.. sq., ft., lb. | 0 12½ |
| Lead sheets, 4 to 8 lbs., sq. ft. | 0 12 |
| Cut sheets ¾c lb. extra. and cut sheets to size, 1c lb. extra. | |
| Solder, guaranteed, lb. | 0 37½ |
| Solder, strictly, lb. | 0 35½ |
| Strictly, commercial, lb. | 0 33½ |
| Solder, wiping, lb. | 0 30½ |
| Solder wire (8 gauge)— | |
| 40160 | 0 56 |
| 45-55 | 0 38¾ |
| 50-50 | 0 41¼ |
| Zinc sheets, casks | 0 16 |
| Do., broken lots | 0 16½ |

## *Coal Oil is Firm But No Advances*

**Montreal.**

COAL OIL, GASOLINE.—The market for coal oil is steady and firm, but prices have not altered, the basis being from 22c to 25c per Imperial gallon, according to grade. There is an active demand, and the sale of gasoline, too, while smaller than it was, is seasonably active. Its price remains at 33c per gallon.

## *Nail Sales Are Big; Wire Products Firm*

**Montreal.**

NAILS AND WIRE.—Jobbers report a very heavy movement of nails, and as one said to HARDWARE AND METAL, "While we are able to supply our customers it is not an easy matter to get supplies, even of regular staple stock." The tendencies are steadily firm, and present base price for cut and wire nails is $5 per keg. The demand for all wire products is seasonably active, and the market firm. Base price for No. 0-9 gauges, smooth steel wire, is held at $5.25 per 100 pounds, and plain galvanized, No. 9, $9.50.

## *Sisal Rope May Be Lower; Manila Firmer*

**Montreal.**

ROPE AND CORDAGE.—There may be some readjustment of sisal rope prices to a lower level. This will not, if it comes, be a heavy reduction, manufacturers state, but may be one-half or one cent per pound. On the other hand pure manila prices are ruling with a firm undertone, and in the United States, HARDWARE AND METAL understands, manufacturers are inclined to advance prices. There is a firm basis for manila fibres, while the cotton rope market is firmer, and some lines are already advanced. Existing prices on rope are: Pure manila, 31c base; beaver and British manila 27c; sisal 23½c. The demand is just fair.

## *Sheets Are Again Advanced 25 Cents*

**Montreal.**

SHEETS.—An advance of 25c per 100 pounds is made effective for galvanized sheets. This, the importers state, does not represent the increase in the cost to them, and the outlook is for still higher prices. Stocks are much reduced. It is evident that there can be no general replenishment for some months to come with mills behind on orders, and manufacturers are wondering where their supplies of plate are coming from. The situation on black sheets is firm, and scarcity is the big feature here again.

| | | |
|---|---|---|
| **BLACK—** | | |
| 10 gauge | 5 90 | 6 20 |
| 12 gauge | 5 95 | 6 25 |
| 14 gauge | 6 00 | 6 30 |
| 16 gauge | 6 10 | 6 40 |
| 18-20 gauge | 6 55 | 6 70 |
| 22-24 gauge | 6 60 | 6 75 |
| 26 gauge | 6 70 | 6 80 |
| 28 gauge | 7 00 | 7 00 |
| **GALVANIZED SHEETS—** | | |
| U.S. Standard— | | |
| 10¾ gauge | | 9 00 |
| 28 gauge | | 8 85 |
| 26 gauge | | 8 75 |
| 22 and 24 gauge | | 8 40 |
| 20 gauge | | 8 25 |
| 18 gauge | | 8 25 |
| 16 gauge | | 8 00 |
| English Standard— | | |
| 28 gauge | | 10 00 |
| 26 gauge | | 9 75 |
| 24 gauge | | 9 15 |
| 22 gauge | | 8 80 |
| 18 and 20 gauge | | 8 60 |

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

## *Rolling Mills Busy; Firm Bar Markets*

**Montreal.**

IRON AND STEEL.—The volume of business accorded the jobber is stated to be of large proportions, and the undertone is steadily firm at the recent advances. As far as raw material goes, the outlook is not bright, that is supplies will not be available, it is said, from the United States. Export orders have been offered the mills at higher prices than those prevailing in Canada, HARDWARE AND METAL is informed, but the domestic demands are being first met, in fact one source states that the export orders are being turned down.

IRON AND STEEL

| | |
|---|---|
| Iron finish machinery steel | 4 10 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 25 |
| Spring steel | 5 00 |
| Sleigh shoe steel | 4 05 |
| Tire steel | 4 25 |
| Toe calk steel, per 100 lbs. | 4 95 |
| Band steel | 4 05 |
| Harrow tooth steel | 4 20 |
| Mining tool steel, per lb. | 0 22 |
| Black Diamond tool steel, per lb. | 0 22 |
| Black Diamond cast steel, per lb. | 0 22 |
| Common bar iron, per 100 lbs. | 3 90 |
| Refined iron, per 100 lbs. | 4 90 |
| Mild steel | 4 05 |

## *Record Prices Paid For Machinery Cast*

**Montreal.**

OLD MATERIAL.—Prices on old iron scrap, for the most part, are firmer, there being a scarcity of some grades. This applies to machinery cast, and prices advanced this week to $29 to $30 per ton. Pipe and malleable scrap are also higher, while No. 1 wrought iron is quoted at $16.50. As a general thing, other scrap metals are easy and very quiet.

| Dealers' Buying Prices— | | |
|---|---|---|
| Old rubbers, boots and shoes | 0 07 | 0 08 |
| Overshoes, lumbermen's rubber boots | | 0 05 |
| Overshoes, etc. (trimmed) | 0 05 | 0 06 |
| Bicycle tires | | 0 03½ |
| Automobile tires | 0 03¾ | 0 04 |
| Yellow brass | 0 10 | 0 11 |
| Red brass | 0 15 | 0 16 |
| Light brass | 0 07½ | 0 08½ |
| Scrap zinc | 0 05½ | 0 06 |
| Light copper | 0 16 | 0 17½ |
| Heavy copper | 0 17 | 0 18 |
| Wrought iron, No. 1, per gr. ton | | 16 50 |
| Malleable scrap (ton) | | 20 00 |
| Pipe scrap, ton | | 12 00 |
| Stove plate, ton | 20 00 | 21 00 |
| No. 2 busheling | 7 00 | 8 00 |
| Machinery, cast (ton) | 29 00 | 30 00 |

## *Copper and Tin Are Marked Little Less*

**Montreal.**

INGOT METALS.—There is weakness in copper and tin to an extent, although the reductions are not heavy. Prices on lead are held firm, and are, in fact, somewhat higher.

COPPER.—While there is a slight reduction of price to 23½c on pure ingot copper, the bottom of the market is thought, by some, to have been reached Casting ingot is quoted at 22c.

TIN.—There was a slight reaction during the week, and the basis is one cent less than that ruling last week, the present price being 59c.

LEAD.—Stronger. The market price this week is 8¾c. Under a heavy demand from all sources, the tendencies are upward.

SPELTER.—Is strong at 10¼c. The movement is normal for this season of the year.

ALUMINUM.—No change, with little trading. Price 34c-35c per pound.

PIG IRON.—While the tendencies on various products would suggest a firmer basis for pig iron, no advance is recorded, and a nominal price of $50 per ton still obtains.

# TORONTO MARKETS

TORONTO, Dec. 4—The continued upward tendencies in hardware is again noticeable this week. The sheet situation continues to be in a serious predicament; it has been stated that it will be two or three years before the situation is properly adjusted and conditions are again settled anywhere near back to normal. This also applies to iron and steel bars, angles and plates. There was a heavy demand noted for some lines of roofing, window glass, nails and other lines of hardware, also corrugated iron. This is attributed to the heavy storm which tore through the country.

Some of the changes noted are: Stove pipe wire up 50c per 100 pounds; builders' hardware 10 per cent. higher; soldering irons show a new base of 59½ cents per pound. A sharp advance is noted in mica of 20 per cent. Chain has advanced and is from 10 to 20 per cent. higher. Stall fixtures, Dominion brand, are now $1.75 per doz. net. The new extra now charged on shovels larger than No. 2 is 35c. Sheets, both black and galvanized, have advanced 30c over base. Nails are noticeably scarce and whether an advance will take place in the near future is uncertain. Brushes may be higher, owing to the bristle situation. Spelter is ½c higher.

## *Stove Pipe Wire Up 50c Per 100 Pounds*

**Toronto**

STOVE PIPE WIRE shows a new and higher price, which is quoting at 18-gauge, $8.75 per 100 lbs.; 19-gauge at $9.25 per 100 lbs.

## *Scarcity in Nails; May Advance*

**Toronto.**

NAILS are showing a decided scarcity and although the supply is limited, it is stated no change in price is at present noted. Some have it that maufacturers have withdrawn prices, but it is believed this is more of an endeavor to steady the prevailing prices, which are very firm and showing a strong tendeny to advance. The present base is $4.95 per keg.

## *Builders' Hardware Advances About 10%*

**Toronto.**

BUILDERS' HARDWARE advances approximately 10 per cent. The price is very firm and the demand continues to be brisk. Manufacturers, it is stated, are booked to capacity on orders, and the business prospects for next year are very favorable. The steel strike and other disturbances are a big factor in this line, especially those commodities of the cheaper variety.

## *Mica Shows a Sharp Advance of 20%*

**Toronto.**

MICA.—An advance of 20 per cent. is noted on mica, due no doubt to the higher cost of producing.

## *Soldering Irons Again Advance 59½c Pound*

**Toronto.**

SOLDERING IRONS.—A new and higher price is again noted on soldering irons. The new base price is now quoting at 59½ cents per pound.

## *Stall Fixtures Up; Chain Also 10% to 30% Higher*

**Toronto.**

CHAIN.—An advance in chain is noted this week and is now quoting as follows: Cow ties, 10 per cent.; tie-out chains, less 30 per cent.; Steel fixtures, Dominion, $1.75 per dozen net, and proportionate advances in other lines of chain.

## *Spades, Shovels, Scoops Up Net Extra Now 35c*

**Toronto.**

SPADES, SHOVELS AND SCOOPS show an advance on the net extras and instead of quoting a net extra of 25 cents per dozen on sizes larger than No. 2, it is now advanced to 35 cents net.

## *Solder Unsettled; May Advance at Once*

**Toronto.**

SOLDER.—It has been rumored that an immediate advance would take place in solder of from 1 to 2 cents per pound. On being questioned by HARDWARE AND METAL, jobbers stated that they had received no official notice of any change in their present prices to date.

### DECLINE IN ROPE PRICES

As HARDWARE AND METAL goes to press it is learned that jobbers have received a wire stating that some qualities of rope have declined 1 cent per pound.

Some of the new prices are: Beaver manila, 26 cents per pound; New Zealand, 26 cents per pound; sisal cordage, 22½ cents, and lath yarn, 22½ cents per pound. The new prices will be given fully in next week's issue of HARDWARE AND METAL.

## *Butt Hinges 12½% More; Others Up 10% to 25%*

**Toronto.**

BUTTS AND HINGES ADVANCE.—Manufacturers have advanced their price on butts and hinges and are quoting as follows: Bright butts, japanned butts, strap and tee hinges, 12½ per cent. Plated butt hinges, 10 per cent. Half surface butts, 25 per cent., and all other lines of wrought hardware, 15 per cent.

## *Scrap and Waste Materials Quiet; Prices Hold*

**Toronto.**

WASTE MATERIALS.—Scrap iron and waste materials are very quiet at present. The coal crisis coming so near the steel strike may have had no more than a little to do with this. The transportation problem may also prove to be a factor, although so many mills are disorganized that it may be some time before they are in condition to require any of these materials. The following are the quotations:

DEALERS' BUYING PRICES

| | | |
|---|---|---|
| Tea lead | .... | 0 03½ |
| Heavy lead pipe | .... | 0 05¾ |
| Pipe scrap | .... | 10 00 |
| Stove plate, per ton | .... | 17 50 |
| No. 2 busheling | .... | 11 00 |
| Yellow brass | .... | 0 10 |
| Red brass | .... | 0 15¾ |
| Light brass | .... | 0 07 |
| Scrap zinc | .... | 0 06 |
| Heavy copper | .... | 0 17 |
| Wrought iron, No. 1, per gr. ton | .... | 14 00 |
| No. 1 machinery cast | .... | 22 00 |

| Overseas, lumberman's rubber boots | .... | 0 04 |
| Bicycle tires | .... | 0 01½ |
| Automobile tires | .... | 0 03 |
| Tea lead | .... | 0 03½ |
| Heavy lead pipe | .... | 0 05¾ |

## *Sheets Galvanized and Black Advance 30c*

**Toronto.**

SHEETS AND PLATES.—The sheet market continues to be in a very serious predicament. It has been stated that it will be 2 or 3 years before the mills are back to anything near their old stride. As a general thing jobbers state they have no sheets in any proportion to sell. It is stated that the mills are all conservative, and as they do not know what is ahead of them and are unable to predict what is coming, they are not able to figure on future deliveries. The prices quoted below are as near correct as possible. While we are quoting these prices we cannot in all cases find stocks to cover them, and any that have small stocks are quoting anywhere, for example, from $8.50 to $10.00 per 100 lbs. for 10¾ oz. The following are the quotations:

| BLACK SHEETS— | | |
|---|---|---|
| 14 gauge | 5 45 | 6 50 |
| 16 gauge | 5 90 | 6 95 |
| 18-20 gauge | 5 45 | 6 85 |

| | | |
|---|---|---|
| 22-24 gauge | 6 50 | 6 90 |
| 26 gauge | 6 60 | 6 95 |
| 28 gauge | 6 75 | 7 05 |
| 3-16 inch plate | 5 20 | 5 55 |
| ¼-inch boiler plate | 4 80 | 6 10 |

**Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.**

**GALVANIZED SHEETS.**

| | Premier | | Apollo | |
|---|---|---|---|---|
| 10¾ oz. | $9 20 | $9 80 | $8 55 | $9 55 |
| U.S. 28 | 8 60 | 10 20 | 8 15 | 8 85 |
| U.S. 26 | 8 20 | 8 80 | 7 85 | 8 50 |
| 22 and 24 | 8 00 | 8 20 | 7 70 | 7 30 |
| 18 and 20 | 7 80 | 8 00 | 7 55 | 8 10 |
| 16 | 7 55 | 7 80 | 7 40 | 7 90 |
| 12 and 14 | 7 35 | 7 55 | 7 25 | 7 65 |

**An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.**

**Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.**

## *Iron and Steel Bars Hold; Mills Advance $5 Ton*

**Toronto.**

BAR IRON AND STEEL.—An advance of $5.00 per ton on bars, angles, plates, sheets, etc., has been made at the mills, and no promise of delivery generally can be obtained till the second quarter. Local prices show no change as jobbers have been trying to regulate the market, and claim they wish, if possible, to continue at present prices till the end of the present year. It is hard to state if this will be accomplished though, as undoubtedly as the stocks are used, higher prices will have to be paid at the mills, and present stocks are very low. The present prices are as follows:

| | | |
|---|---|---|
| **Common bar steel** | .... | **4 25** |
| **Common bar iron** | .... | **4 25** |
| **Angle base** | .... | **4 50** |
| **Horseshoe iron** | .... | **4 75** |
| **Tire steel** | .... | **4 70** |
| **Mild steel** | .... | **4 50** |
| **Norway iron** | **11 50** | **15 00** |
| **Ice caulk iron** | .... | **5 45** |
| **Sleigh shoe steel** | **4 25** | **4 50** |
| **Band steel** | **4 25** | **4 50** |
| **Spring steel** | **9 50** | **11 50** |
| **Mining drill steel** | **21 00** | **30 00** |
| **Sheet cast steel** | **0 42** | **0 45** |

## *Lead and Zinc Products Unchanged But Firm*

**Toronto.**

LEAD AND ZINC PRODUCTS are holding steady. If the present demand continues manufacturers and jobbers will be well pleased with this year's business. No immediate changes are noted this week, although the price holds very firm, for this season of the year. The following are the present quotations:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | .... | $0 12½ |
| Lead waste pipe, list, per lb. | .... | 0 13½ |
| Do., over 8 inches, list, per lb. | .... | 0 14½ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | .... | 15% |
| Lead wool, lb. | 0 11 | 0 12½ |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 12 | 0 13 |
| Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra. | | |
| Solder, guaranteed, lb. | 0 35½ | 0 38 |
| Solder, strictly, lb. | 0 34½ | 0 37 |
| Solder, commercial, lb. | 0 32½ | 0 35 |
| Solder, wiping, lb. | 0 31½ | 0 34 |
| Solder, wire, lb. | 0 35½ | 0 41 |
| Zinc sheets, per lb. | .... | 0 17 |

## *Brushes Advance; Prices Being Revised*

**Toronto.**

BRUSHES advance. Some manufacturers have withdrawn their prices pending an upward revision, and will, it is expected, have the new prices distributed very shortly. Bristles continue to be a scarce necessity in the brush line, and it is stated that manufacturers are booked with orders till about February or March. The new prices are as yet not available, and will show a range, some lines being more affected than others.

## *Corrugated Sheets Firm; Stocks Nearly Exhausted*

**Toronto.**

CORRUGATED SHEETS.—There is no change noted in the corrugated sheet situation. Flat sheets continue to be very scarce and warehouse stocks, it is stated, are depleted. The severe wind storm is causing the local manufacturers to be deluged with orders, on account of the great number of roofs damaged. Some claim that they will have only the iron used for making shingles left in the course of a few days, as the size used for making corrugated is almost exhausted. Present quotations are as follows:

| Corrugated Sheets— | Per 100 square Feet Gal'zed | Painted |
|---|---|---|
| No. 28 gauge | $8 25 | $7 00 |
| No. 26 gauge | 9 00 | 8 00 |
| No. 24 gauge | 13 50 | 10 00 |
| No. 22 gauge | 16 00 | 12 50 |
| No. 20 gauge | 19 00 | 16 00 |
| No. 18 gauge | 24 00 | 19 50 |

**Discount, 7½ per cent.**

**On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.**

## *Boiler Tubes Remain Unchanged*

**Toronto.**

BOILER TUBES.—The rush business in the boiler tube line is practically over for the season and business is noted to be slackening off, although a very good demand is noted for this season of the year. The present price is holding firm and no new or higher prices are looked for at present. The following are the present quotations:

| BOILER TUBES— | Per 100 feet Seamless | Lapweld |
|---|---|---|
| 1 inch | $27 00 | ..... |
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 60 |
| 4 inch | 75 00 | 56 00 |

## *Spelter Up ½ Cent; Other Ingots Firm*

**Toronto.**

INGOT METALS are showing little change this week, and with the exception of spelter last week's prices remain unchanged. The business offering is fair, with the exception of aluminum, which is very quiet. The present and also recent strikes and industrial disturbances have curtailed production in nearly all cases where ingots, as here listed, are the basic metals used in manufacture, and this is particularly true of copper, which is used in so many industries.

SPELTER is very active again, and is showing a good demand. The market is showing a higher figure, and is quoted at 11 cents per pound.

COPPER.—The demand is a little stronger for copper. The European buyers have as yet not come into the market for any quantities, and it is not generally known how this situation will pan out. One of the prominent factors is the large amount of copper being offered by the custom smelter, who are receiving comparatively large consignments from high-priced mines because of the relatively large proportion of silver in such ores, and in not a few instances the silver recovered pays the cost of production and smelting. The present quotations are 24 cents per pound.

TIN is showing a larger demand, although no change in price is noted. The present tendency is a firm one. Quotations are noted locally at 60 cents per pound.

LEAD has been showing a good demand. The local market is holding at 8½ cents per pound.

ANTIMONY.—There is a fair movement in antimony at present, the demand being normal. Quotations remain at 11½ cents per pound.

ALUMINUM continues to be rather quiet with small stocks on hand. Present price quotations remain at 34 cents per pound.

# LONDON MARKETS

LONDON, Ont., Dec. 4—A higher tendency is again noted this week and indications are that higher prices would be in accordance with the unsettled conditions. Scarcity of raw materials and manufactured goods, etc., is causing great inconvenience and is considerably curtailing the large turnover that would otherwise be had.

Some of the changes noted are as follows: Turpentine and linseed oil are up 5 cents per gallon. Victor mouse and rat traps have advanced. Alarm clocks and Chicago surface floor hinges are also higher. Aluminum leg bands are quoted at 60c per 100. Leather hame straps, ⅞ inch, $3.75 per doz. Everlastic roofing cement $9.00 per doz. Stove pipe wire is up 50c per 100 pounds higher, while stove pipe dampers are also higher. Sweat pads have advanced 90c per doz. Considerable business was stimulated by the recent storm.

## *Chicago Surface Floor Hinges Have Advanced*

**London, Ont.**

CHICAGO SURFACE FLOOR HINGES.—New quotations on Chicago surface floor hinges are noted and are as follows: No. 3171, antique copper, $1.75 each; No. 3281, dull brass, $1.75 each.

## *Alarm Clocks Show New and Higher Prices*

**London, Ont.**

ALARM CLOCKS are now selling at higher prices, and are noted as follows: The Good Morning at $1.60 each; the Sleep Meter at $2.15 each.

## *Victor Rat and Mouse Traps Higher*

**London, Ont.**

VICTOR MOUSE TRAPS.—New and higher prices are now in effect on mouse and rat traps, mouse traps quoting at 35 cents per dozen, while rat traps of the Victor brand are quoted at $1.50 per dozen.

## *Higher Quotations on Wood Jack Planes*

**London, Ont.**

COMMON WOOD JACK PLANES.—New and higher quotations are in effect on common wood jack planes, the prices being: 2⅛ in. cutter, $1.80 each; 2¼ in. cutter, $1.85 each.

## *Hickory Whip Stocks Register an Advance*

**London, Ont.**

KEEPERED WHIP STOCKS.—Keepered hickory whip stocks have been advanced and the new quotations are on the basis of $1.60 per dozen.

## *Advance is Made in Sani Flush Compound*

**London, Ont.**

SANI FLUSH.—An advance has gone into effect on Sani Flush compound, the new quotation being $3.40 per dozen cans.

## *Glass Front Ovens Are Revised Upwards*

**London, Ont.**

GLASS FRONT OVENS.—McClary's glass front ovens have been revised upwards and the new price is No. 70, $4.50 each.

## *Brisk Demand For Glass and Putty*

**London, Ont.**

GLASS, PUTTY.—There is a seasonable demand for glass and putty and the damage caused by the recent storm has accentuated it, as heavy damage was caused to windows all over the district. Quotations are as follows:

Glass—Single Diamond, 25 per cent. off; Double Diamond, 25 per cent. off list; Cut Lights, 10 per cent. off list.

Putty—Standard, 100-lb. drums, $6.80 per 100 lbs.; 25-lb. drums, $7.05. Pure, 100-lb. drums, $9.30; 25-lb. drums, $9.55.

## *Price of Nails is Holding Unchanged*

**London, Ont.**

NAILS.—Nails are in good demand. Quotations are unchanged, as follows: Wire, $4.95 base; Cut, $5.00 base.

## *No Change Shown in White Lead in Oil*

**London, Ont.**

WHITE LEAD IN OIL.—The demand for this commodity is fair. No changes are shown in quotations, the prices being: Pure, tons, $17.35; Elephant, $17.95, per 100 lbs.: less tons, pure, $17.70; Elephant, $18.30 per 100 lbs.

## *Five-Cent Advance Shown in Turpentine*

**London, Ont.**

TURPENTINE.—An advance of five cents per Imperial gallon has been made in turpentine, the new quotations being: 1 bbl. lots, $2.50; 2 to 4 bbl. lots, $2.49; 5 gallon lots, $2.65 per Imperial gallon.

Note the difference between bbls. and 5 gallon lots is now 15 cents per gallon.

5 gallon jacketed cans for oil or turpentine are now $1.00 each. The old price was 95c each.

## *Linseed Oil Spot Delivery Up 5c Per Gal.*

**London, Ont.**

LINSEED OIL shows an advance this week of 5 cents per gallon. Spot oil has been very unsettled and there are so many factors in the present situation that it is almost impossible to state which is the main one. If the demand from Europe during the coming year should prove a large one it may also be a factor. However, the fortunate thing is the fact that there is the local demand, as the exchange on the different monies discourages foreign shipments considerably. 15 cents extra is now being charged instead of 10 cents in less than barrel lots.

| | Raw | Boiled |
|---|---|---|
| 1 to 2 barrels, gal. | $2 57 | $2 60 |
| 3 to 5 barrels, gal. | 2 56 | 2 59 |
| 6 to 9 barrels, gal. | 2 54 | 2 57 |

Less barrels, add 15 cents gallon.

## *Hockey Sticks and Steel Ankle Supports*

**London, Ont.**

HOCKEY STICKS, ANKLE SUPPORTS.—There is an active demand for these goods. Prices are as follows: Boys' red, $1.25 per dozen; boys' white, $1.25 per dozen; Men's rock elm, $3.20 per dozen; Spalding, $4.75 per dozen.

Perfection Steel Ankle Supports are selling at 80c per pair.

## *Rope Sales Quiet; Prices Firm*

**London, Ont.**

ROPE.—The rope situation is a quiet one at the present as the season is practically over for this year. The prices, however, are firm with no chance of a possible decline noted. Quotations are as follows: Pure manila 31 cents per pound; British manila 27 cents per pound; sisal 23½ cents per pound.

## *Good Seasonable Demand For Ice Skates*

**London, Ont.**

ICE SKATES.—The demand for ice skates is very seasonable and a good volume of business is being handled. The Starr make are selling at 30 per cent. off list.

## *Sweat Pads, Yellow and Gold Edge, Up 90c Doz.*

**London, Ont.**

YELLOW AND GOLD EDGE SWEAT PADS are reported at a higher figure and are quoting at $9.90 per dozen, being an advance of 90 cents per dozen.

## *Stove Pipe Wire Shows New Price*

**London, Ont.**

STOVE PIPE WIRE is showing a higher figure this week. This is in order with the advance in wire already noted. The new quotations are No. 18, selling at $8.75; No. 19, selling at $9.25 per 100 pounds. Smaller lots are charged at 10 cents per pound.

## *Push-a-Bike is Selling Well*

**London, Ont.**

PUSH-A-BIKE.—The sale of this line is very satisfactory and it is expected it will increase with the approaching Christmas season. The present price is $3.00 each.

## *Stove Pipe Dampers Show an Advance*

**London, Ont.**

STEEL STOVE PIPE DAMPERS.—Advance prices are effective for steel stove pipe dampers, the new price quoting at 6-inch, 95 cents per dozen; 7-inch, $1.15 per dozen.

## *Everlastic Roofing Cement Now Quoting $9.00 Doz.*

**London, Ont.**

EVERLASTIC ROOFING CEMENT.—A higher price is noted, the quotation being 1 gallon cans, $9.00 per dozen.

## *Leather Hame Straps Quoting at $3.75 Doz.*

**London, Ont.**

LEATHER HAME STRAPS are higher, and are now quoting at ⅞-inch, $3.75 per dozen.

## *Aluminum Leg Bands Now Quoting at 60c*

**London, Ont.**

ALUMINUM LEG BANDS.—The new price now being quoted on aluminum leg bands is 60 cents per 100.

## 1847 *Flatware Showing Good Seasonable Demand*

**London, Ont.**

1847 FLATWARE.—There is a very seasonable demand for this line, and it is stated manufacturers are unable to keep up with the demand. The price quoting is 30 per cent. off the list.

## *Electric Washers Are Selling For Christmas*

**London, Ont.**

ELECTRIC WASHERS.—An active demand for a good class of electric washers for Christmas is being experienced. Quotations are as follows:

Seafoam, $73.15 each; New Century, $99.75 each; Washkash, $120.00 each.

# WINNIPEG MARKETS

WINNIPEG, Dec. 4—Price revisions during the week again show advances in many of the staple hardware lines ranging from 5 to 25 per cent. and as predicted in recent issues of HARDWARE AND METAL, further advances are expected as markets in general are very firm, while the steel strike has seriously affected production.

Among the lines to advance this week appears: Maydole hammers, hand saws, Stillson wrenches, clothes lines, lamp wick, awning cord, wrapping twine and nipples.

Business is reported brisk in many lines, such as sleighs, hockey sticks, skates, snowshoes and cutlery. Practically all lines for Xmas are in great demand, while good sales are reported in shelf goods which are generally slow at this season.

## *Maydole Hammers Again Move Upward*

**Winnipeg.**

HAMMERS.—Prices on Maydole hammers again move up during the week, based on new prices issued by the manufacturers, who advise that advances in raw materials and labor has forced a revision. New prices show an approximate advance of 10 per cent. over former figures, and are now selling as follows: Maydole hammers, No. 1, $19.50; No. 1½ $18.00; No. 11, $19.50; No. 11½, $18.00; No. 12, $16.90; No 711, $19.50; No. 711½, $18.00 dozen.

## *Higher Prices For S. & D. Hand Saws*

**Winnipeg.**

HAND SAWS.—Price changes are also noted in a few lines of S. and D. hand saws of the cheaper grades, which advance from 5 to 10 per cent., due to increased cost of production, and from present indications further advances would not be surprising. To-day's prices on the lines affected are given herewith:

Hand Saws—4½ x 26 in., $29.00; 10 x 26 in., $13.25; 25 x 26 in., $16.00; No. 40 x 26 in., $16; No. 265 x 20 in., $15.50; 22 in., $16.80; 26 in., $17.65 dozen.

## *Another Advance in Stillson Wrenches*

**Winnipeg.**

STILLSON WRENCHES.—Following the advance made some time ago by the manufacturers, new prices are now ruling on Stillson wrenches and show an advance of 35 per cent. over former quotations, which brings prices back to the same level as spring prices. To-day's selling prices are given below:

Stillson Wrenches—6 in., $1.00; 8 in., $1.15; 10 in., $1.25; 14 in., $1.75; 18 in., $2.50; 24 in., $3.65; 36 in., $6.75 each.

Extra Jaws—6 in., 41c; 8 in., 44c; 10 in., 47c; 14 in., 63c; 18 in., 93c; 24 in., $1.24; 36 in., $2.40 each.

Extra Nuts—6 in., 6c; 8 in., 8½c; 10 in., 11c; 14 in., 16½c; 18 in., 19½c; 24 in., 30c; 36 in., 38c.

Extra Frames—6 in., 21c; 8 in., 23c; 10 in., 28c; 14 in., 33c; 18 in., 41c; 24 in., 53c; 36 in., 94c.

## *Cotton Products Register An Advance*

**Winnipeg.**

COTTON PRODUCTS. — Further advances are noted in cotton products based on new prices just to hand, and include wrapping twine, candle wick, awning cord, lamp wick and cotton clothes lines, all of which advance from 5 to 10 per cent. To-day's ruling prices on the various lines are given as follows:

Cotton Clothes Lines—40 ft., $3.50; 48 ft., $4.20; 60 ft., $5.25 dozen.

Awning Cord, white—3½, $2.75; 4, $4.40; 4½, $6.60 dozen.

Candle Wick Packing, 85c lb.

Wrapping Twine, 3 ply, in cones, 78c lb.; 3 ply, in balls, 81c; 4 ply, in cones, 83c lb.; 4 ply, in balls, 85c.

Lamp Wick, flat—No. 0, 81c; A, $1.01; B, $1.49; D, $2.36 gross.

Lamp Wick, Rochester—1 in., 44c; 2 in., 62c; 3 in., $2.10 dozen.

Lamp Wick, Rayo, $1.18 dozen; Rayo Junior, 82c dozen.

Stove Wick, flat—3 in., 53c; 3½ in., 62c; 4 in., 73c; 4½ in., 82c; 5 in., 94c dozen.

## *Higher Quotations On Wrought Nipples*

**Winnipeg.**

WROUGHT NIPPLES.—Prices on wrought nipples move up during the past week, following the issuing of new prices by the mills, the increase being in the neighborhood of 20 per cent., making to-day's net prices as follows:

Close Black Nipples—⅛ in., 1½c; ¼ in., 1½c; ⅜ in., 1½c; ½ in., 1½c; ¾ in., 2c; 1 in., 2½c; 1¼ in., 3½c; 1½ in., 4c each.

Close Galvanized Nipples—⅛ in., 2c; ¼ in., 2c; ⅜ in., 2c; ½ in., 2c; ¾ in., 2½c; 1 in., 3½c; 1¼ in., 5c; 1½ in., 6½c each.

Long Black Nipples—⅛ in., 3c; ¼ in., 3c; ⅜ in., 3c; ½ in., 3c; ¾ in., 3½c; 1 in., 4c; 1¼ in., 5c; 1½ in., 6½c each.

Long Galvanized Nipples—⅜ in., 5c; ½ in., 5½c; ¾ in., 6c; 1 in., 8c; 1¼ in., 11c; 1½ in., 12c each.

## *Linseed Oil Prices Are Holding Firm*

**Winnipeg.**

LINSEED OIL.—Linseed oil prices hold firm in the local market during the week, and is still selling as follows: Raw linseed oil, $2.75 gallon; boiled linseed oil, $2.78 gallon.

Turpentine prices show no change during the week, holding firm at the following figures: Barrel lots, $2.65 gallon; ½ barrel lots, $2.68 gallon; 5 gallon lots $2.70 gallon; 1 gallon lots, $2.70 gallon, plus the usual extras for containers.

# PITTSBURGH MARKETS

PITTSBURGH, Dec. 4.—The iron and steel industry is in the midst of troubles, not being entirely out of its own strike while the coal strike threatens to curtail its operations. There has been scarcely any coal delivered to the steel mills since the coal strike started Nov. 1, most of the coal consigned to mills being held up by the fuel distributing authorities. Mills have been able to get along fairly well with their stocks, but these are now largely depleted. On top of this situation, making it uncertain whether there will be enough coal to enable all mills to continue to operate, comes the danger that the production of coke will be restricted in order to release coal for the most urgent uses. Curtailment in coke production would decrease the make of pig iron, of course, while in addition it would interfere with operation of plants that depend upon blast furnace gas for their power.

Strong hopes are entertained that the coal strike will be broken by the strenuous measures adopted by the Government upon refusal of the miners' officials to accept the 14 per cent. wage advance proposed by Dr. Harry A. Garfield, Fuel Administrator. The Pittsburgh Coal Co., by far the largest coal interest in Western Pennsylvania, promptly announced that it would co-operate with the Government and endeavor to operate its mines. If the strike is ended in this way it will be a victory for the Government and the people, not for either the operators or the miners. The operators had expected to pass to the public any additional cost they might incur through a wage increase, perhaps with an addition on the side, whereas Dr. Garfield prescribes that the 14 per cent. advance is to be absorbed by the operators, with no increase in coal prices.

### The Iron and Steel Strike

The iron and steel strike, described in last report as "crumbling," has gone entirely to pieces in Mahoning valley. Men have stampeded back to work, and at the plant that was slowest in resuming during the past few weeks applicants for jobs in some departments are being turned away, as the departments are already fully manned. The entire productive capacity of the valley is not

yet in operation, but work is being resumed as rapidly as possible.

In the Wheeling district the strike still hangs on, but there is likely to be a stampede there within a week or two, since the strikers have at last learned that newspaper reports are correct to the effect that various other districts have been working.

There is no disorder anywhere, and except perhaps for the Wheeling district there is no intimidation. Thus, in the main, the men remaining out of employment are actual strikers, whereas early in the strike many men were idle because of intimidation. Taking the industry as a whole the men idle now amount to between 10 and 15 per cent., as many as the maximum number idle when the strike was at its height, in the first week. How many men are in employment is another matter, for there have been gains by some new men coming into the industry and losses by some men drifting away, a few thousand having gone back to the lands of their birth. Before the strike the industry was not fully manned.

The important thing now is not how much of the strike is left, but how well the works can operate, and that depends as much upon morale and efficiency as upon the actual number of workers. The morale, of course, is low at many works, the men knowing that as an aid to breaking the strike the employers were glad to have them in employment on any terms, even if they did not do much work. As to efficiency, there are some new men who must be trained from nothing, and there are many men who have shifted employment and must be trained in their new jobs. Even that is not all, as when the strike is recognized as entirely over many of these men may drift back to their old jobs and thus cause fresh confusion.

### Production Prospects

Altogether the prospects are clear that there will be nothing like capacity production for months to come, if at any time in the discernible future. Last January production of steel was at about 90 per cent. of capacity, figuring capacity on a conservatively low basis. The subsequent slump carried the rate down to about 50 per cent. the middle of May, and with continued recovery thereafter the rate just before the strike was about 85 per cent. For a few days the strike cut this in half, making a rate a trifle under 45 per cent. Now the rate is about four-fifths of that just before the strike, a trifle under 70 per cent., and the 85 per cent. rate may not be reached before next March.

In our report for the issue of Oct. 30 it was estimated that even if the strike should recede rapidly thereafter it would, all told, cause a loss in production of more than 2,500,000 gross tons of finished rolled steel, since after the strike the full pre-strike rate of production, which was about 2,500,000 tons a month, would not immediately be restored. A fair estimate to-day is a loss of 3,000,000 tons, this including allowances for deficiency in production in January and February, and no one can be certain that production will be going along smoothly even next March.

In these circumstances it is not surprising that steel consumers are seeking eagerly to cover their requirements for the fore part of next year, and that the manufacturers who do not as a matter of policy adhere to March 21 prices are asking advances for such material as they have to offer. The Steel Corporation pursues rigidly its price maintenance policy, but cannot in all cases supply even its regular customers fully. The independent tin plate mills are practically a unit in going along with the Steel Corporation in maintaining the regular $7.00 price, but less than half the independent sheet manufacturers are showing the same spirit as to sheet prices.

The rise in pig iron continues. While some furnace interests a few weeks ago were professing themselves as anxious to see the market held on an even keel, they did not commit themselves by selling ahead at old prices and the forces in favor of advancing prices have had full sway. The Philadelphia market has advanced again, being now $37.60 delivered Philadelphia for No. 2X, while Buffalo and Cleveland have also advanced. In the Pittsburgh valley market a wide range of prices has obtained, according to tonnage and delivery. A small lot of malleable has sold at $35.25, valley and foundry has brought $35, valley for December. The top price on Bessemer has been $36 valley done on 100 tons for December, while a valley furnace sold Bessemer at $32 and then at $33, a detached Western Pennsylvania interest afterwards securing $34, delivery December to March inclusive, equal to $35.10, delivered Pittsburgh.

# British Production Rapidly Increasing in Many Lines of Hardware Goods

INFORMATION regarding the production in England of many lines of special interest to the hardware trade has just been received by Fred W. Field, H. M. Trade Commissioner at Toronto, from the British Governments Department of Overseas Trade. Mr. Field has given the following to HARDWARE AND METAL:

### STAINLESS STEEL

Just before the war a Sheffield metallurgist discovered that if steel were made with a large proportion of chromium it acquired a high resistance to corrosive agents without its other properties being materially affected. From this point the manufacture of articles requiring the strength and other qualities of cast steel, in addition to such non-corrosible properties, has been developed. Perhaps the most popular application of the process is in the case of table cutlery. Steel table-knives and forks are now made which do not rust or become stained by water, vinegar, salt, fruit juices or any of the substances which ordinarily affect cutlery made from carbon steel. A common demonstration in this country is one showing a lemon being cut by a knife, the juice drying on the blade without any sign of staining. The fact that such a knife is merely wiped clean in the same way as glassware is, not only obviates the drudgery of knife cleaning as usually done but preserves the life of the article, as most knife cleaning processes are wearing processes.

### Is Not Inherent

An objection sometimes raised is that such knives do not cut as well as carbon steel knives. This may be so in cases where quality has been sacrificed to cheapness, but it is only necessary to state that such goods as surgical knives are now produced in this way to show that the defect is not inherent in the process.

Other uses to which chrome steel has been put include harness fittings, ships' propellers, and the combustion heads of automobile engines.

Generally speaking, as compared with carbon steel, the new material possesses the qualities of requiring less attention and having a longer life, while it also possesses greater strength as compared with bronze alloys, which are generally used to resist corrosion.

Many experiments are being made to extend the applications of stainless steel and some promise results that can only be described as revolutionary, entire industries being involved.

### Chrome Steel Goods

The following articles made from chrome steel were recently exhibited in London: Butcher and ham knives, surgical knives, palette knives, strip for razor blades, wire and springs, turnbuckles for aeroplanes, valves for petrol engines, roller bearings for submarines, and spurs.

All these goods are made in stainless steel by many Sheffield firms, but the rights, etc., are controlled by the Firth-Brearley Syndicate, Limited, of Sheffield.

### CUTLERY, PLATE, HARDWARE

The cutlery and plate trades of the United Kingdom continue to be busily employed. An effort is being made to attain something like standardization in knives, together with a reduction in the large number of patterns which have grown up and now stand in the way of greater production and lesser price. A committee have been dealing with this matter, and they recommend that only two patterns of table knives and two of dessert knives should be made. Some makers have already adopted standardization to some extent in pen and pocket knives, as well as in knives for table use.

In the lighter Sheffield trades there is an abundance of work. At the transformed national projectile factory at Templeborough mass production of scissors, razors, surgical instruments, cutlery, files and drop forged tools will shortly be in operation on a scale never previously attempted in the trade. Makers of files find it impossible to keep pace with the demand, and although spoons and forks are being turned out by the million, the demand is still well ahead of the supply. Although there appears to be an insatiable demand for the cheap drop-forged tool, such as pliers and pincers, in the supply of which Sheffield has supplanted Germany, the same satisfactory report cannot be made concerning the more costly high-speed steel tool, for which there is a lessening demand both at home and abroad.

**Lamps.**—A rapidly increasing export trade is being done with all parts of the world in both vehicle and hand lamps.

**Motor and Cycle Accessories.**—There is a large and growing export trade in these goods at the present time.

**Hollow-Ware.**—Good business in overseas markets is being done in the galvanized hollow-ware trade.

# Sees Record Paint Business Ahead

## "Never in Our History Has Such a Volume of Spring Orders Been Booked so Early," Says Fred. Moore—Manufacturer Expects That Prices Will be Steady.

"I NEVER was as hopeful of a tremendous paint and wall finish business as I am for the next year," said Fred Moore, President of Benjamin Moore & Co., of Toronto, to a representative of HARDWARE AND METAL, when discussing the prospects of the trade for the coming season.

Judging from the angle which he gets of the development of the trade—the angle of business that is already booked for spring deliveries—he predicts that it will be a bumper year for the dealers who handle paints.

Never in his history, he says, has business been booked so freely as it has been during the last two months, and almost without solicitation. New buildings, both in factory and dwelling constructions, the usual trade that develops from year to year, and the dying out of the hope that there is to be an immediate decline in prices, have all combined to create a greater demand for paints than has been experienced by the manufacturer for the past four years.

### EXPECTS FIRM PRICES

Mr. Moore intimates that prices, in spite of prevailing difficulties, are very likely to remain firm; the outstanding difficulty may be in securing the raw materials, due to short crops of flax in the United States and a poor crop in the Argentine. No difficulty is being met at the present time, however, in securing the required quantities of the raw material.

"We are able at the present time to get all the raw material we want," said Mr. Moore, in discussing the whole matter of supplies, probable prices and the development of spring trade, "though it is hard to say what will be the outcome of the shortage of coal as affecting freight service and deliveries to us. Much of our raw material comes from Canadian points. It is quite possible that the coal situation may create difficulties in getting the raw materials. I think it is good business for people to buy for spring just as soon as they can.

### PURCHASING FREELY

"It looks as though people have got over the scare of a decline in prices and are purchasing more freely than they have been during the last three years. I don't think that in all my experience spring business has been as freely booked as it has been this year and almost without solicitation, which undoubtedly indicates that we are going to have a much better paint business in the next year than we have had in the last four years.

"There is one thing the people should take into consideration with regard to the high prices, that is, the increased value of protection which paint affords. If lumber has increased in value 100 per cent., there is, therefore, a decided increase in the value of paint as a protective for that lumber."

### THE QUESTION OF OIL

Touching on the question of a probable oil shortage during the coming year, Mr. Moore referred to the scarcity created by a decline in production in the United States and the poor crop of flax in the Argentine. "I think it is quite possible," he said, "that oil may develop into a very serious situation next year. There is a big shortage of flax in the United States and the Argentine flax is a very poor quality, and the result is likely to mean a scarcity of oil and consequent high prices. Turpentine is also likely to continue very high in view of the increased demand as well as the increased cost of production in freight handling.

### KEEP AFTER BUSINESS

"I think, however, that we should not dwell on the possible difficulties of the future, but rather make the best use of the present time in developing sales. Every man handling paint ought to carry on an educational campaign showing the protective value of paints in addition to its decorative values. When the dealers realize the great value of paints, not alone for the purpose of protecting and beautifying of homes, but also the value of paints in factories to increase the light and consequent more efficient workmanship, there will be a much bigger field for them to work on to increase their sales.

### DEALER'S ADVANTAGE

"The dealer comes in personal contact with the user of paints continuously and can carry on this education feature from day to day at a very much lower cost than the manufacturer; and, incidentally,

(Continued on page 70)

# MOORE'S

## FLOOR PAINT

Dries quickly with a gloss finish, and forms a durable, hard-wearing surface that satisfactorily withstands the wear and tear to which FLOOR PAINTS are subjected.

Moore's Floor Paint will give your customers splendid satisfaction. In fact it is sold to them with a guarantee—"*Absolutely satisfactory or money refunded.*"

"Save the surface and you save all" *Paint & Varnish*

The best way to find out if it pays better to sell Moore's Paints is to send in a trial order for floor paint. No matter how small your order may be, it will receive the very best attention.

***Prices, Color Cards and Descriptive Matter on Request.***

**BENJAMIN MOORE & CO.**
**LIMITED**
**TORONTO - WINNIPEG**

he will build up a bigger and more profitable paint business for himself."

Touching on the prospects for big business on account of the vast number of houses being built, as well as factories, Mr. Moore said the situation in both the city and the country gave every promise of a bumper trade next year.

RECORD BUILDING YEAR

"There is no question," he said, "that there is an enormous number of factories and buildings of all kinds going up in the city and in the country. The field is much bigger than it has been for the last four years. The old prejudice against the use of mixed paints is becoming less all the time and on new buildings there is a much larger demand for prepared paints."

The question of the probable prices during the coming year is of interest to all the trade, and Mr. Moore expressed the opinion that they would be steady. He does not see any immediate decline, neither does he anticipate a rise in prices.

EXPECTS STEADY PRICES

"My feeling is that prices will be steady as far as it is humanly possible to judge," he said. "We do not look for any increase at the present time."

Mr. Moore did not overlook in making this statement that there is a good deal of labor unrest and that production has fallen of considerably. But, in spite of these difficulties, which he believes must come to an end in the not far distant future, he thinks that prices will not increase.

One of the developments in the trade during the last year was the sale of wall finishes. Mr. Moore said that this was partially due, no doubt, to both the scarcity and the high cost of labor; but their business in this branch last year was something over two million pounds.

A BIG INCREASE

"There has been an enormous increase," he said, "in the sale of wall finishes owing to it being more economical than paints or wall paper. The demand was so enormous last year that we had to turn down orders and I really believe that the high cost and the scarcity of labor was partially responsible for the greater use of the wall finishings."

"I never was as hopeful," said Mr. Moore, in conclusion, "of a tremendous paint and wall finish business as I am for next year. We never have had as much business booked for spring delivery as we have had in the last two months."

# Every Indication of Firm Paint Markets

## Stated That Orders for White Lead Exceed the Output—Makers May Not Be Able to Supply Those Who Have Not Booked—Prospect Linseed Oil May Overtake Record Prices of 1919

THAT there will be no reduction of the price basis for paints and varnishes, was indicated in the special reports appearing in HARDWARE AND METAL last week. It seems that the farther along we get in the late weeks of 1919, the more manifest are the tendencies which indicate advancing markets, and manufacturers state that all commodities are ruling so high that there is absolutely no possibility of declines coming.

"Personally, I feel sure that prices will advance," was the comment of an Eastern manufacturer in speaking with HARDWARE AND METAL. The idea is that of maintaining basic prices without increases, as long as this is possible, according to the statements of various manufacturers. But as raw materials are purchased months ahead of their actually being incorporated into the finished products, the future price schedules are very difficult to foresee, and few, if any, will make definite commitments.

It will be noted that the action of the Canadian Paint, Oil and Varnish Association last week was to the effect that, "Prices will remain as at present until June 1st, unless conditions necessitate an advance." This is a broad statement, permitting of the withdrawal of price quotations by the maker, if he finds, in the meantime, that material and labor costs make this imperative.

### What Materials Cost

While HARDWARE AND METAL has pointed out the continuance of high prices on basic commodities, an advance in the price of white lead in oil being reported three weeks ago, and also increases for linseed oil, rather than decreases (which lower prices were confidently expected a month ago), together with advanced and record prices for turpentine, the difficulties of obtaining supplies of the various commodities have, perhaps, not been very closely measured by the retailers.

"If you are a manufacturer, and if your order was not placed some time ago, you will get no white lead from United States corroders."

In this manner, a large manufacturer referred to the situation in the United States, and the speaker was confident that there was little promise of the supply question being modified; it would more likely be increasingly difficult to obtain stocks than otherwise.

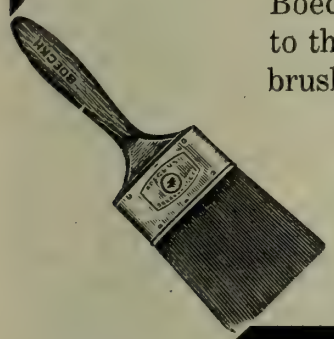
All information available on linseed oil is to the effect that prices are likely to advance. Seed deliveries are decidedly light, and there is little oil on spot, from the best information obtainable through crushers and jobbers. "I would not be surprised to see the high prices of the past season ruling in the spring again," was one crusher's manner of referring to the situation.

Turpentine, too, is scarce, and likely to rule high. With a big season promising for 1920, it seems sound advice when one is urged to buy his requisite and near prospective needs. No factors that HARDWARE AND METAL is aware of point to lower prices for some time to come.

### ADVISES TRADE WITH UNITED KINGDOM

In addressing the McGill Commercial Society, W. P. Hughes, secretary of the Canadian Manufacturers' Association, Quebec division, spoke on the importance of building up a trade with the United Kingdom. Mr. Hughes thought that it was not the part of wisdom to extend too much energy in building up a trade with Eastern Europe, which could not be permanent. The expansion for Canadian trade was in the United Kingdom, to a very great extent.

The speaker also referred to the opportunity of building up a trade with the South American people. In this connection it would be essential to study the customs and language of the people and to get a knowledge of their ideas and ideals.



# BOECKH'S RUBBER SET BRUSHES

"Boeckh's are those superior made paint brushes which improve painting and give general service with complete satisfaction to their users.

Each brush is made to fulfill all the requirements of an ideal paint brush. The bristles are firmly held in a rubber setting and cannot possibly come out. To give additional security and durability the steel grip feature is added.

Boeckh's Paint Brushes have so often proved their superiority to the public in general that it is now a case of,—not, "what brushes will I buy?" but, "Where can I get Boeckh's?"

# Higher Prices for Plate Glass Expected by Manufacturers

NEW YORK, Dec. 3.—It was learned yesterday that the automobile industry has recently placed orders for 30,000,000 feet of glass. Most of this glass is used for wind shields. Whether these orders are all being filled is a matter of doubt, according to members of the trade. At any rate, an effort is being made to meet at least part of the demand in the automobile industry.

**See Higher Prices**

Recent advances in the price of plate glass have given rise to considerable speculation in the trade as well as in building circles as to the reasons for these advances. The opinion is ventured in well-informed circles that the rise in prices would continue in view of the scant likelihood of larger supplies in the immediate future. Many causes have contributed to the apparent shortage, it is stated, and not the least of these has been the shortage of labor in the white sand quarries.

**The Building Boom**

It was pointed out yesterday by a representative of the Pittsburgh Plate Glass Company that, as a matter of fact, prices should be considered as nominal. He asserted that only one-third of the orders on hand were being filled, and intimated that this condition would be likely to exist for some time to come. He added that in view of the fact that the building boom, which was in full blast in the West and Northwest, would hit the East in the not distant future, it would tend to increase the demand that is already great. He put the situation in this way:

**Workers Are Scarce**

"The men who worked in the sand quarries before the war were attracted to the munitions plants by higher wages. Many of them are still employed in these plants, which are embarking in other enterprises, and it seems likely that they will stay there permanently. This means that it has been difficult to get labor for the sand quarries, and has resulted in a material reduction in the output.

**Costing More Now**

"It should be borne in mind also that soda ash and arsenic, the two chemicals which enter into the manufacture of plate glass, have gone up in price. Then again the price of lumber, which is used for the packing of the products, has also risen sharply. What has all this resulted in? Higher prices, of course, and it was natural that prices should have gone up; in fact, it was a purely economic condition. The demand has been great, and the supply has not been anywhere near the requirements.

"One is bound in all fairness to conclude that higher prices have not been the result of profiteering or manipulation. Prices have risen in other commodities for the same reason—scarcity in supply and increased demand. There is really nothing remarkable in the rise of plate glass prices, and I am merely referring to these facts as indicating the conditions that exist in the trade. No one, in my judgment, can tell how long these conditions will continue to exist. They will adjust themselves along with adjustment that will come about in other lines of industrial activity."

# Fear House Shortage; Urge More Building

The Montreal Civic Commission was waited on this week by a deputation representing organized labor in Montreal. The purpose of this delegation was to seek interests of the Commission in hastening building activity in Montreal. Heading the delegation was Gustave Francq and R. Lynch, who represented the Trades and Labor Council. They asked the Commission to proceed without delay in completing personnel of the Housing Commission, so that they might report back to the city in the immediate future.

It was pointed out by the above committee that the workingman of Montreal anticipated an increase in residential rents in the spring, and that because of this they were anxious that the housing scheme might be proceeded with. It will be recalled that Montreal had four million dollars allotted to it under the Government Housing Plan, and it is that this amount may be made use of at an early date that the labor interests have interested themselves.

In leaving the commission, which promised a definite reply within a few days, the speakers are reported to have said: "If we cannot make it go here, we will approach Quebec, and then Ottawa."

# Sees Splendid Demand For Paint in 1920

Walter H. Cottingham, president of the Sherwin-Williams Company, and a number of other subsidiary corporations, was in Winnipeg recently meeting representatives of the company. Mr. Cottingham has taken a very deep interest in British and European affairs. His company owns the firm of Lewis, Berger & Sons, Ltd., of London, which was established in England very many years ago and which has branches in Paris, Bombay, Sydney, Australia and Wellington, New Zealand. Mr. Cottingham has just recently returned from London, Eng., and the Continent, and expresses much cofidence in the ability of England and European countries to "come back" after the unsettled conditions of recent years. Mr. Cottingham is very optimistic over the outlook for the future.

Business through the Western branch of the company for the fiscal year recently ended was 100 per cent. in advance of sales for the corresponding period of last year, and Mr. Cottingham states that conditions in the United States were quite similar, and the anticipation is that these conditions will continue throughout 1920.

## SUPPLYING TRAPPERS' NEEDS OFFERS OPPORTUNITY FOR HARDWARE MERCHANTS

Press reports from the Pas, Manitoba, state that the raw fur auction held on Saturday last realized $75,000. There were 7,000 skins put up, and muskrat, for the first time at this point, brought as high as $2.60. In 1915, these skins were a drug on the market at 30 cents each. Red fox showed strong price, the average paid being $35; beaver picked up at $20, and ermine at $150, while otter, marten, fisher, skunk, and other qualities averaged about the same price as last spring.

As pointed out in previous issues of HARDWARE AND METAL, there is a demand for furs at the present time which cannot be filled, and at prevailing woods than for a long time. Some splendid opportunities for trade are presented for hardware merchants in supplying the trappers' various needs.

## BIG MARKET FOR LUMBER

Canadian lumber manufacturers who are in a position to supply mill-cut houses, should benefit materially from the recent action on the part of the British Government in lifting restrictions on the erection of wooden houses in the British Isles. Even Canadian timber firms that are not in a position at present to supply much lumber to the British market will have a great field for future trade along this line, for it has been estimated that the shortage of houses in England runs well over the million mark and that England will have to build houses for fifteen or twenty years to catch up with requirements.

## TO BUILD MORE HOMES

At a meeting of the Montreal City Improvement League, Mr. F. W. Stewart, the president, announced that he had received assurance from E. R. Decary, chairman of the Administrative Commission, that it was intended to take advantage of the provisions of the Federal Housing Scheme, and that the actual work of construction would probably commence next spring. Pressure is being brought upon the Administrative Commission to complete the personnel of the present City Housing Commission.

# Refinishing Jobs

Much of the varnish sold by the dealer is used for refinishing purposes, and is bought by consumers who are not finishing experts. It is to such consumers that Berry Brothers' Varnishes, Stains and Enamels are especially adapted.

While "Berry" finishes have been for a great many years appreciated by the experienced painter because of their uniform quality, their easy working and excellent drying properties are additional buying inducements among house owners who are unskilled with the varnish brush and do their own refinishing.

Liquid Granite FLOOR VARNISH Luxeberry WHITE ENAMEL

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, Dec. 4.—Paint and varnish markets are active, seasonably speaking, and the manufacturers are engaged in storing up the usual winter surplus to take care of early spring needs. No improvement can be reported for linseed oil, and the same may be said of turpentine. Flax supplies are limited and the crushers are beginning to wonder if they will get much seed for crushing, now that winter conditions are here. The outlook is one which suggests higher oil prices at any time. White lead basis is also firm, although there is no increase in the quotations on various grades.

The putty movement is an active one, and the price basis steadily firm. Glass, both plate and sheet, is very active, and the only problem is that of getting stock enough to fill orders. The undertone is, under these conditions, naturally a very firm one.

### *Predictions Made of Higher Oil Price*

**Montreal.**

LINSEED OIL.—The situation is no easier than it was last week; it is rather the opposite. Receipts of flax from the Canadian West are just about half of what they were a year ago, and the prices quoted at this writing are nearing the $5 mark. This indicates that the present oil quotations, related to the seed basis, are even below what the spot market would suggest. Manufacturers are now needing much oil, and they are not having an easy time, it is understood, obtaining what they require. No one cares to predict an easier market; some venture to assert that, if there is no relief soon, prices will return to the high levels ruling in the late summer, and even these figures may be passed.

HARDWARE AND METAL has been pointing to the upward trend, in recent weeks, and it looks as though the prices this winter will be higher than they ever have been during midwinter. Argentine supplies are a doubtful and uncertain quantity.

| | Imp. Gal. | |
|---|---|---|
| Raw— | | |
| Single barrels | 2 34 | 2 40 |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |
| Boiled— | Imp. Gal. | |
| Single barrels | 2 36½ | 2 43 |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |

NOTE.—Owing to fluctuations seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

### *Turpentine Supplies Light; a Firm Basis*

**Montreal.**

TURPENTINE.—The market undertone is a firm and steady one. Supplies arriving from the south are meagre, and no one appears to have any sizable surplus. The tendencies suggest a steadily high market, and while the present call for turps from the trade is not excessive, the manufacturing needs are considerable. Prices range from $2.35 to $2.40 per gallon, on single barrel lots.

| Turpentine— | Imp. Gal. | |
|---|---|---|
| Single barrels | 2 35 | 2 40 |
| Small lots | .... | 2 65 |

(Packages extra.)

### *Putty Sales Big; Glass Very Firm*

**Montreal.**

PUTTY AND GLASS.—There is an extensive movement of glass, both plate and box glass being most active. The arrival of some Belgian glass, plate and sheet, is reported, and this has been readily absorbed. The buying has been very active for some weeks and jobbers are confronted with more or less difficulty in obtaining supplies. The price basis is firm, but unchanged. The future of prices depends upon the action of manufacturers; if they ask more money, Canadian prices will have to be advanced. In the meantime they are not able—that is, the United States mills, to fill orders already in hand.

The putty situation is a very active one, as far as sales go, and the tendencies are firm. Prices remain unchanged as follows:

| | 5 ton | 1 ton | Quanty. |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 6 30 |
| Do., 100 lbs. | 5 85 | 6 10 | 6 45 |
| Do., 25 lbs. | 6 10 | 6 35 | 6 70 |
| Do., 12½ lbs. | 6 35 | 6 60 | 6 95 |
| 3 and 5 lb. tins | 8 10 | 8 35 | 8 70 |
| 1 and 3 lb. tins | 8 60 | 8 85 | 10 20 |
| Do., in 100 lb. cases | 7 15 | 7 40 | 7 75 |

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

### *May be Scarcity of White Lead in Oil*

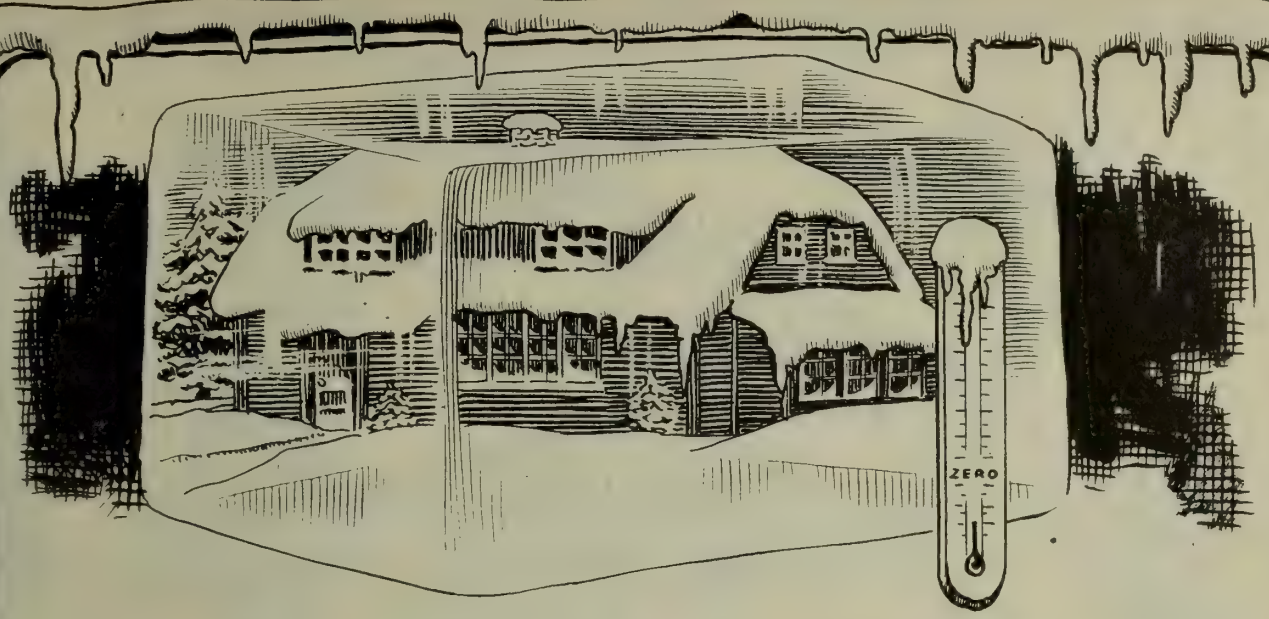
**Montreal.**

WHITE LEAD IN OIL.—Indications point strongly to a firm market. The present outlook confronting the jobber is one of supplies. The policy seems to already be adopted in many quarters; "buy what you need of raw materials; get the goods when you can, and never mind the price."

Suggestion has been made from several sources that there will not be enough white lead to go around next season. The available supplies are already largely booked, together with the forward output for some time, HARDWARE AND METAL is informed. Prices, while firm, still hold at $16.50 for five ton lots; $17 for ton lots, and $17.35 for smaller lots, all prices per 100 pounds.

### *Paintmakers Look For High Prices*

**Montreal.**



PAINTS AND VARNISHES.—As far as the outlook goes, paint and varnish raw materials are continuing to rule high. "Shall we be able to get all we need?" appears to be the prsent query of the manufacturer, when considering his prospective requirements for 1920. The white lead supply seems to be well booked in advance; linseed oil is not plentiful, nor is turpentine. The whole position is firm under these conditions.

## TORONTO

TORONTO, Ont., Dec. 4.—Linseed oil is recorded this week at a considerable advance of 10 cents per noted for spot delivery oil, notwithstandnoted for spot delivery oil, not withstanding the fact that Canadian seed is harvested. The coal crisis has no doubt been a factor in the curtailment of shipments, although it is hard to predict or relate the present and near future tendencies on account of so many disruptions and as is often the case strikes, even when not directly connected, have a deciding tendency in many instances.

Turpentine shows an advance of 5 cents per gallon. The local stocks, it is stated, are at present low, and jobbers state it is difficult to procure shipments with any definite delivery.

Paint sales continue very good and merchants appear to be getting ready for a big season all through the country. White lead in oil is holding firm and may be hard to procure in the near future as a slight scarcity is already noted. A higher extra is now being charged on both linseed oil and turpentine for less than barrel lots, being 15c in place of a former 10c per gallon.

# HARD WINTER *brings* *Spring Customers*

Canada's rigorous Winter brings customers for paint in the Spring. Fortunate is the householder who specified "B-H"—his property will show less deterioration, less wear and tear, and will need less repair than if he had been content with a poorer grade.

The quality of the B-H Products makes sales as a matter of course—the man whose house is B-H painted is always a booster for our lines among his neighbors.

The B-H Agent doesn't have to say a word about B-H quality because our signed guarantee is pasted on every can.

**Write us to-day—we'll submit our proposition. The B-H label helps you to get business and B-H quality helps you to keep it.**

"Save the surface and you save all" *Paint & Varnish*

**BRANDRAM-HENDERSON** LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

## *Linseed Oil Up; Spot Now* 10c *Higher*

**Toronto.**

LINSEED OIL.—An advance of 10c per gallon is noted on oil this week and this price, it is stated, is liable to hold firm for the rest of the month unless some unforeseen development takes place. Many refuse to predict on the linseed oil market as there are so many factors that have direct effect. The coal shortage seems one of the most important as it is greatly hindering shipments. The following are the quotations:

| Linseed Oil— | | Raw |
|---|---|---|
| 1 to 2 barrels, gal. | 2 67 | 2 70 |
| 3 to 5 barrels, gal. | 2 66 | .... |
| 10 barrels and over | 2 64 | .... |
| | | Boiled |
| 1 to 2 barrels, gal. | 2 70 | 2 73 |
| 3 to 5 barrels, gal. | 2 69 | .... |
| 10 barrels and over | 2 67 | .... |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

## *Turpentine Scarce; Advances* 5c *Gallon*

**Toronto.**

TURPENTINE is 5 cents per gallon higher. The local markets seem to show low stocks and owing to the coal shortage and freight curtailment, deliveries are very slow. Jobbers claim it is almost impossible to buy turpentine with any assured delivery. The Southern market continues firm with some advances shown and these prices may be a reflection. Less than barrel lots are now being charged at an extra of 15c in place of the former extra 10c. The following are present quotations:

| | Per Imp. gal. |
|---|---|
| 1 barrel lots | 2 50 |
| 2 to 4 barrel lots | 2 49 |
| 5 gal. lots | 2 65 |

## *Window Glass Firm; No Change in Price*

**Toronto.**

WINDOW GLASS.—In some instances American prices have been withdrawn for an indefinite period. Jobbers generally have experienced a very busy fall, and present indications are that an active demand will continue. Prices remain very firm, with a higher tendency being felt. Owing to the present scarcity it may be that embarrassments will result before the production of the next fire is available. Foreign orders are not expected to assume any great proportions, it is stated, till the exchange is settled. The recent storm, which appears was quite general, has been the means of greatly stimulating the market, which was already doing almost a capacity business.

## *Prepared Paint is Firm; Heavy Bookings*

**Toronto.**

PREPARED PAINT is holding at a firm price, although no immediate change is noted. The demand is said to be one of the largest noted for some time and spring orders are coming in large volume. Some manufacturers state that unless liberal orders continue to come in there may be a possibility that manufacturers will be in the same predicament as last year as the present demand for spring delivery is a heavy one, and manufacturers claim they can produce more and at cheaper prices if they have an idea of the future requirements.

## *Putty Sales Good; Still a Heavy Demand*

**Toronto.**

PUTTY.—Sales have been very good, and the seasonable demand has been a large one, especially the better grades. The following are the present quotations:

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels | $5 35 | $5 60 | $5 95 |
| Do., 100 lb. iron | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels | 7 10 | 7 35 | 7 70 |

## *White Lead in Oil Remains Unchanged*

**Toronto.**

WHITE LEAD IN OIL remains firm and it is hard to state just what price the future will show. Pig lead continues high, also linseed oil. Labor, etc., and the coal shortage is causing great inconvenience through the curtailment of shipping. However no change is reported, and business is reported brisk with a good volume of business offering.

# British Firms Asking Protection

## Federation of Industries Wants Ban Put on Many Lines of Metal Goods as a Protection for Key Industries

THE Federation of British Industries has sent an important memorandum to the Board of Trade, criticizing the abrupt removal of the import restrictions on September 1, and asserting that certain industries and trades still need and should have import protection against foreign competition.

The American Chamber of Commerce in London, which reports the matter, is waiting with interest to see the result: whether the Government will adhere to the non-restriction policy, as announced just prior to September 1, or whether, after two months of practically unrestricted imports, they will agree with the claims of the British manufacturers and reimpose some of the restrictions.

The Federation of British Industries is perhaps the most powerful industrial association in the country, representing about 1,000 of Britain's foremost producers. It is the importance of the Federation that makes this action significant.

### Want Protection

The memorandum presents the claim of the following to be key industries and which should be protected, although the Government has not included them in its published list:

Ferro-alloys (molybdenum, chromes and silicon).
Steel balls and ball bearings.
Wire nails.
Typewriters.
Photographic raw base paper.
Telephone manufacture.
Drop forgings and stampings.
Cotton duck and canvas.

The following trades feel that, owing to their peculiar position, they should receive special protection, at least during the period of reconstruction: Motors, rubber tires, hosiery, dyeing, bleaching and finishing, machine-made lace and embroideries.

The following industries want protection against dumping, i.e., the placing of foreign goods on the British market at a price below that in the producing country: Bridge and constructional iron work, marine work, iron and steel wire, glass bottles.

### Foreign Competition

The following industries want protection against the foreign competion that will result from countries whose labor is paid so much less that British production cannot compete: Jute spinners and manufacturers, boot and shoe laces, silk and cotton bindings, elastic braids, cords, webbing, etc., carpets, hosiery and fabric gloves, brushes, salt.

The following want protection against the foreign competition which would become impossible to meet through collapse in the exchange of the producing country: Emery, emery cloth, grinding wheels, etc., moquette carpets, cotton hosiery, machine-made embroidery and Barmen lace, photographic raw base paper, snap fasteners, corset busks, toys.

Full statements regarding the claim of each industry are being prepared by the Federation, and are to be sent to the Board of Trades as soon as completed.

The American Chamber of Commerce in London, points out that the claims of the last three classes of industry or trade, namely, for protection against dumping, competition through underpaid labor, or collapse of exchange, are really pointed at Germany. The others, however, if admitted by the Government, may affect American exports in those lines to the British market.

### APPOINTED CANADIAN REPRESENTATIVE

G. L. Cohoon, 11 St. Sacrament St., Montreal, has been appointed to represent the cutlery firm of Thos. Ellin & Co., Ltd., Sheffield, England.

# One Glidden Kind Calls for Another

The result is a steady Glidden demand. A good reputation created by constant advertising brings in the first orders. Then good results, coupled with *continued* advertising, keeps them coming.

Glidden Endurance Paint is a *new* kind recently added to the Glidden line. The same Glidden quality that vessel owners and manufacturers generally, have used for nearly 50 years is now available to the home owner.

*If you are not already familiar with our special paint proposition, write us to-day.*

THE GLIDDEN COMPANY, LTD., Toronto, Ontario

LIBERTY ADJUSTABLE CULTIVATOR WEEDER

(Canada Patent Oct. 15, 1918)

Wherever they have been introduced Liberty Cultivator-Weeders and Gilson Weeders are rapidly ousting the hoe from popular favor. Anyone who has ever used a hoe can see at a glance that these new Gilson tools are more effective and will save time and labor. It won't take Gilson Tools long to "catch on" in your locality. Order from any of these jobbers:

## Are You Making the Best of the Big Prospects?

NOT for years has the outlook for a big skate season been so inviting.

It's the first winter really free from the worries of war-time. There's going to be a rousing demand for

*Automobile* SKATES

The Skate with Aluminum Tops

There's an Automobile Skate for every purpose—hockey, pleasure skating, and figure or art skating—are you ready for the demand?

Automobile Skates have a Canada-wide reputation for quality. Your line is half sold before you show it.

Some quality features: Special chrome-nickel steel that takes and holds keen edge—blade has soft, tough core rendering it practically unbreakable—Aluminum tops, etc. Write for full particulars and terms.

Above : One of our factories in Fergus where woodwork on BT Ladders is done. Insert : Dry Kiln we are building at Fergus for preparing the lumber for BT Ladders.

# Beatty Bros. Limited Bulletin

Steel Top on BT Irond Bound Step Ladders.

BT Iron Bound Step Ladder

This steel top will not warp, rot or crack. The nails will not pull out. The hinges which hold sides and risers are riveted and are solid and permanent. This ladder with its heavy steel top is far safer than any other and will last much longer.

Steel Clip which binds steps of ladder to side.

This steel clip binds every step to risers, keeps nails from pulling out and holds the iron rods which support every step. The clips add to the life of the ladder and make it doubly safe.

## BT Ladders are Best

The best is none too good when you use a stepladder. A poor ladder means a fall and a sprain or broken limb. The BT iron bound stepladders are the best because they are the safest.

# Economy Is a Great Sales Force

# SILKSTONE

(REGISTERED TRADE MARK)

## FLAT WALL COLOURS

**The Economic Appeal** is a powerful force in business to-day. Economy for your customer can also mean good profits for you—no salesman needs argument on that. It may mean larger profits on each sale, or more turnovers per year; what you as a business man want is a constant flow of money with a profit in it to your cash register. Silkstone Flat Wall Colours fill this want exactly. Cheaper than wall paper, more sanitary and longer lasting, it can be washed often and never rubs off.

Silkstone gives a beautiful, soft, silky finish. The economy of Silkstone appeals forcibly to all.

**There is something ahead for you; write for our agency proposition.**

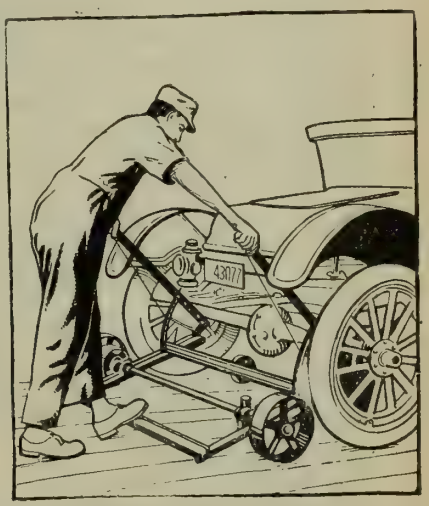
DIAMOND A BRAND — ASHDOWN'S GUARANTEE



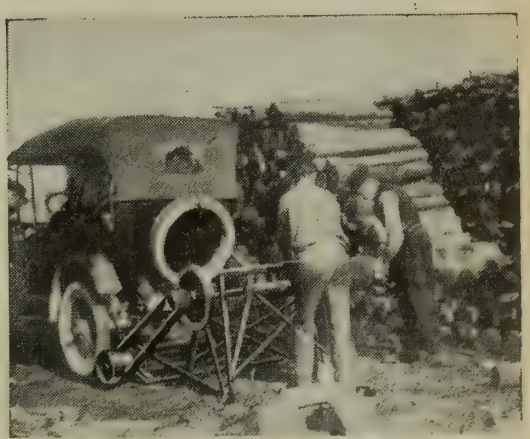
*The Trade Mark Largest Wholesale* *Behind Canada's Hardware House*

# Lay Porta-Power

## A Fast-Moving, Profitable Line For Dealers in Any District

*Fits your Car, regardless of make. No adjustment or alteration of Automobile is necessary. It utilises the power of Automobile Engines for belt power upon farms and ranches.*

Easily and Simply Applied



### Takes the Arm-Work Out of Farm-Work

La Porta-Power is a durable practical implement, well constructed, that takes its power from the rear wheels of any automobile and will develop from 5 to 20 H.P., depending on the size of the car. It acts as a portable gasoline engine, at just one-third the cost of a stationary plant. It takes the engine to the job, not the job to the engine. Wood sawing, feed grinding and cutting, pumping, ensilage cutting, silo filling and farm lighting are only a few of the farm job that this implement can be readily used for. It will not heat the engine nor injure the tires, and is a money, time and labor-saving device that ought to be on every farm. It is simply constructed and can be adjusted to fit practically any make of car or small truck.

**Good for the Dealer**

The demand for Lay Porta-Power being so great already is an indication of the tremendous sales possibilities that it opens to dealers. It fits into any line you may be handling. If you are in "open territory" we will gladly talk business.

*For years the perfect washer*

*The* **Eden** ELECTRIC

THOUSANDS of women throughout the country have learned to appreciate the many advantages and economies of washing clothes the Eden way. The **Eden Electric Clothes Washer** is a time-proved success because it washes everything from the heaviest blanket to the most delicate bit of silk or lace by dipping them up or down through hot suds—without wear or tear or rubbing or scrubbing.

The **Eden** makes clothes last five or six times as long because it washes them without rubbing. It saves time, trouble, money and hard work, and has done so in many homes for many years.

Many dealers have taken advantage of the many superior points of the **Eden,** and are handling it to the exclusion of all other makes. They have found it the most profitable machine to handle because it is the one machine that, once sold, stays sold. The **Eden** has no comebacks.

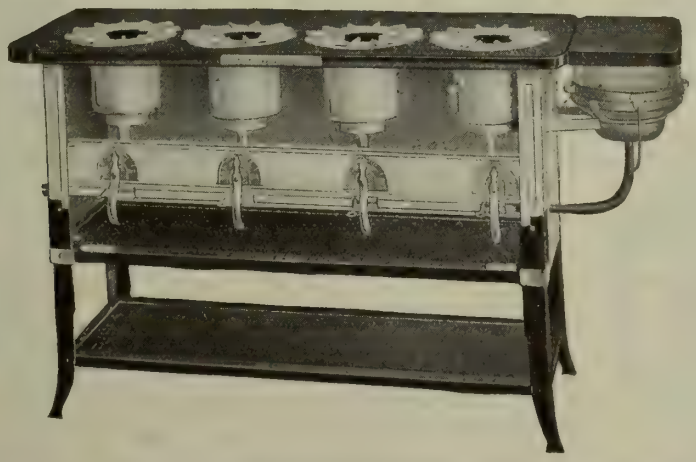
*Mechanical genius* has produced in the "Nesco Perfect" a burner so simple that the wonder is no one ever thought of it before; so practical, so dependable and reliable, that the steadiness and continuity of its hot, blue and smokeless flame rivals that of the finest gas range.

## Nesco NESCO PERFECT Nesco

Because of this and other exclusive Nesco features, it is pronounced by all who see it "the one Oil Cook Stove worthy of its name."

**An Entirely New Application of a Principle**



Instead of wrestling with stubborn, sticking, rusting gears to turn the wick up or down, instead of opening a valve—the **Nesco Perfect** way is simply to lower the burner bowl, with its non-burnable wick, down into the oil. The oil flows into the bowl, the wick absorbs it and conveys it to the flame, constantly, steadily,—always.

Rising between two perforated cylinders, the flame unites with oxygen from the air as it comes through the perforation, forming a gas producing a hot, blue flame. On its way up through the cylinder this flame is joined by another, created through the conversion of heated air to gas as it passes through a center hole. These uniting near the upper end of the burner, reach the cooking utensil, blue as the sky—and intensely hot.

***It will pay you to Investigate***

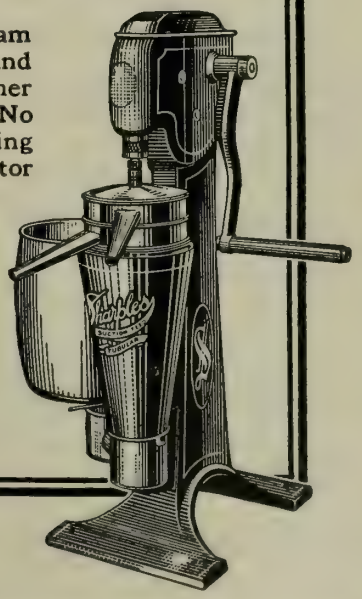
"WE DARE 'EM TO KNOCK IT OFF!"

Sharples dealers have the strongest possible selling argument for the Sharples Suction-feed Separator in saying: "It skims clean at any speed."



Dealers know that this claim has been proved time and again by official tests and by agricultural college officials. They can show prospective buyers the actual reports of these tests.

No other cream separator can skim clean at any speed. No other separator dealers dare to claim it. That is the reason for the *success of dealers who handle the*

# SHARPLES
## SUCTION-FEED CREAM SEPARATOR

***"skims clean at any speed."***

Sharples dealers have the *only* suction-feed cream separator, made by the pioneer North American and the world's largest Separator manufacturer. No other separator can adopt the suction-feed principle. No other separator, therefore, has the big Sharples selling feature, the most important that any cream separator can have—"skims clean at any speed."

We will be glad to give any dealer information concerning his territory and the Sharples contract.

*Prompt attention and quick delivery assured.*

**PEERLESS Lawn Fencing**

is the finish, the last word to beautify, protect and to enhance the value of your property. It safeguards your children, keeps out marauding dogs, animals and destructive chickens, protects the lawn, shrubs and flowers, and prevents trespassing. It is built of open hearth steel wire, galvanized, and when not otherwise ordered, we paint all fencing with a coat of high grade white or green paint. It looks well and lasts long. **Send for Catalog** of many designs, also Farm and Poultry Fencing. A complete line for all purposes.

**THE BANWELL-HOXIE WIRE FENCE CO.**
Hamilton, Ont.
Winnipeg, Man.

**Chair Seats---In Three Ply Veneer Staple Patterns**

Every C.V.C. chair seat is made of best material, well glued nicely formed and carefully bored; corners of seats well rounded, edges smoothed, sandpapered and finished with real church pew varnish.

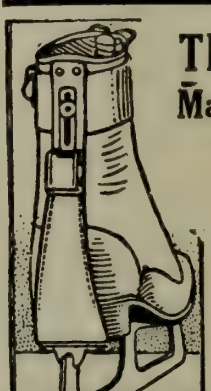
**Ask for samples, and compare with any other make.**

**Canadian Veneering Co., Inc.**
Acton Vale, Quebec
**Distributors: Richardson & Bureau, 55 St. Francois-Xavier St., Montreal.**

**Salesmen Wanted**

Men who have worked up a connection with the trade are far more valuable to you than inexperienced men. The way to locate them is through your trade paper, because wide-awake salesmen read it. When in need of salesmen use the Want Ad Page; the rates are 2 cents per word first insertion and one cent per word for each subsequent insertion, a charge of 5 cents extra is made for Box Number to cover cost of forwarding replies.

**Our Step-Ladder Chairs are Winners**



Also Step-ladders, Ironing Boards, Curtain Stretchers, Hercules Wire Stretchers, Reversible Drip Tub-stands, Clothes-bars, Eureka Post Hole Diggers, Malleable Iron Tank or Silo Lugs and Well Points.

Prompt attention given your enquiries.

**The Real Ankle Support That Makes Others Look Like Imitations**

Sell Perfection Ankle Supports—the only sure and comfortable ankle support on the market.

Made from the best quality of steel, and is so devised that by means of a hinge and sliding attachment the ankles may bend forward or backward, but simply can not bend sideways.

You'll sell more skates this winter as well as supports if you handle this line.

**Write us for prices.**

Opportunities are offered every week on this page.

Are You making use of them?

## Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

**WINDSOR, ONT.**

# Our business doubled this year

WE did twice as much business this year as we did during any other year in our history.

This shows that merchants realize more than ever before that they should get their store records quickly and economically by machinery instead of by the slow, expensive hand method.

It shows in the best way possible that up-to-date National Cash Registers are helping merchants solve their problems most satisfactorily to themselves, their clerks, and their customers.

It is the very best evidence that our efforts to build a labor and time-saving machine are appreciated by merchants everywhere. It shows that up-to-date National Cash Registers are meeting the needs of retail stores in every country in the world.

## Up-to-date National Cash Registers are a business necessity

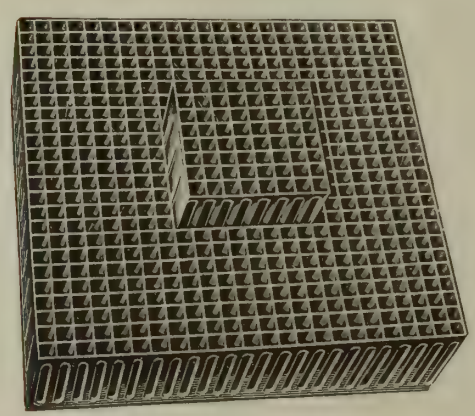
# McKINNON RADIATORS

## *Really Cellular*



It is easy to break an ordinary radiator beyond repair, a condition that entails wholesale waste, because scrapping an ordinary radiator entails scraping the expensive tanks and other accessory parts.

The McKinnon Radiator solves this big waste problem—Its core is made up of individual cells, which can be fitted into any radiator frame work—

This is very valuable information for the auto owners and garage men—We supply new cores that will fit ANY RADIATOR SHELL.

Corrosion is also one of the evil influences of water on the radiator—We overcome this by carefully tinning the inside and outside of McKinnon Radiators. The sides are straight downward, and corrugated so that the water is constantly in agitated action carying sediment away from the sides, so that the heat can be transferred to the sides and carried away by the cool air passing through the air cells, keeping the engine cool.

The water pockets are also constructed to permit of an outward strain many times before a burst will take place—

Vibration has no terrors for the McKinnon Radiator—because it is a solid unit not an aggregation of tubes, fins and separate pieces.

This is one line every garage man and dealer should carry.

# O-Cedar Polish

## "In Season" EVERY SEASON

The modern housewife needs O-Cedar Products every day. Their sale is therefore a steady one—and dealers appreciate this all-year-'round O-Cedar demand.

True, O-Cedar Polish and the O-Cedar Polish Mop are especially in demand at House-Cleaning Time, in Spring and Fall—but not a week goes by in the average modern home, without some use being found for these practical household helps.

Nearly every home has now replaced the heavy carpets of older days with smaller rugs—leaving a border of painted or varnished floor—and floors need dusting and polishing more often than furniture.

Many a housewife looking for an easier, better way of dusting than the old back-breaking methods of reaching and stooping, knows of O-Cedar through our Advertising—but does not know that you sell it. **You should let her know it.**

Give O-Cedar Products a prominent place in your store; display them attractively in your windows; suggest their use to your customers—and you will sell them in such quantities as to make the O-Cedar line one of the most profitable that you stock.

## CHANNELL CHEMICAL COMPANY, LIMITED
TORONTO

# The Kettle with the Cool Handle

# UNIVERSAL ALUMINUM WARE

FOR over fifty years "Universal" devices have led a consistent crusade against the crudities that encumber the home kitchen and turn it into a warehouse. Countless thousands of housekeepers have bought "Universal" kitchen utensils—to their satisfaction. They are the women to whom you can now sell the new Universal Aluminum Ware—the better kind for **cleaner cooking** and **easier cleaning.** "Universal" is built stronger to last longer than the usual run of aluminum ware. Proof is yours for the asking. Ask to-day.

# More DAYLO Customers *for* January

*A NEW and unusually large supply of Daylo purchasers for January is in preparation. They will be ready for delivery to your door January first, guaranteed ready to push their dollars over your counter.*

*We are gathering these buyers from one of the most promising fields that exists among Daylo users—the factories and other industrial plants.*

Daylo magazine advertising for January and February will create a big market for Daylo and Tungsten Batteries among the industries of the entire country.

The magazines have been chosen to reach both employer and employee, and the ads themselves, some of which are reproduced above, will drive home to every plant official and worker the vital necessity of Daylo to increase production, to shorten break downs, to eliminate delays and to increase the profits and pay envelopes.

Right around you there are factories and workers who will be ready to buy Daylo goods in quantities or singly. They can be brought to *your store* if you will join with us on this campaign by making a suitable display with materials which we supply free of charge.

All you have to do is to join the Ever Ready Team workers. Use the coupon below to find out the details. Act now so as to get in on the January drive.

Canada. A-1121

# Souvenir Ranges and New Idea Furnaces

## bring Success and Satisfaction

SOUVENIR RANGE
Without Reservoir

## Why They Sell Well

The furnace that heats the house economically and the kitchen range that gives satisfaction to the housekeeper, are easy to sell. Briefly, these are the reasons why **"Souvenir" Stoves and New Idea Furnaces** have stood the test of seventy-five years and kept the favor of dealer and consumer.

Keeping step with modern invention, they have reached the top-notch of efficiency and the dealer who introduces them into his locality finds a steady and increasing custom.

## What They Are Like

Every Souvenir Range will sell on its appearance alone. Well made, with nickel trimmings, glass oven door, thermometer and other modern appliances, it combines perfect cooking and baking with economy in fuel consumption.

The New Idea Furnace is guaranteed. Through a patented duplex grate every scrap of fuel is consumed. An extra large ash-pit prevents ashes banking.

Furnaces and ranges in a wide range of sizes and styles.

## Satisfaction Guaranteed

The manufacturers of Souvenir Ranges and New Idea Furnaces aim to co-operate with the dealer in giving satisfaction to customers.

# What Your Fellow Merchant Thinks of Neōlin Soles

A. H. STEVENS,
**The Modern Shoe Repairing Plant.**
Electrical Heated and Operated Machinery.
**First-Class Work Promptly Done.**

St. Stephen, N.B., Feb. 28th, 1919.

Messrs. Goodyear Tire & Rubber Co.,
of Canada, Limited,
Toronto, Ont.

Dear Sirs:—

Having sold my interest in the repair firm of which I was a partner I have opened an up-to-date Shoe Repair Plant, on my own account, and would like to be placed on your mailing list. I want to receive the advertising matter you are sending the repair trade. I have been following your advertisements on Neolin Soles, which have appeared in the daily papers and magazines, and I find that the public demand for Neolin is speedily increasing as a result of same.

From a repairman's point of view, I am much interested in your advertising, as you are advertising to help sell more shoe repair jobs.

When I opened my new shop, I immediately put in stock of Neolin Soles and Wingfoot Heels. My past experience with Neolin has been so satisfactory that I would not consider carrying on the repair business without same, no more than I would without modern shoe machinery.

Wingfoot Heels are also very necessary to have if customers who appreciate real value are to be successfully catered to.

I am now using your fifteen iron sole and intend to give my customers the choice of either style 146 or style 196.

Will be glad to receive Repair Tags at your earliest convenience.

Yours very truly,
(Signed) A. H. STEVENS.

# Neōlin Offers the Greatest Value In Shoe Soles

Pick out fifty aggressive shoe retailers—men whose business has increased steadily in the last three years. Ask them exactly what they think of Neōlin Soles, as against all other soles. They will convince you of the great service rendered by Neōlin Soles to all concerned in the manufacture, sale and purchase of shoes.

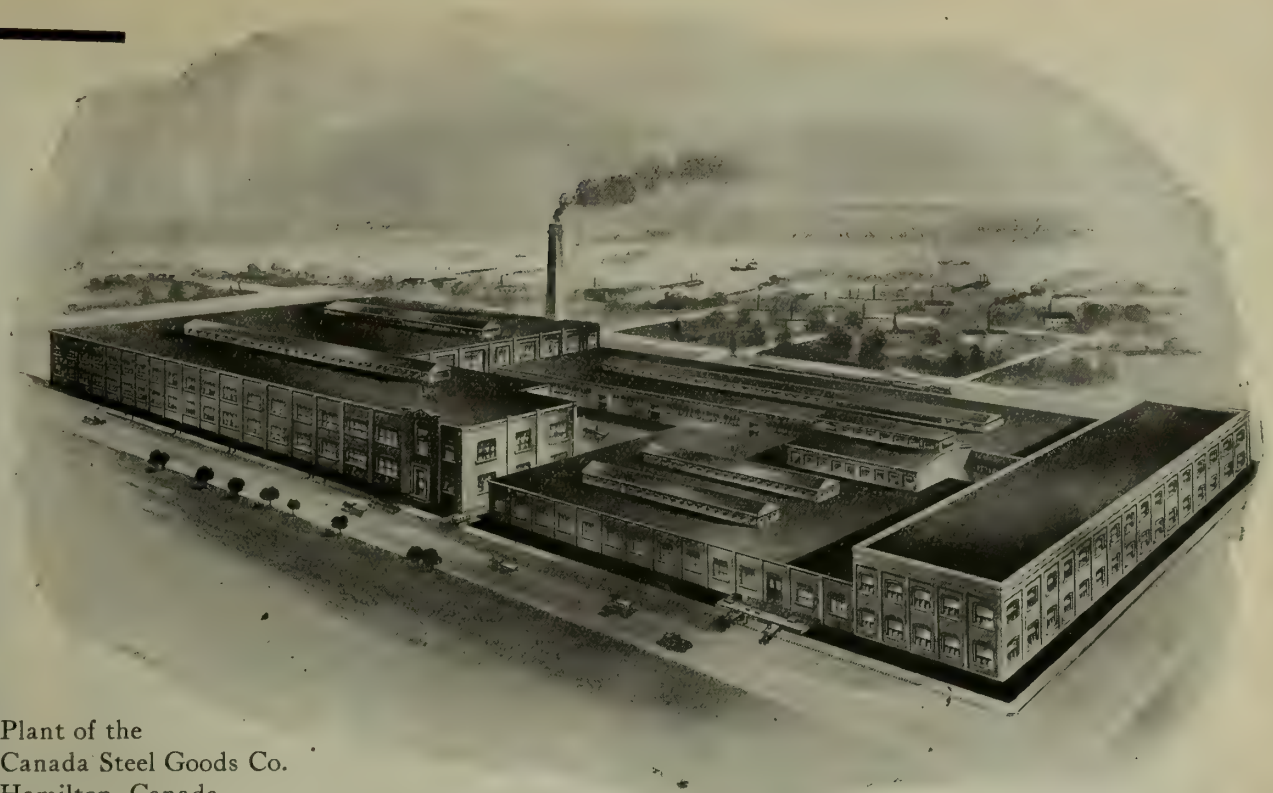
## How To Sell Chucks ---And More Chucks

Sell your customers the chuck which has made good with the greatest number of users — the Jacobs Chuck.

Jacobs Chucks have become the accepted standard. They are the choice of the man who handles tools—the preference of the man who buys equipment. They ease, speed, and safeguard the driller's work—they reduce the broken drill account of the purchaser.

Why not sell these chucks for which there is the broadest demand based upon performance?



The Jacobs Chuck is but another of those small articles which have proved most profitable to Canadian hardware dealers.

# 'HEIRLOOM' PLATE

*Embodied in 'HEIRLOOM' PLATE are all the finer characteristics and refinements associated with that beautiful Old English plate which has always been considered the highest attainment of the Silversmiths' art.*

Many of our master craftsmen received their early training in the factories of Sheffield and Birmingham. The result of their experience and ability is aptly represented in the chaste and artistic designs of 'HEIRLOOM' PLATE productions. In addition to beauty of design, 'HEIRLOOM' PLATE has an extra heavy plating of silver, which means exceptional wearing qualities.

It will give you satisfaction to sell and recommend 'HEIRLOOM' PLATE.

# Clark Indestructible Steel Heaters

## *Make Hard Winters Mild*

### The Trade Builder--No.8A

No. 8-A is a popular style for Limousines, Touring Cars, Sedans, etc. This splendid heater is a 20-inch oval type with extra heavy indestructible steel body. No. 8-A is perfectly insulated with asbestos; covered in finest plush carpet in four distinctive shades of gray, blue, green and maroon.

One of the strong selling points of the No. 8-A is the double fuel drawers—one in each end. This makes it possible to use one or both drawers to suit conditions of comparatively mild, or extremely severe, weather. The carbon brick gives heat all day.

The efficiency, beauty and comfort of the No. 8-A, like all Clark Heaters—make it easily and quickly sold at good profits.

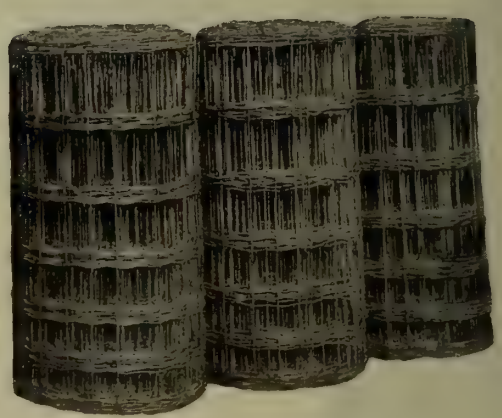
# *As a business proposition*

**—would you rather sell**

**or**



Frost Fence has enabled many a dealer to do this. You can do it, too.

Put your fence business on a firmer foundation.

Your hardware business must grow, and if it is to grow every article must be a sales-builder.

Take fence. Fence, at first glance, and unless two rolls are compared side by side, looks more or less the same. The fence that is one or two cents per rod lower in price wins out among those who have not learned through experience. But those who have learned through experience decide differently.

FROST FENCE is made up to a quality regardless of a trifling fluctuation in price. Dependable materials are put into it and dependability has made

# More Men Want Razors They Can Strop

Your barber uses a regular razor that can be stropped whenever necessary—often when you're half-shaved. Have you noticed how many more men are calling for regular razors made to strop?

Set the GENCO Display Cabinet on your cutlery counter. Sell them razors built to strop—GENCO Razors. Show them the broad back on every GENCO, its hollow-ground blade, that important bevel backing up its edge. These three features perfect a blade that anybody can strop. They compel every GENCO to meet the strop at the scientifically correct angle.

The GENCO Display Cabinet stops men, going and coming. The above-stated facts sell them. And you can be certain of making satisfied customers because of our full guarantee—"GENCO Razors must make good or we will."

A handsome display cabinet free with your first order—customers telling other men where they bought their razors—good round profits for you on every sale.

Write to us for information to-day.

# You're Next!

The Board of Commerce attacked the Packers, and there was, on the whole, general rejoicing. The Packers were few—those who enjoy bacon many. Doubtless many—in ignorance of the facts—thought the Packers were "gouging."

Then one of the Commissioners criticized the farmers. It was a false step—a skid which he has probably lamented and has endeavored to repair, for it has lost him much popularity.

Now the Board of Commerce is setting prices for the retailer. It has dealt with some grocery lines—with clothing.

THE FINANCIAL POST brings out the dangers of the Board of Commerce's course. Dealing with this price fixing, THE POST'S expert writes:

> "For instance, the percentage of profit on bacon and boned ham is set at 20 per cent. The merchant naturally asks on what basis he is to reckon his 20 per cent., and there is nothing in the published report of the ruling to assist him. Does it mean 20 per cent. on the price he actually pays for the goods? That is probably the viewpoint that any court would take of the matter, yet as every sound merchant knows, 20 per cent. on a buying price is just 16 2-3 per cent. of the selling price, and it is only the profit on the selling price that represents the actual profit to the merchant.
>
> "The lowest cost of business for such retail stores is between 18 and 21 per cent., according to the class of business done. Take the cost of doing business at the modest average of 19 per cent. and on bacon selling for 60 cents a pound the retailer on the basis of profit outlined above loses 1 4-5 cents on every pound of bacon sold. If he slices the bacon he is permitted to take 2 cents a pound more; that would seem almost to let him out even.
>
> "There is, however, the large element of waste to be considered here; the ends of the ham or bacon must, of necessity, be a complete loss, which the merchant who slices his bacon has himself to meet. That the two cents per pound margin is pitifuly small to cover these items of loss is illustrated by the fact that the New York City fair price list sets the margin for slicing bacon at 5 cents a pound, believing that it requires that amount to cover the element of loss in the process.

If you are a grocer or a clothing merchant you want to follow the actions of this Board—to have the clear light of understanding brought home as THE POST brings it home. If you haven't been touched yet—well, **"You're Next"** and equally you require to be informed.

To this end subscribe for this business man's paper—

# Courage Plus Ideas Works Wonders

## Fabien, Limited, of Montreal, Make Bid for Christmas Toy Trade—Spend $150 for Single Background—Kiddies Flock to Witness Display—Bicycles and Sporting Goods Big Sellers

Based on an interview by A. H. ILLSEY, of Hardware and Metal, with M. Fabien, of Fabien, Limited, Montreal.

"WE believe that the people want a good line of toys and that they will buy them. We are starting right by putting in a stock of $2,500 worth to begin. We shall depend upon the children to advertise them and I think that it will pay us to spend this $150 for that background."

This is the "nutshell" story of Fabien, Limited, as it relates to the latest addition to their stock, that of toys. This store, located in the city of Verdun, at 1177 Wellington street, has watched the possibilities in its district.

"We have worked hard, and as we are both young, we look forward with confidence," said Mr. Fabien to HARDWARE AND METAL.

While there is one advantage in the store's location, it being situated in a comparatively new section of Greater Montreal, the "boys" have made the best use of opportunities, and that's "the why" of expansion. Passing through the difficulties of the war period, the firm is now reaching out for that business which it believes will be profitable, and for which classes of goods the demand is growing.

In this connection it is very worthy of note that the really big stores, located in the Metropolis, draw thither great crowds from all sections of the city and its suburbs. To divert the hundreds of prospects to the smaller store, Fabien, Limited, are making a strong bid, and are confident that they will win.

### $150 For Background

HARDWARE AND METAL has always stressed upon the great importance of paying heed to the window background. It has not advocated the elaborate idea that the above firm is now carrying out, although the plan may be a winner, as adopted by them.

"I think we should go after the business right if we want to get it," said Mr. Fabien, "and while the background cost us $150, we can use it several times and I think it will pay."

Beaver board was employed for the basis of the winter scene, which the artist, employed by the firm for this work, developed. It is some twenty-one feet in length. The whole scheme is carried out on the very same principle as that of a well-designed stage scene, and arrangements have been made to secure the full advantage of electric lighting at night. This is planned with a special eye for the interest that will attach to the display for the kiddies, and it is these juvenile trade-pullers that the plan is designed and provided for.

"We just want to interest the kiddies; they will bring their parents. They will be saying: 'I want the toy I saw at Fabien's, that's where you will get it,' and the parents are sure to come."

### Santa is a Live One

To illustrate how well, and how decidedly pre-conceived, the whole plan has been, provision was made for using a real moving "Santa," which will pull the youthful enthusiasts to the window, where, without question, they will linger

*In the above display in addition to the striking colors in the background, sunset, snow capped trees, bridge and water, action was secured by having the windmill in operation, also Santa Claus in the distance with reindeer and loaded sleigh. This is a motion idea worked out with a motor propellor and attracted much attention.*

*In this toy department there is plenty of light and ample room. Note the display tables. These always help sales and save the time of salesmen. Note the arrangement of wall paper and the easy access to any desired section.*

for many an hour. This arrangement has been provided through the use of a small electric motor, and through placing the scenic effects in varied positions, the alternated "pieces" of this background permit of the Santa Claus figure moving along from end to end of the window. At either end this moving figure descends and passes beneath, appearing again at the other end, and following the endless chain principle. A moving windmill scene is also depicted. The reader may well imagine that this plan is really effective, and it is bound to be a big advertisement for a class of goods that are considered seasonable within stated periods, and when "showing" is worth infinitely more to the store than much newspaper or other advertising. "Kids" are the greatest advertisers in the world for toys, from six weeks before Christmas, to the very eve of the glad day.

The background, costing this considerable amount, will be preserved and used several times. It may be retinted in the spring and summer, for instance, to afford the proper backing for bicycles and accessories, in which lines the firm do an increasing business.

### Electric Signs—Display

The window is a wide one—over twenty feet. At the back it is entirely closed in and panelled off from the rest of the store, light being permitted to reach the store from above a line, about five feet from the floor. The base of the window is of hard maple, oiled and varnished.

"Box" pattern electric signs—four of them, are placed at the front of the window, and these are of the interchangeable letter type. In this way any desired wording can be used, and the advantage of drawing passersby at night is possessed by these signs, and in this rests their big value. "Better Toys For Less Money," "Buy Here and Save Delivery Delays," "Here's What Your Boys Want," and scores of apt signs might be worked out, and there is the advantage of changing weekly, or even daily, if one desired. Two signs were used with the first display of toys which read in English: "Buy Your Xmas Toys Here," and in French: "Achetez Vos Jouets ici."

Sunken sockets are used in the window, to which these lights are attached, thus eliminating unsightliness from cords that would have to be connected, otherwise, to the ceiling "drops."

In connection with the laying out of the windows—in fact all through the store, Mr. Fabien has drawn on his own experience as a draughtsman, the fixtures in his store being more excellently adapted to the stock, for which they have been designed.

*This illustration which is half the size of the original is seasonable and has a real message to Christmas shoppers.*

### A Separate Display

The toys will be displayed in a separate room. This has several advantages. The most important of these is that of getting the prospect "away from the crowd." Just place oneself in the position of buyer, and it is readily understood what an advantage it is to be left alone while deciding upon a purchase. This is eminently more the case with a line such as toys.

And so a room was recently planned for, and added. This will be used exclusively for wallpaper and toys. (The wallpaper will be referred to later.)

Passing through from the store, and about halfway back from the entrance, a door was cut into a room, that is, say, 20 feet by 20 feet. Tables placed on the floor contain the bulk of the toys. As an investment of about $2,500 has been made in the toy stock, it will afford a comprehensive showing to be made of dolls, dolls' carriages, toy wagons, rocking horses, and the countless lines that will prove good sellers. As the department is just being opened, it is not possible to outline, just now, what the sellers will be.

An important matter has not been lost sight of, and this is that of a display of toys in the main store. When the representative of HARDWARE AND METAL called, Mr. Fabien was busily engaged in completing a table on which he expected to make a showing of toys the same evening. This possesses the advantage of again suggesting to the customer entering the store that toys are sold; then

direction can be at once made to the department just outlined.

### A Novel Feature

In catering to the trade, Mr. Fabien has discovered some things of value in directing the display policy that has been followed. All boxes and drawers are of uniform finish and are very neatly made. The usual idea of sampling is carried out on the hardware side with good effect.

For some time bicycle accessories have been carried in a silent salesman. The idea, while alright, has been abandoned for what is expected to be a much better plan. The new idea is that of carrying the stock in a case, or rather a cabinet, which takes up, say, four feet of wall space. The cabinet contains about 130 drawers. This will afford accommodation for scores of all kinds and sizes of bicycle parts, and for many types of sporting goods. The drawers are of several sizes, conveniently arranged to carry the minutest and the biggest parts. At the base, the drawers are much larger than those at the top, and are deeper. In these lower drawers bicycle spokes and mudguards, etc., may be kept. In some of the drawers, already, dozens of baseball mitts and gloves are kept, no dust entering to destroy the leather.

A movable panel will be provided right near this case, but to rest on the floor, and this will be the "sampler." Beneath, or on each article so displayed on the panels (for there will be several of them as with a wallpaper display rack), a price card or sticker will give the cost, the selling price and the location of the article. The stock can then be at once located, without loss of time. This will prove to be an excellent feature.

Flashlights are sold in considerable quantities, and the city carters buy these to locate addresses after dark.

### After Wallpaper Trade

The firm anticipates the probable demands of its growing trade, and this has caused the management to make provision for a wallpaper stock, part of which has already been received, the balance to come forward as the manufacturer finishes the patterns, which have been ordered. Montreal is a great place for wallpaper sales, and in a fast-growing section, such as this is, the demand for paper will constantly increase.

Reference to the photograph depicting the toy department, shows that ample space has been allotted the wallpaper stocks. Fully 150 patterns can be carried, and the various racks will prove of ready and easy access. Panelled racks, while not visible in the photograph, have been erected near the wall adjoining the hardware store, and these were designed after the ideas of Fabien himself, and made by him. Each panel is about 16 inches wide; is made of beaver or wall board, while all are made on the socket principle, affording space for scores of patterns, with borders attached.

If a change of pattern is desired, all that is necessary is to remove the wall board panel and repaste another design to it, slipping it into the receiving slot again.

### Will Push Bicycle Sales

The distance of Verdun from the city of Montreal, proper, is considerable. Many workmen pass back and forth, and either have to travel by the tram car, or by other means.

"We expect a big year in 1920 for bicycles," said Mr. Fabien. "The high rates charged by the street railway company will be a big help, too. A great many will be persuaded to buy bicycles."

Fabien, Limited, have sold an increasing number of bicycles each year. Hooking their 1920 campaign up with this idea—that of saving money by riding a "wheel"—it will be interesting to watch the development of bicycle sales along this line. It is a mighty good suggestion, which, when carried out, ought to be resultful.

It will be noted that display is made of tires and inner tubes. Scores of the little accessories which yield a good profit are carried, and this new case, so clearly outlined in the photograph, will contain the surplus stocks of these particular goods. A good grade of bicycle is carried, and each new customer proves an advertisement for other sales to come.

The Fabien boys have used their connection with baseball, etc., to good advantage, in developing trade for baseball and sporting goods, and take a

Continued on page 76

*In the store of Fabien Limited, bicycle and other sundries are kept in the cabinet on the left. While it only occupies small space being about four feet wide, there is room in the drawers for a large amount of merchandise which is kept neat and clean. Note the sample racks on the floor.*

# Basis for Determining Profits

## Statement Submitted to Board of Commerce by the Provincial Board of the Retail Merchants' Association of Canada

AFTER going very carefully into the question of "the Basis for Determining Profits," in an effort to remove the many false impressions which have been created in the mind of the public by sensational and unfair inferences drawn by the daily press from investigations, the Manitoba Board of the Retail Merchants' Association of Canada, Inc., has submitted the following to the Board of Commerce:

The retail merchants regard the establishment of the Board of Commerce with satisfaction, and welcome the opportunities it affords for fair discussion of merchandising problems. The advances in prices of all commodities, particularly foodstuffs and other necessaries of life, during the past four years are without parallel in the history of retail trading. They represent to a considerable extent the increases in the cost of living from which the unsettled conditions of the present time largely arise.

### General Impression.

There seems to be an impression, in the minds of some people at least, that the retail merchant is responsible in an unwarranted degree for these advances, that he is now and has been making more than a legitimate profit during these times of high prices. The investigations being conducted by your Board at the present time are for the purpose of determining whether this is so, and if so to devise a remedy. As representing the retail merchants of Manitoba we welcome this investigation, and if profiteering among the retail merchants in Manitoba or any other place be found, we shall in every possible way assist you in curbing the profiteering and in punishing the profiteer. But neither your Board nor the public can come to a just conclusion unless all the essential facts are presented to you. It is because we believe that these are not being presented to you, and because of the misleading way in which even the material presented to your Board reaches the public through the newspapers, that we desire to supplement the detailed evidence, which you have obtained and will obtain, by this somewhat formal statement. We believe that we are asking only what is fair when we suggest to your Board that in future examinations of witnesses in connection with retail merchandising you should see that evidence is obtained on all points essential for not only your Board, but for the general public, in coming to a fair conclusion.

### Retail Quotations

The public's knowledge of prices and values is almost solely confined to the retail quotations. As a rule they do not consider and are not aware of all the elements that necessarily enter into the determining of the retail prices of goods.

The public is prone to consider as profit either the difference between the retail price and the invoice price, or the difference between the price which the consumer pays to the merchant and the price which the merchant pays to the wholesaler or manufacturer, without taking into consideration the numerous other elements which enter into the cost of the goods to the merchant and all of which must be added, such as freight, rent, wages, insurance, delivery, paper, twine, interest, losses on unsaleable goods, etc., etc.

### Not Given Fairly

We do not say that your Board will not give consideration to these facts, but we do believe that in the evidence so far submitted these factors have not been placed before you as fairly and fully as their importance warrants, nor in such a way as to enable your members during the course of your proceedings to judge fairly the relation of the retail merchant to the present high prices. If any of the remarks which we have made or may make should appear to criticize either the evidence which has been obtained or the method of obtaining it, the reason is not that we are desirous of being critical, but we are desirous of seeing that the case of the retail merchants is presented fairly and fully to you and the public. Looking at the matter from that point of view, that is, from the point of view of having the evidence as to the retail merchants' relation to the high prices presented fully, we believe we have reason to complain. The evidence so far obtained and the method of obtaining it have been defective in these respects:—

### Confused the Prices

1. In the confusing of the marked price with the ultimate price at which the goods are sold.

2. In considering as profit the difference between the invoice price of a particular article and the marked price of that article, instead of considering as profit only the difference between the cost to the merchant of the article up to the time it is delivered to the customer, and the price which the customer pays for it. What is really the only true way of measuring profit is by finding out the difference between the total cost to the merchant of all articles sold during a given time, such cost including every legitimate charge of doing business, and the total price which he receives for the goods sold during that time.

### Was Not Considered

3. In not considering as part of the cost of the sold goods such items as freight, insurance, interest on the cost of goods, interest on moneys spent in equipment and furnishings, depreciation of equipment and furnishings, rent, taxes, wages, cost of paper, twine and other accessories, stationery, etc., advertising, cost of draying and delivery, cost of collection of accounts, bad debts, etc., as well as the probable quantity of goods which must be sold below the marked price. All of these must be paid by the merchant and are as much a part of the cost of the goods sold as is the invoice price, or price paid to the wholesaler or manufacturer, and all of them must be taken into account by the merchant in fixing his marked price. The charge of profiteering should not be made or suggested against any merchant unless all of these additional factors have been examined and taken into account.

### Unfair Inferences

The confusion of terms that surrounds the discussion of profits is responsible for most of the unfair inferences that have been drawn by the public from the investigations by your board. The principal subject of interest is the profit, and various conclusions are reached as to the amount of this profit. We beg to point out that there is only one kind of profit in business, and that is net profit. What is erroneously described as gross profit includes the expense of transacting business. No corporation or firm can ignore operating costs when calculating its net earnings.

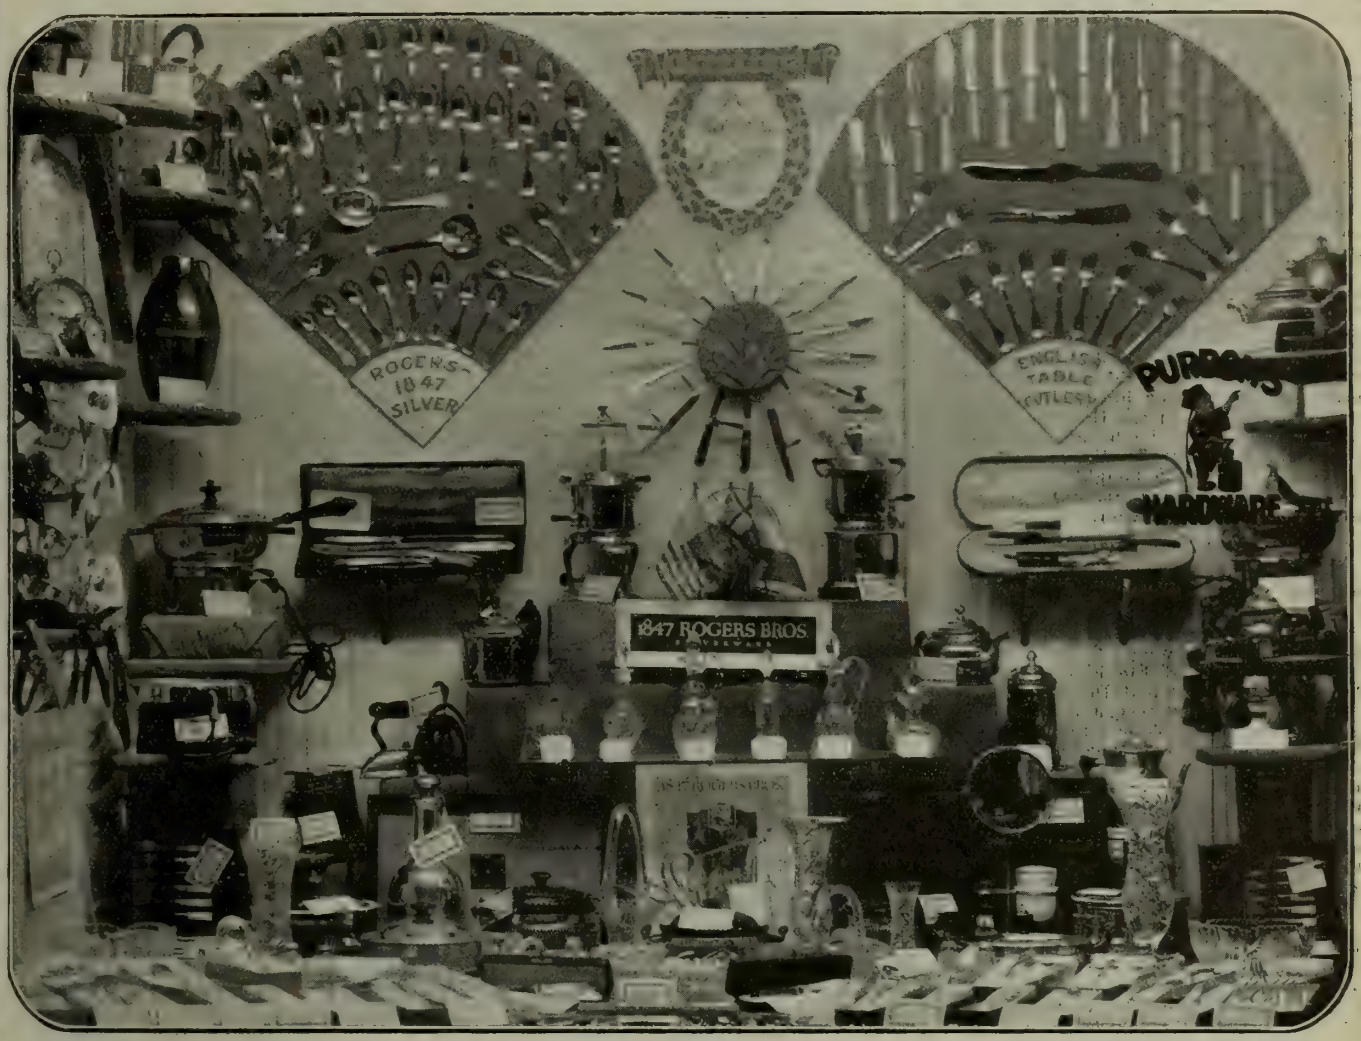
### Question of Profit

Reverting to the question of profit, it is evident that a sale price must be established before the dealer can determine his net earnings; in other words, an actual sale must take place. No great amount of economic argument is required to prove that the price established in a sale must be made up of three factors—invoice cost of merchandise, cost of doing business, and net earning or profit. For convenience of discussion, let us consider these as "A," "B" and "C" respectively. "A" is the price at which the goods are supplied by the manufacturer or jobber, and, of course, it is not under any control by the retail merchant. "B" includes all the items that enter into the cost of handling the goods from the time they leave the manufacturer's or jobber's hands until the sale of them (by retail) is completed. It is only partially controlled by the retail dealer, because the public under the competitive system of merchandising now obtaining demands the utmost in service. The difficulties in this connection are increased, too, through the growing tendencies of outside organizations to dictate methods and terms to merchants as employers. "C" is determined solely by the selling price, and is therefore controlled absolutely by the retail dealer. It constitutes his return on the transaction involved in the sale of the goods. Let us repeat here that there is and can be no return until the goods are actually sold.

### The Selling Price

It follows as a matter of course that the selling price is made up of "A" (invoice cost—uncontrollable) plus "B" (cost of handling goods and transacting business—partially controllable) plus "C" (merchant's return or net earning—controllable). Under normal circumstances this state of affairs prevails, and the three items may be segregated. In our opinion the only fair method of determining net earning or profit is to ascertain the relation or ratio of "C" to the sum of "A," "B" and "C" in a series of transactions covering a definite period. It is only when "C" is examined in this light that anyone can form an opinion as to whether the profit is excessive. In other words, a charge of profiteering or unjust dealing with the public can be sustained only when it is shown conclusively that the proportion "C" bears to the sum of "A," "B" and "C" is unduly large.

### How It Works



For example, suppose a merchant buys one hundred pairs of boots, paying the manufacturer at the manufacturer's place of business $10 a pair, and marks them for sale at $15 a pair. If only these two factors are considered there would be an apparent profit of fifty per cent. on invoice cost. If the information goes to the public in this bald fashion some at least of the people draw the inference that the retail merchant is making the profit of fifty per cent. At any rate there is the suggestion, and too often the inference, that he is making an unreasonable profit, that he is contributing unduly to the high cost of living, and that he is a profiteer. Before the merchant can establish the price at which he proposes to mark the goods he must take into consideration all of the factors which have been mentioned, and probably many others.

### Must Pay Interest

In the first place he will have to figure paying interest on the money with which he has bought the goods, because, as you are aware, the banks do not loan money for mercantile purposes without charging interest. He will also have to pay the freight on the goods, and, if they are bought outside of Canada, the duty as well. He will have to pay also cartage on the goods from the station. He will also have to charge against these boots—every pair of them—a proper proportion of all his other expenses of doing business, that is to say, rent, light, heat, interest on the cost of his furnishings, depreciation in stock-in-trade, wages, paper,

(Continued on page 54)

# HERE'S A SUGGESTION—

*This window, which was dressed for the Purdom Hardware Co., of London, Ont., by L. W. Misener, has a real selling value, besides being striking and very attractive. Special attention was given to lighting effects. Note the splendid selection of really useful articles for gifts. The window, while well filled, is not overcrowded and the articles shown do not lose their identity. Note the prominence given to price cards. Note also the little shelves containing shaving brushes, razors and other articles.*

## HARDWARE AND METAL
## *Window Display Competition*

### EIGHT CASH PRIZES
### Are Offered as Follows:

| (Places Under 5,000) | | (Places of 5,000 and Over) | |
|---|---|---|---|
| First Prize | $10.00 | First Prize | $10.00 |
| Second Prize | 5.00 | Second Prize | 5.00 |
| Third Prize | 3.00 | Third Prize | 3.00 |
| Fourth Prize | 2.00 | Fourth Prize | 2.00 |

This means an absolutely fair and equal chance for the hardware man in the small town or the big city. The field is wide open to the window-dresser with ideas.

The only condition in connection with this contest is that the windows must be dressed with merchandise for the Christmas trade. The winners will be those who in the opinion of the judges have put the greatest "pull" into their displays.

The contest closes on Thursday, January 1. Photos received after that date will not be entered unless there is proof that they have been delayed in transit.

All matter must be addressed to "The Editor, HARDWARE AND METAL," 143-153 University Ave., Toronto, and marked "For Christmas Window Contest."

***Competition Open to All Hardware Dealers or Their Clerks. : : : : Get Busy and Win a Cash Prize!***

## BASIS FOR DETERMINING PROFITS

Continued from page 52

twine, stationery, etc., book-keeping and accounting, collection of debts, bad debts, delivery, advertising, as well as a proportion of the loss which would come through the fact that he will almost certainly have to sell some of the boots at a lower price than the marked price. It is only when a retail merchant has taken these into consideration, basing the amount on his experience of previous years, or on the experience of others, that he is in a position to fix what is a reasonable marked price.

### Must Be Considered

Similarly take the case of bacon. In addition to the other items which have been mentioned as having to be considered by the merchant in fixing the retail price, he must take into consideration the following:

Diminution in weight resulting from evaporation.

Loss in the process of slicing, because certain parts are less saleable or unsaleable.

Loss from the fact he buys bacon wrapped in heavy papers, pays the same price for the paper as for the bacon, and loses whatever has been paid for the paper. The weight of the paper so bought, and which the merchant loses, may amount to many hundreds of dollars in a year.

### Cost of High Living

It is the opinion of merchants who have given deep thought to the question that the prices the consumers are paying to-day are due to the cost of high living, rather than to the high cost of living. This condition is reflected in some of the items that are included in the analysis of the cost of doing business. For instance, one of the details of expense that shames the merchant is the cost of delivering goods to his customers.

During the past four years, owing to the higher prices of labor, of equipment and of feed, that cost has grown enormously. The expense of keeping a horse has actually doubled during the past two years. When in the evolution of retail trading the merchant undertook the work of delivering, he entered the field of transportation. Instead of charging for the service rendered by him in that field, as ordinary transportation companies do, he was unwise enough to carry it on gratuitously. He was obliged to include the expense among the items that made up the cost of doing business, which meant that it was reflected in the price of the goods.

### Has Included the Cost

The result has been that ever since he began to deliver he has included the cost of service in his retail selling price. It may be added here that retail trade delivery is the most expensive kind of transportation known; it is also worth while to mention that the public has unfortunately been taught to expect a maximum service in this particular. It is the function of the retail merchant to serve the public, and he has now little or no option. If he wants the business he must furnish the delivery. The custom has extended itself so that he cannot control it. It may be that sentiment among retail dealers is favorable to a restriction in delivery service, as recent efforts at reform would indicate. But the general principle of full deliveries cannot be changed. Therefore, the customers who live near a store and carry home their purchases usually pay the same prices as the ones who demand that the articles be delivered in some distant and widely-separated parts of the city. There are frequent occasions, indeed, when the cost of delivery exceeds the selling price of the goods delivered.

### Important Factor

We are discussing the subject of delivery at some length because we believe your board is interested in learning about its important bearing on the distribution of merchandise at retail. We would go so far as to suggest that your board consider the advisability of securing to the customer who performs delivery service for himself the benefits of that service. An innovation of this kind would exert a very beneficial influence economically, because it would lead directly to reductions in the retail prices for many lines of goods. We believe that any customer who desires to save the cost of delivery on his purchases by taking the goods with him should have the opportunity of making that saving. The only way in which that saving can be assured to him is by a policy of charges for deliveries.

### Dictate Methods

We have already referred to the growing tendencies of outside organizations to dictate methods and terms to merchants as employers. The principal manifestation of this development is to be found, of course, in the case of wages. The increases in wages paid to employees of retail stores during the past two or three years are unprecedented in the history of business. The situation gains seriousness chiefly through the fact that a considerable part of the service purchased by the merchants is inefficient and indifferent at the beginning. The increasing scale of salaries is being paid to employees who come to the place of business uneducated for their work. This fault is largely due to the Government's failure to furnish institutions of education in which employees may be prepared for business careers. Under present circumstances it is essential that the staff be trained by the merchant. Even during the period of education or training, however, they are receiving large salaries based on the current cost of living. As salaries are by far the most important item in the expense of retail business, this state of affairs naturally increases the retail prices. It would seem to us that reforms by the Federal or Provincial Government would terminate the unfavorable features we have just mentioned, and that your board might make effective recommendations along that line.

### Requires Consideration

We have deliberately refrained from showing resentment at the interpretations placed by newspaper writers on material submitted to your board. But we feel that an item in one of these papers proclaiming that retail merchants were making a yearly gain of 7,000 per cent. on bacon requires some consideration. Your board may remember that this item purported to give an account of the proceedings here at which retail merchants were being called to testify. While we clearly understand that your board has not exercised jurisdiction over newspaper reports, we beg to submit that these reports mislead the public and do a serious injustice to the retail merchant. Our object in drawing this phase of the subject to your attention is to point out that the principle of basis employed by your board in arriving at the so-called gross profit on various articles is followed by the daily press. It appears to us that there should be attached to your board, as a part of its organization, a recognized expert in the principles of merchandising, who could assist you in determining such matters as profits fairly and accurately.

The Retail Trade Bureau and the Retail Merchants' Association realize that there are problems and weaknesses in the system of distributing merchandise. We desire to make clear to your Board and to the public our belief that some of these may be remedied only through legislation. We know that the retail merchants will gladly co-operate with your board in its efforts to reduce the cost of merchandise. We take the liberty of requesting, on behalf of the Retail Trade Bureau and the Retail Merchants' Association, a similar measure of co-operation.

## TO PROVIDE WATER SUPPLY

Regina.—Dr. W. D. Cowan, M.P., states that after several sessions with the Minister of Public Works with regard to the situation at the foot of Last Mountain Lake he has secured a promise from the head of the engineering branch that an amount would be placed in the estimates for the next session for the work necessary to retain the water in the lake at its present level, and, at the same time, give an adequate water supply to all farmers in the Qu'Appelle Valley east of the present dam.

# Closed Car Increases Accessory Sales

## Important Development in Construction Means Much to Hardware Merchants — Big Advance Made in Securing an All-Weather Car — Factory Figures Show Big Demand for Closed Models

DEVELOPMENTS in the field of automobile construction have been so rapid and varied that the dealer handling accessories to-day has an unlimited field for business. The only trouble in the past has been the falling off of trade with the coming of cold weather. In this connection it is interesting to note the progress made towards the adoption of an all-weather automobile which will give service and comfort in the winter almost equally well as in the summer season. Without a doubt the closed car is now coming into its own. All recent developments in the world of automobile manufacture have been toward this end, and the transformation holds further trade possibilities for the hardware dealer handling accessories.

It is difficult to compute the number of closed cars now in use in the large cities, as a result of this recent trend of the market, but it has been estimated by dealers that at least 25 per cent. of the factory output this year will be closed models. In addition about ten per cent. of the cars in use are equipped with winter tops. The estimated percentage of increase in closed-car output each year since 1915 is recorded by dealers as follows:—

1915—10 per cent.; 1916—15 per cent.; 1917—20 per cent.; 1918—20 per cent.; 1919—25 per cent.

It is evident from these figures that there is an increasing demand for closed cars. The motor car owner of average means wants a car that can serve him the year around.

With the return of peace conditions, manufacturers report that this trend has set in more strongly than ever. The result has been to increase the number of expert body builders in the large manufacturing centres, and factories are engaging experts to design for closed cars articles of elegance and luxury. These include such lines as vanity cases, clocks, dome lights, silk window curtains, cigar lighters, speaking tubes, ventilating appliances, window regulators, reading lights, foot warmers, etc. One new model of this season has, in addition, a compass and a folding kodak as part of the regular equipment. Something new in the way of collapsible extra seats is being worked out. Finest quality slip covers are also in big demand in the closed models.

### WORTH WATCHING CLOSELY

The demand for such articles as these increases the field of trade in automobile accessories, and while some conservative dealers might think the day for such articles of luxury is far distant as regards the average motor car owner, manufacturers point out that the demand for these lines is such that dealers will be well advised to watch closely the trend of the market in that direction.

*This window arranged by the Summe r Co., of Moncton, N.B., was most successful in the object for which it was designed, to bring in the hunters who were off to the woods for their annual shooting trips. The idea was cleverly worked out the background making a striking setting for the rifles, ammunition, etc. There are points here that any hardware merchant may adopt.*

# Keep Up Window Displays to Last Day

## Belated Buyers Are Always Out in Crowds and You Can Cash In on Some Splendid Business—Lists of Gifts Often Help Customers in Deciding Purchases

CHRISTMAS will be here in just twelve days, and there is every indication that this year's trade is going to be a record breaker. The only thing that can stop it, apparently, is that hardware merchants in many cases are unable to get enough goods to meet the demands. There is only one way to get around this, and that is to push to the limit the merchandise you have got.

The last few days can spell the difference between profit and loss. Every minute of that time is doubly valuable, and as much of it as possible should be employed in the actual turning out of the goods and taking in of the money.

The belated buyers will be coming in crowds, and there will be limited opportunity for salesmanship. That is where the Christmas window will help take the burden from the shoulders of the tired salesman.

### Keep Them Trimmed

Keep your windows neatly trimmed to the last day, even if it takes night work. They are the biggest sales asset you have in those last few days before Santa comes. Play them up to the limit, and put into them all the attractiveness, all the spirit, and all the suggestion you can. Also put in as many varieties of Christmas merchandise as they will stand and your stock will permit. Decorate with snappy show cards, and don't be afraid to use price cards. This is always important.

The Christmas shopper is a sensitive mortal, and hates to be forced to ask the price of every article that strikes his fancy. He likes to see price cards in the Christmas display.

The more goods the windows can sell, the more time your salesmen will have to push the things that you may not wish to carry over. The more preparatory work that can be done through the display, the easier it is to close the sales.

Show cards will also help in increasing sales. Seasonably decorated cards with such phrases as "Gifts for Mother," "Just the Thing for Father," "Little Sister Will Like This," "A Real Gift," and other phrases on cards placed with the various window groups will do much of the thinking for the perplexed shopper.

Show cards, price cards, and your display, will get the customers into the store, and then it is up to the salesmen.

Christmas windows naturally should reflect the gift spirit, and should back up that reflection with a goodly assortment of gifts. Variety gives the prospective customer an opportunity to exercise a choice; it leads him to believe that there is a still wider range of choice inside the store, and induces him to enter. Last, but not least, variety gives him a wonderful opportunity to learn from the remarks of others just what gifts would be most pleasing to them.

Many hardware merchants have found that by publishing lists of suggestions for appropriate gifts and also by having lists printed and distributed, they stimulate sales. These are usually classified so that the prospective buyer may easily find something suitable for an adult or juvenile. One hardware merchant's list is as follows:

### FOR FATHER

Smoking sets, toilet sets, Safety razors, shaving outfits, extra fine pocket knives, auto tires, auto tire chains, side-mirrors, box of wrenches, tubes, tool sets, repairing outfits, ornaments, electric desk or reading lamps, lanterns, flash lights, fishing tackle, guns, rifles, ammunitions, show shoes, punching bag, game traps, toboggans, hunting sacks, electric heaters, single or double coils, sleigh bells, chimes, horse blankets, extra fine whip, electric lantern, carpenter's tools, waterproof coat, hat and pants, etc.

### FOR MOTHER

Electric iron, electric heaters, electric cleaners, cut glass, oven ware, carpet sweepers, mops, bedroom mirror, kitchen utensils, such as roast pans, enamel or pressed steel, flour and bread boxes, household sets of 5 pieces, bread mixers, washing machines and wringers, bath room fixtures, oil stoves, food choppers, cutlery, scissors, meat carvers, cake cutters, silver knives and forks, nickel tea percolators, coffee pots and kettles, toilet and manicure sets, hair brushes, aluminum ware and enamel ware.

### FOR BROTHER

Manicure and toilet sets, bedroom mirrors, shaving outfits, smoking sets, cigarette boxes, flashlights, hockeys and pucks, bicycles, tires, ankle supports, straps, lamps, tubes and tires, bells, wrenches, toboggans, snow shoes, guns, rifles, sleighs, skates, etc. Toys of all kinds, Kiddie-Kars, shoo-fly horses, wheelbarrows, shovels, etc.

### FOR SISTER

Ladies' companions, sets of scissors, hair brushes, combs, manicure and toilet sets, reading lamps, skates, snow shoes, sleighs, inkstands, jewel cases, toilet mirrors, piano statues and ornaments, dolls, go-carts, cutters, dolls, sleighs, and all kinds of games.

### WHAT A FLASHLIGHT MIGHT HAVE SAVED

Damage estimated at $25,000 was done the Montreal Warehousing Company, No. 3 Shed, about ten days ago.

Ernest Tanguay, an employee of the Dominion Iron & Wrecking Company, testified that he had lighted an oil lamp to enable him to see what he was doing when he found it necessary to crawl under an automobile he was putting in storage for his company. The gasoline tank had become clogged up and it was necessary to drain all the liquid out of it before storing car away for winter. When the gasoline began to flow, it poured all over the ground and it is expected that some of the fumes must have reached the light of the lamp. The fire thus started caused the above estimated damage to automobiles, etc., stored in this building.

The use of a flashlight would have avoided an accident of this kind, and this is but another of the numerous cases to show how important it is that lighted lamps should not be carried in places of this kind, or where gasoline or other inflammable goods are kept or stored.

### VAST POWER AVAILABLE

Vancouver.—Three million horse power is the estimate given the amount of power available in water sites of British Columbia, in a report which has been prepared by Arthur V. White, consulting engineer of the Dominion Commission on Conservation. Of this amount, 2,500,000 horse power is capable of development for commercial purposes, according to the report, which states that at the present time only 300,000 horse power is being used in the province.

# Great Activity Looked For in Building

## Every Indication That the Spring Season of 1920 Will See All Past Records in Canada Smashed—If Weather is Open Considerable Construction Will Proceed During the Winter Months

AN experiment in connection with relieving the housing scarcity is to be tried out in Toronto in the shape of what is known as the "quadruplex bungalow." The plan will, it is expected, be watched with a good deal of interest all over the country by municipalities who have to meet the problem of house shortage.

The "quadruplex bungalow" idea, as advanced by W. E. Dyer, was unanimously endorsed by the Property Committee and recommended to the city council. Mr. Dyer asked permission to establish a group of thirteen of these structures, comprising fifty dwellings, to be operated on a rental basis under the control of the Toronto Housing Company, which was, he said, prepared to accept the responsibility.

### Will Be Distributed

The site selected for these dwellings is the Toronto Housing Company's property and the plan submitted indicated that they would be distributed six on either side, with one at the north end. The last would include only two dwellings, the remainder four each. The central portion of the block is shown as a park playground.

With Mr. Dyer, Mrs. L. A. Hamilton, H. W. Davidson and V. Kearns-Batchelor spoke in support of the proposal. They asserted also that it had met with the approval of Lord Leverhulme, whose employees are housed under similar conditions at Port Sunlight.

### Building Activity

Advices from all parts of the country indicate that great building activity is expected. Architects are very busy with plans and a feature of the work they have on hand so far is the large number of the better class of dwelling houses. Many of the homes that are planned are of a type that will cost from $4.000 to $7,000. The moderate sized, comfortable, homey style of dwelling seems to be decidedly popular.

The construction of these will not be in the cities alone. Out in the country districts scares of farmers, who have been making handsome profits out of their produce, are figuring on erecting new dwellings.

### Housing Commissions

Housing commissions all over the country are busy with plans and the expenditure already in sight from this source alone will run into several millions. While these homes are not of the higher-priced kind, they will, in the great majority of cases, call for substantial construction and many excellent opportunities will be afforded to hardware merchants to supply various lines.

An encouraging feature from a construction standpoint is the attitude being shown by many of the labor unions. Apparently they are realizing that labor unrest has resulted during the present year in several million dollars' worth of building being held up. In order to avoid this during 1920 and restore confidence, they are endeavoring to unify agreements in the various trades and have an understanding arrived at at an early date, so that construction may be commenced early and proceed without interruption.

### Build During Winter

There is every indication that if weather conditions are at all favorable a good deal of construction work will be commenced during the winter. If the weather is open as it was last year, a great deal of work could be proceeded with. Many of those who commenced operations during the fall and have been held up through inability to secure shipments of brick or other commodities, are planning to go ahead with the work as soon as they can get the materials. This will also mean considerable activity.

From Ottawa comes word that to avoid any possibility of strikes or disagreements over hours or wages in the building trades next year, when exceptional activity in construction is expected, steps will be taken early to reach an agreement between employers and men engaged in the building trades.

This unusually early move towards an agreement on wages is due to the unrest that has been evident this year, the many big works to be estimated on for next year, and the fact that there has been dissatisfaction in some branches of construction work recently regarding wages and also employment of unskilled men on some jobs unions hold to be work for their men.

At the annual meeting of the Ottawa branch of the Canadian Building and Construction Industries next Wednesday, Mr. Hugh Graham will move that a committee be appointed to consider drafting an agreement with the employees at an early date.

# Auto Accessory Business is Likely to Increase Steadily

NEW YORK.—Not even the most optimistic can believe that the next ten years will show a similar ratio increase in the number of cars in operation in this country that the past has, but judging from some of the inquiries being received from the export trade, American manufacturers have not only a decidedly optimistic outlook from the domestic trade, but an additional outlet for thousands of cars for shipment to foreign shores.

### Shows Rapid Growth

A study of the growth of the industry during the past few years is of interest. In 1903, when Ford started his career, his total output was 1,708 cars. In 1911 this had jumped to 34,000; 1913, 164,000; 1914, 248,000; 1917, 785,000; 1918, 700,000, with 1919's production estimated at one million cars. The General Motors, who were in 1911 but a comparatively small corporation, produced a total of 28,000 cars. This increased gradually until in 1914 the out-turn was 76,000; in 1917, 182,000; 1918, 246,000, with a probable output of 375,000 cars this year. Other manufacturers have shown a similar proportionate increase.

### Greatly Raised

It was estimated in 1917 that we had absorbed about all the cars that we were able to maintain in service. But since then this limit has been greatly raised by the immense increase of wealth and income of our people, which is still materially increasing and leaves plenty of room for expansion in the industry. The table gives an idea of the industries' growth:

| | Regist'n Dec. 31. | Year's Output. | Cars Scrapped. |
|---|---|---|---|
| 1911 .... | 677,000 | 210,000 | 5,700 |
| 1912 .... | 1,010,483 | 378,000 | 44,500 |
| 1913 .... | 1,253,875 | 483,000 | 239,600 |
| 1914 .... | 1,736,790 | 573,114 | 90,199 |
| 1915 .... | 2,471,595 | 891,618 | 205,620 |
| 1916 .... | 3,544,952 | 1,617,708 | 547,545 |
| 1917 .... | 4,941,276 | 1,938,778 | 542,454 |
| 1918 .... | 5,945,400 | 1,153,638 | 149,438 |
| 1919 .... | 6,700,000 | 2,800,000 | 2,105,400 |

This shows that for the period of nine years there has been a total of 10,000,000 cars built and almost 4,000,000 of these scrapped, so that it can be seen that the life of the average car is somewhat less than three years. It is estimated that the present capacity of all recognized automobile and truck manufacturers would be required simply to replace the cars that are scrapped each year.

### All Records Broken

At the present time the building and delivery of cars is going on at a rapid rate, far in excess of all previous records, whereas the increase in registration is comparatively small. This means that thousands of motorists who last year kept their old cars in service as they were unable to secure new ones, are now purchasing new machines. The figures also indicate that in 1914, old cars were kept in service because of business depression. Past experience of manufacturers has well demonstrated that the American people want above all newness. We apparently live in terror of being considered out of date, and to satisfy our vanity are buying cars often more from the outward appearance than from a durability standpoint.

### Accessories Active

In auto accessories similar conditions exist, particularly in the lines of goods that may be considered accessories rather than necessities. While it is not desirable for a jobber to ever sacrifice durability for show, yet the finish and style and the points that will please the eye of the public about any line of merchandise must always be borne in mind, for the more attractive accessories are made, the quicker they will sell at a higher margin of profit.

### Future is Bright

The accessory dealer has every reason to believe that business with him will not only continue good, but will be greatly improved and with the increasing demand, short and slow deliveries are to be expected, making it advisable for him to anticipate his wants for a greater period than he normally would.

It is doubtful if prices will show any material change as long as the demand continues on its present high plane and as long as the increase is so evident. Therefore, there is apparently nothing to lose from making purchases early and taking in stock against existing contracts as promptly as possible.—*Auto Links.*

## Fiddling While Rome Burns

The world is hungry for the things we eat, wear and use. Stark Hungry! The cupboard is bare as a bone. Prices mount to staggering figures and the cry of our worker is—more pay; shorter hours—and then a shortage shoots the price of things up another notch; again the cry—more pay; less hours.

*Ye Gods! Must the vicious circle continue? Shall we never see that it is more hours we need; that to reduce the cost of the things we use, we must produce not less but more?*

*The countries of Europe have nothing to sell, their shelves are bare. They want to buy—to buy from America—to buy the things that America makes—and the answer of our workers is—reduce our hours—44 hours a week instead of 60—a cut in production of 25 per cent.*

*Short hours in the city has made the farm worker restless, he, too, wants short hours and increased pay. May kind Providence preserve us if farm workers ever insist on 44 hours per week or an 8-hour day.*

*We may keep high wages. We may keep our present scale and still reduce the cost of living by a simple remedy—work—good, hard, honest, faithful service—not 8 hours, rather 10 and then some. Let us for one year, at least, resolve to work and work like H——.*

*—Campbell's Courant.*

## BRITISH TRADE FIGURES MOST ENCOURAGING

The British Board of Trade returns for November indicate that, despite labor unrest and similar deterrent factors, British trade is making steady headway towards pre-war figures. While imports are still increasing, exports are growing far more rapidly, while re-exports are increasing many fold. British trade would appear to be approaching a business footing again. Sales of goods to European allies have been exceptionally heavy, and the break in sterling in New York is partly attributable to this, as most of the Continental sales are credit and purchases from the United States on a cash basis. Only about seven per cent. of British exports are now going to the States. Should the States begin to grant credits to European nations, it is indicated that sterling will immediately recover to some extent in the New York market.

British exports to-day are nearing pre-war figures. Her ships are earning at the rate of $5,000,000 a day, thus proving an important factor in her earning power. Money appears to be plentiful in London now for extra-home expansion, appreciable quantities being available, not only for enterprise within the Empire, but even in the United States itself, despite sterling's depreciation.

## EXPECT TO USE OIL

Progress already made in the adaption of heavy oil for use in engines and plans for further improvements which will mean cheap fuel for automobiles were the chief topics for discussion at the fortieth annual convention of the American Society of Mechanical Engineers, held in New York on Monday.

E. B. Blakely, of Chicago, described the new Hvid engine, which is now being extensively used by tractors and for elevator machinery and similar purposes. The Hvid engine contains one still which is so arranged that as long as this fuel oil will flow through a pipe this still is able to crack the oil in such a way as to free the lighter constituents which are made use of in injecting the fuel by means of a preliminary explo-

sion in a small steel cup. The heavy fuel is sprayed into a combustion chamber by the pressure which is generated by the preliminary combustion. Engines of this type can employ kerosene and even heavy crude oil and various oils which are much cheaper than gasoline. A statement was made by Mr. Blakely that it could be run for about a quarter of the cost of gasoline engines, and that, as compared with an engine where coal had been used under the boiler, the cost of obtaining power was still less.

Mechanical engineers are endeavoring to perfect engines burning cheap oils for use in trucks and automobiles, and the indications are that considerable success will be reached in that line.

### BRITISH INDUSTRIES FAIR

Admission to the British Industries Fair, to be held at London, Birmingham and Glasgow, in February next, is by invitation only. Canadian buyers who propose to visit the Fair, can obtain invitations from the British Trade Commissioners in Canada at Montreal, Toronto and Winnipeg respectively.

---

**¶ "I do not foresee any change from our present measure of prosperity for at least five years, probably for seven. The world is face to face with a famine of essentials. The shelves of the grocer, the draper and the hardware merchant are bare, the ships that we need to bear our trade are yet to build. Everywhere people are needing goods that they cannot buy at any price because the goods are not there to purchase. While these conditions last, while all the world is a buyer, there can be no thought of hard times."**

# Prosperity Assured for Years to Come

*An Interview with*

**LORD LEVERHULME.**

The world has been very full of croakers of late years, and a change in the tone of the music comes gratefully to the ear. Certainly no one could accuse Lord Leverhulme of Port Sunlight, England, head of the great Lever Brothers soap business, and one of the largest employers of labor in the world, of being a croaker; no one could accuse him either of being a man of incautious judgment. He stands as one of the big business men of the world and frankly declares himself an "incurable optimist," not only in regard to general affairs, but in regard to the present disturbed business conditions, and the somewhat uncertain future. "I do not foresee any change from our present measure of prosperity for at least five years, and probably seven," stated Lord Leverhulme to HARDWARE AND METAL. "The world is face to face with a famine of essentials. to face with a famine of essentials. There are too few ships to provide for our needs, there are bare shelves. The shelves of the grocer, the draper and the hardware merchant are bare, and the ships that we need to bear our trade are yet to build. Everywhere people are needing goods that they cannot buy at any price, because the goods are not there to purchase. This condition cannot be remedied in a day. It will be years before production can equal demand, and until it does there will be a ready market for everything that can be produced, and that is so, I believe, quite despite present exorbitant prices. People will pay these prices because only by so doing can they supply their needs. While such conditions last, while the world is a buyer, there can be no thought of hard times. That is the condition existing in this first period of reconstruction, as I see it, and that is a condition that I believe will certainly exist for a period varying from five to seven years. I do not think that in this time any conditions can arise that will greatly modify this judgment.

#### Wage Reduction a Catastrophe

"In what might be called the secondary period, the period that will follow the time when the world's production has again been brought equal to the demand, the stability of business conditions will be contingent upon two factors: the continuance of present wage conditions to the worker, and a reduced production price that will permit of lower prices. In my opinion, any reduction in wages would be a catastrophe and would unquestionably result in one of those periods of depression that we have had from time to time. Any lowering in the wage market, and such will be the case if industries are shut down and the labor market becomes flooded with excess labor, will react sharply on business and will bring about a condition of hard times.

"On the other hand the laborer must be brought to see the fallacy of the doctrine held by some that a re-distribution of wealth would afford any remedy. You might as well say that the mortgage on the home could be raised by rearranging the furniture. Re-arrange it as much as you like, but the mortgage would still be there till someone goes out and takes off his coat and earns the money to raise it. The thing we must look forward to is when the workingman's five dollars can buy seven dollars' worth of goods as they are at present prices, but such things can only be if the workers as a whole, and that means most of us, for we are all of us bartering one sort of labor for another, are prepared to work to raise the mortgage. The high prices of goods is ninety per cent. paid by the working class and if they neglect the production that would lower prices they are merely raising prices on themselves."

"A reduced production price depends on the co-operation of labor, and on sound economic handling. For instance," said Lord Leverhulme, "there was a man in here a short time ago showing us a machine that would do the work of ten men. Now when you have one man doing the work of ten, then you have a

(Continued on page 86)

# EDITORIAL COMMENT

## *HEALTHY GROWING PAINS*

INFORMATION gained at first hand from actual conversation with a large number of hardware merchants shows that an unusually large percentage of them must in the very near future secure larger quarters in which to carry on their steadily growing businesses. There are two outstanding features of the hardware trade in Canada at the present time. One is the inability of the merchants to secure anything like sufficient merchandise to meet their requirements. The other is the scarcity of room in stores which not so very long ago were deemed ample to carry all the stocks required. Merchant after merchant in the past few weeks, in discussing business matters with HARDWARE AND METAL, has expressed himself more or less as follows: "We must have more room. We are losing business simply because we have not got the room to carry our stocks. Business has never been better. We hope in the spring to take the store next door and that will give us room for more goods." In many cases it is not the store next door, but an addition that is planned, or the purchase of new and larger premises. But the number of times this lack of room was reiterated, and by merchants in all parts of the country, made it an unmistakable indication of what is taking place. No business is on a more substantial foundation in Canada to-day than the hardware trade and no merchants are looking forward more confidently to bigger business than the hardware merchants. They are suffering considerably in a great many cases from growing pains, but they are healthy growing pains and sooner or later the only remedy for cases of this kind, larger premises, will be applied.

---

## *BRISK BUILDING SEASON AHEAD*

WITH the most active building year since 1914 drawing to a close, there is every indication that next season will see all records for construction smashed in Canada. This, too, in spite of the highest prices on record for many commodities essential in building. The scarcity of homes all over the country remains acute and it is not exaggerating at all to say that thousands of people are living either doubled up with others, or in places where they intend to remain only until they can get better accommodation. Another factor in the situation is that in the larger cities especially, thousands of those who do not own their homes have been the victims of landlords who have proven absolutely heartless. These "gougers," as they have been rather appropriately termed, have been demanding and getting rentals that are out of all proportion to the value they are giving. They have taken advantage of the man who has to rent and who cannot help himself. The result in a great many cases is that the renter is planning to become an owner even though he realizes that it is going to cost him something to build his own home. Another condition that seems general all over Canada is the real scarcity of small dwellings suitable for the requirements of working men. Heads of factories in many places have been taking this matter up with councils and others, urging that something be done in order that they may enlarge their staff of workmen to take care of steadily growing business. All this of course means opportunity for the hardware merchant. It means chances for him to sell not only the materials used in building but the many articles used in equipping the home for occupancy. In the previous issue of HARDWARE AND METAL a manufacturer gave it as his opinion that as far as the future was concerned, it was going to be, from the merchant's standpoint, not a question of price, but of getting the goods to sell. Hardware merchants, more perhaps than any other class of retailers, have known just what this means for the past five years and many of them are sizing up the outlook and laying their plans accordingly.

---

## *PROMPT ACTION IS NEEDED*

THE *Financial Post* makes timely comment in regard to the important question of "Should the Government Keep the Railroads?" This is a matter which is of particular interest to business men all over the country. The *Financial Post* says:

"That the return of all the railroads in Canada to private ownership is the solution of the national transportation problem has been argued by W. F. Tye, one of the leading authorities on the railway situation in Canada, before the McGill Canadian Club at Montreal. The people of the United States had learned a lesson from Government operation and were longing for the time when the roads would be given back to their owners, he said, and pointed out that the only successful Government railways had

been in Germany where conclusions could not be drawn because the systems were part of the military machine and both cost of operation and revenue charges could be regulated to suit the conditions prevailing.

"That the Government should regard the railroad problem as one which may be solved without the permanent adoption of public ownership on a broad scale will appeal to most people with a practical knowledge of the question. Even accepting the Government's argument—which we do not—that there was no other way out of the crisis than to take over the various roads, it does not necessarily follow that it is in the interests of the people of Canada that the Government should go into the transportation business on a big scale permanently.

"As we see it, the business of the Government is not to run railroads simply because it made loans on railroad security which were defaulted, any more than it would be the business of a bank to do so under similar circumstances. The bank would, perhaps, take over the property temporarily, and handle it in a manner to realize the largest possible sum when conditions favored a sale. This is the course which the Government might very well consider—to maintain the properties in the most efficient conditions possible, to improve that condition if feasible even to the extent of further investments, and then dispose of them when this can be done to advantage.

"The Government has made its mistakes in its policy of making advances and undertaking guarantees for railroad construction. These mistakes involve financial losses. It would be better to face these losses at once than to attempt a policy which will cover them for the time being, but lead to still greater losses in the future. It is a wise business man and a wise Government that knows when it is good policy to face one loss and thus prevent other losses."

## *WATCH YOUR STOCK*

THE coal shortage has occasioned many difficulties, and among them stands prominently the lessened service on the railways. This is going to have a more pronounced effect on the merchant in the smaller centres than may appear on the surface. The friendly face of the traveller will not be seen as frequently as of yore leaning across the counter, bringing a breath of the outside world to the secluded merchant, and by his jaunty air giving a new color to the day. The traveller is going to find it hard to make his rounds, with nearly a hundred trains cut off in Ontario alone, and the merchant is going to miss this incentive to watch that his stock does not get below normal. He is going to have to be his own incentive for some time to come, and he must needs keep this fact in mind, for not only is the traveller to be seen less frequently, but there will be fewer chances to get the goods forward, and with the naturally congested traffic a materially increased possibility of delay. If he is to keep his business at par he must watch his stock.

## *COAL STRIKE IS ENDED*

THE most welcome news which the people of Canada have received, perhaps, since the signing of the Armistice came over the wires on Wednesday evening in the shape of a statement that the striking soft coal miners had accepted the proposals of President Wilson in regard to wages, and would return to work at once. Few people can imagine the hardship and suffering that would have been occasioned to millions of people had the strike gone on. Although the men went out only five weeks ago the dislocation of business already has been serious. The cutting off of scores of trains and the shutting down of many factories will now, it is hoped, be only temporary. In spite of the fact that the miners are going back to work, the strictest economy in the use of fuel will be necessary. This is made clear in a warning just issued by the Dominion Fuel Controller from Ottawa in which he points out that there will be no relaxation yet of the regulations that were imposed with a view of saving every pound of fuel possible. It is likely to be some time before the train service is back to normal. However, the fact that it will get back to normal and that coal will be forthcoming sooner or later is sufficient to bring joy to the average citizen who was beginning to wonder just what might be ahead, in spite of the fact that most householders had their supplies of hard coal safe in their cellars. Had the strike continued indefinitely there is little doubt that hundreds of thousands of workers would have been either out of work completely or on very short time. Just what this means now when the whole world is crying for more goods can be realized. There is another aspect to the question and that is its effects on future prices. If the operators have to pay largely increased wages, sooner or later they must charge more for their output, and this in turn will be reflected all along the line. This, however, is a matter which will have to be adjusted later. The main thing just now, from the standpoint of the retail merchant, is that coal is going to be produced and that the factories which supply him with merchandise will not have to close.

## *EDITORIAL NOTES*

ONCE there was a town which never had any telephone troubles, long waits, wrong numbers and so on. It had no telephones.

* * *

THERE can't be so very much unrest among organized workers. So many thousands of them are resting.

# EVENTS IN THE TRADE

## Business Changes

Minburn, Alberta.—J. H. Bedard has purchased the business of the Stewart Hardware Co.

Falher, Alberta.—Vezina Gamache and Pomolus Godory have registered partnership in the Falher Hardware Company.

Adanac, Saskatchewan.—F. W. Moorlend has purchased the full interest in the hardware firm of Moorlend & Son.

Toronto.—J. H. Smith and A. J. Goldsmith, of the Acme Hardware Co., 2425 Yonge St., have dissolved partnership. The business in future will be under the control of A. J. Goldsmith.

Westport, Ont.—Ernest Gunter, hardware, is succeeded by J. A. Homer.

## Personals

W. H. Davison, of Paisley, Ont., was in Toronto on business during the week.

H. R. Douglas, of Bradford, Ont., was in Toronto during the early part of the week.

J. H. Smith, until recently a partner in the Acme Hardware Co., Toronto, is leaving shortly for California.

## Obituary

Death came very suddenly to William H. Davy at his home, 76 Normandy Boulevard, Toronto, on Sunday. He sustained a stroke, and died soon afterwards. Mr. Davy was 54 years old, and a native of Sydney, Australia. Twelve years ago he came to Toronto from Montreal, and since that time has been travelling for the International Varnish Company. Besides his wife, he leaves one son and one daughter.

Injuries sustained by falling down stairs at his home in Tilbury, Ont., on Sunday morning caused the death a few hours later of Mungo Stewart. He sustained such injuries to his head that no hope was held for his recovery from the first. Mr. Stewart was 82 years old and the pioneer hardware merchant of Tilbury. He was a native of Quebec, but moved to Tilbury East Township at the age of nineteen, where he conducted a saw mill and engaged in farming for twenty years. He then moved to Tilbury and opened the first hardware business in the town. Mrs. Stewart predeceased her husband twenty-three years. Surviving members of the family are two sons, James, of Walkerville; Samuel, of Tilbury, and two daughters, Misses Margaret and Ella.

The death occurred at his home in Cleveland, Ohio, on Sunday, after an illness of only one day, of Lyman H. Treadway, president of the Pec, Stow & Wilcox Co., manufacturers of tools. Death was due to heart trouble. Mr. Treadway was 57 years old, and the direction of the hardware manufacturing end of the business was the main activity of the greater part of his life. He was very prominent in Masonic circles, and although always a busy man, always found time to devote to public matters. He was a former president of the Chamber of Commerce and a trustee of St. Luke's Hospital. W. H. Hughes, of Toronto, the firm's Canadian representative, attended the funeral.

## Trade Notes

The Active Roofing Co. has been registered at Toronto.

The Universal Furnace and Damper Co. of Toronto has been dissolved.

D. R. Williams, hardware and implements, Atwater, Sask., has sold out.

J. E. McEwen, Spirit River, Alberta, is adding hardware to his general store stock.

The Imperial Glass Works, Toronto, jobbers of glass, is discontinuing business.

The R. & H. Hot Water Generator Co. has been registered at Montreal by James W. Donnelly, Jr.

Flewelling Bros., grocery and hardware, Fairville, New Brunswick, have assigned to T. H. Somerville.

The Western Wheel and Foundries, Ltd., St. Boniface, Manitoba, has obtained a Dominion charter.

The Earl Grey Hardware Company, Earl Grey, Sask., plans to change its name to the A. M. Nairn Hardware Company, Limited.

The St. Lawrence Broom and Brush Co., of Montreal, has been dissolved and a new firm formed, which will continue under the same style.

E. Edelmann & Company, Chicago, manufacturers of automobile parts and accessories, are erecting a new factory which will give them 67,000 square feet of additional space.

A winding-up order has been granted in connection with the Canada Stove and Foundry Co., Ltd., St. Laurent, Quebec, and Paul L. Turgeon appointed provisional liquidator. A meeting of the creditors is to be held on December 15.

Robert McKenzie, who returned recently after serving overseas, has purchased the hardware, tinshop and plumbing business conducted by Peter Shiells at Kincardine, Ont., for the part thirty years. Mr. McKenzie learned the business with Mr. Shiells.

## Montreal News

E. M. Trowern, of Ottawa, Dominion secretary of the Retail Merchants' Association of Canada, was in Montreal this week.

The drive for new members for the Montreal Board of Trade has been continued throughout the present week, resulting in securing around one hundred members by Wednesday.

Raymond A. Catlin, who has represented the Corbin Cabinet Lock Co. in this section of Canada, calling on the jobbing trade for several years, made his farewell visit last week. HARDWARE AND METAL is informed that Mr. Catlin will accept an appointment at the home office.

J. K. Illsley, special representative for Brandram-Henderson Ltd., Montreal, to Argentina, who went to the Southern continent in connection with extension work at Buenos Aires and other points, has reached Rio on his trip homeward.

J. H. Bennett, manager of the Canadian Warren Axe and Tool Co., Ltd., St. Catherines, was in Montreal calling on the firm's representatives here, Messrs. Richardson & Bureau.

A. J. McIntyre, of McIntyre & Taylor, Toronto, was in Montreal this week.

Norman O. Philp, of the purchasing department of Starke, Seybold Ltd., was this week a visitor to Chicago, where he attended a convention of accessory and hardware dealers.

A. A. Seeley, with A. C. Wasserstrom Co., manufacturers of razor strops, New York, was in Montreal this week.

Evans & Co., importers of sponges, chamois skins, and other lines, have removed from the Coristine Building to 247 St. Paul Street West.

Alexander Gibb, wholesale metals, was informed by one of his friends that he was reported dead; some of his friends in Quebec having read an apparent obituary notice to this effect. Mr. Gibb states that he feels very much alive and the press dispatch was not to be credited to him.

The Gillette Safety Razor Company's Social Club held a most successful dance in Stanley Hall. It was one of a proposed series to be held during the coming season.

## Western News

W. J. Bland, formerly sales manager at Winnipeg for the Canada Paint Company, has been elected vice-president and general manager of the T. L. Blood Company and the Twin City Varnish Company, of St. Paul, Minn.

## Incorporations

David Steel, Ltd., capital $100,000, head office Vancouver, B.C., plans to manufacture and deal in steel products.

Miller Saw Trimmer Co., capital $500,000, will have head offices in both Pittsburgh and Vancouver.

Simmons, Limited, capital $1,000,000, head office Montreal, plans to manufacture and deal in iron, steel and brass beds.

McPherson Wire Company, Limited, capital $400,000, head office Hamilton, Ont., plans to manufacture and deal in wire products of all kinds.

Everready Gopher Poison Company, Limited, capital $24,000, head office Limerick, Sask., plans to manufacture and deal in this line.

Gear Products of Canada, Limited, head office St. Catharines, Ont., capital $250,000, plans to manufacture and deal in pipes, heaters, and appliances for gas and gasoline.

Charles E. Goad Engineering Company, Limited, capital $300,000, head office Toronto, plans to manufacture and deal in motor accessories, storage batteries, electric appliances and vehicles.

Edgar Allen & Co. (Canada), Limited, head office Montreal, capital $50,000, plans to manufacture and deal in files, tools, steel wire rope, etc.

Canadian Nathan, Limited, capital $100,000, head office Montreal, plans to take over, as a going concern, the business of the Canadian Chadwick Metal Company, Limited, Hamilton, Ont., and to deal in tools, hardware, heating and plumbing equipment.

### INGERSOLL FIRMS PLAN BIG DEVELOPMENTS

E. A. Wilson, of the Ingersoll Machine Co., Limited, Ingersoll, Ont., has joined the John Morrow Screw & Nut Co., Limited, and will be vice-president and joint manager with J. A. Coulter, the head of the Morrow Company for many years. The Morrow Company has purchased an interest in the Ingersoll Machine Co., Limited, and the American Machine Products Co., Incorporated, of Detroit, and will, with Messrs. Wilson and Munger, formerly of Ingersoll, operate them, together with the Ingersoll File Co., as subsidiary companies to the John Morrow Screw & Nut Co., Limited.

At the plant of the Ingersoll Machine Co., $50,000 worth of new machinery is being installed to make a line of tools not previously made.

Col. F. H. Deacon, of Toronto, honorary president and director of the board, will devote as much time as possible to the development of the industries at Ingersoll.

### NAILS FOR ROUMANIA

St. John, N.B.—A new development of the trade of this port was heralded by the arrival of the steamer Lake Ellsbury to take on a part cargo of 450 tons of nails from the Maritime Nail Company, Limited, St. John, for Roumania.

# Many Hardware Firms Would Not Favor Any Central Buying Bureau

EFFORTS, which have been renewed recently, to organize a central buying bureau for the wholesale hardware trade, more or less along such co-operative lines as are followed by the United Farmers, have given rise to rumors that the amalgamation of the various wholesales in Montreal is contemplated.

Persistent rumors have been coming from Montreal regarding a hardware merger. Investigations by HARDWARE AND METAL failed to elicit any authoritative information from the persons mentioned in connection with the matter. The heads of the various wholesale houses were decidedly noncommittal.

"I have no statement, whatever, to make," said James Hardy, secretary of the Canadian Wholesale Hardware Association, when asked by HARDWARE AND METAL.

"What business is it of the retailers, anyway, if the wholesalers did contemplate any consolidation project?" he continued.

It was suggested to Mr. Hardy that any projects which the wholesalers might plan would affect the hardware business as a whole.

"Show me where it affects the retailers in any way," said he. "I have no statement to make."

A number of the firms, according to information obtained by HARDWARE AND METAL, would not favor any central buying plan, for the simple reason that they think no individual buyer would be competent to handle the matter. Their own buyers, they believe, would very often be able to buy at far better figures that could be obtained through a central purchasing department, and as this would involve very large sums of money, they would effect a great saving.

In the meantime, it is understood that litle progress is being made in the matter.

# Single Point Steel Price System is Strongly Defended

THE single point steel price system was very strongly defended at the investigation in Washington this week made by the Federal Trade Commission into charges that a better system should be devised.

Frank H. Scott, representing the Steel & Tube Company of America, declared the important question of the whole proposition is whether the market can be supplied by the Chicago steel consumers.

The 6,000,000 tons produced in the Chicago district, he declared, cannot possibly supply the demand of that district. "and you can't force investors to supply the extra mills needed to meet Western requirements by governmental edict," he asserted. Because the Chicago district must draw on the predominant Pittsburgh supply for the remainder of its steel, he said, Pittsburgh, by the law of supply and demand, dominates the price necessarily.

Abolition of the Pittsburgh base, he contended, would have no direct result in the shape of lower prices at Chicago. The independent steel mills, he said, would be throttled by such a change and the United States Steel Corporation would suffer least. This, he said, was because the steel corporation had producing plants at Milwaukee, Gary, Joliet, Duluth and Birmingham, and were these plants to sell f. o. b. mill they would, respectively, dominate the surrounding territories, and independent companies operating but one mill, would be debarred from these territories because of long-haul freight charges.

L. A. Manchester, representing the Youngstown Sheet and Tube Company, described the Pittsburgh base as being "a unit of measuring prices" and likened it in general to the standards of weights and measures.

C. W. Wickersham, representing the Lackawanna Steel Company, denied the commission's jurisdiction as to the Federal Trade Commission Act, stating the basing point system "is not a method of competition" and is not a "practice as between two competitors." He declared the Chicago district produces "less than 45 per cent. of the requirements of the Western district."

He asserted that abolition of the Pittsburgh base system would "prevent the Lackawanna Steel Company from selling west of its plants at Buffalo. It would kill our business as it is, and whether we can continue to operate at a profit we don't know." Judge Miller's clients, the Western Association of Rolled Steel Consumers, he said, "are the only people in the United States who would profit a penny by a change."

A report on the matter is to be made by the Commission.

### WILL AFFECT PRICES OF FERTILIZERS

Valparaiso. — Nitrate producers pronounce an advance in prices to ten shillings six pence per ton, owing to the increase in wages recently granted, and to higher railroad rates. It is estimated that 500,000 tons will be sold and shipped this season.

# Says Automobile Manufacturers Cannot Keep Up With Orders

ON his return from an extended trip to Europe, J. O. Linteau, president of the Montreal Automobile Trade Association, outlined some important observations which he had made while on the Continent, relative to the automobile industry, generally. On his return, Mr. Linteau was tendered a complimentary dinner by some of his friends in Montreal, and in this way he was welcomed back to his field of business activity.

**Orders Booked Ahead**

Mr. Linteau reports that the automobile industry in both England and France is not only taxed to capacity, but that the output is booked for several years ahead. He attended the automobile shows in both London and Paris and states that the output of cars in both these countries has been booked up to 1921. As indicative of the anxiety of some of the purchasers, he instanced a case where a man in London, who wants a car by a certain date, paid no less than five thousand dollars ($5,000) to obtain the delivery date held by another purchaser. He has done this so that he might secure the car he wanted next spring, and if he had not done this it would have been necessary for him to wait till 1921 for his model.

The manufacturers in these countries are inclined to give their output very close attention, and for this reason they are not anxious, Mr. Linteau stated, to rush their output too much. Obviously, this will leave an excess demand to be supplied from abroad and it will leave a considerable market to be exploited by Canadian manufacturers.

**France Has Big Variety**

Mr. Linteau states that the variety of cars made in France is very much greater than that found in most countries. Conditions in France permit the small manufacturer to obtain an opportunity for development, and this he takes full advantage of. If the Canadian manufacturer can promise delivery, the speaker believed that there would be no difficulty in obtaining business in the European markets.

An observation made along this line, by Mr. Linteau, was that automobile agents in the Old Country could not get cars to sell. This would be an opportunity for manufacturers to link up with men who knew conditions there and who could, doubtless, secure ready sales for any surplus cars that could be supplied. Providing that transportation difficulties could be met and overcome, Mr. Linteau feels that thousands of cars could be sold in the immediate future if they were sent across.

Mr. Linteau was very much impressed with the extent of the terrible devastation made by the war in France and Belgium and expressed his belief that it would take perhaps ten years before the damage could be required. While conditions in Belgium were somewhat similar, they were not, he thought, quite so severe.

# Finds Business Good In The Maritimes

Returning from a trip of several weeks to the Maritimes, Ernest Bureau, of Richardson & Bureau, Montreal, reports the business conditions in the Maritime Provinces to be in a very healthy state. This is evident in Halifax, particularly, said Mr. Bureau to HARDWARE AND METAL, where a great deal of building is still in progress. All through the country there seems to be plenty of money.

On Prince Edward Island the conditions are good. "The farmers have had splendid crops for several seasons, and they have secured good returns for these. It is said that the people of the island subscribed $10,000,000 to the Victory Loans The whole country is prosperous," said Mr. Bureau "and the fox industry is flourishing."

# Dominion Cartridge Co. Makes Staff Changes

The Dominion Cartridge Company, Limited, Montreal, has made several changes in its staff at various points and Mr. E. H. Johonnot, director of sales, has informed HARDWARE AND METAL of the following appointments:

E. H. Johonnot, formerly Western manager Dominion Cartridge Company, with headquarters at Winnipeg, has been appointed director of sales of the Dominion Cartridge Company, with headquarters at Montreal.

A. Stuart Boa has been appointed sales representative for the Province of Quebec, with headquarters at Montreal. Mr. Boa was connected with the Fifth Light Infantry Brigade staff, served in France, and returned to aCnada in May.

J. Cadham, formerly with the Dominion Cartridge Company at Vancouver, has been located at Winnipeg, and where he will serve the company as local representative.

**RESTRAINING ORDER ISSUED**

Judge George M. Bourquin, of the United States District Court for Montana, has granted a temporary injunction against the Montana Trade Commission putting into effect the drastic order requiring all merchants of the State to plainly mark all merchandise with both cost and selling prices. Arguments will be presented by opponents of the plan, setting forth the reasons why they believe the commission should be permanently restrained from placing the order in effect. Partially as a result of this order, there has been organized in Montana, with a membership nearly 100 per cent. strong, the Montana Development Association, and it is under the auspices of this body that the steps looking to a test of the constitutionality of the order have been taken. W. A. Selvidge, Billings, was elected president of this organization.

Mr. Selvidge has issued a statement setting forth the aims and purposes of the organization, emphasizing the fact that the members are ready to accept the court decision on the law in question. If the court says the law is constitutional, the orders of the trade commission will be cheerfully obeyed by every member of the association, says Mr. Selvidge.

# Great Oil Deposits In Western Canada

Returning from overseas in the early part of the present year, Capt. Norquay explored the McKenzie River basins with a view to ascertaining what the actual outlook was there for securing oil and minerals. He had followed up information which he had secured regarding the probable presence of these raw materials in that district.

While in Montreal, Capt. Norquay expressed his belief in the fact that immense quantities of oil were to be found in the above district. When these fields are developed, the whole Dominion and also the Old Country will have no shortage of oil supplies for fuel. Coupled with the existing transportation facilities it will be possible to deliver this oil to large shipping centres, from which it can be transported to any part of the world.

Capt. Norquay, expressing himself further, said that he believed that the McKenzie River basin would see a great development within the next few years and that the oil deposits here might be so developed as to be among the most important in the whole world.

**ACTIVITY IN TRAPPING**

Reports from the north country state that many of the Indians will make from $5,000 to $7,000 during the coming season in trapping. A great deal of trapping is also to be done by others than Indians. With unprecedented prices being paid, and with fur dealers ready to buy everything that is offered in order to keep up with the demands, there is little doubt that a record business will be done. All over the country boys and young men are going after the smaller animals, muskrats, mink, etc. In those districts where beaver are to be had there is great activity, as skins bring from $20 to $30, and very often several beaver may be obtained in one hut.

All this activity opens up some excellent opportunities for the hardware merchants in the sale of traps, guns and ammunition. One of the great troubles hardware men say just now is to get enough goods to meet the demands.

## Lt.-Col. E. G. Prior To Be Lt.-Governor

Press dispatches from Ottawa state that it is understood there that Lt.-Col. E. G. Prior, of Victoria, B.C., is appointed Lieutenant-Governor of British Columbia, to take the place of Hon. Frank Barnard, whose term has come to an end. The appointment, it is believed, has been made, although the order-in-council making it has not been signed as yet by the Governor-General.

Lt.-Col. Prior is the head of the hardware firm of E. G.. Prior & Co., Ltd., of Victoria. During the war, in a quiet way, he did a great deal of patriotic and other work. His son served overseas.

### CANADA'S GIFT APPRECIATED

Ottawa.—An interesting communication has been received by the Department of Agriculture from Belgium relative to the funds contributed in Canada to the British Empire Agricultural Relief Fund for the purchase of garden sets and small tools for farmers in the war-devastated areas of Europe.

The director of the Relief Fund in Belgium states that the total number of tools distributed totalled several thousand, and that many letters of thanks were received from the municipalities that benefited from the distribution. As a means of showing the gratitude of the Belgian people for the contributions occasion was taken at a livestock show to make a display of the tools distributed.

Over the display was a conspicuous sign indicating that the tools were the gift of Canada.

### WANT ROADS KEPT OPEN DURING WINTER FOR AUTOS

Melfort, Sask.—There is considerable discussion locally over putting forth an effort to keep the main roads leading to town open for automobile traffic during the winter.

Advocates of the scheme state that this is being done successfully in Manitoba, where conditions are similar to those prevailing in Saskatchewan.

The method employed in keeping the roads open is a liberal use of the disc and packer. It is claimed that the expense is comparatively trifling and that the required labor is easily obtainable.

The benefits and convenience derived from an open highway for autos during the winter season are obvious, and the plan should have the endorsation of local business men.

### MONTREAL MOTOR SHOW PROMISES TO BE SUCCESS

In view of the fact that the Montreal Automobile Trade Association has been able to secure a very large building for its forthcoming show in January, the promoters and directors of the above association look forward to a very successful affair.

## Many Hardware Merchants Are Placing Orders Months Ahead

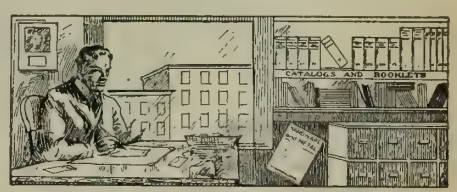
"HARDWARE merchants are buying goods now which they usually take delivery of in January and February," said H. Prudhomme of H. Prudhomme & Fils, Limited, wholesale hardware, Montreal.

Mr. Prudhomme stated to HARDWARE AND METAL that business conditions in the territory which they serve are very satisfactory. A great deal of their selling is done in the Province of Quebec, and conditions in the rural centres are particularly active. The great difficulty which concerns jobbers is that of securing the kind and the amount of goods which they state are wanted. "It is not a matter of price these days so much," said Mr. Prudhomme, "but rather of having what customers want, and if you have it they are willing to pay the price. People realize that prices will remain high."

**Expect Big Business**

Taking a forward look, Mr. Prudhomme expects that the season ahead will be a big one and that 1920 promises well for the hardware merchant. He feels that there must be a good deal of building undertaken and in this connection he stated to HARDWARE AND METAL that it had now come to the point where people could not expect prices to decline sharply, they would therefore have to go ahead with their building. The housing congestion has become so acute that it is impossible to defer building much longer. This means that the hardware merchant throughout the country will doubtless have a large demand for builders' hardware and the year 1920, from the opening of spring forward, should see a great revival of demands from the consumer for this class of hardware, which has been quiet during the period of the war. "The recent advances for nails and iron have stimulated sales already," concluded Mr. Prudhomme.

The location of the mammoth garage which has been secured for this exposition is within ready access of the business part of Montreal, being located to the rear of Sherbrooke Street East. An entrance from Sherbrooke Street will give direct access to the building. The building promises to be well lighted and fully seated.



According to the list of exhibitors already outlined, and because of the fact that many more intend to register, this show is promised to be one of, if not the most successful yet held in this part of Canada. Garage and automobile men are quite enthusiastic over the outlook.

### ENGLISH SHEETS TO BE AVAILABLE

HARDWARE AND METAL is informed by a reliable authority, that English galvanized sheets will be available for the Canadian market within the next five or six weeks. It is stated that several hundred tons of these sheets will be procured at once, and that, despite the high rates prevailing in winter, the needs of the market are such as to justify importation at this season of the year. Under the present market situation, it is interesting and encouraging to note that some relief, even though it may not be extensive at present, will be afforded in due time.

### IT IS WELL TO CARRY FIRE EXTINGUISHERS ON CAR

An automobile burned up in Montreal last week in the centre of the city. The driver of the machine was going along Cherrier street and flames suddenly shot out of the engine. The driver jumped, and seeing that he was unable to extinguish the flames, turned in an alarm which brought out the brigade of one of the divisions. This shows how very important it is that owners of cars carry a fire extinguisher, and while it is not clear whether this owner had one, this experience carries with it the moral that all cars should be provided with such protection. The point for the hardware dealer here is that of impressing upon car owners the necessity of being provided with a fire extinguishers, and while many carry these, there is a fruitful field for exploitation through the initiative of the hardware man of to-day.

### C. A. DUNHAM CO., LIMITED

A new bulletin, "Dunham Heating Data," has just been issued, describing and explaining standard methods of figuring radiation and laying out piping. Valuable ventilating data is also included, the whole being put in very practical and concise form, getting at the real information without having to wade through a lot of preliminaries. Various details of piping connections are illustrated, and complete pipe sizing information given. This bulletin, together with several others of interest and value to the stationary and heating engineer, may be secured by writing the C. A. Dunham Co., Ltd., 1535 Davenport Road, Toronto, Ontario.

### H. A. BEMISTER

H. A. Bemister, Suite 301, Mappin & Webb Building Montreal has issued a neat catalogue showing a line of "Phonograph Accessories." This illustrates records, albums, needles, cleaning brushes, adapters, motrolas, speed indicators, automatic stoppers, etc. Mr. Bemister will supply a copy of this catalogue to any reader of HARDWARE AND METAL.

# THE CLERKS DEPARTMENT

## Do You Ever Try to Get the Viewpoint of the Customer?

### Courtesy and Service Are Always Appreciated—Every Salesman is Constantly Advertising His Firm Either Favorably or Unfavorably

DID you ever try to get the viewpoint of the man or woman on the other side of the counter and find out just how much they appreciate service, courtesy and attention in a store? Salesmen, clerks especially, are constantly advertising their store. Some are a good ad. for their employers, others are only fair, and others again are a menace to the store because they treat people in such a way that they never want to come back.

Treating a customer like a rich uncle, so that you may expect his coin, is not courtesy—that's foresight, says Drew's Imprint.

Offering a seat to a man who enters your office is not courtesy—that's duty.

Listening to the grumbling, growlings and groanings of a bore without remonstrance is not courtesy—that's forbearance.

Helping a pretty girl across the street, holding her umbrella, carrying her poodle —none of these is courtesy. The first two are a pleasure, and the last is politeness. Courtesy is doing that which nothing under the sun makes you do but human kindness. Courtesy springs from the heart; if the mind prompts the action, there is a reason; if there be a reason, it is not courtesy, for courtesy has no reason. Courtesy is good will, and good will is prompted by the heart full of love to be kind.

#### Don't Get Indifferent

Only the generous man is truly courteous. He gives freely without a thought of receiving anything in return. The generous man has developed kindness to such an extent that he considers everyone as good as himself—treats others not as he should be treated (for generosity asks nothing) but as he ought to be treated.

All of us know that the kind of courtesy described is all too rare.

It isn't that many of us really mean or like to discourteous. The humdrum of our duties simply makes us indifferent. We become short or curt without realizing it. We forget that the fiftieth customer doesn't know that we have waited on forty-nine —that the one who asks the tiresome old questions doesn't realize that we have answered them hundreds of times.

#### These Things Count

A mere "Yes" or "No" when the customer expected some detail, some explanation; paying scant attention to what the customer says; criticizing the work of a fellow employee in the presence of a customer; showing by a supercilious smile that we don't think much of the opinions of the customer—all these things show a salesman to be lacking in the fine art of courtesy.

The difference between courtesy and the lack of it is often a small thing. Once upon a time as I sat in a restaurant, a waiter from another table came up, and without a word, "yanked" the sugar bowl from my table in order that he might serve a customer across the room. In another restaurant a waiter wanting a bowl of sugar came to the table at which I was sitting.

#### God Ad. for Firm

With a bow that would have done credit to Lord Chesterfield, he picked up the sugar bowl, offered it to me with "Have you had sugar, sir?" and then went off with it. These waiters were salespeople for the restaurant in which they worked. for what they did played as large a part in the impression that customers carried away as the food itself. One advertised his house badly; the other advertised it well and got more joy out of his work at that.

One of the first things we notice about a stranger is his possession, or his lack, of good manners. We realize instinctively that the person who says, "Yes, Mr. Graham," instead of merely "Yes" is well bred.

#### Perfectly Natural

If you have ever known intimately many persons of French or Spanish birth you have probably been impressed with their unfailing courtesy, and yet all of it seems perfectly natural. They have developed the courteous spirit until it has become a part of their lives.

Gushing, extravagant praise, flattery, agreeing with everything that other people may say; these things are not courtesy."

Don't imagine that people don't take note of store service and talk about it.

#### Was Too Personal

Yesterday a man told me how tired he got at a clerk because he was forever puncturing his sales talk with "I haven't any more of that style left—I didn't put in many of that brand—my trade won't stand for it." And other intense personals.

There are many clerks like that fellow They fail somehow to make a passionate hit a good many times. There is a sizeable and agreeable difference between "My Stock" and "Our Stock." The "Our" has it every time, too.

We would fancy, to hear some of these pecans gush, that they owned the store. the fixtures, sidewalk in front, and balanced the whole business on their important shoulders.

#### They Resent It

Most customers delight to see a clerk loyal to his store. and regard himself as a part of the machinery. But this idea of usurping the store and setting himself onto a personal pedestal doesn't go well with most outsiders. They naturally resent it, or pityingly try to make allowances for his clerkship's esoteric egotism. After they have made allowances, the bad taste of it will cling in their mouth still, and Mr. Clerk will be shoved away that much further instead of being cuddled.

In a small town haberdashery store, with a single clerk and no departments, I once got a fair illustration of this thing. A customer came in and asked for a certain make of hat. The celestial clerk stretched up several inches and answered loftily, "No, sir; I did not put in that kind this season. I found something I fancied better."

#### In the Background

My, that was fine and final. His judgment—his clerkship's judgment and nobody else's—was the dictum. The old man sat quietly in the background, you see, where that clerk had shoved him. He had conducted the business for well onto twenty years, still Mr. Clerk was Court of First and Last Appeals. He knew all the little ins and outs of the business so uncannily well that the seasoned judgment of the boss went out of the reckoning.

That clerk didn't need the old man. He was IT and carry everything. In fact, there was nothing left over to carry. His clerkship was the completely solved problem. Customer, to be sure, should rely upon him alone. The old man was nothing more than a mere figurehead. The store's stock of goods served as a vehicle for that clerk to ride in and deliver his proclamation.

#### The Customer's View

The idea is this—every time a customer deals with a clerk he wants a live consciousness that a big and experienced and dependable store head is back of that clerk's every assertion. He wants to feel that a proprietor is in the background of the transaction. He wants the entire thing flavored of boss. Mr. Clerk has not proved himself to be such a big man, or he would be owning the store. He will some day, but not yet.

Another species is this:

Yours truly called at a store recently and asked to see some cloth-top shoes.

"What color do you want?" was the comeback. Who knew? I didn't. Nobody hardly ever knows beforehand. I couldn't help feel that I was too much trouble here, maybe. Two front windows were filled with shoes of various hues, yet that clerk wanted to know what color I wanted.

#### Is Seldom Set

A man may wend his way to a store for a kind of shoe top partly pictured in his mind. But he is seldom set. He is open to sights and styles and evidences new. In four minutes' time he may change his mind. He may flop completely over.

I do not favor the plan of trotting out and confusing a customer on everything a store has. But it is plain, common sense to begin showing him something without attempting to make him limit himself first thing.

If a customer is urged to commit himself first, he gets an idea that the store's stock is limited. He thinks inwardly also that something there ought not to be shown him. He loses some of his respect for the clerk's resourcefulness. I was, sure, put to it that time up in Canada. I had no preconceived notion of the color of top I want-

ed. I felt out of place in the store and ill at ease.

Finally, I did say "gray" and bought a "brown" top.

If a store thinks it is too much trouble to lay things out before a customer and not drag a declaration out of him first, good night to patronage after that. And it won't have to wait long for patronage to vamoose, either.

### Talk With Them

John Jones wishes a store to make much of him. Wishes it to crack its heels in an effort to please him.

Yes, sir; it's a fine stroke to talk a bit with customer to get onto his slant. It can be done while we are showing him things as a starter. He does not enjoy being put onto a witness stand, first, and limited to the truth, the whole truth, nothing but truth. He wishes leeway. Wants plenty of room in which to breathe. Wishes a chance to turn coat if desirable.

The best way to give him that chance is to commence with this thing and that thing. It will, in itself, put him on a willing witness stand.

A good deal the same way with price, too. A caller generally knows what he wants to spend and hints it, or he has a somewhat hazy notion of the amount he cares to separate himself from and maybe does not speak it.

He is elastic, to an extent, and ought to be handled accordingly.

By the time you have shown him several kinds of hats, say, you can see with reasonable assurance, about what price he wishes to pay. He will often give the verdict, himself, within three minutes.

## COURAGE PLUS IDEAS

Continued from page 51

"fling at the bat" once in a while themselves. It does pay to be a "mixer."

### Other Equipment—Office

A recent removal of the office to a neat and cosy nook which was selected just for this purpose, affords the management a most commodious accounting room, and where work can be done without any possibility of being interrupted. Notwithstanding this, the location of the new office commands a full view of the store, so that if but one salesman is in the store, he can readily serve a customer who may enter. Plenty of light is to be had from an adjacent window—(and which has iron bars for protection on the outside)—as well as light from an electric lamp.

To the rear, an excellent warehouse was erected this summer. Built upon a concrete foundation, the floor of the lower section was planned to come even in height with the bed of dray wagons for loading and unloading. The first floor is used for the storage of heavy goods, and stoves are displayed here—both heaters and ranges. A short runway connects the warehouse with the main store.

The second floor is used for the preparation of window backgrounds, and for storing bicycles, sleighs, and lighter surplus hardware stock. The whole building is covered with metal.

Each year sees new improvements, and these are planned ahead, with a view to affording the desired accommodation that is called for through the expansion that comes yearly.

## BOXING MATERIAL SCARCE

The present demands of various manufacturers for boxing materials cannot be met, according to advices secured by HARDWARE AND METAL. This shortage somes at a season of the year when the condition proves a real hardship, and is due, in large measure, to the shortage of woodsmen, and upon whom the paper manufacturers must depend, in the first instance, for their supplies of pulp.

As showing how acute the situation is, the representative of a Canadian cocoa manufacturing company stated to HARDWARE AND METAL that they had just placed an order for several carloads of boxes at open prices. Not only so; the manufacturer accepted the order on the understanding that delivery would be made when possible, and only at such prices as he should find necessary to charge when the stock was manufactured.

This shortage of stock was emphasized by a second manufacturer, and who stated that the outlook was very uncertain for supplies.

## BROOM PRICES TO ADVANCE AGAIN

The broom market is manifesting considerable strength, and advices received indicate that there will be a further advance of price early in the New Year, if not sooner.

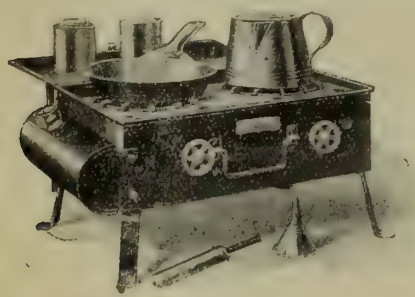
An Eastern Canada manufacturer pointed out to HARDWARE AND METAL that the recent increases for wire products would be one of the contributing factors in the increase. In addition to this, handles have recently advanced, and there is also the advance for wire nails recently effective. Of course the high prices obtaining for broom corn have been the big factor, and in addition to this labor is perhaps the largest contributing factor in the cost of brooms to-day.

While actual Government reports indicate that shipments of broom corn have for some months of 1919 been heavier than those of the corresponding months of 1918, this does not prove that the supply is greater. Manufacturers held off buying their raw materials in the hope that something would turn up and supplies be cheaper. This meant that when the 1919 harvest was garnered the various manufacturers rushed their orders in for supplies, having been short of the necessary stock. The consequence has been that of showing larger shipments than formerly.

It is understood that the present movement of brooms is very large and that, despite the high prices ruling, there was been a continued demand from all sources for this commodity.

L. Fischler, Chicago Spring Butt representative, of New York, called this week on the Montreal trade.

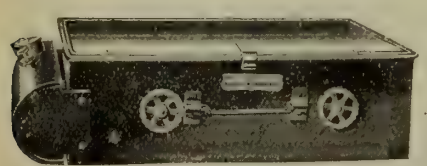
## HE'LL TELL THE WORLD



Williams in Indianapolis "News."

# NEW HARDWARE GOODS

## OFFERED TO CANADIAN HARDWAREMEN



### KAMP KITS

Auto Kamp Kook Kits, manufactured by the Prentiss Wabers Manufacturing Co., of Grand Rapids, Wisconsin, are made in three sizes. The illustration

*Kamp Kit Open*

shows Nos. 2 and 3 open, featuring the new model tank with pressure gauge. No. 2 is a two-burner stove, with two six-inch grates. No. 3 also has two burners, but has eight-inch grates. Both, it is stated, are provided with a die-made

*Closed*

gasoline tank, with nickel pressure gauge. The lower illustration shows the kit closed, with equipment packed inside.

### "B.S.A." OFFERING NEW SHOTGUN

Specifications of a new shotgun, now being manufactured by the Birmingham Small Arms Co., Birmingham, England, are announced.

The "box-lock" or "Anson and Deeley" type of action has been adopted, but this has been re-designed to impart stiffness and strength. A rearrangement of the lock work has been devised to overcome the irregular and grating trigger release, usually associated with this type of action. Expensive machinery has been specially designed for barrel manufacture, so the metal may be massed where it is wanted for the satisfactory balancing of the gun.

The exact specifications are:

Barrels.—28 or 30 inches long. Jessop's fluid compressed steel. Lumps formed solid with barrels. Right cylinder. Left choke.

Action.—B.S.A. special pattern (Anson and Deeley type). Sears, tumblers and other action parts of chrome vanadium steel. Body of nickel steel. Top lever. Automatic safety. Double bottom lock.

Fore-end-snap-on-type, nicely checkered.

Stock.—Straight hand or half pistol grip. Nicely checkered. Bend at heel, 2"; at comb, 1½"; length, 14½".

Weight.—About 6¾ lbs.

Balance and Trigger Pull.—Specially attended to, to give the gun the superb handling qualities of the best hand-made gun.

Interchangeability.—All parts quickly interchangeable.

Proof and Tests.—Every gun is nitro proved at the official proof house and is carefully tested.

The Canadian representative for the B. S. A. Co. is the Fraser Co., 10 Hospital Street, Montreal, Que.

### BREAD TOASTER

The Perfection bread toaster, for gas, gasoline and cook stoves, manufactured by Bouquet-Brownson Co., Inc., St. Paul, Minnesota, is, it is claimed, the cheapest toaster on the market, because it will outwear all other makes, being heavy and substantial. It is stated that it has a perforated flame spreader and woven wire top and that by covering it with a pan it will make an excellent oven for baking potatoes, pies, etc., at a great saving in gas. The wire top plate is designed so as to keep the toast far enough from the flame so that there is no direct contact and no burned toast. The bottom is concaved, so that the flame spreads evenly. Another feature

*Toaster*

about the Perfection is that it is very easy to clean.

### PET COCK WRENCH

The "Handy" pet cock wrench manufactured by the Handy Products Company, 302 Erie Building, Cleveland, Ohio, for draining Ford radiators, is made, it is stated, of high grade steel with a black japan finish.

The jaws of the wrench are made in one piece with the ends closed, which thus prevents it from slipping off. They are riveted to the rod and guaranteed not to work loose or turn. The full length of the wrench is 21 in.

### Wants Stove Supplies

Geo. A. Sills & Co., Seaforth, Ont.—Please advise where we can procure supplies for Home Comfort Stove.

This stove is made by the Wrought Iron Range Co., 149 King St. W., Toronto. —Editor.

### Repairs for Stoves

Chown Hardware Co., London, Ont.—Please inform us where we may procure repairs for the Canada Pride Range.

These may be procured from McIntyre and Taylor, 501 Queen St. W., Toronto. —Editor.

### Repairs for Range

G. A. Hawkins, Exeter, Ont.—Kindly advise where we may procure repairs for Laurentian Ranges, formerly made by the Gould Manufacturing Co., Smith's Falls, Ont.

These are made by the Tudhope Anderson Co., Ltd., Orillia, Ont. McIntyre and Taylor, 501 Queen St. W., Toronto, carry a line of these.—Editor.

### Clay Pigeons and Traps

S. E. Eakins, Millbrook, Ont.—Kindly advise where I may procure clay pigeons and traps.

These may be procured from the following: Dominion Cartridge Co., Montreal, Quebec; Remington Arms Union Metallic Cartridge Co., Windsor, Ont.; The Marble Arms Manufacturing Co., Gladstone, Michigan; Nelson Long, 77 Burlington St., Hamilton, Ont.; Dupont Powder Co., Wilmington St., Delaware, U. S. A.

### Hotpoint Electric Irons

W. Hanna & Company, Port Carling, Ont.—Kindly give us the name of the manufacturer of the Hotpoint Irons and Toasters.

The above are made by the Canadian Hotpoint Electric Heating Company, 25 Brant St., Toronto.—Editor.

### Wire Window Guards

In HARDWARE AND METAL of November 29, in the Letter Box, the name of C. H. Johnson & Sons, Ltd., Montreal, was inadvertently omitted from an inquiry asking where Wire Window Guards, etc., to order could be procured.

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

PRICE changes are unusually numerous this week and almost without exception are upwards. Among the advances that have taken place are: Steel buttweld pipe, 1 to 2 points; nipples, 5 points. All cotton goods, including rope sash cord, clothes line, awning cord, wrapping twine, etc., are up approximately 5 per cent. Bolts and nuts, screw and strap hinges are up 10 per cent. Rivets, ½" and over are 50c per 100 lbs. higher. Tire bolts have advanced approximately 10 per cent. Washing machines, barrel churns, wringers advance 10 per cent. Ready roofing is 5c per square higher. Poultry netting, brushes, hair brooms and stove scrap are also higher. Chair nails, curtain pole and brass trimmings have advanced.

Copper and brass sheets, bars and tubes have declined 2 cents per pound.

The general tendency at present is for firm markets. The settlement of the soft coal strike will have effects. but they will not be immediate,

It is expected that 1920 will be a year of great expansion and tremendous demands are looked for in all hardware lines. Warehouse stocks are depleted and are said to be the lowest in the recollection of some of the oldest business men.

# MONTREAL MARKETS

MONTREAL, Dec. 11—Higher prices are effective for a great many lines this week and among the new high prices are poultry netting, washing machines, clothes wringers, buck and crosscut saws, all kinds of bolts, nuts and coach screws. Screw and strap hinges, too, are marked higher. Barrel churns are marked up, too. Sisal rope is lower, while cotton rope is much higher in price. Lead products are decidedly firm, for pig lead and pig tin are both higher this week. Copper, too, is marked up and spelter and antimony prices are above those of last week. The jobbing trade is a particularly active one at this time and the tendencies of nearly all lines is to advance. There is increasing difficulty in obtaining adequate stocks. In the meantime holiday goods are in ready and brisk demand.

### *Netting, Machines and Wringers Advance*

**Montreal.**

NETTING, WASHING MACHINES.—Advance prices are effective for poultry netting. The new discounts are as follows: 2-in. mesh, Canadian, net list; 1-in. mesh list plus 2½ per cent.; American, 1 and 2-in. mesh list plus 2½ per cent. An advance is effective for washing machines and also for wringers. This amounts, on washing machines, to $1.50 to $10 per machine, list, and depending upon whether the machine is electric or hand or other power type. Prices on wringers are higher, some of the new prices being as follows: Royal Canadian, per doz., $92.80; Easy, $99.80: Rapid, $90.80; Crest, $88.80; New Eureka, $79: Eureka, 11 in., $71.40; Bicycle, $109.30.

### *Buck and Crosscut Saws Higher; Bolts, Too*

**Montreal.**

SAWS, BOLTS.—Crosscut saws are marked higher this week, the increase amounting to about 15 per cent. on the cheaper grades and to 5 to 7½ per cent. on the higher quality. Buck saws are also advanced, this being about 15 per cent. An advance of approximately 10 per cent. is made for bolts and nuts, and this applies to bolt ends, coach and lag screws.

### *Hinges Are Higher; So Also Churns*

**Montreal.**

HINGES, CHURNS. — Prices are higher for screw and strap hinges, the present discount being 25 per cent. from list, whereas it was 35 per cent. before. Barrel churns are up. The present discount from the list is 7½ per cent. instead of 17½ per cent. as formerly.

### *Differential Changes For Shovels; Scoops*

**Montreal.**

SHOVELS, SCOOPS.—The advance for shovels and scoops is higher. Heretofore the advance, per dozen, for various large sizes above No. 2, has been 25c per dozen. This is now advanced to 35c per dozen extra.

### *Firmness and Activity Mark Wares; Stoves*

**Montreal.**

STOVES AND WARES.—The manufacturers are still making quite full deliveries on many lines of stoves, and for heaters and ranges there continues to be an active market. Prices are, naturally, very firm, and some suggest that there will be other advances than those which have already matured. Wares are very active, too, particularly japanned and enamelled, decorated holiday sets. There is much strength of undertone.

### *Still Active Sales Wire and Wire Nails*

**Montreal.**

NAILS AND WIRE.—The Canadian market is said to be better supplied with nails, relatively speaking, than are some sections of the trade in the United States. In any case the trade here appears to be getting a fair supply, and prices, while firm, are still held at $5 per keg, this applying as well for cut nails. The demand is still a heavy one. Wire products, too, are quite active for this season of the year. smooth steel being held at $5.25 per 100 pounds.

### *Sisal Rope Lower; Cotton is higher*

**Montreal.**

ROPE AND CORDAGE.—Prices are reduced on sisal rope and on British and beaver manila. This follows the very definite forecast made in HARDWARE AND METAL's market columns last week. The present prices are: Pure

manila, 31c per pound; British and beaver manila, 26c, and sisal, 22½c per pound. Lath yarn is also down to 22½c per pound. Cotton rope has advanced and the present basis is: 3-16 in., per pound, 81c: ¼ in. and up, 80c.

## *Business Stated Good For Gasoline and Oil*

**Montreal.**

GASOLINE AND COAL OIL.—The demand for gasoline and coal oil is reported to be good, and prices are unchanged on both lines. Oil, as to grade, is ruling at 22 to 25 cents per gallon, while motor grade gasoline is selling at 33 cents per gallon.

## *Roofing Advanced 5c Per Square*

**Montreal.**

ROOFING.—An advance of 5 cents is reported on roofing. Some of the lines affected are as follows:

Everlastic, 1 ply, $1.85 square; 2 ply, at $2.20 square; 3 ply, at $2.55 square.

Panamoid, 1 ply, $1.75 square; 2 ply, $2.05 square; 3 ply, $2.40 square.

## *Sheet Supplies Less; Almost Any Price*

**Montreal.**

SHEETS AND PLATES.—It is safe to say that the sheet situation has narrowed down to this, that stocks are, in some instances, fully exhausted; that what stocks are to be had are much broken and the tonnage depleted, and that, as a consequence, it is almost impossible to make definite quotations from week to week. Premiums are being paid for stock, when available.

| 18 and 20 gauge | .... | 8 60 |

NOTE——These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

## *An Active Demand For Iron and Steel*

**Montreal.**

IRON AND STEEL.—There is a brisk demand, still, for iron and steel bars and the undertone is very firm. No changes have been made, and while supplies are not excessive by any means, the stocks placed at the disposal of jobbers are fairly ample.

| IRON AND STEEL | |
|---|---|
| Iron finish machinery steel | 4 10 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 25 |
| Spring steel | 5 00 |

| Refined iron, per 100 lbs. | 4 90 |
| Mild steel | 4 05 |

## *Solder May Advance; Pig Lead Products Firmer*

**Montreal.**

LEAD PRODUCTS.—Under the higher prices that are now ruling for pig lead, and also for tin, it would seem that solder will be revised upward if these advances are continued. In the meantime there is a firmer feeling, and this applies, likewise, to various other lead products.

| | | |
|---|---|---|
| Lead pipe | .... | 0 12½ |

## *Old Metals Are Firm But Movement Slight*

**Montreal.**

OLD MATERIAL.—The movement of old material to the mills is fairly steady, but beyond this the activity is not marked. Prices are ruling, however, with a quite satisfactory undertone, the tendencies being toward higher levels.

| Dealers' Buying Prices— | | |
|---|---|---|
| Old rubbers, boots and shoes | 0 07 | 0 08 |

| No. 2 busheling | 7 00 | 8 00 |
| Machinery, cast (ton) | 29 00 | 30 00 |

## *Tin, Lead, Spelter, Copper; All Stronger*

**Montreal.**

INGOT METALS.—The markets are ruling higher all around, and this is noticeable in pig lead, tin, spelter, copper and antimony.

COPPER.—This is again firming, and the tendencies are upward once more. Electrolytic is quoted at 24½c, and casting at 24c per pound.

TIN.—London markets advanced 10 pounds in two days this week. The local situation is firmer, and prices quoted are 60c per pound.

LEAD.—Considerable trade in lead seems to have been accomplished. Markets are again higher. Local price 8½c.

SPELTER.—This, too, is stronger for the week, and prices quoted in this market are now 10½c per pound.

ANTIMONY.—There is a good outlook for this metal, importers state. Price basis is firmer again at 11½c per pound for English and 11¼c for Chinese.

ALUMINUM.—Featureless at 33c per pound.

# TORONTO MARKETS

TORONTO, Dec. 11—The upward tendencies in nearly all lines of hardware are the most noticeable that have been reported for some time. The coal crisis continues to be the main factor and numerous mills are forced to shut down on account of the great scarcity of coal. Some have it that 65 cars of coal were confiscated from one manufacturer and he had to close his plant on account of it.

It is believed by many that 1920 will be a great year of expansion and that the demand in all lines will be tremendous. It is stated that if this is the case many shortages will be noticed as it is believed that generally manufacturers still have enormous orders of the present year to fill and which are nowhere near completed on account of the many disturbances, etc.

The following are some of the lines showing a change in price: Bolts and nuts advance 10 per cent; rivets, ½ inch and larger, 50c per 100 pounds; tire bolts now quoting less 40 per cent.; steel buttweld pipe 1 to 2 points; nipples 5 points; sash cord, awning cord, cotton twine, barrel churns, ready roofing, poultry netting, hair brooms and brushes, screw, hook and strap hinges, chair nails, curtain poles and brass trimmings, stove scrap and scrap metals, all show higher prices.

Copper and brass bars, sheets and tubes show a decline of 2 cents per pound.

## *Steel Buttweld Pipe Advanced* 1 *to* 2 *Points*

**Toronto.**

STEEL PIPE.—Standard steel buttweld pipe shows an advance of from 1 to 2 points. Prices are holding firm on the new list, and are showing a good demand. The steel strike, also the present coal crisis, has, it is stated, been a factor in bringing this change into effect. The situation was in a bad condition previously to the coal strike, and since it has taken place the whole situation has become more serious. The new lists will soon be available and are quoting, it is stated, 2-inch and under advance 2 points, 2½-inch and over 1 point, extra heavy 2 points.

## *Nipples and Couplings Up Approximately* 5 *Points*

**Toronto.**

NIPPLES AND COUPLINGS.—An advance in accordance with steel buttweld pipe has taken place in all nipples and will approximate 5 points.

## *Sash Cord and Awning Cord Advance*

**Toronto.**

SASH CORN AND AWNING CORD have advanced and are holding very firm at the new prices which are as follows: Hercules Sash Cord No. 6 at 90c lb., No. 7 at 89c lb., and 8 to 12 at 88c lb.

Awning Cord, white, No. 3½ at $2.50 doz., 4 at $4.00 doz., 4½ at $5.50 doz. Drab No. 3½ at $3.00 doz., 4 at $4.50 doz., 4½ at $6.00 doz.

## *Tire Bolts Are Now Quoting Less* 40%

**Toronto.**

TIRE BOLTS.—An advance has taken effect in tire bolts and they are now quoting at 40 per cent. discount.

## *Chair Nails Advance; Now* 20% *Higher*

**Toronto.**

CHAIR NAILS.—An advance has taken effort on brass-headed and other chair nails. This advance will approximate 20 per cent., it is stated.

## *Curtain Pole Trimmings, Etc., Advance* 10 *to* 40%

**Toronto.**

CURTAIN POLE AND BRASS TRIMMINGS, PICTURE WIRE, etc.—These lines show varied advances but owing to the way they are marketed, it is not convenient to list. However, the new advances show a range from 10 per cent. to 40 per cent.

## *Barrel Churns Have Advanced* 10 *Per Cent.*

**Toronto.**

BARREL CHURNS.—In sympathy with other lines, that of woodenware showed higher prices last week. Churns are reported to have advanced. The new discount for Toronto, Hamilton, London, and St. Marys is 10 per cent.

## *Cotton Wrapping Twine Advanced* 5c *Pound*

**Toronto.**

COTTON TWINE.—An advance of 5 cents per pound has taken place in cotton twines. The quotations now read: 3-ply balls, 87c per lb., 3-ply cones, 83c per lb., 4-ply cones, 87½ cents per lb.

## *Ready Roofing Advanced* 5c; *May Go Higher*

**Toronto.**

READY ROOFING has advanced 5 cents per 100 square feet, with an intimation that further advance will take effect in the near future.

## *Poultry Netting Advances* 10 *Per Cent.*

**Toronto.**

POULTRY NETTING.—An advance of approximately 10 per cent. has taken effect in poultry netting, and the present quotations are no was follows: Lay Flat 1 and 2-inch are now list plus 2½ per cent. Hexagon 2-inch, net list, 1-inch, plus 2½ per cent. on list.

### CHANGES IN CARTRIDGE PRICES

As HARDWARE AND METAL goes to press it is learned that prices on metallic cartridges and empty paper shot shells, primers and accessories, etc., have been revised. A new price list will be issued and will appear in next issue of HARDWARE AND METAL. An extra charge is also noted for broken cases and is 5 per cent. over the list prices. All metalics and shot sheils are now net 60 days, or 2 per cent. 30 days, and are all f.o.b. the factory.

## *Rope Declines* 1c *lb.; New Prices Firm*

**Toronto.**

ROPE.—The decline in rope that HARDWARE AND METAL reported in last week's issue is now being quoted and prices are as per current market quotations. The new price is firm and no further change is expected at present.

## *Hair Brooms Advance* 5 *Per Cent.*

**Toronto**

HAIR BROOMS.—The advance on hair brooms is approximately 5 per cent. This is no doubt due to the increased cost of production, also the cost of raw materials as well as the higher costs of doing business. The new price is a firm one, and is expected to remain unchanged for some time, although manufacturers would have to raise with increasing costs.

## *Brushes Have Advanced Approximately* 10 *to* 25%

**Toronto.**

BRUSHES.—Scrub, shoe, stove, etc., show an advance of approximately from 10 to 25 per cent. This line has been firm for some time and the advance is not unexpected.

## *Eavetrough Firm; May Advance Soon*

**Toronto.**

EAVETROUGH continues to show good demand and large sales are the result. Jobbers do not quote any higher prices as yet, although galvanized sheets are nearly exhausted. It is hard to predict the future market on eavetrough, but a higher price in the near future would not surprise many of the best informed.

## *Copper and Brass, Sheets, Bars and Tubing Down* 2c

**Toronto.**

COPPER AND BRASS.—Sheets, bars and tubing have declined from 2 to 2½ cents per pound. The heavy demand for copper and brass has fallen off considerably. There are so many factors in the situation that it is almost impossible to state just what the controlling factor is. There is no doubt that the curtailed production caused by the recent strikes, as well as the present coal strike, has affected the demand. Quotations are as listed in the current quotations of HARDWARE AND METAL.

## *Screw Hook and Strap Hinges Advance* 10%

**Toronto.**

SCREW HOOK AND STRAP HINGES are now quoting 10 per cent. higher. This is no doubt a direct reflection from the coal crisis, and other labor disturbances. The new discount is quoting at 25 per cent. off the list prices as shown in HARDWARE AND METAL current quotations.

## *Rivets ½-in. and Larger Are Up* 50c *Per* 100 *lbs.*

**Toronto.**

RIVETS.—½-inch and larger are 50 cents per 100 pounds higher. This is in order with the new advance already noted on bolts and nuts, this price is a firm one and makes the new basis $6.75 per 100 pounds.

## *Bolts and Nuts Have Advanced* 10%

**Toronto.**

BOLTS AND NUTS show an advance of approximately 10 per cent. This is no doubt a reflection of the coal crisis and other recent strikes, especially in the steel mills. Bolt rods and bars are showing a marked scarcity nearly all over the world, there being few countries that have not had their strikes in the dif-

# An Important Development in the Paint Industry

## Remarkable Progress of the Old Established Montreal Paint House of McArthur, Irwin, Limited

IN 1842 when the late John McArthur and associates founded what is now known as McArthur, Irwin, Limited, they adopted a definite Forward policy. That this policy has been adhered to throughout the history of the Company is amply proven by the advance of the business from one small store to its present dimensions.

Paints and paint products are not the only concern of this company, but like every other part of the business, the paint end has been developed as a single business by experts. As a consequence, sales have advanced by leaps and bounds, and development after development has been found necessary.

*The story of McArthur, Irwin, Limited is the story of an old business, firmly founded and carefully built. It is a story which should be written in two chapters. Both chapters would unfold a tale of steady growth, first under the old regime and by old methods, and now under the guidance of younger men of the modern aggressive type.*

The founders of the concern set as the means of attaining more business the production of high grade paints only. To this they aimed to add as perfect service as it was possible to give. Limited as they were in so many ways, they were able to turn out a product that gained an enviable record for dependable quality. And so they builded, laying a foundation of rugged honesty and fair dealing upon which the present great business is built.

The great deciding factor in the production of quality in a finished article is the quality of the raw materials from which it is made. For many years McArthur, Irwin, Limited, imported dye stuffs, chemicals, dry colors, White Lead and similar materials to be used in the manufacture of their *Crown Diamond Paints*. No expense was spared to have these raw materials of the very best quality, buyers being sent to all parts of the World. However, there is only one way to be certain on this score, and that is to gather the raw materials and prepare them under your own supervision. This became the object of McArthur, Irwin, Limited. Formulae and processes of manufacture were secured, factories purchased or erected, and men of expert knowledge added to the growing organization.

From time to time, as expansion demanded, the capital stock of the company was increased. The rapid growth of the past few years is well illustrated in the fact that in 1912, when the present organization was effected, the capitalization was $380,000—to-day it is $1,000,000. This big increase in capital has been made necessary by the establishment of several factories for the manufacture of chemicals, dry colors, white lead, etc.

Mr. John Irwin, the Vice President and Managing Director is largely responsible for the rapid strides the Company is making. He is a man of business energy and unquenchable optimism. He has the happy faculty of imparting his energy and optimism to those who work with him and an almost uncanny knack of always picking the right man for the right job. He has built up around him a loyal staff filled with the confidence that wins and intent on each doing his part to uphold the fair reputation of all *Crown Diamond Products.*

Mr. Irwin is a man of wide interests. In addition to his chief interest (McArthur, Irwin, Ltd.), he is President of Parker, Irwin, Ltd., Montreal, Manufacturers of Rubber Cements, Toe Caps, Blackings, Shoe Dressings, etc.

Vice President Davies, Irwin, Ltd., Montreal, Refiners and Bleachers of Waxes, Importers and Exporters of Oils.

Vice President Laporte Irwin Ltd., Montreal, Mfrs., Hydrogen Peroxide and Blanc Fixe.

Vice President Miller Extracts Ltd., Millerton, N.B. The only hemlock extract manufacturers in Canada.

Director Standard Amusement Co., Montreal.

The latest addition to the list of McArthur, Irwin, Limited, industries and one that will have a great bearing on the quality of *Crown Diamond Paint Products* is the new Lead Corroding plant recently established at Outremont. This plant is said to be the best controlled and most efficient lead corroding factory in America.

This new plant has been erected under the personal supervision of Mr. R. H. Monk, and will be operated under his management. The high efficiency of the plant and the remarkable quality of the product are due to the broad experience and technical knowledge of Mr. Monk. He received his early training at King's College, London, England, in the research laboratories of Sherard Cooper Cole of London, England. Since then he has specialized in

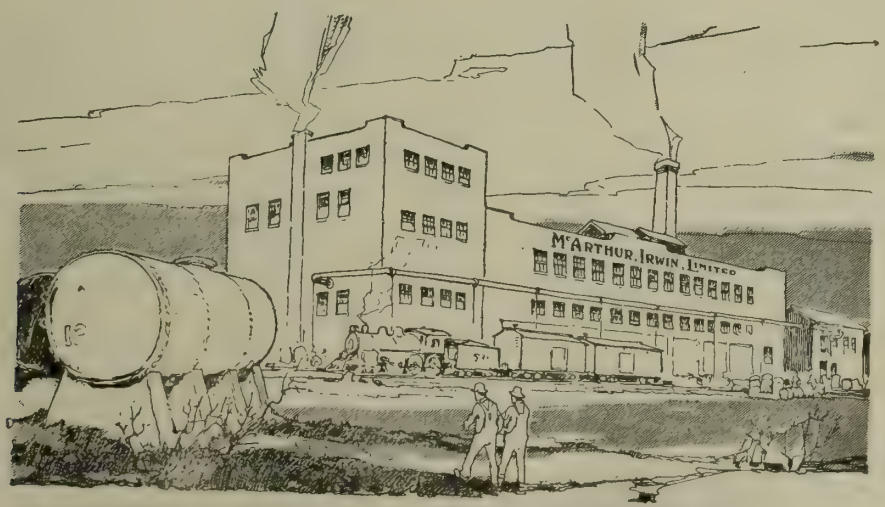
MR. JOHN IRWIN

in the technique of white lead production.

The method of corroding lead followed in the McArthur, Irwin plant follows very closely the principal of that known as the "Old Dutch" Process. Under the "Old Dutch" Process reaction of the acids and gases goes on largely out of sight and control. The difference in the McArthur, Irwin process guarantees this control because every operation is completed under direct observation. A trip through the plant is really a liberal education in the making of paint pigments, and helps one to realize how fully the company can guarantee the uniform high quality of their product.

In the first place, the finest British Columbia pig lead is refined in specially built furnaces and cast into thin wafers so that the greatest amount of surface will be presented to the action of the acids and gases in the corroding chamber.

The corroding chamber is an immense room constructed of solid concrete. Great heaps of the lead wafers are arranged in this room so that air, acids, and gases may freely circulate in and around them. Oxygen extracted from the air, acetic acid, and carbon dioxide as produced from pure carbon and air, act upon the masses of lead wafers reducing them to a semi-liquid state. This is pumped into high filter tanks and as much of the free acid as possible is drawn off and the remaining lead pulp is ready for the heavy bronze filter presses.



The filter presses exert hydraulic pressure on the lead pulp, removing every trace of acid and leaving the lead in the form of a dry white powder. This powder is next subjected to the action of a four-thousand - pound wheel which reduces it to an extremely fine, soft, non - metallic powder.

Ordinarily, the next step would be to mix the dry lead with linseed oil, pass it through a grinder and pack for shipment. In the the McArthur, Irwin plant, an additional five hours time is consumed in making certain that the oil penetrates every last fine particle of the lead. To this end, two additional machines are employed. The paste formed by mixing the lead and oil is first mechanically matured and then passed through a kneading machine from whence it emerges perfectly mixed. It is then fed into huge granite rolls, where, rolled and re-rolled, it acquires that perfect smoothness and freedom from moisture by which *Crown Diamond White Lead* will be readily distinguished from all others. As it comes through the rolls, the white lead is removed, weighed, and packed for shipment in the well-known yellow irons and drums. For domestic trade, the drums are the standard sizes—1, 2, 5, 12½, 25, 50 and 100 lbs. For export trade, the sizes are governed by special requirements.

MR. R. H. MONK

A very interesting booklet has been prepared which describes, in detail, this modern method of corroding white lead. The booklet is entitled "From Pig Lead to White Lead"—McArthur, Irwin, Limited, 20 St. Paul Street West, will gladly mail you a copy on request.

EXACT REPRODUCTION OF LEAD CORRODING WORKS—MONTREAL

ferent steel mills. The U. S. A. coal miners' strike has caused great disturbance and unrest, especially in the steel market. It is generally believed that it is to the manufacturer's interest to keep the prices as low as possible under the prevailing circumstances. This, however, is becoming impossible owing to the greatly increasing costs. The following are the new prices:

We quote the following discounts, subject to change without notice:

| | |
|---|---|
| Carriage bolts, $1.00 list, ⅜ in. dia. and smaller, 6 in. and shorter | 15% |
| Carriage bolts, $1.00 list, ⅜ in. dia. and longer lengths | Net |
| Carriage bolts, $1.00 list, 7-16 in diam. and larger | Net |
| Machine bolts, ⅜ in. dia. and smaller, 4 in. and shorter | 20% |
| Machine bolts, ⅜ in. dia. and longer lengths | 10% |
| Machine bolts, 7-16 in. dia. and larger | 10% |
| Sleigh shoe bolts, all sizes | Net list |
| Coach and lag screws | 30% |
| Square head blank bolts | 10% |
| Bolt ends | 10% |
| Plow bolts | 5% |
| Elevator bolts, large head | 5% |
| Elevator bolts, corrugated heads | 40% |
| Fancy head bolts | 5% |
| Shaft bolts ($3.00 list) | 5% |
| Step bolts, large head ($3.00 list) | 5% |
| Whiffletree bolts | 5% |
| Nuts, 2 in. and smaller, square blank, add to list | $1 50 |
| Nuts, 2 in. and smaller, square tapped add to list | $1.75 |
| Nuts, 2 in. and smaller, hexagon—blank, add to list | 1 75 |
| Nuts, 2 in. and smaller, hexagon—tapped | 2 00 |

Terms: 2 per cent. off 30 days from date of shipment.

## *Boiler Tubes Firm; Remain Unchanged*

**Toronto.**

BOILER TUBES are holding firm and are showing little movement. Although the demand is seasonable, the rush business is practically over for the season. It is hard to predict what will happen to the prices in this line next season, as all markets are so unsettled. The following are the quotations:

| BOILER TUBES— | Per 100 feet Seamless | Lapweld |
|---|---|---|
| 1 inch | $27 00 | ..... |
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## *Corrugated Sheets Firm; Remain Unchanged*

**Toronto.**

CORRUGATED SHEETS show no change in price, although owing to the serious condition of the present market on flat sheets, an immediate change would not be surprising. The demand was considerably increased owing to the storm which was quite general two weeks ago. The following are quotations:

| Corrugated Sheets— | Per 100 square Feet Gal'zed | Painted |
|---|---|---|
| No. 28 gauge | $8 25 | $7 00 |
| No. 26 gauge | 9 00 | 8 00 |
| No. 24 gauge | 13 50 | 10 00 |
| No. 22 gauge | 16 00 | 12 50 |
| No. 20 gauge | 19 00 | 16 00 |
| No. 18 gauge | 24 00 | 19 50 |

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

## *Sheets and Plates Firm; Famine Continues*

**Toronto.**

SHEETS AND PLATES.—A decided famine is at present prevailing on the local market. The sheet situation has been in a serious position for some time and the coal crisis has made the situation more acute. It is stated that sheets are not procurable and that price is no consideration to consumers requiring the material. However, it is believed, generally, that jobbers are regulating prices and stipulating orders so that their stocks will serve as many as possible and their price be reasonably low under the prevailing conditions.

Owing to the conditions stated above it is almost impossible to give accurate prices as nearly all who have stocks have procured them under extraordinary conditions, and sheets galvanized, 10¾ for instance, are quoting at anywhere from $8.50 to $10.00 per 100 lbs. The following are the quotations:

| BLACK SHEETS— | | |
|---|---|---|
| 14 gauge | 5 45 | 6 50 |
| 16 gauge | 5 90 | 6 95 |
| 18-20 gauge | 5 45 | 6 85 |
| 22-24 gauge | 6 50 | 6 90 |
| 26 gauge | 6 60 | 6 95 |
| 28 gauge | 6 75 | 7 05 |
| 3-16 inch plate | 5 20 | 5 55 |
| ¼-inch boiler plate | 4 80 | 6 10 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

| GALVANIZED SHEETS. | Premier | | Apollo | |
|---|---|---|---|---|
| 10¾ oz. | $9 20 | $9 80 | $8 55 | $9 55 |
| U.S. 28 | 8 60 | 10 20 | 8 15 | 8 85 |
| U.S. 26 | 8 20 | 8 80 | 7 85 | 8 50 |
| 22 and 24 | 8 00 | 8 20 | 7 70 | 7 30 |
| 18 and 20 | 7 80 | 8 00 | 7 55 | 8 10 |
| 16 | 7 55 | 7 80 | 7 40 | 7 90 |
| 12 and 14 | 7 35 | 7 55 | 7 25 | 7 65 |

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Stove Plate and Other Scrap Metals Higher*

**Toronto.**

WASTE MATERIAL.—Scrap iron and other scrap metals have shown considerable activity this week and a noticeable change is recorded. If the coal strike were satisfactorily settled, there is no doubt that this market would show considerable movement, it is stated. The present transportation curtailment due to this strike also is a factor. The following are the present quotations:

| DEALERS' BUYING PRICES | | |
|---|---|---|
| Pipe scrap | .... | 11 00 |
| Stove plate, per ton | .... | 18 50 |
| No. 2 busheling | .... | 13 00 |
| Yellow brass | .... | 0 10 |
| Red brass | .... | 0 15¾ |
| Light brass | .... | 0 07 |
| Scrap zinc | .... | 0 06½ |
| Heavy copper | .... | 0 17 |
| No. 1 machinery cast | .... | 24 00 |
| Heavy melting steel | .... | 15 00 |
| Wrought iron, No. 1, per gr. ton | .... | 15 00 |
| Heavy lead pipe | .... | 0 06 |
| Old rubbers, boots and shoes | .... | 0 06 |
| Overseas, lumbermen's rubber boots | .... | 0 04 |
| Bicycle tires | .... | 0 01½ |
| Automobile tires | .... | 0 03 |
| Tea lead | .... | 0 04 |
| Heavy lead pipe | .... | 0 05¾ |

## *Iron and Steel Bars Scarce; Unchanged*

**Toronto.**

BAR IRON AND STEEL.—Jobbers have so far taken no advantage of the famine prevailing in the iron and steel situation. It is stated they will, if possible, try and hold stocks at present prices. But whether this is possible, remains to be seen. Owing to some, there are a number of mills forced to shut down on account of the severe shortage of coal. The following are present quotations:

| | | |
|---|---|---|
| Common bar steel | .... | 4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 50 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 75 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | 4 25 | 4 50 |
| Band steel | 4 25 | 4 50 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## *Lead and Zinc Products Firm; Solder May Advance*

**Toronto.**

LEAD AND ZINC PRODUCTS continue to show a good demand and are holding at a firm price. Although there is no immediate change noted, a higher price would not be unexpected as the coal strike and previous disruptions all have had a very serious effect on the marketing of these commodities. It has been rumored that a new price is pending on solder and it may be that this price will go into effect in the near future. The following are the quotations that are current at present:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | .... | $0 12½ |
| Lead waste pipe, list, per lb. | .... | 0 13½ |
| Do., over 8 inches, list, per lb. | .... | 0 14½ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | .... | 15% |
| Lead wool, lb. | 0 11 | 0 12½ |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 12 | 0 13 |
| Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra. | | |
| Solder, guaranteed, lb. | 0 35½ | 0 38 |
| Solder, strictly, lb. | 0 34½ | 0 37 |
| Solder, commercial, lb. | 0 32½ | 0 35 |
| Solder, wiping, lb. | 0 31½ | 0 34 |
| Solder, wire, lb. | 0 35½ | 0 41 |
| Zinc sheets, per lb. | .... | 0 17 |

## *Spelter and Lead Up ¼c; Other Ingots Firm*

**Toronto.**

INGOT METALS.—Great interest is being shown in the first delivery copper for 1920. It is stated that most producers have withdrawn from the market. Tin continues to advance, also lead. In fact, the whole ingot list is stronger. It is believed that 1920 will be a great year of expansion and it is expected that tremendous demands in all lines will be experienced.

LEAD.—The market price of lead is of an upward tendency and this shows in a higher price this week, the increase being ¼ cent, making the new price 8¾ cents per pound.

TIN continues to advance on the primary market, but this is neutralized locally by the great difference in the present rate of exchange. The present price quotations are 60 cents per pound.

COPPER.—It is stated that most producers have withdrawn from the market. Great interest is being shown in the first delivery of 1920 copper. The present price is quoted at 24 cents per pound.

SPELTER is very active and is showing good demand. The market is showing a firm tendency. The present price is 11 cents per pound.

ANTIMONY.—The demand for antimony is normal and a fair movement is noted, although like other ingots, it is very scarce, and it is stated that warehouse stocks are depleted. Quotations are 11½ cents per pound.

ALUMINUM continues quiet, partly on account of the low stocks that are on hand. Present quotations remain at 34 cents per pound.

# LONDON MARKETS

LONDON, Ont., Dec. 11—The upward tendencies noted this week are more numerous than have been reported for some time. It is stated that the coal strike has been the biggest factor as transportation has been severely interrupted and factories generally are extremely short of coal and coke.

The outlook for 1920 is said to be very bright and a great expansion and tremendous demands in all lines will be in order. This situation may show developments as numerous manufacturers are still swamped with 1920 orders and owing to present conditions cannot make any headway.

Some of the price changes are as follows: Bolts and nuts, stall fixtures and cow ties, canvas belting, poultry netting, washing machines, barrel churns, wringers, lamp wick, Taintor saw sets, seine twine, cotton rope twines, awning cord, etc., cotton clothes line, planes, builders' hardware, weather strip, scoops and shovels.

Beaver, manila and sisal rope and lath yarn show a decline of 1 cent per pound.

## *English Table Cutlery Commencing to Arrive*

**London, Ont.**

TABLE CUTLERY.—English stainless steel variety is now coming in again in small lots. Prices average on dessert size, $14.00 doz., and table size $16.50 doz.

## *Hollow Stall Fixtures and Cow Chains Higher*

**London, Ont.**

STALL FIXTURES, COW CHAINS.—New and higher quotations are effective on cow chains, the new price being net list.

Hollow stall fixtures are also higher, the price being $1.75 per dozen.

Tie-out chains are advanced also, the new price being 20 per cent. off list.

## *Canvas Belting is Up Five Per Cent.*

**London, Ont.**

CANVAS BELTING.—An advance of five per cent. has been made in canvas belting, the new quotation being 47½ per cent. off list.

## *Hockey Sticks and Hand Sleighs Selling*

**London, Ont.**

HOCKEY STICKS, HAND SLEIGHS.—There is an active demand for these goods. Prices show no change and are as follows:

Hockey sticks.—Boy's, red, $1.25 per dozen; Boy's, white, $1.25 per dozen; Men's practice, $3.20 per dozen; Spalding, $4.75 per dozen; Championship, $5.75 per dozen.

Hand sleighs.—Canadian Buffalo make 35 per cent. off list.

LIST PRICES

| | Per Doz. |
|---|---|
| No. 27 | $ 7 50 |
| No. 32 | 8 75 |
| No. 30 | 10 50 |
| No. 33 | 12 75 |
| No. 36 | 15 40 |
| No. 36-H | 17 70 |
| No. 42-H | 24 30 |
| No. 85 | 32 65 |
| No. 86 | 34 25 |
| No. 87 | 46 15 |
| No. 17 | 38 10 |
| No. 18 | 43 15 |

## *Poultry Netting Advances 15%*

**London, Ont.**

POULTRY NETTING is among the many advances noted this week, and will approximate 15 per cent.

## *Washing Machines, Barrel Churns, Wringers, Up 10%*

**London, Ont.**

WASHING MACHINES, WRINGERS, BARREL CHURNS.—These prices have been withdrawn by the manufacturers, and new prices will soon be in effect and will approximate 10 per cent. higher.

## *Bolts Advance 10%; Nuts 50c Per 100 Higher*

**London, Ont.**

BOLTS AND NUTS advance about 10 per cent. and 50c per 100 lbs. respectively. It is stated this is caused by the steel strike being followed so closely by the present coal crisis, the latter seriously curtailing shipments as well as production. Following are quotations now prevailing:

APPLYING TO STANDARD LISTS

We quote the following discounts, subject to change without notice:

| | |
|---|---|
| Carriage bolts ($1.00 list) ⅜ in. dia. and smaller, 6 in. and shorter | 15% |
| Carriage bolts ($1.00 list) 7-16 in. dia. and smaller, long lengths | Net |
| Carriage bolts ($1.00 list 7-16 in. dia and larger | Net |
| Machine bolts ⅜ in. dia. and smaller, 4 in. and shorter | 20% |
| Machine bolts ⅜ in. dia. and smaller, longer lengths | 10% |
| Machine bolts 7-16 in. dia and larger | 10% |
| Sleigh shoe bolts, all sizes | Net list |
| Coach and lag screws | 30% |
| Square head blank bolts | 10% |
| Bolt ends | 10% |
| Plow bolts | 5% |
| Elevator bolts, large flat head | 5% |
| Elevator bolts, corrugated head | 40% |
| Fancy head bolts | 5% |
| Step and shaft bolts ($3.00 list) | 5% |
| Whiffletree bolts | 5% |
| Tire bolts | 40% |
| Nuts, square, blank | add $1.50 to list |
| Nuts, square, tapped | add $1.50 to list |
| Nuts, hexagon, blank | add $1.75 to list |
| Nuts, hexagon, tapped | add $2.00 to list |

Terms:—2%, 30 days.

## *Taintor Saw Sets No. 7 Advance to $19.25 Doz.*

**London, Ont.**

TAINTOR HAND SAW SETS, No. 7. An advance has been recorded in this line and present quotations are $19.25 per dozen.

## *Lamp Wick Shows Higher Quotations*

**London, Ont.**

LAMP WICK.—New and higher prices are now in effect on lamp wick and the quotations are:

Price per 32-yd. roll.—Nutmeg, 70c per roll; O, 85c per roll; A, $1.05 per roll; B, $1.50 per roll; D, $2.45 per roll.

## *Seine Twine Has Advanced*

**London, Ont.**

SEINE TWINE has been advanced and the new quotations are as per the following:

No. 18 and larger, 1 lb. spool, 98c lb; No. 18 and larger, ¼-lb. spool, 99c lb. No. 15, smaller, 1-lb spool, 99c lb.; No. 15, and smaller, ¼-lb spool, $1.00 lb.

## *Cotton Rope, Awning Cord Bag Twine, All Advance*

**London, Ont.**

COTTON AWNING CORD, ROPE, AND BAG TWINE.—All are at advanced prices, which are as follows: Cotton rope, 3-16-inch, 82 cents per pound; ¼-inch, 81 cents; candle wick, 87 cents per pound; cotton bag twine, 98c per pound.

Braided awning cord, white, No. 3, $2.25 doz.; No. 3½, $2.50 doz.; No. 4, $4.00 doz.; No. 4½, $5.50 doz.

## *Cotton Clothes Line Shows Higher Prices*

**London, Ont.**

COTTON CLOTHES LINES in accordance with advance in other cotton

goods have shown higher prices with a present firm tendency. New net prices on twisted: 30 ft., $2.95 doz.; 48 ft., $4.35 doz.; 60 ft., $5.45 doz., while braided is selling at 50 ft., $5.20 per dozen.

## *Cotton Goods All Up 50%; Sash Cord May Go Higher*

**London, Ont.**

COTTON GOODS all show an advance of approximately 5 per cent. Sash Cord is now quoted as follows:

Sash Cord, No. 6, 90c lb.; No, 7, 89c lb.; No. 8, 9, 10, 12, 88c lb.

## *Planes Have Advanced Approximately 10%*

**London, Ont.**

PLANES.—An advance is noted on the National Manufacturing Company's planes, etc., and will approximate 10 per cent. higher.

## *Builders' Hardware Advances About 5%*

**London, Ont.**

BUILDERS' HARDWARE.—An advance is recorded this week in builders' hardware. It is stated that manufacturers are booked to capacity on orders and the business prospects for next year are very favorable. The new discount is 7½ per cent. off the list on the Peterboro line in place of 12½ per cent.

## *Weather Strip Advances; Good Demand Shown*

**London, Ont.**

WEATHER STRIP.—The demand for weather strip is very seasonable, and good quantities are going out. It is reported a new and higher price is effective and Frost King is now quoting at $4.90 per dozen packages. The wood and felt weather strip, however, shows no change and is quoting at 55 and 5 per cent. off the list.

## *New Net Prices on Scoops, Black Cat and Moose*

**London, Ont.**

SCOOPS.—The new net prices for Black Cat and Moose Scoops are as follows:

MOOSE SCOOPS

| | Doz. |
|---|---|
| No. 4 | $18 74 |
| No. 6 | 19 44 |
| No. 8 | 20 14 |
| No. 10 | 20 84 |

BLACK CAT SCOOPS

| | Doz. |
|---|---|
| No. 2 | $16 72 |
| No. 4 | 17 42 |
| No. 5 | 17 77 |
| No. 6 | 18 12 |
| No. 8 | 18 82 |
| No. 10 | 19 52 |

## *Shovels, Scoops, Spades Up; Net Extra Now 35c*

**London, Ont.**

SHOVELS, SCOOPS, ETC.—An advance on the net extras of shovels larger than No. 2 has taken effect and instead of quoting at 25 cents per dozen net, is now 35 cents per dozen net.

## *Wire Nails Scarce; Demand Continues Heavy*

**London, Ont.**

WIRE NAILS.—The demand for wire nails continues to be a heavy one. And warehouse stocks are reported very low with great difficulty experienced in procuring further supplies on account of the scarcity as well as the difficulty in getting delivery owing to the freight curtailment and shortage of coal. The present quotations are: wire, $4.95 base, cut, $5.00 base.

## *Beaver Manila Rope Cent a Pound Lower*

**London, Ont.**

BEAVER MANILA ROPE.—Beaver manila rope has been reduced a cent a pound and the new price is 26 cents a pound base.

## *Rope, Sisal and Lath Yarn Have Declined 1c a Pound*

**London, Ont.**

SISAL ROPE.—A reduction of 1 cent per pound has taken effect on sisal rope. Lath yarn, as mentioned in HARDWARE AND METAL last week, the quotation now being 22½ cents per pound.

## *Turpentine Firm; Remains Unchanged*

**London, Ont.**

TURPENTINE.—The local markets seem to show low stocks owing to the coal shortage and freight curtailment. Jobbers state it is almost impossible to procure assured delivery from the South. The quotations are as follows:

1 bbl. lots, $2.50 imp. gallon; 2 to 4 bbl. lots $2.49 imp. gallon; 5 gallon lots, $2.65 imp. gallon.

## *Linseed Oil Advances 10 Cents Per Gallon*

**London, Ont.**

LINSEED OIL.—An advance in linseed oil is reported this week and the quotation now reads as follows:

| LINSEED OIL— | Raw. | Boiled |
|---|---|---|
| 1 to 2 barrels, gal. | 2 67 | 2 70 |
| 3 to 5 barrels, gal. | 2 66 | 2 69 |
| 6 to 9 barrels, gal. | 2 64 | 2 67 |

Less than barrels, add 15c gal.

## *White Lead in Oil Firm; Remains Unchanged*

**London, Ont.**

WHITE LEAD IN OIL is showing good sales and the demand still continues. The price is holding firm with no immediate changes looked for, although the market is in a very unsettled condition and it is hard to predict what will happen even in the near future. The present quotations are: Ton lots, pure, $17.35 per 100 pounds; Elephant, $17.95; less than ton, are pure, $17.70 and Elephant, $18.30 per 100 pounds.

## *Glass Scarce; Price Remains Firm*

**London, Ont.**

GLASS.—Both window and plate is showing a demand greater than the supply it is stated, and manufacturers are finding difficulty in supplying their regular customers. Although the United States manufacturers have withdrawn their prices, the local markets remain unchanged.

PUTTY is showing an excellent demand and remains unchanged at the following prices:

Standard, 100-lb. drums, $6.80 per 100 lbs.; Standard, 25-lb. drum, $7.05 per 100 lbs.; Pure, 100-lb. drum, $9.30 per 100 lb.; Pure, 25-lb. drum, $9.55 per 100 lbs.

# WINNIPEG MARKETS

WINNIPEG, Dec. 11—The price tendencies this week are showing remarkable strength and many changes are believed to be pending. An immediate advance is daily expected on some of the following lines: Barrel churns, wringers and washing machines. Bolts and nuts are very firm and an advance is looked for. Rivets ½ inch and larger as well as tire bolts, screw, hook and strap hinges, ready roofing, poultry netting, hair brooms and brushes, chair nails, curtain pole trimmings, all lines of cotton rope, sash cord, awning cord, clothes line, etc., are among the list of probable immediate changes.

An actual advance has taken effect on brass wire, all sizes, and also sheet steel. A decline is noted on Stillson and Trimo wrenches and parts.

The fact that the coal strike has been called off is no indication that the bad effects will immediately be remedied. The shortage in all lines throughout the hardware trade is serious and manufacturers, it is stated, have yet to finish production of the present year which will, it is claimed, take at least four months or longer and only a few days left to do it in. The natural result is that 1920 production will be carried well into the new year and unless premiums are given the outstanding orders will have the preference.

## 7½% Reduction Reported in Pipe Wrencher, Parts

**Winnipeg.**

PIPE WRENCHES. — Stillson and Trimo pipe wrenches, and parts, have but it is expected that a slight change is to take place in the near future of a downward trend.

## Common Sad Irons Up 2 Cents a Pound

**Winnipeg.**

COMMON SAD IRONS.—A further and somewhat substantial advance has occurred. This line for the past few weeks has been steadily advancing, this week winning all precedence by a jump of two cents a pound. The latest prices are as follows: Common sad irons, 5 lbs. under, 18 cents per lb.; 6 to 8 lbs., 14½ cents.

## Substantial Advance in Harvest Tools

**Winnipeg.**

HARVEST TOOLS.—The latest quotations show a general and substantial advance in these lines. The market appears firm, but general conditions point to further advances at no great distant date.

## Further Advances in Formaldehyde

**Winnipeg.**

FORMALDEHYDE.—For some considerable time the market has been of uncertain character regarding prices on this product. It has been obvious, however, that market quotations have decidedly been advancing for some time. A further general advance has taken place lately and indications point to this continuing indefinitely. Prices are as follows: Formaldehyde, 400 lb. barrels, 32c; 200 lb. kegs, 33c; 100 lb. kegs, 34c; 10 lb. jugs, $3.76; 5 lb. jugs, $2.00; 2 lb. jugs, 85c.

## Linseed Oil is Still Advancing

**Winnipeg.**

LINSEED OIL.—Prices for both raw and boiled are uncertain. A substantial advance is expected at any time, with assured advances covering an indefinite period. Temporary quotations show prices ruling on date of shipment.

## Some Rope Grades Down 1 Cent; Cotton Firmer

**Winnipeg.**

ROPE.—Sisal, British manila and African hemp show a decline of one cent per pound as mentioned in last week's issue of HARDWARE AND METAL. Pure manila and lath yarn have as yet shown no change. Cotton rope is very firm and an early advance is expected.

## Brass Wire, All Sizes Shows Decided Advance

**Winnipeg.**

BRASS WIRE.—All sizes show a decided advance, and new prices are as yet unavailable. These will appear in next week's issue.

## Sheets, Galvanized and Black, Scarce; Price Firm

**Winnipeg.**

SHEETS, black and galvanized, are very scarce. Black shows slight general advance and is a reflection of the recent advance at the mills. The sheet situation generally is serious, and no relief is looked for for some time to come as manufacturers are swamped with orders. Prices are as per current quotations.

# PITTSBURGH MARKETS

PITTSBURGH, Dec. 11.—Last week, when the coal strike had already lasted four weeks, occurred the first noticeable curtailment in steel mill operations, while predictions were that if the coal strike continued a fortnight longer a large part of the industry, perhaps half, would have to close. Nevertheless coal production has been increasing, by the non-union mines doing better, and by a union mine here and there resuming production. The explanation of the currents thus crossing is of course that the steel mills had been operating chiefly on their stocks of coal, and these stocks were nearing exhaustion.

Inasmuch as the steel is heated six times in the process of making tin plate, it is not surprisng that the first cases of mill closing reported were tin mills, including the American Works, Elwood, Ind., and the Gary tin plate department, both of the American Sheet & Tin Plate Company, and of some at least of the tin mills of the Trumbull Steel Company, Warren, O.

With only a gradual increase in coal production this closing of mills will spread, there being many requirements more essential. Only a practically complete resumption of the union mines can put the steel industry in an easy position, but if there is such resumptions the industry will be relieved almost at once, since there are stocks of coal held by the railroads for distribution to the most important uses, and these would be released as soon as it became known that fresh supplies were coming. Closings, if they occur, will probably affect the rolling and finishing of steel somewhat more than the making of steel. Even now some mills are husbanding their coal by putting steel through the finishing processes that require the smallest quantity of coal per ton of product.

By the order determined upon by the Fuel Administration, Dec. 2, the production of beehive coke is being restricted about 25 per cent., the regulation being effected through the medium of car supply for coke loading. In Connellsville region the regular procedure is likely to be for the railroads to furnish no coke cars Wednesdays and Thursdays, coal cars being furnished on those days. There has been a rush on the part of blast furnaces to pick up any lots of furnace coke available, and in the space of one week the market price of Connellsville furnace coke for spot shipment advanced from $6.25 to $10, on transactions involving very limited tonnages. Some conservative coke operators deplored the advance, but had no coke to offer at the prices they considered reasonable. Some of the buyers were furnace interests whose supplies from other coke fields, or from their by-product operations, had been decreased, while others were regular customers of the Connellsville region who desired to gather up a surplus against contingencies.

### The Iron and Steel Strike

All interest in the iron and steel strike is now lost, the coal situation being of vastly more consequence than what little remains of the iron and steel industry's own strike. The Wheeling district remains largely closed with rumors, denied at strike headquarters, that the strike in general has been called off. At various other points there remain some strikers, but the mills where they remain strikers are more interested in lining up the men in employment and organizing them into efficient working units again, than in getting more men into employment. Even in the Mahoning valley, which next to the Wheeling district has held out the longest, some mills are turning away an occasional applicant for a job, as they either do not need the man at all or are not ready for him.

### Pig Iron Movement May Be Over

There are distinct suggestions that possibly the pig iron buying movement is about over, in which case the remarkable rise in prices will stop. Inquiry is certainly much less widespread, but whether that is because consumers are now well covered in most cases, or because the consumers remaining uncovered feel that the advance has gone too far to make it worth while for them to cover now, is uncertain. It is learned that there was a considerable volume of speculative buying, particularly of Buffalo and Eastern Pennsylvania iron, in the advance, and the speculative holdings may disturb the market at some later time.

An effect of the advance in pig iron has been to encourage the Connellsville coke operators to demand more money for coke for 1920 delivery and most of the furnaces that have closed for coke have had to pay large advances. Another effect may be to encourage an advance in Lake Superior iron ores for the 1920 season, whereas a month ago it seemed certain that the ore interests would be quite content to go along for another season at the established prices. The furnaces will be consuming 1920 ore into May or June of 1921 and if the pig iron advance they have brought about does not hold they may find themselves

# Paint Buyers Appreciate Advice

## The Majority of Them Depend on the Merchant From Whom They Are Buying to Tell Them What is Best and How to Use It—Some Pointers That Help Sales

THE great majority of buyers of paints and varnishes expect the merchant from whom they are buying the materials, to be able to tell them all about their uses and the best means of applying. They appreciate service of this kind and hardware merchants have learned that it pays and pays well to become thoroughly posted on the goods they are handling and be in a position to answer any and all questions they may be asked.

Being able to do this quickly and accurately, undoubtedly means more business and also the establishing in the buyer's mind of a confidence that will not readily be shaken.

Very often it is necessary for the dealer to ask many questions before he can decide just what really is required and what will give the best results. It is important for him to know if the building or article has ever been painted before, and if so, in what condition it is. It is also necessary for him to know whether metal or wood is to be painted, and in case it is wood, just what kind of wood, and if it has been long exposed to the weather or not. A great deal depends on the answers given. If the surface has been gone over before, it is essential to know the present condition of the paint.

### Service, Not Price

Many paint dealers have stated to HARDWARE AND METAL recently that buyers, especially farmers, bring up the question of price the very first thing. The dealer has, as a rule, little difficulty in disposing of this by explaining that values, especially of paints, are not measured in dollars but in service, and that with materials at the prices they are now, paint is easily the cheapest and best preservative agent there is. There is no economy in buying a cheap product that will have to be quickly renewed and will not give results in service when by paying a reasonable price an article may be obtained which the dealer can stand behind to the limit.

### Practical Advice

If the painting is to be done on new wood, any knots should be covered with thin shellac. It is important that all surfaces should be dry before painting begins. Also in the case of wood that has been previously painted, all loose paint should be scraped off and any bad spots sand-papered. Many dealers advise customers to allow the first coat of paint to dry for at least five days, and to make sure when applying it that they work with the grain of the wood, then brush across the grain and finish with the grain, rubbing the paint well into the surface.

### Ask About Dryers

Many people, now that help is so scarce and time a big factor with them, ask about dryers, so that they can get the work done more quickly. Usually people need to be cautioned to use dryers sparingly in any case, and also against adding them to varnish, if they wish to secure long life for the finish. The right kind of dryer should be used in each case, and this is a matter about which the general public knows little. A high-grade Japan dryer shoudl be used for such work as porch chairs, while a liquid dryer is generally satisfactory for other paints. A dealer is generally safe in recommending a good grade of dryer rather than something cheap that may be asked for.

### Advising Women

Women usually know little of materials or about their application. They have very definite ideas of the effect desired, but little knowledge of the means required to produce it. Start then, by ascertaining what the customer wishes to accomplish, and base your recommendations upon this information. Women are usually very vague on methods of application. Advise against the use of a rag, and furnish a suitable brush for paint, enamel, varnish, varnish stain, etc. If the customer buys two or more colored materials, ascertain if they are to be used side by side, and assist her in the selection of pleasing color harmonies or contrasts. Unless trained, she is likely to select the individual colors that please her, without regard to the laws of color harmony. Advise her to close cans tightly after use, to prevent skinning, thickening and evaporation. This advice will also, to some extent, guard against the use of improper thinners.

It has been estimated that there are ten times the possibilities in dollars and cents in the sale of paints and varnishes for interior use than for exterior. Unquestionably, a great deal of this work is done by women, and they are every year becoming larger buyers of materials for fixing up their homes, furniture, etc.

### Floor Finishes

Many of them are particularly interested in floor finishes. Many dealers, in talking with prospects, call particular attention to the directions on the can, and inquire as to the material and condition of the floor. If white birch, white pine, or a similar very light-colored wood, a very thin coat of white shellac as a first coater (white shellac varnish thinned with about an equal volume of grain alcohol), may be suggested, to prevent the floor varnish from darkening the wood. Tell the customer to begin at the far side of the floor and work towards the door; to see that the room is warm and dry, but well ventilated; to apply two coats of varnish over the shellac, allowing each coat ample time to dry hard. If an open grain wood, like oak, etc., explain the necessity of filling first with paste filler. Call attention to the directions on the filler can, and lay particular stress on the necessity of rubbing off surplus filler across the grain, within fifteen or twenty minutes after applying. Three coats of varnish are often suggested for such work, Ask whether natural finish or a stained effect is desired, and supply the proper filler accordingly.

### PAINT BUYERS APPRECIATE ADVICE

(Continued from page 78)

If a cheap finish on soft wood is desired, call attention to the liquid fillers and special colored varnishes; two coats of the latter may be desirable, in some cases, finished with one coat of high-grade clear floor varnish. If an old floor, with cracks and crevices, is to be done, recommend a crack and crevice filler, and call attention to the necessity of priming the floor before using this filler. If the wood of the floor be stained and discolored, recommend preliminary washing with a solution of oxalic acid, followed by careful washing with weak ammonia water and complete drying.

## Paint Manager Enjoys Novel Ride

General Manager Archie T. Black, of the Martin Senour Company, Montreal, left his Robin's Egg Blue car in the garage last week and took a ride in a gaudy red wheelbarrow, covering some of the well-travelled thoroughfares in the metropolis, and winning much applause from those of his friends who were fortunate enough to be "wished" on the little function.

It was thusly: Kiwanis Mapes, of the Montreal Kiwanis Club, thought that "Archie" would like a new kind of ride, and this involved the innovation of a little parade, beginning at the Queen's Hotel, after luncheon, and proceeding via St. James street to Victoria Square. It was but a brief while before there were many interested pedestrians, and curiosity gave ready place to the best Canadian humor, when it was learned that, in a little "drawing" stunt pulled off at the club dinner, the two Kiwanis, Mapes and Black, were to afford such amusement for their friends, as all good fellows will do under such circumstances.

Down the busy street they passed, right by the Bonaventure Station, with four selected canopy bearers proudly holding aloft a Kiwanis Club banner. The crowd swelled; Kiwanis Black smiled one of his winning grins, and, securely resting on the bumpers, he reached—all too soon, alas—his destination at Victoria Square. But his blue limousine has since been seen speeding. Car-riding this time of the year must, under such temperatures, be preferable to barrow-riding, even though the paint be of the turkey red variety.

The T. G. Campbell Co., Ltd., Midland, Ont., sanitary and heating engineers, are adding a stock of hardware and plan to have this end of the business open by December 15.

# The Brush Department

## Considerable Advances in Prices of Brushes is Likely

### Quotations on Chinese Bristles May Soar to New Records Shortly as the Demand is Far in Excess of Supplies

THE brush business was never as good in respect to volume of trade as it has been during the last six months, and we can see no reason why this should not continue during 1920," said W. G. Meakins, of Meakins and Sons, Limited, Hamilton, Ont., in discussing the outlook with HARDWARE AND METAL. "There has been a great deal of building of all kinds done all over the world and this building activity means the use of a great quantity of brushes, but from the point of view of any reduction in prices of our material, this is a totally different question.

**Shortage of Bristles**

The troubles in Russia have kept any quantity of Russian bristles from coming to America or Europe. Before 1914 Russia practically supplied 50 per cent. of the world's supply of bristles, the other 50 per cent. being supplied from Manchuria and China. A pound of bristles that was worth 90c in 1910 was worth $1.30 on January 1, 1915, and it advanced $2.70 on January 1, 1919. There was a reaction in prices during January, February, March and April, 1919, and prices dropped from $2.70 to in the neighborhood of $2.50, but the great activity in the brush business which commenced about March or April of this year quickly brought the prices of Chinese and Manchurian bristles back to their former level around $2.70, and during the last two months there has been a great scramble for supplies, and stocks have practically all been bought up.

**May Be Big Advance**

We would not be surprised to see a pound of Chinese bristles which cost 90c in 1910 and $1.40 on January 1, 1916, to be up to $3.50 by April 1, 1920.

These prices that we give above are prices per lb. f.o.b. New York, in bond, and to this must, of course, be added the freight and the 7½ per cent. war tax. The high price of bristles is practically the same all over the world, as there is only one primary source of supply and bristles are not sold any cheaper in one country than they are sold in another.

**Demand Exceeds Supply**

The high price of bristles is, of course, brought about by a larger demand than there is a supply and the Chinese dresser, and also the grower, wishes to get all he can out of the trade while it lasts, but the high price of silver, which is now higher than it was ever known, is also a feature in the high prices. This above condition of the bristle market will, we consider, make the prices of brushes advance quite rapidly during 1920.

**Home Market First**

Regarding delivery of brushes, although Canadian brushes are now being sold pretty well all over the world and the export trade is very good, where it has been cultivated, we think that all the Canadian factories realize that their home market must be looked after first, and therefore, we do not think that deliveries in Canada will be delayed.

In reference to prices, although the prices of brushes is high, we really believe that brushes are sold cheaper in Canada to-day than in any other country in the world. The constant competition between the three or four large factories in Canada, between whom there has never been any kind of a working arrangement in any manner, has kept the price of brushes in Canada at a comparatively low level compared with other countries, while the different factories in Canada have grown until they now have machinery of a class that we do not think is excelled in the world.

We might state that we would advise the hardware trade to place their orders early, as there will most certainly be no dropping in prices, although we consider there might be considerable advances.

### PROSECUTING OIL PRODUCERS

Washington.—Prosecution of Western oil producers for alleged profiteering has been ordered by Attorney-General Palmer. Simultaneously the railroad administration established an embargo, effective Monday, against shipments of fuel oil from the West to points east of Chicago and St. Louis. This action, it was explained, was necessary to conserve the small supply of coal available for the territory west of the Mississippi River and to compel, where possible, the use of fuel oil instead.

# Anticipate Your Glass Needs is Broker's Advice

THE Johnston Brokerage Co., of Pittsburgh, has sent the following letter to the trade:

While we have not withdrawn positively from the market on single and double strength glass we feel that it is only fair to advise our friends that our bookings are such that we deem it unwise to accept any more business at present. The factories are requesting us to take this position, as we have enough glass sold to take our production for about ten or twelve weeks, and the uncertainties of operating perhaps justify a discontinuance of entering into more contracts. The fuel situation is very uncertain, both coal and natural gas. We have had two plants close down within the last month on account of fuel shortage, and the winter is ahead of us and the uncertainty of strikes in the coal mines, and possibly with the railroad companies. We have as much business as we should take with the plants operating on normal schedule and we think it best to notify you of this situation.

We of course will take on any business that we can possibly handle within a period that would be reasonable for the factories and satisfactory to yourselves. If you haven't your needs fully taken care or you might send us your inquiries and we would advise you promptly if we could do anything toward handling them.

It looks as if the demand for 1920 would be the greatest in the history of the window glass business, and we are advising our friends to anticipate their needs as far in the future as possible. The writer cannot recall any such volume of business as we have been offered during the last sixty days, and which is still being offered us.

# New Low Price Store Chain for Canada

## The L. R. Steel Company Propose to start a Chain of 100 Stores in Canada, Forty of These to be Started During the Coming Year

A NEW chain of stores following the general policy of the 5 and 10 cent stores at present in existence, are about to be opened simultaneously in Canada and the United States. The Canadian Company is known as the L. R. Steel Company Ltd., and has its executive quarters for the present in the Royal Bank Building, Toronto. In the United States the company is known as the L. R. Steel Company, Inc., Lincoln Building, Buffalo. The control of the Canadian company will rest with the United States Company, and all financial dealings will be completed at that end.

The plan is to start a chain of 100 stores in Canada. The stores to be located in cities of over 6,000 population. As far as can be learned, no locations have yet been purchased, but it is understood that this work is in hand, and the first stores will probably be opened early in the spring, and it is expected that before the close of the coming year fully forty stores will be in operation. The organization at present is busily arranging for supplies.

The new chain varies from the well-known chains now in existence in the fact that while they will cater to the needs of the public for a cheaper line of goods, they will not set themselves as low a limit as the stores at present operating.

The new organization opens with a 5c to $1.00 margin, and this idea arose out of the fact that the war conditions had made the lower limit set by other stores a great element of difficulty, because owing to the advancing cost of many lines, several of the most profitable departments of the 5c and 10c stores had to be discontinued. With the dollar limit the new company believes that it has a sound proposition, that many lines that heretofore have been too high-priced for these stores, can be listed, and they feel that the public will appreciate the change.

The company will not deal largely in grocery lines. There will be a cafeteria in connection with all the stores, however, and it is the intention to sell a few lines such as coffee and tea in connection with this cafeteria. The beverages will be served in the restaurant, and will so be introduced to the customers.

Sundry odd lines generally sold in the grocery store will also be handled such fruit, soap, washboards, wash-boilers, etc.

### RESTRICTIONS IN SEEDS

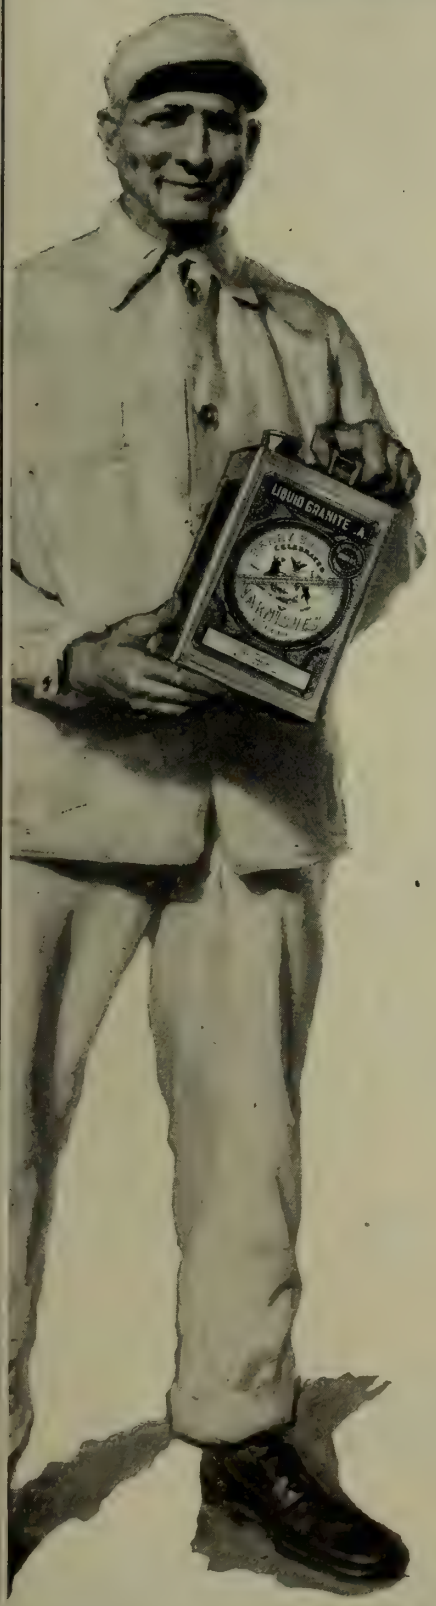
Guelph.—At the annual meeting of the Ontario Seed Growers' Association held Monday, matters connected with the improvement of seed grain were discussed at great length. E. D. Eddy, of the Dominion Seed Branch, stated that his department would in the near future institute much more severe restrictions with regard to the introduction of new varieties of grain, and Prof. C. A. Zavitz asked that these restrictions be made to apply also in the case of alfalfa with respect to place of origin.

# *Glass Market is Active and Very Firm*

The present position with regard to both plate and window glass is one of considerable strength. The activity has been marked, and buyers have been securing supplies wherever they could obtain them to the best advantage. There has been a wide distribution of late and the glass jobbers who deal in this commodity in a large way report much activity.

As to the tendencies of the market it is safe to say that these are firm. Certain supplies have reached the Canadian market from Belgium, and while these are understood to be limited, they have been readily absorbed into trade channels. Just whether there will be an increase in price it is difficult to say at this time. The difficulty of obtainng adequate supplies of both window and plate glass have kept the jobbers and the importers guessing, at times, to know just where to obtain what they require. From all indications the retail trade has been active and jobbers have been kept very busy supplying the wants of various dealers.

HARDWARE AND METAL is informed that the import from the United States have been necessarily smaller of late. This is simply the result of dealers across the line being piled up with a multitude of orders which they cannot fill promptly. In view of all the surrounding conditions of manufacture, and particularly in view of the possibility of coal shortage during the coming winter months, it does not seem that the prospects of getting larger and more complete supplies is a rosy one.



### WILDER PIKE THERMOMETER CO.

The Wilder Pike Thermometer Company of Troy, N.Y., has issued a twenty-eight page catalogue in which is listed the various lines of thermometers manufactured by the firm. These include, beside the regular weather thermometers, incubator thermometers, hygrometers, and thermometers for photographic work, cooking, maple sugar making, cold storage, dairies, candy makers and other lines. Readers of HARDWARE AND METAL, who desire copies of the catalogue, may obtain same upon request.

### BIRMINGHAM SMALL ARMS TO MAKE SHOTGUNS

The Birmingham Small Arms Company, Birmingham, England, are entering the field as manufacturers of shotguns, and a large portion of their plant. it is understood, has already been readapted for this purpose. HARDWARE AND METAL understands that the product will be available to the Canadian trade in the spring of 1920—perhaps in April. It is further understood that supplies will be available from stock in Montreal on or about the above date.

# The Luxeberry Painter says:

"Everywhere I go I get a double smile of greeting—one for myself and one for the Berry Brothers' label on the finishes I use. Seems as though everybody looked on that label as an old friend."

Generations of home-builders and home-lovers have learned that the most artistic and harmonious interiors are produced with Berry Brothers' Varnishes, Enamels and Stains. This is why the "Berry" label is the only selling argument the dealer needs in marketing Berry Brothers' Finishes.

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, Dec. 11. — Market prices on linseed oil are higher this week as a result of the short supplies of flax, and with $2.47 per gallon the low point on single barrels, raw. The tendencies are upward, for seed stocks are limited and crushers do not look for an early relief. Some look for much higher prices, and are stating that those who bought at around $2 per gallon are fortunate. There is also difficulty in obtaining adequate supplies of turpentine. Shellacs are 50c per gallon higher. Mixed paints are very firm, and the undertone on putty and white lead in oil is firm. Glass is being offered by Belgian makers, and this may, a little later, have a beneficial affect on this market. Trade orders for spring shipment are reported to be extremely heavy.

### *Present Oil is Higher; Situation Difficult*

**Montreal.**

LINSEED OIL.—The markets have advanced this week again, and base price for raw, on the basis of one barrel lots, is $2.47 per gallon. This is the time of the year when the paint makers are using large quantities for manufacturing, and none seem anxious to sell, and only in one barrel lots. As far as Canadian seed supplies go, there is little probability of improvement coming now, the trade states. The only hope is in connection with Argentine seed, and if the prospects are as favorable for the next few weeks as they are now, it is stated that there will be a bumper crop there. However, the effect of this will not be felt in Canada for many weeks, and oil may go considerably higher in the meantime. Probably two months will elapse before the arrival of seed from the South will be a real factor in this market. Supplies from the West, many say, are not likely to be greatly augmented at this time.

| | Imp. Gal. | |
|---|---|---|
| Raw— | | |
| Single barrels | 2 47 | 2 50 |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |
| Boiled— | Imp. | Gal. |

| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |

NOTE. Owing to fluctuations seed markets jobbers, generally, are not quoting. The basis is

### *Not Easy Matter To Get Turpentine*

**Montreal**

TURPENTINE.—Supplies are very short, and the tendencies are still firm. Jobbers, and particularly paint makers, are now interested in the outlook for supplies for themselves, and the amount of stock coming through, and procurable, is really quite limited. Single barrel lots are available in some cases, but the holders are not anxious to sell.

| Turpentine— | Imp. Gal. | |
|---|---|---|
| Single barrels | 2 35 | 2 40 |
| Small lots | .... | 2 65 |

(Packages extra.)

### *Putty Moves Actively; Foreign Glass Comes*

**Montreal.**

PUTTY AND GLASS.—The movement of putty is very active now, and the market, while unchanged, is firm. Prices are listed below.

Glass is offered, HARDWARE AND METAL is informed, from Belgian sources, and despite the havoc played by the war in one of the most important producing centres over there, supplies, it is stated, are being offered the Canadian trade in increasing quantities. This applies to plate as well as to sheet glass, and some are wondering, in view of the United States situation, whether the offering and sale of this Belgium glass will not, sooner or later, have a salutary effect on the price basis in Canada. In the meantime, the trade is an active one at unchanged prices.

| | 5 ton | 1 ton | Quanty |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 6 30 |

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty $1.60 per 100 lbs. advance on above prices

Terms—2%, 15 days, net 60.

### *Big Paint Bookings And Undertone is Firm*

**Montreal.**

PREPARED PAINT.—Bookings for paint are very heavy, and some of the manufacturers are wondering, if this keeps up, how they will take care of orders. The factories are extremely busy right now and are working full time. There are some who see nothing in store but a decidedly firm basis for prepared paints, and with all factors maintaining a continued high basis, and with some raw materials firming, and even advancing, there is not any promise of reduced prices.

### *White Lead is Firm Under Influence of Pig*

**Montreal.**

WHITE LEAD IN OIL.—The undertone of the market is firm. With linseed oil high, and with the pig lead market firmer, there could be no easing of the basis, and it begins to look as if lead will rule high, considerable export of both pig lead and of lead in oil, being reported. Prices remain at $16.50 per 100 lbs. for five ton lots; $17 per 100 lbs. for ton lots, and at $17.35 per 100 lbs. for smaller quantities.

### *Shellacs Are Higher; Fifty Cents Gallon*

**Montreal.**

SHELLACS.—Prices are higher on shellac. The advance is fifty cents per gallon and applies to both orange and white. The gum markets are decidedly firm, and prices are bound to rule high for the immediate future at least.

## TORONTO

TORONTO, ONT., Dec. 11.—Linseed oil, although raw material has declined, is not immediately expected to drop. This decline in seed is considered by some as more of a fluctuation on account of the climax of the coal strike.

Turpentine is very scarce locally and an advance is recorded this week, which is claimed is mainly due to the increased rate of exchange. Deliveries are very uncertain and jobbers are experiencing great inconvenience on account of these poor deliveries.

Paint is showing good demand and spring bookings are coming in good volume. White lead is showing a strong undertone on account of the firm price of pig lead.

Putty is selling in good volume. A change has been made in the extras of the 1 and 2 pound packages of 1 cent per pound.

### *Extras Show Change on White Lead and Putty*

**Toronto.**

WHITE LEAD IN OIL AND PUTTY are showing a good demand and a new extra is noted on the 1 and 2 pound packages. The former price was quoted at an advance of 2½ cents per pound;

| Do., 12½ lb. irons | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels | 7 10 | 7 35 | 7 70 |

## *Turpentine Scarce; Advanced* 10c *Gallon*

**Toronto.**

TURPENTINE is noted to be scarce on the local market and jobbers state they are having difficulty in securing delivery. An advance of 10 cents per gallon is recorded, and it is believed that this is a direct result of the increased exchange rates. Prices are as follows:

| | Per Imp. gal. |
|---|---|
| 1 barrel lots | 2 60 |
| 2 to 4 barrel lots | 2 59 |
| 5 gal. lots | 2 75 |

## *Linseed Oil Firm; No Change Noted*

**Toronto.**

LINSEED OIL.—The reduction of raw material has not affected the linseed oil market. It has been stated that this decline in seed is merely a fluctuation in sympathy with the climax of the coal strike. It is believed that no further change will be effected till at least the end of present year, but it is hard to state officially if this will be the case, as there are so many factors in this market. The following are quotations:

| Linseed Oil— | Raw | |
|---|---|---|
| 1 to 2 barrels, gal. | 2 67 | 2 70 |
| 3 to 5 barrels, gal. | 2 66 | .... |
| 10 barrels and over | 2 64 | .... |
| | Boiled | |
| 1 to 2 barrels, gal. | 2 70 | 2 73 |
| 3 to 5 barrels, gal. | 2 69 | .... |
| 10 barrels and over | 2 67 | .... |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

## *Window Glass Firm; Supplies Growing Scarce*

**Toronto.**

WINDOW GLASS.—There has been no change in the underlying situation in the window glass trade outside of the fuel shortage during the past week. It is stated that a number of plants were forced to close down through their inability to secure coal. It is stated that in one instance 65 cars of coal were confiscated by the railroad, leaving this particular factory without any fuel. It is stated that the supply of window and plate glass is growing scarcer every day, and the general opinion of the trade is that there will be no relief until early in the new year.

It looks as if the demand for 1920 would be the greatest in the history of the window glass business. Jobbers generally are advising placing orders immediately in order to insure stocks as well as possible.

### PROSPERITY ASSURED FOR YEARS TO COME

Continued from page 59

costs reduced, you naturally have a commodity that can be sold at lower prices. What of the nine men whose services are disposed of? They will be making the machine that saves the labor and handling the excess production. It is merely a re-arrangement of labor that leaves everyone employed and producing more.

**Larger Production—Lower Prices**

"With larger production there must come lower prices; lower prices are made possible by better business system, and with the laborers' wages maintained there is a buyer for all the goods that can be produced. Such conditions will mean an indefinite continuance of prosperity.

**Prosperity Outstrips Debt**
